AVAILABLE INFORMATION

Morgan Stanley files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (the “SEC”). You may read and copy any document we file with the SEC at the SEC’s public reference room at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for information on the public reference room. The SEC maintains an internet site that contains annual, quarterly and current reports, proxy and information statements and other information that issuers (including Morgan Stanley) file electronically with the SEC. Morgan Stanley’s electronic SEC filings are available to the public at the SEC’s internet site, www.sec.gov.

Morgan Stanley’s internet site is www.morganstanley.com. You can access Morgan Stanley’s Investor Relations webpage at www.morganstanley.com/about/ir. Morgan Stanley makes available free of charge, on or through our Investor Relations webpage, its proxy statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. Morgan Stanley also makes available, through its Investor Relations webpage, via a link to the SEC’s internet site, statements of beneficial ownership of Morgan Stanley’s equity securities filed by its directors, officers, 10% or greater shareholders and others under Section 16 of the Exchange Act.

Morgan Stanley has a Corporate Governance webpage. You can access information about Morgan Stanley’s corporate governance at www.morganstanley.com/about/company/governance. Morgan Stanley posts the following on its Corporate Governance webpage:

- Composite Certificate of Incorporation;
- Bylaws;
- Charters for our Audit Committee, Compensation, Management Development and Succession Committee and Nominating and Governance Committee;
- Corporate Governance Policies;
- Policy Regarding Communication with the Board of Directors;
- Policy Regarding Director Candidates Recommended by Shareholders;
- Policy Regarding Corporate Political Contributions;
- Policy Regarding Shareholder Rights Plan;
- Code of Ethics and Business Conduct; and
- Integrity Hotline.

Morgan Stanley’s Code of Ethics and Business Conduct applies to all directors, officers and employees, including its Chief Executive Officer, its Chief Financial Officer and its Controller and Principal Accounting Officer. Morgan Stanley will post any amendments to the Code of Ethics and Business Conduct and any waivers that are required to be disclosed by the rules of either the SEC or the New York Stock Exchange, Inc. (“NYSE”) on its internet site. You can request a copy of these documents, excluding exhibits, at no cost, by contacting Investor Relations, 1585 Broadway, New York, NY 10036 (212-761-4000). The information on Morgan Stanley’s internet site is not incorporated by reference into this report.

Part I—Financial Information.

Item 1. Financial Statements.

MORGAN STANLEY

CONDENSED CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

(dollars in millions, except share data)

	February 29, 2008	November 30, 2007

See Notes to Condensed Consolidated Financial Statements.

MORGAN STANLEY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. Basis of Presentation and Summary of Significant Accounting Policies.

The Company. Morgan Stanley (the “Company”) is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Global Wealth Management Group and Asset Management.

A summary of the activities of each of the Company’s business segments is as follows:

Institutional Securities includes capital raising; financial advisory services, including advice on mergers and acquisitions, restructurings, real estate and project finance; corporate lending; sales, trading, financing and market-making activities in equity and fixed income securities and related products, including foreign exchange and commodities; benchmark indices and risk management analytics; research; and investment activities.

Global Wealth Management Group provides brokerage and investment advisory services covering various investment alternatives; financial and wealth planning services; annuity and other insurance products; credit and other lending products; cash management services; retirement services; and trust and fiduciary services.

Asset Management provides global asset management products and services in equity, fixed income, alternative investments, which includes hedge funds and funds of funds, and merchant banking, which includes real estate, private equity and infrastructure, to institutional and retail clients through proprietary and third-party distribution channels. Asset Management also engages in investment activities.

Discontinued Operations.

Discover. On June 30, 2007, the Company completed the spin-off (the “Discover Spin-off”) of its business segment Discover Financial Services (“DFS”). The results of DFS prior to the Discover Spin-off are reported as discontinued operations for all periods presented.

Quilter Holdings Ltd. The results of Quilter Holdings Ltd. (“Quilter”) are reported as discontinued operations for all periods presented through its sale on February 28, 2007. The results of Quilter were formerly included in the Global Wealth Management Group business segment.

See Note 14 for additional information on discontinued operations.

Basis of Financial Information. The condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the U.S., which require the Company to make estimates and assumptions regarding the valuations of certain financial instruments, the outcome of litigation and tax matters, incentive-based compensation accruals and other matters that affect the condensed consolidated financial statements and related disclosures. The Company believes that the estimates utilized in the preparation of the condensed consolidated financial statements are prudent and reasonable. Actual results could differ materially from these estimates.

All material intercompany balances and transactions have been eliminated.

Consolidation. The condensed consolidated financial statements include the accounts of the Company, its wholly owned subsidiaries, other entities in which the Company has a controlling financial interest and certain variable interest entities (“VIE”).

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

For entities where (1) the total equity investment at risk is sufficient to enable the entity to finance its activities independently and (2) the equity holders bear the economic residual risks of the entity and have the right to make decisions about the entity's activities, the Company consolidates those entities it controls through a majority voting interest or otherwise. For entities that do not meet these criteria, commonly known as variable interest entities, the Company consolidates those entities where the Company is deemed to be the primary beneficiary when it absorbs a majority of the expected losses or a majority of the expected residual returns, or both, of such entities.

Notwithstanding the above, certain securitization vehicles, commonly known as qualifying special purpose entities ("QSPEs"), are generally not consolidated by the Company if they meet certain criteria regarding the types of assets and derivatives they may hold, the types of sales they may engage in and the range of discretion they may exercise in connection with the assets they hold.

For investments in entities in which the Company does not have a controlling financial interest but has significant influence over operating and financial decisions, the Company generally applies the equity method of accounting, except in instances where the Company has elected to fair value certain eligible investments (see Note 2).

Equity and partnership interests held by entities qualifying for accounting purposes as investment companies are carried at fair value.

The Company's U.S. and international subsidiaries include Morgan Stanley & Co. Incorporated ("MS&Co."), Morgan Stanley & Co. International plc ("MSIP"), Morgan Stanley Japan Securities Co., Ltd. ("MSJS") and Morgan Stanley Investment Advisors Inc.

Income Statement Presentation. The Company, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. In connection with the delivery of the various products and services to clients, the Company manages its revenues and related expenses in the aggregate. As such, when assessing the performance of its businesses, the Company considers its principal trading, investment banking, commissions, and interest and dividend income, along with the associated interest expense, as one integrated activity for each of the Company's separate businesses.

The Company's cost infrastructure supporting its businesses varies by activity. In some cases, these costs are directly attributable to one line of business, and, in other cases, such costs relate to multiple businesses. As such, when assessing the performance of its businesses, the Company does not consider these costs separately but rather assesses performance in the aggregate along with the related revenues.

Therefore, the Company's pricing structure considers various items, including the level of expenses incurred directly and indirectly to support the cost infrastructure, the risk it incurs in connection with a transaction, the overall client relationship and the availability in the market for the particular product and/or service. Accordingly, the Company does not manage or capture the costs associated with the products or services sold or its general and administrative costs by revenue line, in total or by product.

Revenue Recognition.

Investment Banking. Underwriting revenues and fees from mergers, acquisitions and advisory assignments are recorded when services for the transactions are determined to be completed, generally as set forth under the terms of the engagement. Transaction-related expenses, primarily consisting of legal, travel and other costs directly

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

associated with the transaction, are deferred and recognized in the same period as the related investment banking transaction revenue. Underwriting revenues are presented net of related expenses. Non-reimbursed expenses associated with advisory transactions are recorded within Non-interest expenses.

Commissions. The Company generates commissions from executing and clearing customer transactions on stock, options and futures markets. Commission revenues are recorded in the accounts on trade date.

Asset Management, Distribution and Administration Fees. Asset management, distribution and administration fees are recognized over the relevant contract period. In certain management fee arrangements, the Company is entitled to receive performance-based fees (also referred to as incentive fees) when the return on assets under management exceeds certain benchmark returns or other performance targets. In such arrangements, performance fee revenue is accrued (or reversed) quarterly based on measuring account/fund performance to date versus the performance benchmark stated in the investment management agreement. Performance-based fees are recorded within Principal transactions—investments revenues or Asset management, distribution and administration fees depending on the nature of the arrangement.

Financial Instruments and Fair Value.

A significant portion of the Company's financial instruments is carried at fair value with changes in fair value recognized in earnings each period. A description of the Company's policies regarding fair value measurement and its application to these financial instruments follows.

Financial Instruments Measured at Fair Value. All of the instruments within Financial instruments owned and Financial instruments sold, not yet purchased, are measured at fair value, either through the fair value option election (discussed below) or as required by other accounting pronouncements. These instruments primarily represent the Company's trading and investment activities and include both cash and derivative products. In addition, Securities received as collateral and Obligation to return securities received as collateral are measured at fair value as required by other accounting pronouncements. Additionally, certain Commercial paper and other short-term borrowings (primarily structured notes), certain Deposits, certain Other secured financings and certain Long-term borrowings (primarily structured notes and certain junior subordinated debentures) are measured at fair value through the fair value option election. Gains and losses on all of these instruments carried at fair value are reflected in Principal transactions—trading revenues or Principal transactions—investments revenues in the condensed consolidated statements of income. Interest income and expense and dividend income are recorded within the condensed consolidated statements of income depending on the nature of the instrument and related market conventions. When interest and dividends are included as a component of the instruments' fair value, interest and dividends are included within Principal transactions—trading revenues or Principal transactions—investments revenues. Otherwise, they are included within Interest and dividend income or Interest expense.

Fair Value Option. The Company adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" ("SFAS No. 159"), effective December 1, 2006. SFAS No. 159 provides entities the option to measure certain financial assets and financial liabilities at fair value with changes in fair value recognized in earnings each period. SFAS No. 159 permits the fair value option election on an instrument-by-instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument. The Company applies the fair value option for certain eligible instruments, including certain loans and loan commitments, certain equity method investments, certain structured notes and certain junior subordinated debentures, certain certificates of deposits and certain Other secured financings.

Fair Value Measurement—Definition and Hierarchy. The Company adopted the provisions of SFAS No. 157, "Fair Value Measurements" ("SFAS No. 157"), effective December 1, 2006. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.*, the "exit price") in an orderly transaction between market participants at the measurement date.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

In determining fair value, the Company uses various valuation approaches. SFAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 instruments. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Examples of assets and liabilities utilizing Level 1 inputs are: most U.S. Government securities; certain other sovereign government obligations; and exchange-traded equity securities and listed derivatives that are actively traded.

- Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Examples of assets and liabilities utilizing Level 2 inputs are: U.S. agency securities; municipal bonds; corporate bonds; certain corporate loans and loan commitments; certain residential and commercial mortgage-related instruments (including loans, securities and derivatives); most over-the-counter ("OTC") derivatives; physical commodities; mortgage servicing rights; deposits; and most structured notes.

- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Examples of assets and liabilities utilizing Level 3 inputs are: certain corporate loans and loan commitments; certain residential and commercial mortgage-related instruments (including loans, securities and derivatives); real estate and private equity investments; and long-dated or complex OTC derivatives.

The availability of observable inputs can vary from product to product and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or Level 2 to Level 3 (see Note 2).

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

Valuation Techniques. Many cash and OTC contracts have bid and ask prices that can be observed in the marketplace. Bid prices reflect the highest price that the Company and others are willing to pay for an asset. Ask prices represent the lowest price that the Company and others are willing to accept for an asset. For financial instruments whose inputs are based on bid-ask prices, the Company does not require that fair value always be a predetermined point in the bid-ask range. The Company's policy is to allow for mid-market pricing and adjusting to the point within the bid-ask range that meets the Company's best estimate of fair value. For offsetting positions in the same financial instrument, the same price within the bid-ask spread is used to measure both the long and short positions.

Fair value for many cash and OTC contracts is derived using pricing models. Pricing models take into account the contract terms (including maturity) as well as multiple inputs, including, where applicable, commodity prices, equity prices, interest rate yield curves, credit curves, creditworthiness of the counterparty, option volatility and currency rates. In accordance with SFAS No. 157, the impact of the Company's own credit spreads is also considered when measuring the fair value of liabilities, including OTC derivative contracts. Where appropriate, valuation adjustments are made to account for various factors, including bid-ask spreads, credit quality, market liquidity and the unit of account. These adjustments are subject to judgment, are applied on a consistent basis and are based upon observable inputs where available. The Company subjects all valuations and models to a review process on a periodic basis.

U.S. Government Securities. U.S. government securities are valued using quoted market prices. Valuation adjustments are not applied. Accordingly, U.S. government securities are categorized in Level 1 of the fair value hierarchy.

U.S. Agency Securities. U.S. agency securities include To-be-announced ("TBA") securities and mortgage pass-through certificates. TBA securities are generally valued using quoted market prices or are benchmarked thereto. Fair value of mortgage pass-through certificates is determined via a simulation model, which considers different rate scenarios and historical activity to calculate a spread to the comparable TBA security. U.S. agency securities are generally categorized in Level 2 of the fair value hierarchy.

Other Sovereign Government Obligations. The fair value of foreign sovereign government obligations is generally based on quoted prices in active markets. When quoted prices are not available, fair value is determined based on a valuation model that has as inputs interest rate yield curves, cross-currency basis index spreads, and country credit spreads for structures similar to the bond in terms of issuer, maturity and seniority. These bonds are generally categorized in Levels 1 or 2 of the fair value hierarchy.

Corporate Bonds. The fair value of corporate bonds is estimated using recently executed transactions, market price quotations (where observable), bond spreads or credit default swap spreads. The spread data used are for the same maturity as the bond. If the spread data do not reference the issuer, then data that reference a comparable issuer is used. When observable price quotations are not available, fair value is determined based on cash flow models with yield curves, bond or single name credit default swap spreads and recovery rates based on collateral values as key inputs. Corporate bonds are generally categorized in Level 2 of the fair value hierarchy; in instances where significant inputs are unobservable, they are categorized in Level 3 of the hierarchy.

Corporate Loans and Loan Commitments. The fair value of corporate loans is estimated using recently executed transactions, market price quotations (where observable) and market observable credit default swap levels along with proprietary valuation models and default recovery analysis where such transactions and quotations are unobservable. The fair value of contingent corporate loan commitments is estimated by using executed transactions on comparable loans and the anticipated market price based on pricing indications from syndicate banks and customers. The valuation of these commitments also takes into account certain fee income.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

While certain corporate loans, closed loan commitments and revolving loans are Level 2 instruments, certain other corporate loans and contingent corporate loan commitments are categorized in Level 3 of the fair value hierarchy.

Municipal Bonds. The fair value of municipal bonds is estimated using recently executed transactions, market price quotations and pricing models that factor in, where applicable, interest rates, bond or credit default swap spreads and volatility. These bonds are generally categorized in Level 2 of the fair value hierarchy.

Mortgage Loans. The valuation of mortgage loans depends upon the exit market for the loan. Loans not intended for securitization are valued based on the analysis of the underlying collateral performance, capital structure and market spreads for comparable positions as prices and/or spreads for specific credits tend to be unobservable. Where comparables do not exist, such loans are valued based on origination price and collateral performance (credit events) since origination. These loans are classified in Levels 2 or 3 of the fair value hierarchy.

The Company also holds certain loan products and mortgage products with the intent to securitize them. When structuring of the related securitization is substantially complete, such that the value likely to be realized in a current transaction is consistent with the price that a securitization entity will pay to acquire these products, the Company marks them to the expected securitized value. Factors affecting the value of loan and mortgage products intended to be securitized include, but are not limited to, loan type, underlying property type and geographic location, loan interest rate, loan to value ratios, debt service coverage ratio, updated cumulative loan loss data, prepayment rates, yields, investor demand, any significant market volatility since the last securitization, and credit enhancement. While these valuation factors may be supported by historical and actual external observations, the determination of their value as it relates to specific positions may require significant judgment. These instruments are classified in Levels 2 or 3 of the fair value hierarchy.

Commercial Mortgage-Backed Securities (“CMBS”) and Asset-Backed Securities (“ABS”). CMBS and ABS may be valued based on external price/spread data. When position-specific external price data are not observable, the valuation is based on prices of comparable bonds. Valuation levels of ABS and CMBS indices are used as an additional data point for benchmarking purposes or to price outright index positions. Included in this category are certain interest-only securities, which, in the absence of market prices, are valued as a function of observable whole bond prices and cash flow values of principal-only bonds using current market assumptions at the measurement date. CMBS and ABS are categorized in Level 3 if external prices are unobservable; otherwise they are categorized in Level 2 of the fair value hierarchy.

Retained Interests in Securitization Transactions. The Company engages in securitization activities related to various types of loans and bonds. The Company may retain interests in securitized financial assets as one or more tranches of the securitization. To determine fair values, observable inputs are used if available. Observable inputs, however, may not be available for certain retained interests so the Company estimates fair value based on the present value of expected future cash flows using its best estimates of the key assumptions, including forecasted credit losses, prepayment rates, forward yield curves and discount rates commensurate with the risks involved. When there are no significant unobservable inputs, retained interests are categorized in Level 2 of the fair value hierarchy. When unobservable inputs are significant to the fair value measurement, albeit generally supportable by historical and actual benchmark data, retained interests are categorized in Level 3 of the fair value hierarchy.

Exchange-Traded Equity Securities. Exchange-traded equity securities are generally valued based on quoted prices from the exchange. To the extent these securities are actively traded, valuation adjustments are not applied and they are categorized in Level 1 of the fair value hierarchy.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

Listed Derivative Contracts. Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. Listed derivatives that are not actively traded are valued using the same approaches as those applied to OTC derivatives; they are generally categorized in Level 2 of the fair value hierarchy.

OTC Derivative Contracts. OTC derivative contracts include forward, swap and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices or commodity prices.

Depending on the product and the terms of the transaction, the fair value of OTC derivative products can be modeled using a series of techniques, including closed-form analytic formulae, such as the Black-Scholes option-pricing model, and simulation models or a combination thereof. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgment, and the pricing inputs are observed from actively quoted markets, as is the case for generic interest rate swap and option contracts. In the case of more established derivative products, the pricing models used by the Company are widely accepted by the financial services industry. A substantial majority of OTC derivative products valued by the Company using pricing models fall into this category and are categorized within Level 2 of the fair value hierarchy.

Other derivative products, typically the newest and most complex products, require more judgment in the implementation of the valuation technique applied due to the complexity of the valuation assumptions and the reduced observability of inputs. This includes derivative interests in certain mortgage-related collateralized debt obligation (“CDO”) securities, mortgage-related credit default swaps, basket credit default swaps and CDO-squared positions where direct trading activity or quotes are unobservable. These instruments involve significant unobservable inputs and are categorized in Level 3 of the fair value hierarchy.

Derivative interests in mortgage-related CDOs, for which observability of external price data is extremely limited, are valued based on an evaluation of the market for similar positions as indicated by primary and secondary market activity in the cash CDO and synthetic CDO market. Each position is evaluated independently taking into consideration the underlying collateral performance and pricing, behavior of the tranche under various cumulative loss and prepayment scenarios, deal structures (*e.g.*, non-amortizing reference obligations, call features) and liquidity. While these factors may be supported by historical and actual external observations, the determination of their value as it relates to specific positions nevertheless requires significant judgment.

Mortgage-related credit default swaps are valued based on data from comparable credit instruments in the cash market and trades in comparable swaps as benchmarks, as prices and spreads for the specific credits subject to valuation tend to be of limited observability.

For basket credit default swaps and CDO-squared positions, the correlation between reference credits is often a significant input into the pricing model, in addition to several other more observable inputs such as credit spread, interest and recovery rates. As the correlation input is unobservable for each specific swap, it is benchmarked to standardized proxy baskets for which external data are available.

The Company trades various derivative structures with commodity underlyings. Depending on the type of structure, the model inputs generally include interest rate yield curves, commodity underlier spread curves, volatility of the underlying commodities and, in some cases, the correlation between these inputs. The fair value of these products is estimated using executed trades and broker and consensus data to provide values for the aforementioned inputs. Where these inputs are unobservable, relationships to observable commodities and data points, based on historic and/or implied observations, are employed as a technique to estimate the model input values. Commodity derivatives are generally categorized in Level 2 of the fair value hierarchy; in instances where significant inputs are unobservable, they are categorized in Level 3 of the fair value hierarchy.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

Investments in Private Equity and Real Estate. The Company's investments in private equity and real estate take the form of direct private equity investments and investments in private equity and real estate funds. The transaction price is used as the best estimate of fair value at inception. Thereafter, valuation is based on an assessment of each underlying investment, incorporating valuations that consider the evaluation of financing and sale transactions with third parties, expected cash flows and market-based information, including comparable company transactions, performance multiples and changes in market outlook, among other factors. These nonpublic investments are included in Level 3 of the fair value hierarchy because they trade infrequently, and, therefore, the fair value is unobservable.

Physical Commodities. The Company trades various physical commodities, including crude oil and refined products, metals and agricultural products. Fair value for physical commodities is determined using observable inputs, including broker quotations and published indices. Physical commodities are categorized in Level 2 of the fair value hierarchy.

Deposits. The fair value of certificates of deposit is estimated using third-party quotations. These deposits are categorized in Level 2 of the fair value hierarchy.

Structured Notes. The Company issues structured notes that have coupons or repayment terms linked to the performance of debt or equity securities, indices, currencies or commodities. Fair value of structured notes is estimated using valuation models described in this section for the derivative and debt features of the notes. These models incorporate observable inputs referencing identical or comparable securities, including prices that the notes are linked to, interest rate yield curves, option volatility and currency rates. The impact of the Company's own credit spreads also is included based on the Company's observed secondary bond market spreads. Most structured notes are categorized in Level 2 of the fair value hierarchy.

Fair Value Measurement—Other.

The fair value of OTC financial instruments, including derivative contracts related to financial instruments and commodities, is presented in the accompanying condensed consolidated statements of financial condition on a net-by-counterparty basis, when appropriate. Additionally, the Company nets fair value of cash collateral paid or received against fair value amounts recognized for net derivative positions executed with the same counterparty under the same master netting arrangement.

Hedge Accounting.

The Company applies hedge accounting for hedges involving various derivative financial instruments and non-U.S. dollar-denominated debt used to hedge interest rate, foreign exchange and credit risk arising from assets and liabilities not held at fair value. These derivative financial instruments are included within Financial instruments owned—Derivative contracts or Financial instruments sold, not yet purchased—Derivative contracts in the condensed consolidated statements of financial condition.

The Company's hedges are designated and qualify for accounting purposes as one of the following types of hedges: hedges of changes in fair value of assets and liabilities due to the risk being hedged (fair value hedges), hedges of the variability of future cash flows from floating rate assets and liabilities due to the risk being hedged (cash flow hedges) and hedges of net investments in foreign operations whose functional currency is different from the reporting currency of the parent company (net investment hedges).

For all hedges where hedge accounting is being applied, effectiveness testing and other procedures to ensure the ongoing validity of the hedges are performed at least monthly. The impact of hedge ineffectiveness on the

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

condensed consolidated statements of income, primarily related to fair value hedges, was a gain of \$16 million and \$13 million for the quarters ended February 29, 2008 and February 28, 2007, respectively. The amount excluded from the assessment of hedge effectiveness was immaterial. If a derivative is de-designated as a hedge, it is thereafter accounted for as a financial instrument used for trading.

Fair Value Hedges—Interest Rate Risk. In the first quarter of fiscal 2007, the Company began using regression analysis to perform an ongoing prospective and retrospective assessment of the effectiveness of these hedging relationships (*i.e.*, the Company applied the “long-haul” method of hedge accounting). A hedging relationship is deemed effective if the fair values of the hedging instrument (derivative) and the hedged item (debt liability) change inversely within a range of 80% to 125%.

Previously, the Company’s designated fair value hedges consisted primarily of interest rate swaps designated as fair value hedges of changes in the benchmark interest rate of fixed rate borrowings, including both certificates of deposit and senior long-term borrowings. For these hedges, the Company ensured that the terms of the hedging instruments and hedged items matched and that other accounting criteria were met so that the hedges were assumed to have no ineffectiveness (*i.e.*, the Company applied the “shortcut” method of hedge accounting). The Company also used interest rate swaps as fair value hedges of the benchmark interest rate risk of host contracts of equity-linked notes that contained embedded derivatives. For these hedging relationships, regression analysis was used for the prospective and retrospective assessments of hedge effectiveness.

For qualifying fair value hedges of benchmark interest rates, the changes in the fair value of the derivative and the changes in the fair value of the hedged liability provide offset of one another and, together with any resulting ineffectiveness, are recorded in Interest expense. When a derivative is de-designated as a hedge, any basis adjustment remaining on the hedged liability is amortized to Interest expense over the remaining life of the liability using the effective interest method.

Fair Value Hedges—Credit Risk. Until the fourth quarter of 2007, the Company had designated a portion of a credit derivative embedded in a non-recourse structured note liability as a fair value hedge of the credit risk arising from a loan receivable to which the structured note liability was specifically linked. Regression analysis was used to perform prospective and retrospective assessments of hedge effectiveness for this hedge relationship. The changes in the fair value of the derivative and the changes in the fair value of the hedged item provided offset of one another and, together with any resulting ineffectiveness, were recorded in Principal transactions—trading revenues. This hedge was terminated in the fourth quarter of 2007 upon derecognition of both the hedging instrument and the hedged item.

Cash Flow Hedges. The Company applies cash flow hedge accounting to interest rate swaps designated as hedges of the variability of future cash flows from floating rate liabilities due to the benchmark interest rate. The Company uses regression analysis to perform an ongoing prospective and retrospective assessment of the effectiveness of these hedging relationships. Changes in fair value of these interest rate swaps are recorded to “Net change in cash flow hedges” as a component of Accumulated other comprehensive income (loss) in Shareholders’ equity, net of tax effects, to the extent they are effective. Amounts recorded to Accumulated other comprehensive income (loss) are then reclassified to Interest expense as interest on the hedged borrowings is recognized. Any ineffective portion of the change in fair value of these instruments is recorded to Interest expense.

Before the sale of the aircraft leasing business in 2006, the Company applied hedge accounting to interest rate swaps used to hedge variable rate long-term borrowings associated with this business. Changes in the fair value of the swaps were recorded in Accumulated other comprehensive income (loss) in Shareholders’ equity, net of tax effects, and then reclassified to Interest expense as interest on the hedged borrowings was recognized.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

In connection with the sale of the aircraft leasing business, the Company de-designated the interest rate swaps associated with this business effective August 31, 2005 and no longer accounts for them as cash flow hedges. Amounts in Accumulated other comprehensive income (loss) related to those interest rate swaps continue to be reclassified to Interest expense since the related borrowings remain outstanding.

Net Investment Hedges. The Company utilizes forward foreign exchange contracts and non-U.S. dollar-denominated debt to manage the currency exposure relating to its net investments in non-U.S. dollar functional currency operations. No hedge ineffectiveness is recognized in earnings since the notional amounts of the hedging instruments equal the portion of the investments being hedged, and, where forward contracts are used, the currencies being exchanged are the functional currencies of the parent and investee; where debt instruments are used as hedges, they are denominated in the functional currency of the investee. The gain or loss from revaluing hedges of net investments in foreign operations at the spot rate is deferred and reported within Accumulated other comprehensive income (loss) in Shareholders' equity, net of tax effects. The forward points on the hedging instruments are recorded in Interest and dividend revenues or expense.

Condensed Consolidated Statements of Cash Flows.

For purposes of these statements, cash and cash equivalents consist of cash and highly liquid investments not held for resale with maturities, when purchased, of three months or less. In connection with business acquisitions, the Company assumed liabilities of \$77 million and \$7,679 million in the first quarter of fiscal 2008 and fiscal 2007, respectively.

Securitization Activities.

The Company engages in securitization activities related to commercial and residential mortgage loans, corporate bonds and loans, U.S. agency collateralized mortgage obligations and other types of financial assets (see Note 4). Generally, such transfers of financial assets are accounted for as sales when the Company has relinquished control over the transferred assets. The gain or loss on sale of such financial assets depends, in part, on the previous carrying amount of the assets involved in the transfer allocated between the assets sold and the retained interests based upon their respective fair values at the date of sale. Transfers that are not accounted for as sales are accounted for as secured borrowings.

Gains (losses) from Unconsolidated Investees.

The Company invests in unconsolidated investees that provide funds to develop low income communities, renewable energy sources and other structured transactions. These structures provide the Company with tax benefits and are not integral to the operations of the Company. The Company accounts for these investments under the equity method with gains and losses from these investments recorded within Gains (losses) from unconsolidated investees and the applicable tax credits and benefits from tax losses recorded within Provision for income taxes.

Accounting Developments.

Accounting for Uncertainty in Income Taxes. In July 2006, the Financial Accounting Standards Board (the "FASB") issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109" ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in an income tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties,

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

accounting in interim periods, disclosure and transition. As a result of the adoption of FIN 48 on December 1, 2007, the Company recorded a cumulative effect adjustment of approximately \$92 million as a decrease to the opening balance of Retained earnings as of December 1, 2007 (see Note 12).

Employee Benefit Plans. In September 2006, the FASB issued SFAS No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)” (“SFAS No. 158”). In fiscal 2007, the Company adopted SFAS No. 158’s requirement to recognize the overfunded or underfunded status of its defined benefit and postretirement plans as an asset or liability. In the first quarter of fiscal 2008, the Company recorded an after-tax charge of approximately \$13 million (\$21 million pre-tax) to Shareholders’ equity upon early adoption of SFAS No. 158’s other requirement to use the fiscal year-end date as the measurement date.

Offsetting of Amounts Related to Certain Contracts. In April 2007, the FASB issued FASB Staff Position (“FSP”) No. FIN 39-1, “Amendment of FASB Interpretation No. 39”, (“FSP FIN 39-1”). FSP FIN 39-1 amends certain provisions of FIN 39, “Offsetting of Amounts Related to Certain Contracts,” and permits companies to offset fair value amounts recognized for cash collateral receivables or payables against fair value amounts recognized for net derivative positions executed with the same counterparty under the same master netting arrangement. In accordance with the provisions of FSP FIN 39-1, the Company offset cash collateral receivables and payables against net derivative positions as of February 29, 2008. The adoption of FSP FIN 39-1 on December 1, 2007 did not have a material impact on the Company’s condensed consolidated financial statements.

Investment Company Accounting. In June 2007, the AICPA issued Statement of Position (“SOP”) 07-1, “Clarification of the Scope of the Audit and Accounting Guide *Investment Companies* and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies” (“SOP 07-1”). SOP 07-1 provides guidance for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies*. In February 2008, the FASB issued a final FSP SOP 07-1-1 to delay indefinitely the effective date of SOP 07-1.

Dividends on Share-Based Payment Awards. In June 2007, the Emerging Issues Task Force (“EITF”) reached consensus on Issue No. 06-11, “Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards” (“EITF Issue No. 06-11”). EITF Issue No. 06-11 requires that the tax benefit related to dividend equivalents paid on restricted stock units that are expected to vest be recorded as an increase to additional paid-in capital. The Company currently accounts for this tax benefit as a reduction to its income tax provision. EITF Issue No. 06-11 is to be applied prospectively for tax benefits on dividends declared in fiscal years beginning after December 15, 2007. The Company is currently evaluating the potential impact of adopting EITF Issue No. 06-11.

Business Combinations. In December 2007, the FASB issued SFAS No. 141(R), “Business Combinations” (“SFAS No. 141(R)”). SFAS 141(R) requires the acquiring entity in a business combination to recognize the full fair value of assets acquired and liabilities assumed in the transaction (whether a full or partial acquisition); establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; requires expensing of most transaction and restructuring costs; and requires the acquirer to disclose to investors and other users all of the information needed to evaluate and understand the nature and financial effect of the business combination. SFAS No. 141(R) applies to all transactions or other events in which the Company obtains control of one or more businesses, including those sometimes referred to as “true mergers” or “mergers

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

of equals” and combinations achieved without the transfer of consideration, for example, by contract alone or through the lapse of minority veto rights. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after December 1, 2009.

Noncontrolling Interests. In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements—an amendment of Accounting Research Bulletin No. 51” (“SFAS No. 160”). SFAS No. 160 requires reporting entities to present noncontrolling (minority) interests as equity (as opposed to as a liability or mezzanine equity) and provides guidance on the accounting for transactions between an entity and noncontrolling interests. SFAS No. 160 applies prospectively as of December 1, 2009, except for the presentation and disclosure requirements which will be applied retrospectively for all periods presented.

ASF Framework. In December 2007, the American Securitization Forum (“ASF”) issued the “Streamlined Foreclosure and Loss Avoidance Framework for Securitized Subprime Adjustable Rate Mortgage Loans” (the “ASF Framework”). The overall purpose of the ASF Framework is to provide recommended guidance for servicers to streamline borrower evaluation procedures and to facilitate the effective use of all forms of foreclosure and loss prevention efforts, including refinancings, forbearances, workout plans, loan modifications, deeds-in-lieu and short sales or short payoffs. The ASF Framework is focused on subprime first-lien adjustable rate residential mortgages loans that have an initial fixed rate period of 36 months or less, are included in securitized pools, were originated between January 1, 2005 and July 31, 2007, and have an initial interest rate reset date between January 1, 2008 and July 31, 2010 (“subprime ARM loans”).

The ASF Framework categorizes the population of subprime ARM loans into three segments. Segment 1 includes current loans, as defined, where the borrower is likely to be able to refinance into an available mortgage product. It is expected that borrowers in this category should refinance their loans, if they are unable or unwilling to meet their reset payment. Segment 2 includes current loans where the borrower is unlikely to be able to refinance and meet specific criteria related to Fair Isaac Corporation (or “FICO”) scores and expected payment increase due to the initial adjustment of the interest rate. Borrowers in this segment are eligible for a fast track loan modification under which the interest rate will be kept at the existing rate, generally for five years following the upcoming reset. The ASF Framework indicates that for Segment 2 loans, the servicer can presume that the borrower would be unable to pay pursuant to the original terms of the loan after the interest rate reset, and thus, borrower default on the loan is “reasonably foreseeable” in absence of a modification. Segment 3 includes loans where the borrower is not current or which do not otherwise qualify for Segment 1 or Segment 2. For loans in this category, the servicer will determine the appropriate loss mitigation approach in a manner consistent with the applicable servicing standard in the transaction documents, but without employing the fast track procedures described under Segment 2.

In January 2008, the SEC’s Office of Chief Accountant (the “OCA”) issued a letter (the “OCA Letter”) addressing accounting issues that may be raised by the ASF Framework. The OCA letter concluded that the SEC would not object to continuing off-balance sheet accounting treatment for QSPEs that hold Segment 2 subprime ARM loans modified pursuant to the ASF Framework.

For those current loans that are accounted for off-balance sheet that are modified, but not as part of the ASF Framework above, the servicer must perform on an individual basis an analysis of the borrower and the loan to provide sufficient evidence to demonstrate that default on the loan is imminent or reasonably foreseeable.

The Company adopted the ASF Framework during the first quarter of fiscal 2008, but has not yet modified a significant volume of loans using the ASF Framework. The Company does not expect that its application of the

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

ASF Framework will impact the off-balance sheet status of Company-sponsored QSPEs that hold Segment 2 subprime ARM loans and is currently evaluating the potential impact on its condensed consolidated statements of income. The total amount of assets owned by Company-sponsored QSPEs that hold subprime ARM loans (including those loans that are not serviced by the Company) as of February 29, 2008, was approximately \$30.5 billion. Of this amount, approximately \$11.8 billion relates to subprime ARM loans serviced by the Company. The Company's retained interests in Company sponsored QSPEs that hold subprime ARM loans totaled approximately \$272 million as of February 29, 2008.

Transfers of Financial Assets and Repurchase Financing Transactions. In February 2008, the FASB issued FSP FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions" ("FSP SFAS No. 140-3"). The objective of FSP FAS 140-3 is to provide implementation guidance on accounting for a transfer of a financial asset and repurchase financing. Under the guidance in FSP FAS 140-3, there is a presumption that an initial transfer of a financial asset and a repurchase financing are considered part of the same arrangement (*i.e.*, a linked transaction) for purposes of evaluation under SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities" ("SFAS No. 140"). If certain criteria are met, however, the initial transfer and repurchase financing shall not be evaluated as a linked transaction and shall be evaluated separately under SFAS No. 140. FSP FAS 140-3 is effective for the Company on December 1, 2008. The Company is currently evaluating the potential impact of adopting FSP FAS 140-3.

Disclosures about Derivative Instruments and Hedging Activities. In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities" ("SFAS No. 161"). SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities", and requires entities to provide enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair values and amounts of gains and losses on derivative contracts, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS No. 161 will be effective for the Company's fiscal 2009 interim and annual consolidated financial statements.

2. Fair Value Disclosures.

Fair Value Measurements.

The Company's assets and liabilities recorded at fair value have been categorized based upon a fair value hierarchy in accordance with SFAS No. 157. See Note 1 for a discussion of the Company's policies regarding this hierarchy.

The following fair value hierarchy tables present information about the Company's assets and liabilities measured at fair value on a recurring basis as of February 29, 2008 and November 30, 2007:

Assets and Liabilities Measured at Fair Value on a Recurring Basis as of February 29, 2008

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Counterparty and Cash Collateral Netting	Balance as of February 29, 2008
	(dollars in millions)				
Assets

(UNAUDITED)

The following tables present additional information about Level 3 assets and liabilities measured at fair value on a recurring basis. Level 3 instruments may be hedged with instruments classified in Level 1 and Level 2. As a result, the realized and unrealized gains and losses for assets and liabilities within the Level 3 category presented in the tables below do not reflect the related realized or unrealized gains and losses on hedging instruments that have been classified by the Company within the Level 1 and/or Level 2 categories. Additionally, both observable and unobservable inputs may be used to determine the fair value of positions that the Company has classified within the Level 3 category. As a result, the unrealized gains and losses for assets and liabilities within the Level 3 category presented in the tables below may include changes in fair value that were attributable to both observable (*e.g.*, changes in market interest rates) and unobservable (*e.g.*, changes in unobservable long-dated volatilities) inputs.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for the Three Months Ended February 29, 2008

	<u>Beginning Balance</u>	<u>Realized Gains or (Losses)(1)</u>	<u>Unrealized Gains or (Losses)(1)</u>	<u>Total Realized and Unrealized Gains or (Losses)(1)</u>	<u>Purchases, Sales, Other Settlements and Issuances, net</u>	<u>Net Transfers In and/or Out of Level 3</u>	<u>Ending Balance</u>
	(dollars in millions)						
Assets							
Financial instruments owned:

(1) Realized and unrealized gains (losses) are included in Principal transactions—trading in the condensed consolidated statements of income except for \$(72) million related to Financial instruments owned—investments, which is included in Principal transactions—investments. Unrealized gains (losses) relate to Level 3 assets and liabilities still held by the Company at February 29, 2008.

(2) The net gains from Net derivative contracts and the net losses from Corporate and other debt resulted from market movements primarily associated with credit products and various credit linked instruments, respectively. The net gains in Level 3 Net derivative contracts were primarily driven by certain credit default swaps and other instruments associated with the Company's credit products and securitized products activities. The net losses in Level 3 Corporate and other debt were primarily driven by certain asset-backed securities, including residential and commercial mortgage loans, and by corporate loans and loan commitments.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)

These results are only a component of the overall trading strategies of these businesses and do not take into consideration any related financial instruments that have been classified by the Company within the Level 1 and/or Level 2 categories. For example, the Company recorded offsetting net losses in Level 2 Net derivative contracts, which were primarily associated with the Company's credit products and securitized products activities.

The Company reclassified certain Corporate and other debt from Level 2 to Level 3 because certain significant inputs for the fair value measurement became unobservable. These reclassifications included transfers primarily related to loans and loan commitments, largely related to corporate lending transactions.

- (3) Amounts represent Financial instruments owned—derivative contracts net of Financial instruments sold, not yet purchased—derivative contracts.
- (4) The Company reclassified investments from Level 3 to Level 2 because certain significant inputs for the fair value measurement were identified and, therefore, became observable.
- (5) Amounts included in the Purchases, sales, other settlements and issuances, net column primarily relates to the issuance of junior subordinated debentures related to China Investment Corporation investment (see Note 9).

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for the Three Months Ended February 28, 2007

(UNAUDITED)**

- (4) The net gains from Financial instruments owned—investments were primarily related to investments associated with the Company’s real estate funds.
- (5) Gains and losses associated with DFS within Other revenues are included in discontinued operations.

Fair Value Option.

The following tables present gains and (losses) due to changes in fair value for items measured at fair value pursuant to the fair value option election for the quarters ended February 29, 2008 and February 28, 2007:

<u>Three months ended February 29, 2008</u>	<u>Principal Transactions: Trading</u>	<u>Net Interest Revenue</u>	<u>Gains (losses) Included in the Three Months Ended February 29, 2008(1)</u>
			(dollars in millions)
Commercial paper and other short-term borrowings	\$208	\$ (2)	\$206
Deposits	(6)	—	(6)
Long-term borrowings	464	(198)	266

- (1) In addition to these amounts, as discussed in Note 1, all of the instruments within Financial instruments owned or Financial instruments sold, not yet purchased are measured at fair value, either through the election of SFAS No. 159 or as required by other accounting pronouncements. Changes in the fair value of these instruments are recorded in Principal transactions—trading and Principal transactions—investments revenues.

<u>Three months ended February 28, 2007</u>	<u>Principal Transactions: Trading</u>	<u>Net Interest Revenue</u>	<u>(Losses) gains Included in the Three Months Ended February 28, 2007(1)</u>
			(dollars in millions)
Commercial paper and other short-term borrowings	\$ (5)	\$ —	\$ (5)
Deposits	4	—	4
Long-term borrowings	136	(49)	87

- (1) In addition to these amounts, as discussed in Note 1, all of the instruments within Financial instruments owned or Financial instruments sold, not yet purchased are measured at fair value, either through the election of SFAS No. 159 or as required by other accounting pronouncements. Changes in the fair value of these instruments are recorded in Principal transactions—trading and Principal transactions—investments revenues.

As of February 29, 2008 and November 30, 2007, the aggregate contractual principal amount of loans for which the fair value option was elected exceeded the fair value of such loans by approximately \$28,193 million and \$28,880 million, respectively. The aggregate fair value of loans that were 90 or more days past due as of February 29, 2008 and November 30, 2007 was \$2,267 million and \$6,588 million, respectively. The aggregate contractual principal amount of such loans 90 or more days past due exceeded their fair value by approximately \$21,239 million and \$23,501 million at February 29, 2008 and November 30, 2007, respectively. This difference in amount primarily emanates from the Company’s distressed debt trading business, which purchases distressed debt at amounts well below par.

For the quarter ended February 29, 2008, changes in the fair value of loans for which the fair value option was elected that were attributable to changes in instrument-specific credit spreads were losses of \$2,226 million. Instrument-specific credit losses were determined by excluding the non-credit components of gains and losses, such as those due to changes in interest rates. For the quarter ended February 28, 2007, changes in the fair value of loans for which the fair value option was elected that were attributable to changes in instrument-specific credit spreads were estimated to be an immaterial unrealized loss.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

For the quarter ended February 29, 2008, the estimated changes in the fair value of the Company’s short-term and long-term borrowings, including structured notes and junior subordinated debentures, for which the fair value option was elected that were attributable to changes in instrument-specific credit spreads were gains of approximately \$895 million. This gain was attributable to the widening of the Company’s credit spreads and was determined based upon observations of the Company’s secondary bond market spreads. For the quarter ended February 28, 2007, the estimated changes in the fair value of the Company’s short-term and long-term borrowings, including structured notes and junior subordinated debentures, for which the fair value option was elected that were attributable to changes in instrument-specific credit spreads were not material. As of February 29, 2008 and November 30, 2007, the aggregate contractual principal amount of long-term debt instruments for which the fair value option was elected exceeded the fair value of such instruments by approximately \$2,955 million and \$1,572 million, respectively.

The estimated change in the fair value of other liabilities for which the fair value option was elected that was attributable to changes in instrument-specific credit spreads was a loss of approximately \$482 million in the quarter ended February 29, 2008. This loss was primarily related to leveraged loan contingent commitments and was attributable to the illiquid market conditions that existed in the quarter. It was generally determined based on the differential between estimated expected client yields at February 29, 2008 and contractual yields. For the quarter ended February 28, 2007, the estimated changes in the fair value of other liabilities for which the fair value option was elected that were attributable to changes in instrument-specific credit spreads were not material.

3. Collateralized Transactions.

Securities purchased under agreements to resell (“reverse repurchase agreements”) and Securities sold under agreements to repurchase (“repurchase agreements”), principally government and agency securities, are carried at the amounts at which the securities subsequently will be resold or reacquired as specified in the respective agreements; such amounts include accrued interest. Reverse repurchase agreements and repurchase agreements are presented on a net-by-counterparty basis, when appropriate. The Company’s policy is to take possession of securities purchased under agreements to resell. Securities borrowed and Securities loaned are carried at the amounts of cash collateral advanced and received in connection with the transactions. Other secured financings include the liabilities related to transfers of financial assets that are accounted for as financings rather than sales, consolidated variable interest entities where the Company is deemed to be the primary beneficiary and certain equity-referenced securities and loans where in all instances these liabilities are payable solely from the cash flows of the related assets accounted for as Financial instruments owned.

The Company pledges its financial instruments owned to collateralize repurchase agreements and other securities financings. Pledged securities that can be sold or repledged by the secured party are identified as Financial instruments owned (pledged to various parties) in the condensed consolidated statements of financial condition. The carrying value and classification of securities owned by the Company that have been loaned or pledged to counterparties where those counterparties do not have the right to sell or repledge the collateral were as follows:

	At February 29, 2008	At November 30, 2007
	(dollars in millions)	
Financial instruments owned:		
U.S. government and agency securities	\$ 7,655	\$ 7,134
Other sovereign government obligations	6,619	333
Corporate and other debt	43,087	32,530
Corporate equities	3,938	1,133
Total	\$61,299	\$41,130

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

The Company enters into reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned transactions to, among other things, acquire securities to cover short positions and settle other securities obligations, to accommodate customers' needs and to finance the Company's inventory positions. The Company also engages in securities financing transactions for customers through margin lending. Under these agreements and transactions, the Company either receives or provides collateral, including U.S. government and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. The Company receives collateral in the form of securities in connection with reverse repurchase agreements, securities borrowed and derivative transactions, and customer margin loans. In many cases, the Company is permitted to sell or repledge these securities held as collateral and use the securities to secure repurchase agreements, to enter into securities lending and derivative transactions or for delivery to counterparties to cover short positions. At February 29, 2008 and November 30, 2007, the fair value of securities received as collateral where the Company is permitted to sell or repledge the securities was \$935 billion and \$948 billion, respectively, and the fair value of the portion that had been sold or repledged was \$721 billion and \$708 billion, respectively.

The Company additionally receives securities as collateral in connection with certain securities for securities transactions in which the Company is the lender. In instances where the Company is permitted to sell or repledge these securities, the Company reports the fair value of the collateral received and the related obligation to return the collateral in the condensed consolidated statements of financial condition. At February 29, 2008 and November 30, 2007, \$49 billion and \$82 billion, respectively, were reported as Securities received as collateral and an Obligation to return securities received as collateral in the condensed consolidated statements of financial condition. Collateral received in connection with these transactions that was subsequently repledged was approximately \$44 billion and \$72 billion at February 29, 2008 and November 30, 2007, respectively.

The Company manages credit exposure arising from reverse repurchase agreements, repurchase agreements, securities borrowed and securities loaned transactions by, in appropriate circumstances, entering into master netting agreements and collateral arrangements with counterparties that provide the Company, in the event of a customer default, the right to liquidate collateral and the right to offset a counterparty's rights and obligations. The Company also monitors the fair value of the underlying securities as compared with the related receivable or payable, including accrued interest, and, as necessary, requests additional collateral to ensure such transactions are adequately collateralized. Where deemed appropriate, the Company's agreements with third parties specify its rights to request additional collateral. Customer receivables generated from margin lending activity are collateralized by customer-owned securities held by the Company. For these transactions, adherence to the Company's collateral policies significantly limits the Company's credit exposure in the event of customer default. The Company may request additional margin collateral from customers, if appropriate, and, if necessary, may sell securities that have not been paid for or purchase securities sold but not delivered from customers.

4. Securitization Activities and Variable Interest Entities.

Securitization Activities. The Company engages in securitization activities related to commercial and residential mortgage loans, U.S. agency collateralized mortgage obligations, corporate bonds and loans, municipal bonds and other types of financial assets. Special purpose entities ("SPEs"), also known as variable interest entities ("VIEs") are typically used in such securitization transactions. Transferred assets are carried at fair value prior to securitization, and any changes in fair value are recognized in the condensed consolidated statements of income. The Company may act as underwriter of the beneficial interests issued by securitization vehicles. Underwriting net revenues are recognized in connection with these transactions. The Company may retain interests in the securitized financial assets as one or more tranches of the securitization. These retained interests are included in the condensed consolidated statements of financial condition at fair value. Any changes in the fair value of such retained interests are recognized in the condensed consolidated statements of income.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)

Retained interests in securitized financial assets were approximately \$3.5 billion at February 29, 2008, the majority of which were related to residential mortgage loan, commercial mortgage loan and U.S. agency collateralized mortgage obligation securitization transactions. Net gains at the time of securitization were not material in the quarter ended February 29, 2008.

The following table presents information on the Company's residential mortgage loan, commercial mortgage loan and U.S. agency collateralized mortgage obligation securitization transactions. Key economic assumptions and the sensitivity of the current fair value of the retained interests to immediate 10% and 20% adverse changes in those assumptions as of February 29, 2008 were as follows (dollars in millions):

	Residential Mortgage Loans	Commercial Mortgage Loans	U.S. Agency Collateralized Mortgage Obligations
Investment grade retained interests	\$ 1,264	\$ 760	\$ 491
Non-investment grade retained interests	580	191	—
Total retained interests (carrying amount/fair value) . .	<u>\$ 1,844</u>	<u>\$ 951</u>	<u>\$ 491</u>
Weighted average life (in months)	46	37	44
Range	0.3-146	5.5-119	1.5-268
Weighted average discount rate (per annum)	15.08%	7.86%	6.92%
Range	4.30-124.62%	2.82-27.90%	0.21-40.63%
Impact on fair value of 10% adverse change	\$ (65)	\$ (16)	\$ (8)
Impact on fair value of 20% adverse change	\$ (124)	\$ (30)	\$ (16)
Weighted average credit losses(1)(2)	2.13%	7.10%	0.00%
Range	0.00-12.00%	0.00-25.80%	0.00-0.00%
Impact on fair value of 10% adverse change	\$ (122)	\$ (4)	\$ —
Impact on fair value of 20% adverse change	\$ (186)	\$ (7)	\$ —
Weighted average prepayment speed assumption ("PSA")(3)(4)	973	—	359
Range	182-1,500PSA	—	166-558PSA
Impact on fair value of 10% adverse change	\$ (71)	\$ —	\$ (7)
Impact on fair value of 20% adverse change	\$ (115)	\$ —	\$ (15)

- (1) Residential mortgage loans credit loss rate stated in terms of cumulative loss rate. Commercial mortgage loans credit loss rate stated in terms of annualized loss rate.
- (2) Credit losses are computed only on positions for which expected credit loss is either a key assumption in the determination of fair value or is not reflected in the discount rate.
- (3) Amounts for residential mortgage loans exclude positive valuation effects from immediate 10% and 20% changes.
- (4) Commercial mortgage loans typically contain provisions that either prohibit or economically penalize the borrower from prepaying the loan for a specified period of time.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)

The following table presents information on the Company's residential mortgage loan, commercial mortgage loan and U.S. agency collateralized mortgage obligation securitization transactions. Key economic assumptions and the sensitivity of the current fair value of the retained interests to immediate 10% and 20% adverse changes in those assumptions at November 30, 2007 were as follows (dollars in millions):

	Residential Mortgage Loans	Commercial Mortgage Loans	U.S. Agency Collateralized Mortgage Obligations
Investment grade retained interests	\$ 2,048	\$ 678	\$ 826
Non-investment grade retained interests	1,167	406	—
Total retained interests (carrying amount/fair value)	<u>\$ 3,215</u>	<u>\$ 1,084</u>	<u>\$ 826</u>
Weighted average life (in months)	49	57	51
Range	1-322	0.5-139	1-271
Weighted average discount rate (per annum)	12.55%	8.48%	6.04%
Range	1.12 - 74.10%	3.00 - 16.83%	0.75 - 18.12%
Impact on fair value of 10% adverse change	\$ (114)	\$ (14)	\$ (16)
Impact on fair value of 20% adverse change	\$ (218)	\$ (28)	\$ (31)
Weighted average credit losses(1)(2)	4.52%	3.24%	0.00%
Range	0.00 - 12.00%	0.00 - 13.69%	0.00 - 0.00%
Impact on fair value of 10% adverse change	\$ (215)	\$ (5)	\$ —
Impact on fair value of 20% adverse change	\$ (371)	\$ (10)	\$ —
Weighted average prepayment speed assumption ("PSA")(3)(4)	1,173	—	301
Range	188 - 2,250PSA	—	167 - 718PSA
Impact on fair value of 10% adverse change	\$ (118)	\$ —	\$ (7)
Impact on fair value of 20% adverse change	\$ (194)	\$ —	\$ (19)

- (1) Residential mortgage loans credit loss rate stated in terms of cumulative loss rate. Commercial mortgage loans credit loss rate stated in terms of annualized loss rate.
- (2) Credit losses are computed only on positions for which expected credit loss is either a key assumption in the determination of fair value or is not reflected in the discount rate.
- (3) Amounts for residential mortgage loans exclude positive valuation effects from immediate 10% and 20% changes.
- (4) Commercial mortgage loans typically contain provisions that either prohibit or economically penalize the borrower from prepaying the loan for a specified period of time.

The weighted average assumptions and parameters used initially to value retained interests in relation to securitizations that were still held by the Company as of February 29, 2008 were as follows:

	Residential Mortgage Loans	Commercial Mortgage Loans	U.S. Agency Collateralized Mortgage Obligations
Weighted average life (in months)	51	44	75
Weighted average discount rate (rate per annum)	10.04%	6.03%	6.29%
Weighted average credit losses (1)(2)	0.73%	1.51%	—
Weighted average prepayment speed assumptions	1,628PSA	—	279PSA

- (1) Residential mortgage loans credit loss rate stated in terms of cumulative loss rate. Commercial mortgage loans credit loss rate stated in terms of annualized loss rate.
- (2) Credit losses are computed only on positions for which expected credit loss is either a key assumption in the determination of fair value or is not reflected in the discount rate.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

The tables above do not include the offsetting benefit of any financial instruments that the Company may utilize to hedge risks inherent in its retained interests. In addition, the sensitivity analysis is hypothetical and should be used with caution. Changes in fair value based on a 10% or 20% variation in an assumption generally cannot be extrapolated because the relationship of the change in the assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the retained interests is calculated independently of changes in any other assumption; in practice, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. In addition, the sensitivity analysis does not consider any corrective action that the Company may take to mitigate the impact of any adverse changes in the key assumptions.

During the quarters ended February 29, 2008 and February 28, 2007, the Company received proceeds from new securitization transactions of \$3.8 billion and \$14.5 billion, respectively, and cash flows from retained interests in securitization transactions of \$1.7 billion in both periods.

Mortgage Servicing Rights. The Company may retain servicing rights to certain mortgage loans that are sold through its securitization activities. These transactions create an asset referred to as MSRs, which are included within Intangible assets in the condensed consolidated statements of financial condition.

The following table presents information about the Company's MSRs, which relate to its mortgage loan business activities:

	<u>Three Months Ended</u>	
	<u>February 29, 2008</u>	<u>February 28, 2007</u>
	<u>(dollars in millions)</u>	
Fair value as of the beginning of the period	\$428	\$ 93
Additions:		
Purchases of servicing assets	1	187
Servicing assets that result from transfers of financial assets	<u>14</u>	<u>50</u>
Total additions	15	237
Subtractions:		
Sales/disposals	(8)	(18)
Changes in fair value(1)	<u>(43)</u>	<u>(25)</u>
Fair value as of the end of the period	<u>\$392</u>	<u>\$287</u>
Amount of contractually specified(1):		
Servicing fees	\$ 65	\$ 38
Late fees	8	6
Ancillary fees	<u>—</u>	<u>1</u>
	<u>\$ 73</u>	<u>\$ 45</u>

(1) These amounts are recorded within Other revenues in the Company's condensed consolidated statements of income.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)

	Three Months Ended	
	February 29, 2008	February 28, 2007
Assumptions Used in Measuring Fair Value:		
Weighted average discount rate	17.59%	17.87%
Weighted average prepayment speed assumption	584PSA	977PSA

The Company generally utilizes information provided by third parties in order to determine the fair value of its MSR. The valuation of MSR consist of projecting servicing cash flows and discounting such cash flows using an appropriate risk-adjusted discount rate. These valuations require estimation of various assumptions, including future servicing fees, credit losses and other related costs, discount rates and mortgage prepayment speeds. The Company also compares the estimated fair values of the MSR from the valuations with observable trades of similar instruments or portfolios. Due to subsequent changes in economic and market conditions, the actual rates of prepayments, credit losses and the value of collateral may differ significantly from the Company’s original estimates. Such differences could be material. If actual prepayment rates and credit losses were higher than those assumed, the value of the Company’s MSR could be adversely affected. The Company may hedge a portion of its MSR through the use of financial instruments, including certain derivative contracts.

Variable Interest Entities. FASB Interpretation No. 46, as revised (“FIN 46R”), “Consolidation of Variable Interest Entities,” applies to certain entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The primary beneficiary of a VIE is the party that absorbs a majority of the entity’s expected losses, receives a majority of its expected residual returns or both, as a result of holding variable interests. The Company consolidates entities in which it is the primary beneficiary. For those entities deemed to be qualifying special purpose entities (as defined in SFAS No. 140), the Company does not consolidate the entity. See Note 1 regarding the characteristics of QSPEs.

The Company is involved with various entities in the normal course of business that may be deemed to be VIEs. The Company’s variable interests in VIEs include debt and equity interests, commitments, guarantees and derivative instruments. The Company’s involvement with VIEs arises primarily from:

- Purchased, sold and retained interests in connection with market making and securitization activities.
- Guarantees issued and residual interests retained in connection with municipal bond securitizations.
- Loans and investments made to VIEs that hold debt, equity, real estate or other assets.
- Derivatives entered into with variable interest entities.
- Structuring of credit linked notes or other asset-repackaged notes designed to meet the investment objectives of clients.
- Other structured transactions designed to provide enhanced, tax-efficient yields to the Company or its clients.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

The following table presents information about the Company's total assets and maximum exposure to loss associated with VIEs as of February 29, 2008 which the Company consolidates. The Company accounts for the assets held by the entities as Financial instruments owned and the liabilities of the entities as Other secured financings in the condensed consolidated statements of financial condition (dollars in millions):

	VIE Assets That the Company Consolidates	At February 29, 2008 Maximum Exposure to Loss in Consolidated VIEs(1)			
		Debt and Equity Interests	Derivatives	Commitments and Guarantees	Total
Mortgage and asset-backed securitizations	\$ 7,141	\$ 1,864	\$ 4	\$ —	\$ 1,868
Municipal bond trusts	811	1	—	810	811
Credit and real estate(2)	4,608	3,606	2,606	—	6,212
Commodities financing	1,160	—	274	—	274
Other structured transactions	15,257	14,736	—	9	14,745
	<u>\$28,977</u>	<u>\$20,207</u>	<u>\$2,884</u>	<u>\$ 819</u>	<u>\$23,910</u>

- (1) The Company's maximum exposure to loss often differs from the carrying value of the VIE's assets. The maximum exposure to loss is dependent on the nature of the Company's variable interest in the VIEs and is limited to the notional amounts of certain liquidity facilities, other credit support, total return swaps, written put options, and the fair value of certain other derivatives and investments the Company has made in the VIEs. Where notional amounts are utilized in quantifying maximum exposure related to derivatives, such amounts do not reflect writedowns already recorded by the Company. The Company's maximum exposure to loss does not include the offsetting benefit of any financial instruments that the Company may utilize to hedge these risks associated with the Company's variable interests.
- (2) The Company's maximum exposure to loss associated with Credit and real estate VIEs exceeds the consolidated assets of these entities. This is due to the inclusion in this category of certain VIEs that typically hold a limited amount of non-derivative security positions and instead obtain market exposure through the use of derivatives. Given the use of such derivatives, the risk of loss associated with such entities typically exceeds the carrying value of their assets. The Company's maximum exposure to loss associated with such consolidated variable interest entities is generally limited to the notional amount of the Company's derivatives entered into with the VIE and the fair value of any non-derivative security positions held by the Company.

The following table presents information about the Company's total assets and maximum exposure to loss associated with non-consolidated VIEs as of February 29, 2008 in which the Company had significant variable interests (dollars in millions):

	VIE Assets That the Company Does not Consolidate	At February 29, 2008 Maximum Exposure to Loss in Non-consolidated VIEs (1)			
		Debt and Equity Interests	Derivatives	Commitments and Guarantees	Total
Mortgage and asset-backed securitizations	\$ 7,475	\$ 136	\$108	\$ —	\$ 244
Municipal bond trusts	801	518	—	142	660
Credit and real estate	13,351	7,361	703	52	8,116
Other structured transactions	10,457	2,169	—	414	2,583
	<u>\$32,084</u>	<u>\$10,184</u>	<u>\$811</u>	<u>\$ 608</u>	<u>\$11,603</u>

- (1) The Company's maximum exposure to loss often differs from the carrying value of the VIE's assets. The maximum exposure to loss is dependent on the nature of the Company's variable interest in the VIEs and is limited to the notional amounts of certain liquidity facilities, other credit support, total return swaps, written put options, and the fair value of certain other derivatives and investments the Company has made in the VIEs. Where notional amounts are utilized in quantifying maximum exposure related to derivatives, such amounts do not reflect writedowns already recorded by the Company. The Company's maximum exposure to loss does not include the offsetting benefit of any financial instruments that the Company may utilize to hedge these risks associated with the Company's variable interests.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

5. Derivative Contracts.

In the normal course of business, the Company enters into a variety of derivative contracts related to financial instruments and commodities. The Company uses these instruments for trading and investment purposes, as well as for asset and liability management. These instruments generally represent future commitments to swap interest payment streams, exchange currencies, or purchase or sell commodities and other financial instruments on specific terms at specified future dates. Many of these products have maturities that do not extend beyond one year, although swaps, options and equity warrants typically have longer maturities. For further discussion of these matters, refer to Note 6 to the consolidated financial statements for the fiscal year ended November 30, 2007 included in the Company's Annual Report on Form 10-K for the fiscal year ended November 30, 2007 (the "Form 10-K").

Future changes in interest rates, foreign currency exchange rates or the fair values of the financial instruments, commodities or indices underlying these contracts ultimately may result in cash settlements exceeding fair value amounts recognized in the condensed consolidated statements of financial condition. The amounts in the following table represent the fair value of exchange traded and OTC options and other contracts (including interest rate, foreign exchange, and other forward contracts and swaps) for derivatives for trading and investment and for asset and liability management, net of offsetting positions in situations where netting is appropriate. The asset amounts are not reported net of non-cash collateral, which the Company obtains with respect to certain of these transactions to reduce its exposure to credit losses. In accordance with the provisions of FSP FIN 39-1, the Company offset cash collateral receivables and payables of \$33 billion and \$45 billion, respectively, against net derivative positions as of February 29, 2008.

Credit risk with respect to derivative instruments arises from the failure of a counterparty to perform according to the terms of the contract. The Company's exposure to credit risk at any point in time is represented by the fair value of the contracts reported as assets. The Company monitors the creditworthiness of counterparties to these transactions on an ongoing basis and requests additional collateral when deemed necessary.

The Company's derivatives (both listed and OTC), net of cash collateral, as of February 29, 2008 and November 30, 2007 are summarized in the table below, showing the fair value of the related assets and liabilities by product:

<u>Product Type</u>	<u>At February 29, 2008</u>		<u>At November 30, 2007</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
	(dollars in millions)			
Interest rate and currency swaps, interest rate options, credit derivatives and other fixed income securities contracts	\$47,776	\$29,504	\$33,804	\$19,515
Foreign exchange forward contracts and options	10,956	10,955	7,755	9,372
Equity securities contracts (including equity swaps, warrants and options)	20,777	30,156	19,913	27,887
Commodity forwards, options and swaps	19,965	18,777	15,531	14,830
Total	<u>\$99,474</u>	<u>\$89,392</u>	<u>\$77,003</u>	<u>\$71,604</u>

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

6. Goodwill and Net Intangible Assets.

Changes in the carrying amount of the Company's goodwill and intangible assets for the quarter ended February 29, 2008 were as follows:

	<u>Institutional Securities</u>	<u>Global Wealth Management Group</u>	<u>Asset Management</u>	<u>Total</u>
	(dollars in millions)			
<i>Goodwill:</i>				
Balance as of November 30, 2007	\$1,555	\$297	\$1,172	\$3,024
Foreign currency translation adjustments	(2)	6	—	4
Goodwill acquired during the period and other	28	—	(3)	25
Balance as of February 29, 2008	<u>\$1,581</u>	<u>\$303</u>	<u>\$1,169</u>	<u>\$3,053</u>

Due to the deterioration in the broader credit markets, the Company performed an interim impairment test of goodwill in the first quarter of fiscal 2008, which did not result in an impairment.

	<u>Institutional Securities</u>	<u>Global Wealth Management Group</u>	<u>Asset Management</u>	<u>Total</u>
	(dollars in millions)			
<i>Intangible Assets:</i>				
Amortizable intangible assets at November 30, 2007	\$386	\$ —	\$233	\$ 619
Foreign currency translation adjustments	(1)	—	—	(1)
Intangible assets acquired during the period and other	24	—	—	24
Intangible assets disposed of during the period and other	(8)	—	(4)	(12)
Amortization expense	(12)	—	(2)	(14)
Amortizable intangible assets at February 29, 2008	389	—	227	616
Mortgage servicing rights(see Note 4)	392	—	—	392
Balance as of February 29, 2008	<u>\$781</u>	<u>\$ —</u>	<u>\$227</u>	<u>\$1,008</u>

7. Long-Term Borrowings.

Long-term borrowings at February 29, 2008 scheduled to mature within one year aggregated \$35,386 million.

During the quarter ended February 29, 2008, the Company issued notes with a carrying value at quarter-end aggregating \$15,861 million, including non-U.S. dollar currency notes aggregating \$3,737 million. Maturities in the aggregate of these notes by fiscal year are as follows: 2009, \$2,046 million; 2010, \$1,474 million; 2011, \$716 million; 2012, \$1,338 million; and thereafter, \$10,287 million. In the quarter ended February 29, 2008, \$10,330 million of notes were repaid.

The weighted average maturity of the Company's long-term borrowings, based upon stated maturity dates, was approximately 6.2 years at February 29, 2008.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

8. Commitments, Guarantees and Contingencies.

Commitments.

The Company's commitments associated with letters of credit and other financial guarantees obtained to satisfy collateral requirements, investment activities, corporate lending and financing arrangements, and mortgage lending as of February 29, 2008 are summarized below by period of expiration. Since commitments associated with these instruments may expire unused, the amounts shown do not necessarily reflect the actual future cash funding requirements:

	Years to Maturity				Total
	Less than 1	1-3	3-5	Over 5	February 29, 2008
	(dollars in millions)				
Letters of credit and other financial guarantees obtained to satisfy collateral requirements	\$ 11,719	\$ 11	\$ —	\$ 1	\$ 11,731
Investment activities	527	220	97	699	1,543
Primary lending commitments(1)	14,687	7,894	26,350	10,594	59,525
Secondary lending commitments(1)	5	17	228	275	525
Commitments for secured lending transactions	2,710	4,143	2,610	23	9,486
Commitments to enter into reverse repurchase agreements	115,036	—	—	—	115,036
Commercial and residential mortgage-related commitments(1)	4,654	—	—	—	4,654
Other commitments	1,062	13	5	—	1,080
Total	\$150,400	\$12,298	\$29,290	\$11,592	\$203,580

(1) These commitments are recorded at fair value within Financial instruments owned and Financial instruments sold, not yet purchased in the condensed consolidated statements of financial condition (see Note 2).

Letters of Credit and Other Financial Guarantees Obtained to Satisfy Collateral Requirements. The Company has outstanding letters of credit and other financial guarantees issued by third-party banks to certain of the Company's counterparties. The Company is contingently liable for these letters of credit and other financial guarantees, which are primarily used to provide collateral for securities and commodities borrowed and to satisfy various margin requirements in lieu of depositing cash or securities with these counterparties.

Investment Activities. The Company enters into commitments associated with its real estate, private equity and principal investment activities, which include alternative products.

Lending Commitments. Primary lending commitments are those which are originated by the Company whereas secondary lending commitments are purchased from third parties in the market. The commitments include lending commitments that are made to investment grade and non-investment grade companies in connection with corporate lending and other business activities.

Commitments for Secured Lending Transactions. Secured lending commitments are extended by the Company to companies and are secured by real estate or other physical assets of the borrower. Loans made under these arrangements typically are at variable rates and generally provide for over-collateralization based upon the

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

creditworthiness of the borrower. This amount also includes commitments to asset-backed commercial paper conduits of \$590 million as of February 29, 2008, which have maturities of less than four years.

Commitments to Enter into Reverse Repurchase Agreements. The Company enters into forward starting securities purchased under agreements to resell that are primarily secured by collateral from U.S. government agency securities and other sovereign government obligations.

Commercial and Residential Mortgage-Related Commitments. The Company enters into forward purchase contracts involving residential mortgage loans, residential mortgage loan commitments to individuals and residential home equity lines of credit. In addition, the Company enters into commitments to originate commercial and residential mortgage loans.

Other Commitments. Other commitments include commercial loan commitments to small businesses and commitments related to securities-based lending activities in connection with the Company's Global Wealth Management Group business segment.

Guarantees.

The table below summarizes certain information regarding the Company's obligations under guarantee arrangements at February 29, 2008:

<u>Type of Guarantee</u>	<u>Maximum Potential Payout/Notional</u>				<u>Total</u>	<u>Carrying Amount</u>	<u>Collateral/Recourse</u>
	<u>Years to Maturity</u>						
	<u>Less than 1</u>	<u>1-3</u>	<u>3-5</u>	<u>Over 5</u>			
	(dollars in millions)						
Notional amount of derivative contracts	\$948,925	\$1,174,956	\$2,834,213	\$2,135,215	\$7,093,309	\$426,538	\$ 46
Standby letters of credit and other financial guarantees issued(1)	619	1,018	2,516	7,823	11,976	9	4,804
Market value guarantees	108	76	—	653	837	66	145
Liquidity facilities(2)	19,371	1,598	803	425	22,197	22	20,224
General partner guarantees	47	111	40	306	504	14	—

(1) Approximately \$5 billion of standby letters of credit are also reflected in the "Commitments" table above in primary and secondary lending commitments.

(2) The maximum potential payout amount includes liquidity facilities to asset-backed commercial paper conduits of \$714 million.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

The Company has certain obligations under certain guarantee arrangements, including contracts and indemnification agreements that contingently require a guarantor to make payments to the guaranteed party based on changes in an underlying measure (such as an interest or foreign exchange rate, security or commodity price, an index or the occurrence or non-occurrence of a specified event) related to an asset, liability or equity security of a guaranteed party. Also included as guarantees are contracts that contingently require the guarantor to make payments to the guaranteed party based on another entity's failure to perform under an agreement, as well as indirect guarantees of the indebtedness of others. The Company's use of guarantees is described below by type of guarantee:

Derivative Contracts. Certain derivative contracts meet the accounting definition of a guarantee, including certain written options, contingent forward contracts and credit default swaps. Although the Company's derivative arrangements do not specifically identify whether the derivative counterparty retains the underlying asset, liability or equity security, the Company has disclosed information regarding all derivative contracts that could meet the accounting definition of a guarantee. The maximum potential payout for certain derivative contracts, such as written interest rate caps and written foreign currency options, cannot be estimated, as increases in interest or foreign exchange rates in the future could possibly be unlimited. Therefore, in order to provide information regarding the maximum potential amount of future payments that the Company could be required to make under certain derivative contracts, the notional amount of the contracts has been disclosed.

The Company records all derivative contracts at fair value. Aggregate market risk limits have been established, and market risk measures are routinely monitored against these limits. The Company also manages its exposure to these derivative contracts through a variety of risk mitigation strategies, including, but not limited to, entering into offsetting economic hedge positions. The Company believes that the notional amounts of the derivative contracts generally overstate its exposure.

Standby Letters of Credit and other Financial Guarantees Issued. In connection with its corporate lending business and other corporate activities, the Company provides standby letters of credit and other financial guarantees to counterparties. Such arrangements represent obligations to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing arrangement or other contractual obligation.

Market Value Guarantees. Market value guarantees are issued to guarantee return of principal invested to fund investors associated with certain European equity funds and to guarantee timely payment of a specified return to investors in certain affordable housing tax credit funds. The guarantees associated with certain European equity funds are designed to provide for any shortfall between the market value of the underlying fund assets and invested principal and a stipulated return amount. The guarantees provided to investors in certain affordable housing tax credit funds are designed to return an investor's contribution to a fund and the investor's share of tax losses and tax credits expected to be generated by a fund.

Liquidity Facilities. The Company has entered into liquidity facilities with SPEs and other counterparties, whereby the Company is required to make certain payments if losses or defaults occur. Primarily, the Company acts as liquidity provider to municipal bond securitization SPEs and for standalone municipal bonds in which the holders of beneficial interests issued by these SPEs or the holders of the individual bonds, respectively, have the right to tender their interests for purchase by the Company on specified dates at a specified price. The Company often may have recourse to the underlying assets held by the SPEs in the event payments are required under such liquidity facilities as well as make-whole or recourse provisions with the trust sponsors.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

General Partner Guarantees. As a general partner in certain private equity and real estate partnerships, the Company receives distributions from the partnerships according to the provisions of the partnership agreements. The Company may, from time to time, be required to return all or a portion of such distributions to the limited partners in the event the limited partners do not achieve a certain return as specified in various partnership agreements, subject to certain limitations.

Other Guarantees and Indemnities.

In the normal course of business, the Company provides a variety of other guarantees and indemnifications, which are described below.

Trust Preferred Securities. The Company has established Morgan Stanley Trusts for the limited purpose of issuing trust preferred securities to third parties and lending the proceeds to the Company in exchange for junior subordinated debentures. The Company has directly guaranteed the repayment of the trust preferred securities to the holders thereof to the extent that the Company has made payments to a Morgan Stanley Trust on the junior subordinated debentures. In the event that the Company does not make payments to a Morgan Stanley Trust, holders of such series of trust preferred securities would not be able to rely upon the guarantee for payment of those amounts. The Company has not recorded any liability in the condensed consolidated financial statements for these guarantees and believes that the occurrence of any events (*i.e.*, nonperformance on the part of the paying agent) that would trigger payments under these contracts is remote. See Note 13 to the consolidated financial statements for the fiscal year ended November 30, 2007 included in the Form 10-K for details on the Company's junior subordinated debentures.

Indemnities. The Company provides standard indemnities to counterparties for certain contingent exposures and taxes, including U.S. and foreign withholding taxes, on interest and other payments made on derivatives, securities and stock lending transactions, certain annuity products and other financial arrangements. These indemnity payments could be required based on a change in the tax laws or change in interpretation of applicable tax rulings or a change in factual circumstances. Certain contracts contain provisions that enable the Company to terminate the agreement upon the occurrence of such events. The maximum potential amount of future payments that the Company could be required to make under these indemnifications cannot be estimated. The Company has not recorded any contingent liability in the condensed consolidated financial statements for these indemnifications and believes that the occurrence of any events that would trigger payments under these contracts is remote.

Exchange/Clearinghouse Member Guarantees. The Company is a member of various U.S. and non-U.S. exchanges and clearinghouses that trade and clear securities and/or futures contracts. Associated with its membership, the Company may be required to pay a proportionate share of the financial obligations of another member who may default on its obligations to the exchange or the clearinghouse. While the rules governing different exchange or clearinghouse memberships vary, in general the Company's guarantee obligations would arise only if the exchange or clearinghouse had previously exhausted its resources. Any potential contingent liability under these membership agreements cannot be estimated. The Company has not recorded any contingent liability in the condensed consolidated financial statements for these agreements and believes that any potential requirement to make payments under these agreements is remote.

Securitized Asset Guarantees. As part of the Company's Institutional Securities securitization activities, the Company provides representations and warranties that certain securitized assets conform to specified guidelines. The Company may be required to repurchase such assets or indemnify the purchaser against losses if the assets do not meet certain conforming guidelines. Due diligence is performed by the Company to ensure that asset guideline qualifications are met, and, to the extent the Company has acquired such assets to be securitized from other parties, the Company seeks to obtain its own representations and warranties regarding the assets. The

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

maximum potential amount of future payments the Company could be required to make would be equal to the current outstanding balances of all assets subject to such securitization activities. Also, in connection with originations of residential mortgage loans under the Company's FlexSource® program, the Company may permit borrowers to pledge marketable securities as collateral instead of requiring cash down payments for the purchase of the underlying residential property. Upon sale of the residential mortgage loans, the Company may provide a surety bond that reimburses the purchasers for shortfalls in the borrowers' securities accounts up to certain limits if the collateral maintained in the securities accounts (along with the associated real estate collateral) is insufficient to cover losses that purchasers experience as a result of defaults by borrowers on the underlying residential mortgage loans. The Company requires the borrowers to meet daily collateral calls to ensure the marketable securities pledged in lieu of a cash down payment are sufficient. At February 29, 2008 and November 30, 2007, the maximum potential amount of future payments the Company may be required to make under its surety bond was \$133 million and \$122 million, respectively. The Company has not recorded any contingent liability in the condensed consolidated financial statements for these representations and warranties and reimbursement agreements and believes that the probability of any payments under these arrangements is remote.

Merger and Acquisition Guarantees. The Company may, from time to time, in its role as investment banking advisor be required to provide guarantees in connection with certain European merger and acquisition transactions. If required by the regulating authorities, the Company provides a guarantee that the acquirer in the merger and acquisition transaction has or will have sufficient funds to complete the transaction and would then be required to make the acquisition payments in the event the acquirer's funds are insufficient at the completion date of the transaction. These arrangements generally cover the time frame from the transaction offer date to its closing date and, therefore, are generally short term in nature. The maximum potential amount of future payments that the Company could be required to make cannot be estimated. The Company believes the likelihood of any payment by the Company under these arrangements is remote given the level of the Company's due diligence associated with its role as investment banking advisor.

Contingencies.

Legal. In the normal course of business, the Company has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a global diversified financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or in financial distress.

The Company is also involved, from time to time, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding the Company's business, including, among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

The Company contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, the Company cannot predict with certainty the loss or range of loss, if any, related to such matters, how or if such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, fine, penalty or other relief, if any, might be. Subject to the foregoing, the Company believes, based on current knowledge and

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

after consultation with counsel, that the outcome of such pending matters will not have a material adverse effect on the condensed consolidated financial condition of the Company, although the outcome of such matters could be material to the Company's operating results and cash flows for a particular future period, depending on, among other things, the level of the Company's revenues or income for such period. Legal reserves have been established in accordance with SFAS No. 5, "Accounting for Contingencies" ("SFAS No. 5"). Once established, reserves are adjusted when there is more information available or when an event occurs requiring a change.

9. Shareholders' Equity.

Regulatory Requirements. MS&Co. is a registered broker-dealer and registered futures commission merchant and, accordingly, subject to the minimum net capital requirements of the Securities and Exchange Commission (the "SEC"), the Financial Industry Regulatory Authority and the Commodity Futures Trading Commission. MS&Co. has consistently operated in excess of these requirements. MS&Co.'s net capital totaled \$9,131 million at February 29, 2008, which exceeded the amount required by \$6,866 million. MSIP, a London-based broker-dealer subsidiary, is subject to the capital requirements of the Financial Services Authority, and MSJS, a Tokyo-based broker-dealer subsidiary, is subject to the capital requirements of the Financial Services Agency. MSIP and MSJS consistently operated in excess of their respective regulatory capital requirements.

Under regulatory capital requirements adopted by the Federal Deposit Insurance Corporation (the "FDIC") and other bank regulatory agencies, FDIC-insured financial institutions must maintain (a) 3% to 4% of Tier 1 capital, as defined, to average assets ("leverage ratio"), (b) 4% of Tier 1 capital, as defined, to risk-weighted assets ("Tier 1 risk-weighted capital ratio") and (c) 8% of total capital, as defined, to risk-weighted assets ("total risk-weighted capital ratio"). At February 29, 2008, the leverage ratio, Tier 1 risk-weighted capital ratio and total risk-weighted capital ratio of each of the Company's FDIC-insured financial institutions exceeded these regulatory minimums.

Certain other U.S. and non-U.S. subsidiaries are subject to various securities, commodities and banking regulations, and capital adequacy requirements promulgated by the regulatory and exchange authorities of the countries in which they operate. These subsidiaries have consistently operated in excess of their local capital adequacy requirements.

Morgan Stanley Derivative Products Inc. ("MSDP") and Cournot Financial Products LLC ("Cournot"), which are triple-A rated derivative products subsidiaries, maintain certain operating restrictions that have been reviewed by various rating agencies. Both entities are operated such that creditors of the Company should not expect to have any claims on either the assets of MSDP or the assets of Cournot, unless and until the obligations of such entity to its own creditors are satisfied in full. Creditors of MSDP or Cournot, respectively, should not expect to have any claims on the assets of the Company or any of its affiliates, other than the respective assets of MSDP or Cournot.

The Company is a consolidated supervised entity ("CSE") as defined by the SEC. As such, the Company is subject to group-wide supervision and examination by the SEC and to minimum capital requirements on a consolidated basis. As of February 29, 2008, the Company was in compliance with the CSE capital requirements.

MS&Co. is required to hold tentative net capital in excess of \$1 billion and net capital in excess of \$500 million in accordance with the market and credit risk standards of Appendix E of Rule 15c3-1. MS&Co. is also required to notify the SEC in the event that its tentative net capital is less than \$5 billion. As of February 29, 2008, MS&Co. had tentative net capital in excess of the minimum and the notification requirements.

Treasury Shares. During the quarter ended February 29, 2008, the Company did not purchase any of its common stock through the open market share repurchase program. During the quarter ended February 28, 2007, the Company purchased approximately \$1.2 billion of its common stock through open market purchases at an average cost of \$82.02 per share.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued) (UNAUDITED)

China Investment Corporation Investment. In December 2007, the Company sold Equity Units which included contracts to purchase Company common stock to a wholly owned subsidiary of China Investment Corporation (“CIC”), for approximately \$5,579 million. CIC’s ownership in the Company’s common stock, including the maximum number of shares of common stock to be received by CIC upon settlement of the stock purchase contracts, will be 9.9% or less of the Company’s total shares outstanding based on the total shares that were outstanding on November 30, 2007. CIC is a passive financial investor and has no special rights of ownership nor a role in the management of the Company. A substantial portion of the investment proceeds were treated as Tier 1 capital for regulatory capital purposes.

The present value of the future contract adjustment payments due under the stock purchase contracts was approximately \$400 million and was recorded in Other liabilities and accrued expenses with a corresponding decrease recorded in Paid-in capital, a component of Shareholders’ equity in the Company’s condensed consolidated statement of financial condition in the first quarter of fiscal 2008. The other liability balance related to the stock purchase contracts will accrete over the term of the stock purchase contract using the effective yield method with a corresponding charge to Interest expense. When the contract adjustment payments are made under the stock purchase contracts, they will reduce the other liability balance.

For a more detailed summary of the Equity Units, including the junior subordinated debentures issued to support trust common and trust preferred securities and the stock purchase contracts, refer to Note 28 to the consolidated financial statements for the fiscal year ended November 30, 2007 included in the Form 10-K.

Prior to the issuance of common stock upon settlement of the stock purchase contract, the impact of the Equity Units are reflected in the Company’s earnings per diluted common share using the treasury stock method, as defined by SFAS No. 128, “Earnings Per Share.” Under the treasury stock method, the number of shares of common stock included in the calculation of earnings per diluted common share are calculated as the excess, if any, of the number of shares expected to be issued upon settlement of the stock purchase contract based on the average market price for the last 20 days of the reporting period, less the number of shares that could be purchased by the Company with the proceeds to be received upon settlement of the contract at the average closing price for the reporting period.

Dilution of net income per share occurs (i) in reporting periods when the average closing price of common shares is over \$57.6840 per share or (ii) in reporting periods when the average closing price of common shares for a reporting period is between \$48.0700 and \$57.6840 and is greater than the average market price for the last 20 days ending three days prior to the end of such reporting period.

The dilutive impact for the first quarter of fiscal 2008 was approximately 256,000 shares.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

10. Earnings per Common Share.

Basic earnings per share (“EPS”) is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of all dilutive securities. The following table presents the calculation of basic and diluted EPS (in millions, except for per share data):

	<u>Three Months Ended</u>	
	<u>February 29, 2008</u>	<u>February 28, 2007</u>
Basic EPS:		
Income from continuing operations	\$1,551	\$2,314
Gain on discontinued operations, net	—	358
Preferred stock dividend requirements	(17)	(17)
Net income applicable to common shareholders	<u>\$1,534</u>	<u>\$2,655</u>
Weighted average common shares outstanding	<u>1,021</u>	<u>1,009</u>
Earnings per basic common share:		
Income from continuing operations	\$ 1.50	\$ 2.28
Gain on discontinued operations	—	0.35
Earnings per basic common share	<u>\$ 1.50</u>	<u>\$ 2.63</u>
Diluted EPS:		
Net income applicable to common shareholders	<u>\$1,534</u>	<u>\$2,655</u>
Weighted average common shares outstanding	1,021	1,009
Effect of dilutive securities:		
Stock options and restricted stock units	37	49
Weighted average common shares outstanding and common stock equivalents	<u>1,058</u>	<u>1,058</u>
Earnings per diluted common share:		
Income from continuing operations	\$ 1.45	\$ 2.17
Gain on discontinued operations	—	0.34
Earnings per diluted common share	<u>\$ 1.45</u>	<u>\$ 2.51</u>

The following securities were considered antidilutive and, therefore, were excluded from the computation of diluted EPS:

	<u>Three Months Ended</u>	
	<u>February 29, 2008</u>	<u>February 28, 2007</u>
	(shares in millions)	
Number of antidilutive securities (including stock options and restricted stock units) outstanding at end of period	60	16

Cash dividends declared per common share were \$0.27 for the quarters ended February 29, 2008 and February 28, 2007.

For information on the dilutive impact related to CIC, see Note 9.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

11. Employee Benefit Plans.

The Company maintains various pension and benefit plans for eligible employees.

The components of the Company’s net periodic benefit expense for its pension and postretirement plans were as follows:

	Three Months Ended	
	February 29, 2008	February 28, 2007
	(dollars in millions)	
Service cost, benefits earned during the period	\$ 28	\$ 29
Interest cost on projected benefit obligation	36	33
Expected return on plan assets	(33)	(31)
Net amortization of actuarial loss	8	10
Net amortization of prior-service credit	(2)	(2)
Net periodic benefit expense	\$ 37	\$ 39

12. Income Taxes.

The Company adopted FIN 48 on December 1, 2007 and recorded a cumulative effect adjustment of approximately \$92 million as a decrease to the opening balance of Retained earnings as of December 1, 2007.

The total amount of unrecognized tax benefits as of the date of adoption of FIN 48 was approximately \$2.7 billion. Of this total, approximately \$1.7 billion (net of federal benefit of state issues, competent authority and foreign tax credit offsets) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate in future periods.

The Company recognizes the accrual of interest related to unrecognized tax benefits in Provision for income taxes in the condensed consolidated statements of income. The Company recognizes the accrual of penalties (if any) related to unrecognized tax benefits in income before income taxes. Interest expense included in income taxes as of December 1, 2007 was approximately \$223 million, net of federal and state income tax benefits. The amount of penalties accrued is immaterial.

It is reasonably possible that significant changes in the gross balance of unrecognized tax benefits may occur within the next twelve months. It is difficult to estimate the range of such changes; however, the Company does not expect that any change in the gross balance of unrecognized tax benefits would have a material impact on its effective tax rate over the next twelve months.

The Company is under continuous examination by the Internal Revenue Service (the “IRS”) and other tax authorities in certain countries, such as Japan and the United Kingdom, and states in which the Company has significant business operations, such as New York. The Company regularly assesses the likelihood of additional assessments in each of the taxing jurisdictions resulting from these and subsequent years’ examinations. The Company has established unrecognized tax benefits that the Company believes are adequate in relation to the potential for additional assessments. Once established, the Company adjusts unrecognized tax benefits only when more information is available or when an event occurs necessitating a change. The Company believes that the resolution of tax matters will not have a material effect on the condensed consolidated statements of financial condition of the Company, although a resolution could have a material impact on the Company’s condensed consolidated statements of income for a particular future period and on the Company’s effective income tax rate for any period in which such resolution occurs.

MORGAN STANLEY

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)**

The following are the major tax jurisdictions in which the Company and its affiliates operate and the earliest tax year subject to examination:

<u>Jurisdiction</u>	<u>Tax Year</u>
United States	1999
New York State and City	2002
Hong Kong	2001
United Kingdom	2004
Japan	2004

13. Segment Information.

The Company structures its segments primarily based upon the nature of the financial products and services provided to customers and the Company’s management organization. The Company provides a wide range of financial products and services to its customers in each of its business segments: Institutional Securities, Global Wealth Management Group and Asset Management. For further discussion of the Company’s business segments, see Note 1.

Revenues and expenses directly associated with each respective segment are included in determining their operating results. Other revenues and expenses that are not directly attributable to a particular segment are allocated based upon the Company’s allocation methodologies, generally based on each segment’s respective net revenues, non-interest expenses or other relevant measures.

As a result of treating certain intersegment transactions as transactions with external parties, the Company includes an Intersegment Eliminations category to reconcile the business segment results to the Company’s consolidated results. Income before taxes in Intersegment Eliminations primarily represents the effect of timing differences associated with the revenue and expense recognition of commissions paid by Asset Management to the Global Wealth Management Group associated with sales of certain products and the related compensation costs paid to the Global Wealth Management Group’s global representatives.

The Company operates in both U.S. and non-U.S. markets. The Company’s non-U.S. business activities are principally conducted through European and Asian locations. The following table presents selected income statement information of the Company’s operations by geographic area. The net revenues disclosed in the following table reflect the regional view of the Company’s consolidated net revenues, on a managed basis, based on the following methodology:

- Institutional Securities: investment banking—client location, equity capital markets—client location, debt capital markets—revenue recording location, sales & trading—trading desk location.
- Global Wealth Management Group: global representative coverage location.
- Asset Management: client location, except for the merchant banking business, which is based on asset location.

<u>Net Revenues</u>	<u>Americas</u>	<u>Europe, Middle East and Africa</u>	<u>Asia</u>	<u>Total</u>
		(dollars in millions)		
Three Months Ended February 29, 2008	\$3,823	\$3,267	\$1,232	\$8,322
Three Months Ended February 28, 2007	6,072	2,702	1,220	9,994

14. Discontinued Operations.

Discover. On June 30, 2007, the Company completed the Discover Spin-off. The Company distributed all of the outstanding shares of DFS common stock, par value \$0.01 per share, to the Company’s stockholders of record as of June 18, 2007. The results of DFS prior to the Discover Spin-off are included within discontinued operations for the three months ended February 28, 2007.

Net revenues included in discontinued operations related to DFS were \$1,025 million for the three months ended February 28, 2007.

The results of discontinued operations include interest expense that was allocated based upon borrowings that were specifically attributable to DFS’ operations through intercompany transactions existing prior to the Discover Spin-off. For the three months ended February 28, 2007, the amount of interest expense reclassified to discontinued operations was approximately \$88 million.

Quilter. On February 28, 2007, the Company sold Quilter, its standalone U.K. mass affluent business that was formerly included within the Global Wealth Management Group business segment. The results of Quilter are included within discontinued operations for the three months ended February 28, 2007. The results for discontinued operations in the quarter ended February 28, 2007 also included a pre-tax gain of \$168 million (\$109 million after-tax) on disposition.

MORGAN STANLEY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(UNAUDITED)

Summarized financial information for the Company's discontinued operations:

The table below provides information regarding amounts included within discontinued operations for the three months ended February 28, 2007 (dollars in millions):

Pre-tax gain on discontinued operations	
DFS	\$390
Quilter	<u>174</u>
	<u>\$564</u>

15. Business Disposition.

Morgan Stanley Wealth Management S.V., S.A.U. On January 28, 2008, the Company announced that it had reached an agreement to sell Morgan Stanley Wealth Management S.V., S.A.U. ("MSWM"), its Spanish onshore mass affluent wealth management business. The transaction closed during the second quarter of fiscal 2008. The results of MSWM are included within the Global Wealth Management Group business segment.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Morgan Stanley:

We have reviewed the accompanying condensed consolidated statement of financial condition of Morgan Stanley and subsidiaries (the “Company”) as of February 29, 2008, and the related condensed consolidated statements of income, comprehensive income and cash flows for the three-month periods ended February 29, 2008 and February 28, 2007. These interim financial statements are the responsibility of the management of the Company.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial condition of the Company as of November 30, 2007, and the related consolidated statements of income, comprehensive income, cash flows and changes in shareholders’ equity for the fiscal year then ended (not presented herein) included in Morgan Stanley’s Annual Report on Form 10-K; and in our report dated January 28, 2008, which report contains an explanatory paragraph relating to the adoption, in fiscal 2005, of Statement of Financial Accounting Standards (“SFAS”) No. 123(R), “Share-Based Payment” and effective December 1, 2005, the change in accounting policy for recognition of equity awards granted to retirement-eligible employees, an explanatory paragraph relating to, in fiscal 2006, the application of Staff Accounting Bulletin No. 108, “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements,” an explanatory paragraph relating to the adoption, in fiscal 2007, of SFAS No. 157, “Fair Value Measurements” and SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115” and an explanatory paragraph relating to the adoption, in fiscal 2007, of SFAS No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R),” we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial condition as of November 30, 2007 is fairly stated, in all material respects, in relation to the consolidated statement of financial condition from which it has been derived.

As discussed in Note 1 and in Note 12 to the condensed consolidated interim financial statements, effective December 1, 2007, the Company adopted FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109.”

/s/ Deloitte & Touche LLP

New York, New York

April 7, 2008

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Introduction.

Morgan Stanley (the “Company”) is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Global Wealth Management Group and Asset Management. The Company, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. A summary of the activities of each of the segments follows.

Institutional Securities includes capital raising; financial advisory services, including advice on mergers and acquisitions, restructurings, real estate and project finance; corporate lending; sales, trading, financing and market-making activities in equity and fixed income securities and related products, including foreign exchange and commodities; benchmark indices and risk management analytics; research; and investment activities.

Global Wealth Management Group provides brokerage and investment advisory services covering various investment alternatives; financial and wealth planning services; annuity and other insurance products; credit and other lending products; cash management services; retirement services; and trust and fiduciary services.

Asset Management provides global asset management products and services in equity, fixed income, alternative investments, which includes hedge funds and funds of funds, and merchant banking, which includes real estate, private equity and infrastructure, to institutional and retail clients through proprietary and third-party distribution channels. Asset Management also engages in investment activities.

The discussion of the Company’s results of operations below may contain forward-looking statements. These statements, which reflect management’s beliefs and expectations, are subject to risks and uncertainties that may cause actual results to differ materially. For a discussion of the risks and uncertainties that may affect the Company’s future results, please see “Forward-Looking Statements” immediately preceding Part I, Item 1, “Competition” and “Regulation” in Part I, Item 1, “Risk Factors” in Part I, Item 1A and “Certain Factors Affecting Results of Operations” in Part II, Item 7 and other items throughout the Company’s Annual Report on Form 10-K for the fiscal year ended November 30, 2007 (the “Form 10-K”) and the Company’s 2008 Current Reports on Form 8-K.

The Company’s results of operations for the three month periods ended February 29, 2008 and February 28, 2007 are discussed below.

Discontinued Operations.

On June 30, 2007, the Company completed the spin-off (the “Discover Spin-off”) of Discover Financial Services (“DFS”) to its shareholders. DFS’ results are included within discontinued operations for the first quarter of fiscal 2007. The results of Quilter Holdings Ltd. (“Quilter”), Global Wealth Management Group’s former mass affluent business in the U.K., are also reported as discontinued operations for the first quarter of fiscal 2007. See Note 14 to the condensed consolidated financial statements.

Results of Operations.

Executive Summary.

Financial Information.

	As of or for the Three Months Ended	
	February 29, 2008	February 28, 2007
Net revenues (dollars in millions):

N/M – Not Meaningful

- (1) Amounts represent income from continuing operations before gains (losses) from unconsolidated investees, income taxes and gain from discontinued operations.
- (2) Earnings applicable to common shareholders are used to calculate earnings per share information. The three months ended February 29, 2008 and February 28, 2007 reflect a preferred stock dividend of \$17 million.
- (3) Reflects the regional view of the Company's consolidated net revenues, on a managed basis, based on the following methodology:
Institutional Securities: investment banking—client location, equity capital markets—client location, debt capital markets—revenue recording location, sales and trading—trading desk location. Global Wealth Management Group: global representative coverage location. Asset Management: client location, except for the merchant banking business, which is based on asset location.
- (4) Book value per common share equals common shareholders' equity of \$32,180 million at February 29, 2008 and \$36,854 million at February 28, 2007, divided by common shares outstanding of 1,105 million at February 29, 2008 and 1,062 million at February 28, 2007.
- (5) The computation of average common equity for each business segment is based upon an economic capital framework that estimates the amount of equity capital required to support the businesses over a wide range of market environments while simultaneously satisfying regulatory, rating agency and investor requirements. The economic capital framework will evolve over time in response to changes in the business and regulatory environment and to improvements in modeling techniques. The effective tax rates used in the computation of segment return on average common equity were determined on a separate entity basis.
- (6) Amounts reported for Alternatives include the Company's invested equity in those funds and include a range of alternative investment products such as real estate funds, hedge funds, private equity funds, funds of hedge funds and funds of private equity funds.
- (7) Amounts include assets under management or supervision associated with the Global Wealth Management Group business segment.
- (8) Revenues and expenses associated with these assets are included in the Company's Asset Management, Global Wealth Management Group and Institutional Securities business segments.
- (9) Amounts represent Asset Management's proportional share of assets managed by entities in which it owns a minority interest.
- (10) Source: Thomson Financial, data as of March 5, 2008—The data for the three months ended February 29, 2008 and February 28, 2007 are for the periods from January 1 to February 29, 2008 and January 1 to February 28, 2007, respectively, as Thomson Financial presents these data on a calendar-year basis.
- (11) Percentages represent income from continuing operations before losses from unconsolidated investees and income taxes, as a percentage of net revenues.
- (12) Annualized net revenue per global representative amounts equal Global Wealth Management Group's net revenues divided by the quarterly average global representative headcount for the periods presented.

- (13) The decline in fee-based assets as a percent of total client assets largely reflected the termination on October 1, 2007 of the Company's fee-based (fee-in-lieu of commission) brokerage program pursuant to a court decision vacating a Securities and Exchange Commission ("SEC") rule that permitted fee-based brokerage. Client assets that were in the fee-based program primarily moved to commission-based brokerage accounts, or at the election of some clients, into other fee-based advisory programs, including Morgan Stanley Advisory, a new nondiscretionary account launched in August 2007.
- (14) Client assets per global representative equal total period-end client assets divided by period-end global representative headcount.
- (15) Bank deposits are held at certain of the Company's Federal Deposit Insurance Corporation (the "FDIC") insured depository institutions for the benefit of retail clients through their accounts.
- (16) Amounts include Asset Management's proportional share of assets managed by entities in which it owns a minority interest.
- (17) Source: Lipper, one-year performance excluding money market funds as of February 29, 2008 and February 28, 2007, respectively.

First Quarter 2008 Performance.

Company Results. The Company recorded net income of \$1,551 million in the quarter ended February 29, 2008, a 42% decrease from the comparable fiscal 2007 period. Net revenues (total revenues less interest expense) declined 17% to \$8,322 million. Non-interest expenses of \$6,108 million, including severance expense of approximately \$161 million related to staff reductions, decreased 7% from the first quarter of last year primarily due to lower compensation and benefits costs. Diluted earnings per share were \$1.45 compared with \$2.51 in last year's first quarter. Compensation and benefits expense decreased 15%, primarily reflecting lower incentive-based compensation accruals due to lower net revenues in the Company's Institutional Securities and Asset Management business segments. Diluted earnings per share from continuing operations were \$1.45 compared with \$2.17 in last year's first quarter. The annualized return on average common equity was 19.7% compared with 29.9% in the first quarter of last year. The return on average common equity from continuing operations was 19.7% compared with 30.9% in the first quarter of last year.

Results for the first quarter of fiscal 2007 included a gain of \$168 million (\$109 million after-tax) in discontinued operations related to the sale of Quilter on February 28, 2007 (see Note 14 to the condensed consolidated financial statements).

The Company's effective income tax rate from continuing operations was 30.0% for the first quarter of fiscal 2008 compared with 32.5% for the first quarter of fiscal 2007. The decrease primarily reflected a change in the geographic mix of earnings, partially offset by an increase in the rate due to lower domestic tax credits.

In December 2007, the Company sold equity units (the "Equity Units") to a wholly owned subsidiary of the China Investment Corporation Ltd. ("CIC") for approximately \$5,579 million (see "Liquidity and Capital Resources—China Investment Corporation Investment" herein).

At February 29, 2008, the Company had 47,050 employees worldwide compared with 44,797 (excluding DFS employees) at the end of the first quarter of last year and 48,256 at November 30, 2007.

Institutional Securities. Institutional Securities recorded income from continuing operations before gains (losses) from unconsolidated investees and income taxes of \$2,117 million, a 26% decrease from last year's first quarter. Net revenues declined 13% to \$6,213 million as lower results in fixed income sales and trading and underwriting transactions more than offset record results in equity sales and trading. Non-interest expenses decreased 5% to \$4,096 million from last year's first quarter, reflecting lower compensation costs, partially offset by higher costs associated with higher levels of business activity.

Investment banking revenues decreased 5% from the first quarter of fiscal 2007 to \$980 million. Underwriting revenues decreased 19% to \$536 million due to a decline in market activity. Advisory fees from merger, acquisition and restructuring transactions were \$444 million, an increase of 19% from the comparable period of fiscal 2007, reflecting higher revenues from completed transactions.

Equity sales and trading revenues increased 51% to a record \$3,329 million. Strong trading results in a volatile market coupled with increased customer flows contributed to record results in derivatives and higher revenues in cash equity products. Prime brokerage also generated record net revenues for the quarter. Equity sales and

trading revenues also benefited by approximately \$321 million from the widening of the Company's credit spreads on certain long-term and short-term borrowings that are accounted for at fair value. Fixed income sales and trading revenues were \$2,907 million, 15% below the record \$3,430 million in the first quarter of fiscal 2007, as record revenues in interest rate, credit and currency products and higher revenues from commodities products were partially offset by net writedowns on mortgage proprietary trading products. Interest rate, credit and currency trading products generated higher revenues from strong customer flows and higher levels of volatility, and emerging markets generated record revenues. Credit trading also benefited from favorable positioning as credit spreads widened during the quarter. Commodities revenues benefited from strong customer flows and were higher than last year's first quarter as higher trading revenues in agricultural products and oil liquids were partly offset by lower revenues in electricity and natural gas products. Fixed income sales and trading also benefited by approximately \$527 million from widening of the Company's credit spreads on certain long-term and short-term borrowings that are accounted for at fair value.

In the first quarter of fiscal 2008, other sales and trading losses of \$1,102 million reflected writedowns on loans and commitments largely related to "event-driven" lending transactions to non-investment grade companies and the writedown of mortgage-related securities portfolios in the Company's domestic subsidiary banks (see "Impact of Credit Market Events" herein).

Principal transaction net investment losses aggregating \$141 million were recognized in the quarter ended February 29, 2008 as compared with net investment gains of \$350 million in the quarter ended February 28, 2007. The decrease was primarily related to net losses from the Company's investments in passive limited partnership interests associated with the Company's real estate funds and investments related to certain employee deferred compensation and co-investment plans.

Global Wealth Management Group. Global Wealth Management Group recorded income from continuing operations before income taxes of \$254 million, up 12% from the first quarter of fiscal 2007. Net revenues were \$1,606 million, a 6% increase from last year's first quarter, primarily reflecting higher net interest revenue from growth in the bank deposit program and higher client activity. Total non-interest expenses were \$1,352 million, a 5% increase from last year's first quarter. Compensation and benefits expense increased 10%, primarily reflecting higher incentive-based compensation accruals due to higher net revenues and severance-related expenses. Non-compensation costs decreased 7%, as higher levels of business activity were more than offset by a change in the classification of sub-advisory fees due to modifications of certain customer agreements. Total client assets increased to \$722 billion, a 5% increase from last year's first quarter. In addition, client assets in fee-based accounts decreased 8% from last year's first quarter to \$185 billion and decreased as a percentage of total client assets to 26% from 29%. The decline in fee-based assets as a percent of total client assets largely reflected the termination on October 1, 2007 of the Company's fee-based (fee-in-lieu of commission) brokerage program pursuant to a court decision vacating an SEC rule that permitted fee-based brokerage. At February 29, 2008, the number of global representatives was 8,456, an increase of 463 from a year ago.

Asset Management. Asset Management recorded a loss before income taxes of \$161 million in the first quarter of fiscal 2008 as compared with income before income taxes of \$379 million in the first quarter of last year. Net revenues of \$543 million decreased 60% from last year's first quarter, primarily due to principal transaction net investment losses in real estate, including those associated with deferred compensation and co-investment plans, as compared with net gains recorded in the first quarter of fiscal 2007. The current quarter also included principal transaction trading losses of approximately \$187 million related to securities issued by structured investment vehicles. These decreases were partly offset by higher asset management, distribution and administration fees resulting primarily from an increase in assets under management and a more favorable asset mix. Non-interest expenses decreased 29% to \$704 million from last year's first quarter. Compensation and benefits expense decreased primarily due to lower net revenues and lower expenses associated with the Company's employee deferred compensation plans. Non-compensation expenses increased from a year ago reflecting higher levels of business activity. Assets under management or supervision within Asset Management of \$577 billion were up \$56 billion, or 11%, from a year ago, primarily driven by increases in the alternative and money market asset classes related to positive net customer inflows.

Global Market and Economic Conditions in the Quarter Ended February 29, 2008.

In the U.S., the slowdown of economic growth that occurred during the second half of fiscal 2007 continued during the first quarter of fiscal 2008. Significant and broad-based illiquidity in the residential real estate and credit markets continued to stress financial markets. Continued concerns about the impact of subprime loans caused the subprime-related and broader credit markets to deteriorate further over the course of the quarter. The U.S. unemployment rate at the end of the first quarter of fiscal 2008 increased to 4.8% from 4.7% at the end of fiscal 2007. During the quarter, the U.S. dollar weakened against most major currencies. Conditions in the U.S. equity markets were also volatile and major equity market indices declined during the quarter, primarily as a result of concerns about future economic growth, record oil prices, lower consumer sentiment, the adverse developments in the credit markets and mixed corporate earnings. The Federal Reserve Board (the "Fed") lowered both the benchmark interest rate and discount rate by an aggregate of 1.50% during the first quarter of fiscal 2008, including an unscheduled 0.75% interest rate reduction in January 2008. The Fed acted to continue to provide additional liquidity and stability to the financial markets and to contain the negative economic impact related to the residential real estate and credit markets. Although providing liquidity and stability to the financial markets is a primary objective, the Fed also remains concerned about inflationary pressures. Subsequent to quarter end, the Fed lowered both the benchmark interest rate and discount rate by an additional 0.75% in order to provide increased liquidity to the financial markets. In March 2008, the Fed also announced new lending facilities, which are now available to primary broker-dealers in an additional effort to restore liquidity within the securities industry. Also in March 2008, the Fed lowered the primary credit rate by 0.25%. The Fed continues to consult frequently with its central bank counterparts in Europe and North America to address liquidity pressures within the capital markets.

In Europe, the strong pace of economic growth that occurred in fiscal 2007 showed signs of slowing during the first quarter of fiscal 2008 as export demand decreased, the Euro strengthened against the U.S. dollar and the disruption in the global financial markets continued. Major equity market indices in Europe decreased during the first quarter of fiscal 2008, primarily due to concerns about the economic outlook and difficult conditions in the credit markets. The European Central Bank left the benchmark interest rate unchanged during the first quarter of fiscal 2008, while the Bank of England reduced the benchmark interest rate by an aggregate of 0.50%.

In Japan, economic growth moderated as demand for exports were adversely impacted by a stronger Japanese yen against the U.S. dollar. The level of unemployment remained relatively low. Japanese equity market indices decreased during the first quarter of fiscal 2008 amid tighter global credit conditions. The Bank of Japan left the benchmark interest rate unchanged during the first quarter of fiscal 2008. Economies elsewhere in Asia expanded, particularly in China, which benefited from strength in exports, domestic demand for capital projects and continued globalization. In China, equity market indices declined during the first quarter of fiscal 2008. In addition, the People's Bank of China raised the benchmark lending rate by 0.18%.

Business Segments.

The remainder of "Results of Operations" is presented on a business segment basis before discontinued operations. Substantially all of the Company's operating revenues and operating expenses can be directly attributed to its business segments. Certain revenues and expenses have been allocated to each business segment, generally in proportion to its respective net revenues, non-interest expenses or other relevant measures.

As a result of treating certain intersegment transactions as transactions with external parties, the Company includes an Intersegment Eliminations category to reconcile the business segment results to the Company's consolidated results. Income before taxes in Intersegment Eliminations primarily represents the effect of timing differences associated with the revenue and expense recognition of commissions paid by Asset Management to the Global Wealth Management Group associated with sales of certain products and the related compensation costs paid to the Global Wealth Management Group's global representatives. Income before taxes recorded in Intersegment Eliminations was \$4 million in the quarter ended February 29, 2008 and \$6 million in the quarter ended February 28, 2007.

Income from continuing operations	<u>\$ 1,492</u>	<u>\$ 1,941</u>

Investment Banking. Investment banking revenues for the quarter ended February 29, 2008 decreased 5% from the comparable period of fiscal 2007. The decrease was due to lower revenues from fixed income and equity underwriting transactions, partially offset by higher revenues from merger, acquisition and restructuring activities. Advisory fees from merger, acquisition and restructuring transactions were \$444 million, an increase of 19% from the comparable period of fiscal 2007, reflecting higher revenues from completed transactions. Underwriting revenues were \$536 million, a decrease of 19% from the comparable period of fiscal 2007. Equity underwriting revenues decreased 13% to \$261 million. Fixed income underwriting revenues decreased 23% to \$275 million. The decrease in underwriting activity was consistent with a decline in industry-wide activity.

At February 29, 2008, the backlog for investment banking transactions remained relatively robust given market conditions that continue to be challenging. The backlog of merger, acquisition and restructuring transactions and equity and fixed income underwriting transactions is subject to the risk that transactions may not be completed due to challenging or unforeseen economic and market conditions, adverse developments regarding one of the parties to the transaction, a failure to obtain required regulatory approval or a decision on the part of the parties involved not to pursue a transaction.

Sales and Trading. Sales and trading revenues are composed of principal transaction trading revenues, commissions and net interest revenues (expenses). In assessing the profitability of its sales and trading activities, the Company views principal trading, commissions and net interest revenues in the aggregate. In addition, decisions relating to principal transactions are based on an overall review of aggregate revenues and costs associated with each transaction or series of transactions. This review includes, among other things, an assessment of the potential gain or loss associated with a transaction, including any associated commissions, dividends, the interest income or expense associated with financing or hedging the Company's positions, and other related expenses.

Total sales and trading revenues decreased 7% from the comparable period of fiscal 2007. Lower fixed income sales and trading revenues and increased net losses from other sales and trading revenues were partially offset by record equity sales and trading revenues.

Sales and trading revenues include the following:

	Three Months Ended	
	February 29, 2008(1)	February 28, 2007(1)
	(dollars in millions)	
Equity	\$ 3,329	\$2,209
Fixed income	2,907	3,430
Other	<u>(1,102)</u>	<u>(89)</u>
Total sales and trading revenues	<u>\$ 5,134</u>	<u>\$5,550</u>

(1) Amounts include Principal transactions—trading, Commissions and Net interest revenues. Other sales and trading net revenues primarily include net losses from loans and closed pipeline commitments related to investment banking, corporate lending and other corporate activities.

Equity sales and trading revenues increased 51% to a record \$3,329 million. The increase was driven by record revenues from derivative products and prime brokerage and higher revenues from equity cash and financing products, partially offset by lower revenues from principal trading strategies. Revenues from derivative products and equity cash products benefited from strong customer flows and higher market volatility. Record prime brokerage revenues reflected continued growth in global client asset balances. Higher revenues from financing products were primarily due to higher commission revenues driven by strong market volumes. Equity sales and trading revenues also benefited from the widening of the Company’s credit spreads on financial instruments that are accounted for at fair value, including, but not limited to, those for which the fair value option was elected pursuant to Statement of Financial Accounting Standards (“SFAS”) No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities” (“SFAS No. 159”) on December 1, 2006 (see Note 2 to the condensed consolidated financial statements). Revenues included approximately \$321 million due to the widening of the Company’s credit spreads during the quarter resulting from the decrease in the fair value of certain of the Company’s long-term and short-term borrowings, such as structured notes, for which the fair value option was elected.

Fixed income sales and trading revenues were \$2,907 million, 15% lower than the first quarter of fiscal 2007. The first quarter of fiscal 2008 reflected record results in interest rate, credit and currency products and higher revenues from commodities, partially offset by losses in residential and commercial mortgage loan products. Writedowns on mortgage proprietary trading products of \$1.2 billion were primarily due to a broadening decline in the residential and commercial mortgage sector. The decline in the Company’s residential mortgage loan activities reflected the difficult market conditions, as well as continued concerns in the subprime mortgage loan sector. See “Impact of Credit Market Events” herein, detailing the Company’s direct U.S. subprime mortgage-related exposures at February 29, 2008.

Interest rate, credit and currency product revenues increased 46%, reflecting higher revenues from interest rate, credit and foreign exchange products and record revenues in emerging markets, partially offset by writedowns related to exposure to monoline insurers (see “Impact of Credit Market Events—Monoline Insurers” herein). Revenues from interest rate and credit trading products benefited from strong customer flows and higher levels of market volatility. Higher revenues from credit trading products also reflected favorable positioning as credit spreads widened during the first quarter of fiscal 2008. Commodity revenues benefited from strong customer flows and increased 25%, primarily due to higher trading results from agricultural products and oil liquids, partially offset by lower revenues from electricity and natural gas products. Fixed income sales and trading revenues also benefited from the widening of the Company’s credit spreads on financial instruments that are accounted for at fair value, including, but not limited to, those for which the fair value option was elected (see

Note 2 to the condensed consolidated financial statements). Revenues increased by approximately \$527 million due to the widening of the Company's credit spreads during the quarter resulting from the decrease in the fair value of certain of the Company's long-term and short-term borrowings, such as structured notes, for which the fair value option was elected.

In addition to the equity and fixed income sales and trading revenues discussed above, sales and trading revenues include the net revenues from the Company's corporate lending activities. In the first quarter of fiscal 2008, other sales and trading losses were \$1,102 million. Included in the \$1,102 million were net losses of approximately \$910 million (mark-to-market valuations of approximately \$2.1 billion, net of gains on hedges of approximately \$1.2 billion) associated with loans and commitments largely related to "event-driven" lending to non-investment grade companies and the writedown of securities in the Company's domestic subsidiary banks (see "Impact of Credit Market Events" herein). The losses included markdowns of leveraged loan commitments associated with acquisition financing transactions that were accepted by the borrower but not yet closed. These losses were primarily related to the illiquid market conditions that existed during the first quarter of fiscal 2008. The valuation of these commitments could change in future periods depending on, among other things, the extent that they are renegotiated or repriced or if the associated acquisition transaction does not occur. In addition, the Company's leveraged finance business originates and distributes loans and commitments and intends to distribute its current positions; however, this is taking longer than in the past. Widening credit spreads for non-investment grade loans could result in additional writedowns for these loans and commitments. The fair value measurement of loan commitments takes into account certain fee income that is attributable to the contingent commitment contract. For further information about the Company's corporate lending activities, see Item 3, "Quantitative and Qualitative Disclosures about Market Risk—Credit Risk."

Principal Transactions—Investments. Principal transaction net investment losses aggregating \$141 million were recognized in the quarter ended February 29, 2008 as compared with net investment gains of \$350 million in the quarter ended February 28, 2007. The decrease was primarily related to net losses from the Company's investments in passive limited partnership interests associated with the Company's real estate funds and investments related to certain employee deferred compensation and co-investment plans.

Other. Other revenues increased 2%. The increase was primarily attributable to higher sales of benchmark indices and risk management analytic products, partially offset by lower revenues related to the operation of pipelines, terminals and barges and the distribution of refined petroleum products associated with TransMontaigne and lower revenues associated with Saxon.

Non-Interest Expenses. Non-interest expenses decreased 5%, primarily reflecting a decrease in compensation and benefits expense, partially offset by higher non-compensation expenses. Compensation and benefits expense decreased 15%, primarily reflecting lower incentive-based compensation accruals due to lower net revenues, partially offset by severance-related expenses of \$130 million recorded in the first quarter of fiscal 2008. Excluding compensation and benefits expense, non-interest expenses increased 24%, reflecting increased levels of business activity. Brokerage, clearing and exchange fees increased 25%, primarily reflecting substantially increased equity and fixed income trading activity. Information processing and communications expense increased 15%, primarily due to higher market data and data processing costs. Marketing and business development expense increased 24%, primarily due to a higher level of business activity. Other expenses increased 66%, primarily reflecting higher regulatory and litigation costs.

GLOBAL WEALTH MANAGEMENT GROUP

Investment Banking. Investment banking revenues decreased 37%, primarily due to lower underwriting activity across equity and unit trust products, partially offset by an increase in fixed income underwriting activity. The first quarter of fiscal 2007's equity underwriting results included a significant closed end fund offering.

Principal Transactions—Trading. Principal transaction trading revenues increased 37%, primarily due to higher revenues from municipal, government and corporate fixed income securities, partially offset by losses associated with investments related to certain employee deferred compensation plans.

Commissions. Commission revenues increased 15% reflecting higher client activity.

Asset Management, Distribution and Administration Fees. Asset management, distribution and administration fees decreased 2%, primarily reflecting the discontinuance of certain fee-based brokerage programs in the fourth quarter of fiscal 2007 and a change in the classification of sub-advisory fees due to modifications of certain customer agreements, partially offset by growth in other fee-based products.

Client assets in fee-based accounts decreased 8% to \$185 billion at February 29, 2008 and represented 26% of total client assets compared with 29% at February 28, 2007. The decline in fee-based assets as a percent of total client assets largely reflected the termination on October 1, 2007 of the Company's fee-based (fee-in-lieu of commission) brokerage program pursuant to a court decision vacating an SEC rule that permitted fee-based brokerage. Client assets that were in the fee-based program primarily moved to commission-based brokerage accounts, or, at the election of some clients, into other fee-based advisory programs, including Morgan Stanley Advisory, a nondiscretionary account launched in August 2007. Total client asset balances increased to \$722 billion at February 29, 2008 from \$690 billion at February 28, 2007, primarily due to higher client inflows. Client asset balances in households greater than \$1 million increased to \$491 billion at February 29, 2008 from \$458 billion at February 28, 2007.

Net Interest. Net interest revenues increased 55%, primarily due to increased customer account balances in the bank deposit program. Balances in the bank deposit program rose to \$33.4 billion at February 29, 2008 from \$16.4 billion at February 28, 2007.

Non-Interest Expenses. Non-interest expenses increased 5%, primarily reflecting an increase in compensation and benefits expense, partially offset by lower non-compensation expenses. Compensation and benefits expense increased 10%, primarily reflecting higher incentive-based compensation accruals related to higher net revenues and severance-related expenses of \$19 million recorded in the first quarter of fiscal 2008. Excluding compensation and benefits expense, non-interest expenses decreased 7%. Occupancy and equipment increased 6%, primarily due to an increase in space costs and branch renovations. Marketing and business development expense increased 14%, primarily due to a higher level of business activity. Professional service expenses decreased 32%, primarily due to the change in the classification of sub-advisory fees relating to certain customer agreements. Other expenses increased 6%, primarily due to an increase in the reserve for debit card fraud and higher FDIC insurance premiums related to the bank deposit program, partially offset by lower litigation expenses.

ASSET MANAGEMENT
INCOME STATEMENT INFORMATION

	Three Months Ended	
	February 29, 2008	February 28, 2007
	(dollars in millions)	
Revenues:		
Investment banking	\$ 26	\$ 31
Principal transactions:		
Trading	(179)	—
Investments	(201)	532
Commissions	4	6
Asset management, distribution and administration fees	845	768
Interest and dividends	15	14
Other	71	34
Total revenues	581	1,385
Interest expense	38	17
Net revenues	543	1,368
Total non-interest expenses	704	989
(Loss) income before income taxes	(161)	379
(Benefit from) provision for income taxes	(58)	149
Net income (loss)	\$(103)	\$ 230

Investment Banking. Investment banking revenues decreased 16%, primarily reflecting lower revenues from certain merchant banking products and unit trust sales.

Principal Transactions—Trading. The first quarter of fiscal 2008 primarily included losses of \$187 million related to structured investment vehicles. See “Impact of Credit Market Events—Structured Investment Vehicles” herein for further discussion.

Principal Transactions—Investments. Principal transaction net investment losses aggregating \$201 million were recognized in the first quarter of fiscal 2008 as compared with gains of \$532 million in the prior-year period. The current quarter included net investment losses associated with the Company’s real estate products, including those associated with deferred compensation and co-investment plans and alternative investments and lower investment gains in the Company’s private equity portfolio.

Asset Management, Distribution and Administration Fees. Asset management, distribution and administration fees increased 10%, primarily due to higher fund management and administration fees resulting from an increase in assets and a more favorable asset mix. Average assets under management increased 14% to \$585 billion as of February 29, 2008 from the prior-year period average of \$512 billion. The increase was partially offset by lower performance fees from the alternatives business and lower distribution fees.

Asset Management's period-end and average customer assets under management or supervision were as follows:

	February 29, 2008	February 28, 2007	Average for the Three Months Ended	
			February 29, 2008	February 28, 2007
	(dollars in billions)

Net market (depreciation)/appreciation	<u>(26)</u>	<u>14</u>
Total net (decrease)/increase	(20)	19
Acquisitions	<u>—</u>	<u>6</u>
Balance at end of period	<u><u>\$577</u></u>	<u><u>\$521</u></u>

(1) Americas Intermediary channel primarily represents client flows through defined contribution, insurance and bank trust platforms.

Net outflows (excluding money markets) during the quarter ended February 29, 2008 were primarily associated with Americas Retail Morgan Stanley and Van Kampen brand products, partially offset by positive flows into Americas Intermediary and U.S. Institutional products. Money market net flows for the quarter were primarily associated with positive flows into institutional liquidity assets.

Other. Other revenues increased 109%, primarily due to revenues associated with Lansdowne Partners (“Lansdowne”), a London-based investment manager in which the Company has a minority interest.

Non-Interest Expenses. Non-interest expenses decreased 29%, primarily reflecting a decrease in compensation and benefits expense. Compensation and benefits expense decreased 46%, primarily reflecting lower incentive-based compensation accruals due to lower net revenues and lower expenses associated with certain employee deferred compensation plans. Excluding compensation and benefits expense, non-interest expenses increased 6%. Brokerage, clearing and exchange fees increased 11%, primarily due to increased fee sharing related to increased assets under management. Professional services expense decreased 19%, primarily due to lower sub-advisory fees. Other expenses increased 38%, primarily due to higher minority interest and other miscellaneous expense.

Impact of Credit Market Events.

Overview.

The systematic risk reduction in the markets that occurred in the latter half of fiscal 2007 continued in the first quarter of fiscal 2008 after an extended period of global liquidity and historically low interest rates. Continued concerns about the impact of subprime loans caused the subprime-related and broader credit markets to deteriorate further, with lower levels of liquidity and price transparency for certain credit products. These difficult market conditions adversely affected “event-driven” lending transactions, U.S. subprime and non-subprime residential mortgage products, commercial real estate products, structured investment vehicles and monoline insurers.

The results for the first quarter of fiscal 2008 included net losses of approximately \$910 million (mark-to-market valuations of approximately \$2.1 billion net of gains on hedges of approximately \$1.2 billion) associated with loans and loan commitments largely related to “event-driven” lending transactions to non-investment grade companies. The losses included markdowns of leveraged loan commitments associated with “event-driven” lending transactions that were accepted by the borrower but not yet closed. These losses were primarily related to the illiquid market conditions that existed during the first quarter of fiscal 2008. The valuation of these commitments could change in future periods depending on, among other things, the extent that they are renegotiated or repriced or the associated acquisition transaction does not occur. In addition, the Company’s leveraged finance business originates and distributes loans and commitments, and intends to distribute its current positions; however, this is taking longer than in the past. Widening credit spreads for non-investment grade loans could result in additional writedowns for these loans and commitments. For further information about the Company’s corporate lending activities, see Item 3, “Quantitative and Qualitative Disclosures about Market Risk—Credit Risk.”

In the first quarter of fiscal 2008, the Company recorded mortgage proprietary trading net writedowns of approximately \$1.2 billion, half of which was related to U.S. subprime exposures. The \$1.2 billion reflected net writedowns on U.S. subprime trading positions including super senior derivative positions and subprime residuals. The \$1.2 billion also included net writedowns on non-subprime residential mortgages. See “Non-subprime Residential Mortgages and Commercial Mortgage-backed Securities” herein.

In addition, the Company recorded writedowns of approximately \$204 million related to mortgage-related securities portfolios in the Company’s domestic subsidiary banks (see “Subsidiary Banks” herein).

The Company also recognized losses of \$187 million in the first quarter of fiscal 2008 related to investments issued by structured investment vehicles (see “Structured Investment Vehicles” herein).

The Company continues to have exposure to real estate and lending-related markets and instruments, and, as market conditions continue to evolve, the fair value of these other positions could further deteriorate (see “Results of Operations—Asset Management” herein for discussion of losses related to real estate products). Additionally, given the current challenges in the financial markets, it is possible that declines in the estimated fair value of the Company’s businesses may occur which could result in a future goodwill impairment charge.

U.S. Subprime Mortgage-Related Exposures.

The Company’s U.S. subprime mortgage-related trading positions consist of those related to U.S. ABS CDOs and other mortgage-related exposures arising from investments in subprime loans, from asset-backed securities that, in whole or in part, are backed by subprime mortgage loans, and from derivatives referencing subprime mortgages or subprime mortgage-backed securities.

Subprime mortgages are loans secured by real property made to a borrower (or borrowers) with a diminished or impaired credit rating or with a limited credit history. A borrower’s credit history is reflected in his credit report

and routinely converted into a numerical credit score often referred to as a Fair Isaac Corporation (or “FICO”) score. Generally, a loan made to a borrower with a low FICO score or other credit score has historically been considered as subprime. Loans to borrowers with higher FICO scores may be subprime if the loan exhibits other high-risk factors. Such risk factors may include loans where: (a) the loan has a high loan-to-value ratio or combined loan-to-value ratios; (b) the borrower has reduced or limited income documentation; (c) the borrower has a high debt-to-income ratio; or (d) the occupancy type for the loan is other than the borrower’s primary residence. There are many other risk factors, including borrowers who have purchased multiple properties or have taken previous equity withdrawal (cash out) refinancings within the last 12 to 24 month period, non-arm’s length purchase transactions and unsupported or high-risk collateral properties, among others. Subprime mortgage-related securities are those securities that derive a significant portion of their value from subprime loans.

U.S. ABS CDO Exposures.

The Company purchases interests in and enters into derivatives with ABS CDOs. CDOs provide credit risk exposure to a portfolio of asset-backed securities (“cash CDOs”) or a reference portfolio of securities (“synthetic CDOs”). The underlying or reference portfolios consist primarily of residential mortgage-backed securities. The CDOs to which the Company has exposure are primarily structured and underwritten by third parties, although the Company also structures and underwrites CDOs, for which it receives structuring and/or distribution fees, and does from time to time retain interests in such CDOs.

The Company’s primary exposure to ABS CDOs is to synthetic CDOs that hold or are referenced to collateral with ratings of BBB+, BBB or BBB- (“mezzanine CDOs”). Under these credit default swap arrangements, the Company can be required to make payments in the event that securities in the referenced portfolios default or experience other credit events such as rating agency downgrades. (The characterization of these credit default swaps as “super senior” derives from their seniority in the capital structure of the synthetic CDO.) The Company also has exposure to ABS CDOs via other types of credit default swaps, direct investments in CDO securities, and retained interests in CDOs that the Company has underwritten. In determining the fair value of the Company’s ABS CDO-related instruments the Company took into consideration prices observed from the execution of a limited number of transactions and data for relevant benchmark instruments in synthetic subprime markets. Despite the fact that actual defaults on swap obligations have not yet been realized, the fair value of such positions has experienced significant declines as a result of a deterioration of value in the benchmark instruments as well as market developments. These losses, as well as the Company’s net CDO exposures, are quantified in the U.S. subprime-related exposures table below.

Other U.S. Subprime Mortgage-Related Exposures.

The Company also has exposure to the U.S. subprime mortgage market via investments in subprime mortgage loans and ABS that are backed in whole or in part by subprime mortgage loans and via derivatives referencing subprime mortgages or subprime mortgage-backed securities. With respect to whole loans, the Company purchases pools of mortgage loans from third-party originators and also originates mortgage loans through its retail channel and typically disposes of such loans by securitizing them. The Company typically retains certain lower-rated securities of such securitizations, often referred to as residual tranche securities. The Company’s other subprime mortgage-related trading exposures are quantified in the table below.

The Company’s interests in U.S. subprime-related exposures are carried at fair value with changes recognized in earnings. The valuation methodology used for these instruments incorporated a variety of inputs, including prices observed from the execution of a limited number of trades in the marketplace; ABX and similar indices that track the performance of a series of credit default swaps based on subprime mortgages; and other market information, including data on remittances received and updated cumulative loss data on the underlying mortgages. For a further discussion of the Company’s risk management policies and procedures see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management” in Part II, Item 7A of the Form 10-K.

The following table provides a summary of the Company's direct U.S. subprime trading exposures (excluding amounts related to mortgage-related securities portfolios in the Company's domestic subsidiary banks (see "Subsidiary Banks" herein)) as of and for the fiscal quarter ended February 29, 2008. Net exposure as of November 30, 2007 is also presented. The Company utilizes various methods of evaluating risk in its trading and other portfolios, including monitoring Net Exposure. Net Exposure is defined as potential loss to the Company over a period of time in an event of 100% default of the referenced loan, assuming zero recovery. The value of these positions remains subject to mark-to-market volatility. Positive net exposure amounts indicate potential loss (long position) in a default scenario. Negative net exposure amounts indicate potential gain (short position) in a default scenario. Net Exposure does not take into consideration the risk of counterparty default such that actual losses could exceed the amount of Net Exposure. See Note 1 to the condensed consolidated financial statements for a description regarding valuation of these instruments. See "Quantitative and Qualitative Disclosures about Market Risk—Credit Risk" in Part II, Item 7A of the Form 10-K for a further description of how credit risk is monitored.

	Statement of Financial Condition February 29, 2008(1)	Profit and (Loss) Three Months Ended February 29, 2008	Net Exposure February 29, 2008	Net Exposure November 30, 2007

Total U.S. subprime trading exposure	<u>\$ 7.6</u>	<u>\$ —</u>	<u>\$ 1.8</u>	<u>\$ 1.8</u>

(1) Statement of financial condition amounts are presented on a net asset/liability basis and do not take into account any netting of cash collateral against these positions. In addition, these amounts reflect counterparty netting to the extent that there are positions with the same counterparty that are subprime-related; they do not reflect any counterparty netting to the extent that there are positions with the same counterparty that are not subprime related. The \$7.6 billion is reflected in the Company's condensed consolidated statement of financial condition as follows: Financial instruments owned of \$15.4 billion and Financial instruments sold, not yet purchased of \$7.8 billion.

(2) In determining the fair value of the Company's ABS super senior CDO-related exposures the Company took into consideration prices observed from the execution of a limited number of transactions and data for relevant benchmark instruments in synthetic subprime markets. Deterioration of value in the benchmark instruments as well as market developments have led to significant declines in the estimates of fair value. These declines reflected increased implied losses across this portfolio. These implied loss levels are consistent with losses in the range between 18% – 26% implied by the ABX indices. These cumulative loss levels, at a severity rate of 55%, imply defaults in the range of 52% – 61% for 2005 and 2006 outstanding mortgages.

(3) Refers to CDOs where the collateral is comprised entirely of another CDO security.

Subsidiary Banks.

The securities portfolios of Morgan Stanley Bank (Utah) and Morgan Stanley Trust FSB (collectively, the “Subsidiary Banks”) include certain subprime-related securities. The portfolios contain no subprime whole loans, subprime residuals or CDOs.

At February 29, 2008 and November 30, 2007, the securities portfolios totaled \$9.6 billion and \$9.9 billion, respectively, consisting primarily of AAA-rated ABS and residential mortgage-backed securities. Of these total amounts, \$4.7 billion and \$5.5 billion were subprime mortgage-related securities as of February 29, 2008 and November 30, 2007, respectively.

Non-subprime Residential Mortgages and Commercial Mortgage-backed Securities.

The Company continues to have exposure to non-subprime residential mortgages which include residential mortgage-backed securities bonds, residential Alt-A (a residential mortgage loan categorization that falls between prime and subprime) and European mortgage loans. Statement of financial condition amounts for non-subprime residential mortgages were \$14.5 billion and \$16.5 billion as of February 29, 2008 and November 30, 2007, respectively. Net exposure amounts as of February 29, 2008 and November 30, 2007 were \$8.7 billion and \$10.9 billion, respectively.

The Company also has exposure to commercial mortgage-backed securities (“CMBS”). Statement of financial condition amounts for CMBS were \$23.5 billion and \$31.5 billion as of February 29, 2008 and November 30, 2007, respectively. Net exposure amounts as of February 29, 2008 and November 30, 2007 were \$11.6 billion and \$17.5 billion, respectively.

See Note 1 to the condensed consolidated financial statements for a description regarding valuation of these instruments.

Special Purpose Entities and Variable Interest Entities.

The Company’s involvement with special purpose entities (“SPEs”) and variable interest entities (“VIEs”) is discussed in Note 4 to the condensed consolidated financial statements and “Critical Accounting Policies—Special Purpose Entities” herein. In relation to subprime loans and subprime-backed securities, the Company’s involvement with SPEs/VIEs consists primarily of the following:

- Engaging in securitization activities related to subprime loans and subprime-backed securities;
- Acting as an underwriter of beneficial interests issued by securitization vehicles;
- Transferring whole loans into SPEs/VIEs;
- Holding one or more classes of securities issued by such securitization vehicles (including residual tranche securities) and possibly entering into derivative agreements with such securitization vehicles;
- Purchasing and selling (in both a market-making and a proprietary-trading capacity) subprime-backed securities issued by SPEs/VIEs, whether such vehicles are sponsored by the Company or not;
- Entering into derivative transactions with SPEs/VIEs (not sponsored by the Company) that hold subprime-related assets;
- Providing warehouse financing to CDOs and collateralized loan obligations (“CLOs”);
- Entering into derivative agreements with non-SPEs/VIEs, whose value is derived from securities issued by SPEs/VIEs;
- Servicing assets held by SPEs/VIEs or holding servicing rights related to assets held by SPEs/VIEs that are serviced by others under subservicing arrangements; and

- Serving as an asset manager to various investment funds that may invest in securities that are backed, in whole or in part, by subprime loans.

Structured Investment Vehicles.

Structured investment vehicles (“SIVs”) are unconsolidated entities that issue various capital notes and debt instruments to fund the purchase of assets. While the Company does not sponsor or serve as asset manager to any unconsolidated SIVs, the Company does serve as investment advisor to certain unconsolidated money market funds (“the Funds”) that have investments in securities issued by SIVs. In the second half of fiscal 2007, widespread illiquidity in the commercial paper market led to market value declines and rating agency downgrades of many securities issued by SIVs, some of which were held by the Funds. As a result, the Company purchased at amortized cost approximately \$900 million of such securities from the Funds during fiscal 2007 and \$217 million of such securities during the first quarter of fiscal 2008. During the first quarter of fiscal 2008, the Company recorded losses of \$187 million on these securities. The carrying value of the purchased securities still held by the Company as of February 29, 2008 was \$588 million. Such positions are reflected at fair value, and presented in Financial instruments owned—Corporate and other debt in the condensed consolidated statements of financial condition. Subsequent to February 29, 2008, the Company has not purchased additional securities from the Funds. The Company has no obligation to purchase any additional securities from the Funds in the future. The Funds continue to have investments in securities issued by SIVs, with an aggregate face value of \$3.6 billion as of February 29, 2008 compared with \$8.2 billion as of November 30, 2007.

Monoline Insurers.

Monoline insurers (“Monolines”) provide credit enhancement to capital markets transactions. The current credit environment severely affected the capacity of such financial guarantors. The Company’s direct exposure to Monolines is limited to bonds that are insured by Monolines and as counterparties to derivative contracts. The Company’s direct exposure to Monolines at February 29, 2008 consisted primarily of ABS bonds of \$1.3 billion in the Subsidiary Banks’ portfolio (see “Subsidiary Banks”) that are collateralized by first and second lien subprime mortgages enhanced by financial guarantees, \$2.6 billion in insurance municipal bond securities and \$800 million in net counterparty exposure. The Company’s direct exposure to Monolines at November 30, 2007 consisted primarily of ABS bonds of \$1.5 billion in the Subsidiary Banks’ portfolio, \$1.3 billion in insurance municipal bond securities and \$800 million in net counterparty exposure. The increase in direct exposure in the first quarter of fiscal 2008 reflects the Company’s support for clients of the Company’s municipal business, partially offset by a writedown of approximately \$600 million.

ASF Framework.

In December 2007, the American Securitization Forum (“ASF”) issued the “Streamlined Foreclosure and Loss Avoidance Framework for Securitized Subprime Adjustable Rate Mortgage Loans” (the “ASF Framework”). The overall purpose of the ASF Framework is to provide recommended guidance for servicers to streamline borrower evaluation procedures and to facilitate the effective use of all forms of foreclosure and loss prevention efforts, including refinancings, forbearances, workout plans, loan modifications, deeds-in-lieu and short sales or short payoffs. The ASF Framework is focused on subprime first-lien adjustable rate residential mortgages loans that have an initial fixed rate period of 36 months or less, are included in securitized pools, were originated between January 1, 2005 and July 31, 2007, and have an initial interest rate reset date between January 1, 2008 and July 31, 2010 (“subprime ARM loans”).

The ASF Framework categorizes the population of subprime ARM loans into three segments. Segment 1 includes current loans, as defined, where the borrower is likely to be able to refinance into an available mortgage product. It is expected that borrowers in this category should refinance their loans, if they are unable or unwilling to meet their reset payment. Segment 2 includes current loans where the borrower is unlikely to be able to refinance and meet specific criteria related to Fair Isaac Corporation (or “FICO”) scores and expected payment increase due to the initial adjustment of the interest rate. Borrowers in this segment are eligible for a fast track

loan modification under which the interest rate will be kept at the existing rate, generally for five years following the upcoming reset. The ASF Framework indicates that for Segment 2 loans, the servicer can presume that the borrower would be unable to pay pursuant to the original terms of the loan after the interest rate reset, and thus, borrower default on the loan is “reasonably foreseeable” in absence of a modification. Segment 3 includes loans where the borrower is not current or which do not otherwise qualify for Segment 1 or Segment 2. For loans in this category, the servicer will determine the appropriate loss mitigation approach in a manner consistent with the applicable servicing standard in the transaction documents, but without employing the fast track procedures described under Segment 2.

In January 2008, the SEC’s Office of Chief Accountant (the “OCA”) issued a letter (the “OCA Letter”) addressing accounting issues that may be raised by the ASF Framework. The OCA Letter concluded that the SEC would not object to continuing off-balance sheet accounting treatment for qualifying special purpose entities (“QSPEs”) that hold Segment 2 subprime ARM loans modified pursuant to the ASF Framework.

For those current loans that are accounted for off-balance sheet that are modified, but not as part of the ASF Framework above, the servicer must perform on an individual basis an analysis of the borrower and the loan to provide sufficient evidence to demonstrate that default on the loan is imminent or reasonably foreseeable.

The Company adopted the ASF Framework during the first quarter of fiscal 2008, but has not yet modified a significant volume of loans using the ASF Framework. The Company does not expect that its application of the ASF Framework will impact the off-balance sheet status of Company-sponsored QSPEs that hold Segment 2 subprime ARM loans and is currently evaluating the potential impact on its condensed consolidated statements of income. The total amount of assets owned by Company-sponsored QSPEs that hold subprime ARM loans (including those loans that are not serviced by the Company) as of February 29, 2008, was approximately \$30.5 billion. Of this amount, approximately \$11.8 billion relates to subprime ARM loans serviced by the Company. The Company’s retained interests in Company sponsored QSPEs that hold subprime ARM loans totaled approximately \$272 million as of February 29, 2008.

Other Matters.

The following matters are discussed in the Company's notes to the condensed consolidated financial statements. For further information on these matters, please see the applicable note:

Critical Accounting Policies.

The Company's condensed consolidated financial statements are prepared in accordance with U.S. GAAP, which requires the Company to make estimates and assumptions (see Note 1 to the condensed consolidated financial statements). The Company believes that of its significant accounting policies (see Note 2 to the consolidated financial statements for the fiscal year ended November 30, 2007 included in the Form 10-K), the following involve a higher degree of judgment and complexity.

Fair Value.

Financial Instruments Measured at Fair Value. A significant number of the Company's financial instruments are carried at fair value with changes in fair value recognized in earnings each period. The Company makes estimates regarding valuation of assets and liabilities measured at fair value in preparing the condensed consolidated financial statements. These assets and liabilities include:

- Financial instruments owned and Financial instruments sold, not yet purchased;
- Securities received as collateral and Obligation to return securities received as collateral;
- Certain Commercial paper and other short-term borrowings, primarily structured notes;
- Certain Deposits;
- Other secured financings; and
- Certain Long-term borrowings, primarily structured notes and certain junior subordinated debentures.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.*, the "exit price") in an orderly transaction between market participants at the measurement date.

In determining fair value, the Company uses various valuation approaches. A hierarchy for inputs is used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. For further information on the fair value definition, Level 1, Level 2 and Level 3 hierarchy and related valuation techniques, see Note 1 to the condensed consolidated financial statements.

The Company's Level 3 assets before the impact of counterparty netting across the levels of the fair value hierarchy were \$78.2 billion and \$73.7 billion as of February 29, 2008 and November 30, 2007, respectively, and represented approximately 15% as of both periods of the assets measured at fair value (7% of total assets as of both periods). Level 3 liabilities were \$24.8 billion and \$19.5 billion as of February 29, 2008 and November 30, 2007, respectively, and represented approximately 8% and 7%, respectively, of the Company's liabilities measured at fair value.

During the quarter ended February 29, 2008, the Company reclassified approximately \$2.0 billion of certain Corporate and other debt from Level 2 to Level 3. These reclassifications included transfers primarily related to loans and loan commitments largely related to "event-driven" transactions. The reclassifications were due to a reduction in recently executed transactions and market price quotations for these instruments such that the inputs for these instruments became less observable.

See Note 2 to the condensed consolidated financial statements for further information about the Company's financial assets and liabilities that are accounted for at fair value.

Fair Value Control Processes. The Company employs control processes to validate the fair value of its financial instruments, including those derived from pricing models. These control processes are designed to assure that the values used for financial reporting are based on observable inputs wherever possible. In the event that observable inputs are not available, the control processes are designed to assure that the valuation approach

utilized is appropriate and consistently applied and that the assumptions are reasonable. These control processes include reviews of the pricing model's theoretical soundness and appropriateness by Company personnel with relevant expertise who are independent from the trading desks. Additionally, groups independent from the trading divisions within the Financial Control, Market Risk and Credit Risk Departments participate in the review and validation of the fair values generated from pricing models, as appropriate. Where a pricing model is used to determine fair value, recently executed comparable transactions and other observable market data are considered for purposes of validating assumptions underlying the model.

Consistent with market practice, the Company has individually negotiated agreements with certain counterparties to exchange collateral ("margining") based on the level of fair values of the derivative contracts they have executed. Through this margining process, one party or both parties to a derivative contract provides the other party with information about the fair value of the derivative contract to calculate the amount of collateral required. This sharing of fair value information provides additional support of the Company's recorded fair value for the relevant OTC derivative products. For certain OTC derivative products, the Company, along with other market participants, contributes derivative pricing information to aggregation services that synthesize the data and make it accessible to subscribers. This information is then used to evaluate the fair value of these OTC derivative products. For more information regarding the Company's risk management practices, see "Quantitative and Qualitative Disclosures about Market Risk—Risk Management" in Part II, Item 7A of the Form 10-K.

Legal, Regulatory and Tax Contingencies.

In the normal course of business, the Company has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a global diversified financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or in financial distress.

The Company is also involved, from time to time, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding the Company's business, including, among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

Reserves for litigation and regulatory proceedings are generally determined on a case-by-case basis and represent an estimate of probable losses after considering, among other factors, the progress of each case, prior experience and the experience of others in similar cases, and the opinions and views of internal and external legal counsel. Given the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, the Company cannot predict with certainty the loss or range of loss, if any, related to such matters, how such matters will be resolved, when they will ultimately be resolved or what the eventual settlement, fine, penalty or other relief, if any, might be.

The Company is subject to the income and indirect tax laws of the U.S., its states and municipalities and those of the foreign jurisdictions in which the Company has significant business operations. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant governmental taxing authorities. The Company must make judgments and interpretations about the application of these inherently complex tax laws when determining the provision for income taxes and the expense for indirect taxes and must also make estimates about when in the future certain items affect taxable income in the various tax jurisdictions. Disputes over interpretations of the tax laws may be settled with the taxing authority upon examination or audit. The Company regularly assesses the likelihood of assessments in each of the taxing jurisdictions resulting from current and subsequent years' examinations, and tax reserves are established as appropriate.

The Company establishes reserves for potential losses that may arise out of litigation, regulatory proceedings and tax audits to the extent that such losses are probable and can be estimated in accordance with SFAS No. 5 for

potential losses related to litigation and regulatory proceedings and FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109” (“FIN 48”) for potential losses related to tax audits. Once established, reserves are adjusted when there is more information available or when an event occurs requiring a change. Significant judgment is required in making these estimates, and the actual cost of a legal claim, tax assessment or regulatory fine/penalty may ultimately be materially different from the recorded reserves, if any.

See Notes 8 and 12 to the condensed consolidated financial statements for additional information on legal proceedings and tax examinations.

Special Purpose Entities.

The Company enters into a variety of transactions with SPEs, primarily in connection with securitization activities. The Company engages in securitization activities related to commercial and residential mortgage loans, U.S. agency collateralized mortgage obligations, corporate bonds and loans, municipal bonds and other types of financial instruments. In most cases, these SPEs are deemed to be VIEs. Unless a VIE is determined to be a QSPE, the Company is required to perform an analysis of each VIE at the date upon which the Company becomes involved with it to determine whether the Company is the primary beneficiary of the VIE, in which case the Company must consolidate the VIE. QSPEs are not consolidated.

The Company reassesses whether it is the primary beneficiary of a VIE upon the occurrence of certain reconsideration events. If the Company’s initial assessment results in a determination that it is not the primary beneficiary of a VIE, then the Company reassesses this determination upon the occurrence of:

- Changes to the VIE’s governing documents or contractual arrangements in a manner that reallocates the obligation to absorb the expected losses or the right to receive the expected residual returns of the VIE between the current primary beneficiary and the other variable interest holders, including the Company.
- Acquisition by the Company of additional variable interests in the VIE.

If the Company’s initial assessment results in a determination that it is the primary beneficiary, then the Company reassesses this determination upon the occurrence of:

- Changes to the VIE’s governing documents or contractual arrangements in a manner that reallocates the obligation to absorb the expected losses or the right to receive the expected residual returns of the VIE between the current primary beneficiary and the other variable interest holders, including the Company.
- A sale or disposition by the Company of all or part of its variable interests in the VIE to unrelated parties.
- The issuance of new variable interests by the VIE to parties unrelated to the Company.

QSPEs are not consolidated. The determination of whether an SPE meets the accounting requirements of a QSPE requires significant judgment, particularly in evaluating whether the permitted activities of the SPE are significantly limited and in determining whether derivatives held by the SPE are passive and nonexcessive. In addition, the analysis involved in determining whether an entity is a VIE, and in determining the primary beneficiary of a VIE, requires significant judgment (see Note 4 to the condensed consolidated financial statements).

Liquidity and Capital Resources.

The Company's senior management establishes the liquidity and capital policies of the Company. Through various risk and control committees, the Company's senior management reviews business performance relative to these policies, monitors the availability of alternative sources of financing, and oversees the liquidity, interest rate and currency sensitivities of the Company's asset and liability position. The Company's Treasury Department and other control groups, assist in evaluating, monitoring and controlling the impact that the Company's business activities have on its condensed consolidated statements of financial condition, liquidity and capital structure.

The Balance Sheet.

The Company actively monitors and evaluates the composition and size of its balance sheet. A substantial portion of the Company's total assets consists of liquid marketable securities and short-term receivables arising principally from Institutional Securities sales and trading activities. The liquid nature of these assets provides the Company with flexibility in managing the size of its balance sheet.

The Company's total assets increased to \$1,090,896 million at February 29, 2008, from \$1,045,409 million at November 30, 2007. The increase was primarily due to increases in financial instruments owned (largely driven by increases in derivative contracts, U.S. government and agency securities, other sovereign government obligations and corporate and other debt) and securities purchased under agreements to resell, partially offset by a decrease in securities received as collateral.

Within the sales and trading related assets and liabilities are transactions attributable to securities financing activities. As of February 29, 2008, securities financing assets and liabilities were \$565 billion and \$546 billion, respectively. Securities financing transactions include repurchase and resale agreements, securities borrowed and loaned transactions, securities received as collateral and obligation to return securities received, customer receivables/payables and related segregated customer cash.

Securities financing assets and liabilities also include matched book transactions with minimal market, credit and/or liquidity risk. These matched book transactions are to accommodate customers, as well as to obtain securities for the settlement and finance of inventory positions. The customer receivable/payable portion of the securities financing transactions includes customer margin loans, collateralized by customer owned securities, and customer cash, which is segregated in order to satisfy regulatory requirements. The Company's risk exposure on these transactions is mitigated by collateral maintenance policies that limit the Company's credit exposure to customers. Included within securities financing assets was \$49 billion that, in accordance with SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" ("SFAS No. 140") represented equal and offsetting assets and liabilities for fully collateralized non-cash loan transactions.

Balance sheet leverage ratios are one indicator of capital adequacy when viewed in the context of a company's overall liquidity and capital policies. The Company views the adjusted leverage ratio a more relevant measure of financial risk than gross leverage when comparing financial services firms and evaluating leverage trends. The Company has adopted a definition of adjusted assets that excludes certain self-funded assets considered to have minimal market, credit and/or liquidity risk. These low-risk assets generally are attributable to the Company's matched book and securities lending businesses. Adjusted assets are calculated by reducing gross assets by aggregate resale agreements and securities borrowed less non-derivative short positions and assets recorded under certain provisions of SFAS No. 140 and FASB Interpretation No. 46 (revised December 2003) "Consolidation of Variable Interest Entities" ("FIN 46R"). Gross assets are also reduced by the full amount of cash and securities deposited with clearing organizations or segregated under federal and other regulations or requirements.

Leverage ratios reflect the deduction from shareholders' equity of the amount of equity used to support goodwill and intangible assets (as the Company does not view this amount of equity as available to support its risk capital

needs). In addition, the Company views junior subordinated debt issued to capital trusts as a component of its capital base given the inherent characteristics of the securities. These characteristics include the long-dated nature (*e.g.*, final maturity at issuance of 30 years extendible at the Company's option by a further 19 years; others have a 60-year final maturity at issuance), the Company's ability to defer coupon interest for up to 20 consecutive quarters and the subordinated nature of the obligations in the capital structure. The Company also receives rating agency equity credit for these securities.

The following table sets forth the Company's total assets, adjusted assets and leverage ratios as of February 29, 2008 and November 30, 2007 and for the average month-end balances during the quarter ended February 29, 2008:

	Balance at		Average Month- End Balance
	February 29, 2008	November 30, 2007	For the Quarter Ended February 29, 2008
	(dollars in millions, except ratio data)		
Total assets	\$1,090,896	\$1,045,409	\$1,083,685
Less: Securities purchased under agreements to resell	(143,097)	(126,887)	(130,731)
Securities borrowed	(243,695)	(239,994)	(243,297)
Add: Financial instruments sold, not yet purchased	171,111	134,341	155,337
Less: Derivative contracts sold, not yet purchased	(89,392)	(71,604)	(75,666)
Subtotal	785,823	741,265	789,328
Less: Cash and securities deposited with clearing organizations or segregated under federal and other regulations or requirements	(60,964)	(61,608)	(61,215)
Assets recorded under certain provisions of SFAS No. 140 and FIN 46R	(83,906)	(110,001)	(98,606)
Goodwill and net intangible assets	(4,061)	(4,071)	(4,081)
Adjusted assets	<u>\$ 636,892</u>	<u>\$ 565,585</u>	<u>\$ 625,426</u>
Common equity	\$ 32,180	\$ 30,169	\$ 31,202
Preferred equity	1,100	1,100	1,100
Shareholders' equity	33,280	31,269	32,302
Junior subordinated debt issued to capital trusts	10,621	4,876	9,185
Subtotal	43,901	36,145	41,487
Less: Goodwill and net intangible assets	(4,061)	(4,071)	(4,081)
Tangible shareholders' equity	<u>\$ 39,840</u>	<u>\$ 32,074</u>	<u>\$ 37,406</u>
Leverage ratio(1)	<u>27.4x</u>	<u>32.6x</u>	<u>29.0x</u>
Adjusted leverage ratio(2)	<u>16.0x</u>	<u>17.6x</u>	<u>16.7x</u>

(1) Leverage ratio equals total assets divided by tangible shareholders' equity.

(2) Adjusted leverage ratio equals adjusted assets divided by tangible shareholders' equity.

The Company's discipline in maintaining an appropriately sized balance sheet along with the adequate capital position has brought the leverage ratio down to 27.4x from 32.6x and the adjusted leverage ratio down to 16.0x from 17.6x.

Activity in the Quarter Ended February 29, 2008.

The Company's total capital consists of shareholders' equity, long-term borrowings (debt obligations scheduled to mature in more than 12 months) and junior subordinated debt issued to capital trusts. At February 29, 2008, total capital was \$198,210 million, an increase of \$7,125 million from November 30, 2007.

During the quarter ended February 29, 2008, the Company issued notes with a carrying value at quarter-end aggregating \$15.9 billion, including non-U.S. dollar currency notes aggregating \$3.7 billion. In connection with the note issuances, the Company has entered into certain transactions to obtain floating interest rates based primarily on short-term London Interbank Offered Rates (“LIBOR”) trading levels. At February 29, 2008, the aggregate outstanding principal amount of the Company’s Senior Indebtedness (as defined in the Company’s senior debt indentures) was approximately \$208 billion (including guaranteed obligations of the indebtedness of subsidiaries). The weighted average maturity of the Company’s long-term borrowings, based upon stated maturity dates, was approximately 6.2 years at February 29, 2008. In addition, in December 2007, the Company sold Equity Units to a wholly owned subsidiary of CIC for approximately \$5,579 million. See “China Investment Corporation Investment” herein.

China Investment Corporation Investment.

In December 2007, the Company sold Equity Units which included contracts to purchase Company common stock to a wholly owned subsidiary of CIC for approximately \$5,579 million. CIC’s ownership in the Company’s common stock, including the maximum number of shares of common stock to be received by CIC upon settlement of the stock purchase contracts, will be 9.9% or less of the Company’s total shares outstanding based on the total shares that were outstanding on November 30, 2007. CIC is a passive financial investor and has no special rights of ownership nor a role in the management of the Company. A substantial portion of the investment proceeds were treated as Tier 1 capital for regulatory capital purposes.

For a more detailed summary of the Equity Units, including the junior subordinated debentures issued to support trust common and trust preferred securities and the stock purchase contracts, refer to “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” in Part II, Item 7 of the Form 10-K and “Financial Statements and Supplementary Data—Note 28” in Part II, Item 8 of the Form 10-K.

Prior to the issuance of common stock upon settlement of the stock purchase contract, the impact of the Equity Units are reflected in the Company’s earnings per diluted common share using the treasury stock method, as defined by SFAS No. 128, “Earnings Per Share.” Under the treasury stock method, the number of shares of common stock included in the calculation of earnings per diluted common share are calculated as the excess, if any, of the number of shares expected to be issued upon settlement of the stock purchase contract based on the average market price for the last 20 days of the reporting period, less the number of shares that could be purchased by the Company with the proceeds to be received upon settlement of the contract at the average closing price for the reporting period.

Dilution of net income per share occurs (i) in reporting periods when the average closing price of common shares is over \$57.6840 per share or (ii) in reporting periods when the average closing price of common shares for a reporting period is between \$48.0700 and \$57.6840 and is greater than the average market price for the last 20 days ending three days prior to the end of such reporting period.

The dilutive impact for the first quarter of fiscal 2008 was approximately 256,000 shares.

Equity Capital Management Policies.

The Company’s senior management views equity capital as an important source of financial strength. The Company actively manages its consolidated equity capital position based upon, among other things, business opportunities, capital availability and rates of return together with internal capital policies, regulatory requirements and rating agency guidelines and, therefore, in the future may expand or contract its equity capital base to address the changing needs of its businesses. The Company attempts to maintain total equity, on a consolidated basis, at least equal to the sum of its operating subsidiaries’ equity.

At February 29, 2008, the Company’s equity capital (which includes shareholders’ equity and junior subordinated debt issued to capital trusts) was \$43,901 million, an increase of \$7,756 million from November 30, 2007, primarily due to the CIC investment. The Company returns internally generated equity capital that is in

excess of the needs of its businesses to its shareholders through common stock repurchases and dividends. During the quarter ended February 29, 2008, the Company did not purchase any of its common stock through the open market share repurchase program (see also “Unregistered Sales of Equity Securities and Use of Proceeds” in Part II, Item 2).

In December 2006, the Company announced that its Board of Directors had authorized the repurchase of up to \$6 billion of the Company’s outstanding common stock. This share repurchase authorization replaced the Company’s previous repurchase authorizations with one repurchase program for capital management purposes that will consider, among other things, business segment capital needs, as well as equity-based compensation and benefit plan requirements. As of February 29, 2008, the Company had approximately \$2.3 billion remaining under its current share repurchase authorization.

The Board of Directors determines the declaration and payment of dividends on a quarterly basis. In March 2008, the Company announced that its Board of Directors declared a quarterly dividend per common share of \$0.27. The Company also announced that its Board of Directors declared a quarterly dividend of \$313.29 per share of Series A Floating Rate Non-Cumulative Preferred Stock (represented by depositary shares, each representing 1/1,000th interest in a share of preferred stock and each having a dividend of \$0.31329).

Economic Capital.

The Company’s economic capital framework estimates the amount of equity capital required to support the businesses over a wide range of market environments while simultaneously satisfying regulatory, rating agency and investor requirements. The framework will evolve over time in response to changes in the business and regulatory environment and to incorporate improvements in modeling techniques.

Economic capital is assigned to each business segment and sub-allocated to product lines. Each business segment is capitalized as an independent operating entity. This process is intended to align equity capital with the risks in each business in order to allow senior management to evaluate returns on a risk-adjusted basis (such as return on equity and shareholder value added).

Economic capital is based on regulatory capital usage plus additional capital for stress losses. The Company assesses stress loss capital across various dimensions of market, credit, business and operational risks. Economic capital requirements are met by regulatory Tier 1 equity (including common shareholders’ equity, certain preferred stock, eligible hybrid capital instruments and deductions of certain goodwill, intangible assets and net deferred tax assets), subject to regulatory limits. The difference between the Company’s Tier 1 equity and aggregate equity requirements denotes the Company’s unallocated capital position.

The following table presents the Company’s allocated average Tier 1 equity (“economic capital”) and average common equity for the quarters ended February 29, 2008 and November 30, 2007:

	Three Months Ended February 29, 2008		Three Months Ended November 30, 2007	
	Average Tier 1 equity	Average common equity	Average Tier 1 equity	Average common equity
	(dollars in billions)			
Institutional Securities	\$27.5	\$24.4	\$28.0	\$27.7
Global Wealth Management Group	1.6	1.5	1.6	1.7
Asset Management	3.2	3.8	3.1	3.9
Unallocated capital	1.5	1.5	(0.4)	(0.4)
Total	<u>\$33.8</u>	<u>\$31.2</u>	<u>\$32.3</u>	<u>\$32.9</u>

Tier 1 Equity allocated to the operating segments remained relatively flat in comparison to the prior quarter. The marginal decrease in Tier 1 equity allocated to Institutional Securities was driven by reductions in market risk. Additionally, the proportion of common equity allocated to the operating segments decreased due to the issuance of hybrid capital. See “China Investment Corporation Investment” herein.

The Company continues to believe that it is adequately capitalized. The Company generally uses available unallocated capital for organic growth, additional acquisitions and other capital needs including repurchases of common stock while maintaining adequate internal capital ratios.

Liquidity and Funding Management Policies.

The primary goal of the Company's liquidity management and funding activities is to ensure adequate funding over a wide range of market environments. Given the mix of the Company's business activities, funding requirements are fulfilled through a diversified range of secured and unsecured financing.

The Company's liquidity and funding risk management policies are designed to mitigate the potential risk that the Company may be unable to access adequate financing to service its financial obligations without material franchise or business impact. The key objectives of the liquidity and funding risk management framework are to support the successful execution of the Company's business strategies while ensuring sufficient liquidity through the business cycle and during periods of financial distress.

Liquidity Management Policies.

The principal elements of the Company's liquidity management framework are the Contingency Funding Plan ("CFP"), the Liquidity Reserves and the Cash Capital Policy. Comprehensive financing guidelines (secured funding, long-term funding strategy, surplus capacity, diversification, staggered maturities and committed credit facilities) support the Company's target liquidity profile.

Contingency Funding Plan. The Contingency Funding Plan is the Company's primary liquidity risk management tool. The CFP models a potential, prolonged liquidity contraction over a one-year time period and sets forth a course of action to effectively manage a liquidity event. The CFP and liquidity risk exposures are evaluated on an on-going basis and reported to the Firm Risk Committee and other appropriate risk committees.

The Company's CFP model is designed to be dynamic and scenarios incorporate a wide range of potential cash outflows during a liquidity stress event, including, but not limited to, the following: (i) repayment of all unsecured debt maturing within one year and no incremental unsecured debt issuance; (ii) maturity roll-off of outstanding letters of credit with no further issuance and replacement with cash collateral; (iii) return of unsecured securities borrowed and any cash raised against these securities; (iv) additional collateral that would be required by counterparties in the event of a two-notch long-term credit ratings downgrade; (v) higher haircuts on or lower availability of secured funding; (vi) client cash withdrawals; (vii) drawdowns on unfunded commitments provided to third parties; and (viii) discretionary unsecured debt buybacks.

The CFP is produced on a parent, bank subsidiary and non-bank subsidiary level to capture specific cash requirements and cash availability at various legal entities. The CFP assumes that the parent company does not have access to cash that may be held at certain subsidiaries due to regulatory, legal or tax constraints. In addition, the CFP assumes that the parent company does not draw down on its committed credit facilities.

Liquidity Reserves. The Company seeks to maintain target liquidity reserves that are sized to cover daily funding needs and meet strategic liquidity targets as outlined in the CFP. These liquidity reserves are held in the form of cash deposits with banks and pools of unencumbered securities. The parent company liquidity reserve is managed globally and consists of cash deposits and unencumbered U.S. and European government bonds and other high-quality collateral. The U.S. component of unencumbered securities is all Federal Reserve repo eligible. The Company believes that diversifying the form in which its liquidity reserves (cash and securities) are maintained enhances its ability to quickly and efficiently source funding in a stressed environment. The Company's funding requirements and target liquidity reserves may vary based on changes to the level and composition of its balance sheet, timing of specific transactions, client financing activity, market conditions and seasonal factors.

The table below summarizes the Company's liquidity reserves on a parent, bank subsidiary and non-bank subsidiary level. The liquidity held on the bank and non-bank subsidiary level is generally not available to the parent.

<u>Liquidity Reserve</u>	At	Average Balance
	<u>February 29, 2008</u>	<u>For the Quarter Ended February, 29, 2008</u>
	(dollars in billions)	
Parent	\$ 70	\$ 71
Bank subsidiaries	25	22
Non-bank subsidiaries	28	29
Total	<u>\$123</u>	<u>\$122</u>

Cash Capital. The Company maintains a cash capital model that measures long-term funding sources against requirements. Sources of cash capital include the parent company's equity and the non-current portion of certain long-term borrowings. Uses of cash capital include the following: (i) illiquid assets such as buildings, equipment, goodwill, net intangible assets, exchange memberships, deferred tax assets and principal investments; (ii) a portion of securities inventory that is not expected to be financed on a secured basis in a credit-stressed environment (*i.e.*, stressed haircuts); and (iii) drawdowns of unfunded commitments.

The Company seeks to maintain a surplus cash capital position. The Company's equity capital of \$43,901 million (including junior subordinated debt issued to capital trusts of \$10,621 million) and long-term borrowings (debt obligations scheduled to mature in more than 12 months) of \$154,309 million comprised the Company's total capital of \$198,210 million as of February 29, 2008, which substantially exceeded cash capital requirements.

Committed Credit Facilities.

The maintenance of committed credit facilities serves to further diversify the Company's funding sources. The Company values committed credit as a secondary component of its liquidity management framework. The committed credit facilities include a diversification of lenders to the Company covering geographic regions, including the Americas, Europe and Asia.

The Company maintains a senior revolving credit agreement with a group of banks to support general liquidity needs, which consists of three separate tranches: a U.S. dollar tranche; a Japanese yen tranche; and a multicurrency tranche available in both euro and British pound, all of which exist with the Company as borrower. Under this combined facility (the "Credit Facility"), the banks are committed to provide up to \$7.6 billion under the U.S. dollar tranche, 80 billion Japanese yen under the Japanese yen tranche and \$3.25 billion under the multicurrency tranche. The Credit Facility expires on April 16, 2008 and includes a term-out feature that allows the Company, at its option, to extend borrowings under the Credit Facility for an additional one year beyond the expiration date.

The Company anticipates that it may utilize the Credit Facility for short-term funding from time to time. The Company does not believe that any of the covenant requirements in its Credit Facility will impair its ability to obtain funding under the Credit Facility, pay its current level of dividends or obtain loan arrangements, letters of credit and other financial guarantees or other financial accommodations. At February 29, 2008, no borrowings were outstanding under the Credit Facility.

At February 29, 2008, the Company had a \$15.9 billion consolidated stockholders' equity surplus as compared with the Credit Facility's covenant requirement.

In March 2008, the Company went to market with the annual renewal of the Credit Facility and expects to close on April 16, 2008 in a reduced amount with substantially similar terms. Given the growth of the Company's

liquidity reserves during fiscal 2007 and in fiscal 2008 as well as the robustness of its overall liquidity management framework, the Company has elected to reduce its Credit Facility amount in this year's renewal.

The Company also maintains a committed bilateral credit facility to support general liquidity needs. This facility is expected to be drawn from time to time to cover short-term funding needs.

Capital Covenants.

In October 2006 and April 2007, the Company executed a replacement capital covenant in connection with offerings by Morgan Stanley Capital Trust VII and Morgan Stanley Capital Trust VIII (the "Capital Securities"). Under the terms of the replacement capital covenant, the Company has agreed, for the benefit of certain specified holders of debt, to limitations on its ability to redeem or repurchase any of the Capital Securities for specified periods of time. For a complete description of the Capital Securities and the terms of the replacement capital covenant, see the Company's Current Reports on Form 8-K dated October 12, 2006 and April 26, 2007.

Funding Management Policies.

The Company's funding management policies are designed to provide for financings that are executed in a manner that reduces the risk of disruption to the Company's operations. The Company pursues a strategy of diversification of secured and unsecured funding sources (by product, by investor and by region) and attempts to ensure that the tenor of the Company's liabilities equals or exceeds the expected holding period of the assets being financed. Maturities of financings are designed to manage exposure to refinancing risk in any one period.

The Company funds its balance sheet on a global basis through diverse sources. These sources include the Company's equity capital; long-term debt; repurchase agreements; U.S., Canadian, European, Japanese and Australian commercial paper; letters of credit; unsecured bond borrowings; securities lending; buy/sell agreements; municipal reinvestments; promissory notes; and committed and uncommitted lines of credit. Repurchase agreement transactions, securities lending and a portion of the Company's bank borrowings are made on a collateralized basis and, therefore, provide a more stable source of funding than short-term unsecured borrowings. The Company has active financing programs for both standard and structured products in the U.S., European and Asian markets, targeting global investors and currencies such as the U.S. dollar, euro, British pound, Australian dollar and Japanese yen.

Secured Financing. A substantial portion of the Company's total assets consists of liquid marketable securities and short-term receivables arising principally from its Institutional Securities sales and trading activities. The liquid nature of these assets provides the Company with flexibility in financing these assets with collateralized borrowings.

The Company's goal is to achieve an optimal mix of secured and unsecured funding through appropriate use of collateralized borrowings. The Institutional Securities business emphasizes the use of collateralized short-term borrowings to limit the growth of short-term unsecured funding, which is more typically subject to disruption during periods of financial stress. As part of this effort, the Institutional Securities business segment continually seeks to expand its global secured borrowing capacity.

In addition, the Company, through several of its subsidiaries, maintains funded and unfunded committed credit facilities to support various businesses, including the collateralized commercial and residential mortgage whole loan, derivative contracts, warehouse lending, emerging market loan, structured product, corporate loan, investment banking and prime brokerage businesses.

On March 11, 2008, the Federal Reserve announced an expansion of its securities lending program to promote liquidity in the financing markets for Treasury and other collateral. Under this new Term Securities Lending

Facility (“TSLF”), the Federal Reserve will lend up to \$200 billion of Treasury securities to primary dealers secured for a term of 28 days (rather than overnight, as in the existing program) by a pledge of other securities, including federal agency debt, federal agency residential-mortgage-backed securities (“MBS”), and non-agency AAA/Aaa-rated private-label residential MBS.

On March 16, 2008, the Federal Reserve announced that the Federal Reserve Bank of New York has been granted the authority to establish a Primary Dealer Credit Facility (“PDCF”). The PDCF provides overnight funding to primary dealers in exchange for a specified range of collateral. The Company may at times use the PDCF as an additional source of secured funding for its regular business operations.

Unsecured Financing. The Company views long-term debt as a stable source of funding for core inventories and illiquid assets. Securities inventories not financed by secured funding sources and the majority of current assets are financed with a combination of short-term funding, floating rate long-term debt or fixed rate long-term debt swapped to a floating rate. The Company uses derivative products (primarily interest rate, currency and equity swaps) to assist in asset and liability management, reduce borrowing costs and hedge interest rate risk (see Note 13 to the consolidated financial statements for the fiscal year ended November 30, 2007 included in the Form 10-K).

Short-Term Debt. The Company’s unsecured short-term borrowings consist of commercial paper, bank loans, Federal Funds, bank notes and structured notes with maturities of twelve months or less at issuance. The primary source of unsecured short-term borrowings for the Company is commercial paper. The Company seeks to diversify commercial paper issuance by investor, region and currency by maintaining active programs in North America, Europe and Asia and by monitoring and managing investor concentration limits on a global basis.

The Company maintains a surplus of unused short-term funding sources to withstand unforeseen contractions in credit capacity. In addition, the Company attempts to maintain cash and unencumbered marketable securities equal to at least 110% of its outstanding short-term unsecured borrowings.

	At February 29, 2008	At November 30, 2007
	(dollars in millions)	
Commercial paper	\$16,629	\$22,596
Other short-term borrowings	<u>9,323</u>	<u>11,899</u>
Total	<u>\$25,952</u>	<u>\$34,495</u>

Deposits. The Company’s bank subsidiaries’ primary source of funding includes bank deposit sweeps, federal funds purchased, certificates of deposit, money market deposit accounts, commercial paper and FHLB advances. As of February 29, 2008, the Company’s bank subsidiaries had total deposits of approximately \$36 billion, an increase of approximately \$5 billion from November 30, 2007.

Long-Term Debt. The Company uses a variety of long-term debt funding sources to generate liquidity, taking into consideration the CFP and cash capital requirements. In addition, issuance of long-term debt allows the Company to reduce reliance on short-term credit sensitive instruments (e.g., commercial paper and other unsecured short-term borrowings). Financing transactions are structured to ensure staggered maturities, thereby mitigating refinancing risk, and to maximize investor diversification through sales to global institutional and retail clients. Availability and cost of financing to the Company can vary depending on market conditions, the volume of certain trading and lending activities, the Company’s credit ratings and the overall availability of credit.

During the quarter ended February 29, 2008, the Company’s long-term financing strategy was driven, in part, by its continued focus on improving its balance sheet strength (evaluated through enhanced capital and liquidity positions). As a result, for the quarter ended February 29, 2008, a principal amount of \$16 billion of unsecured debt was issued (of which \$5 billion of certain structured notes were not considered to be a component of the Company’s cash capital).

Credit Ratings.

The Company relies on external sources to finance a significant portion of its day-to-day operations. The cost and availability of financing generally are dependent on the Company's short-term and long-term credit ratings. Factors that are significant to the determination of the Company's credit ratings or that otherwise affect its ability to raise short-term and long-term financing include the Company's level and volatility of earnings, relative positions in the markets in which it operates, management quality, franchise strength and diversification, risk appetite and management, liquidity, funding capacity and capital adequacy as well as the operating environment. A deterioration in any of the previously mentioned factors or combination of these factors may lead rating agencies to downgrade the credit ratings of the Company, thereby increasing the cost to the Company in obtaining funding. In addition, the Company's debt ratings can have a significant impact on certain trading revenues, particularly in those businesses where longer term counterparty performance is critical, such as OTC derivative transactions, including credit derivatives and interest rate swaps.

In connection with certain OTC trading agreements and certain other agreements associated with the Institutional Securities business, the Company may be required to provide additional collateral to certain counterparties in the event of a credit ratings downgrade. At February 29, 2008, the amount of additional collateral that would be required in the event of a one-notch downgrade of the Company's long-term credit rating was approximately \$973 million. An additional amount of approximately \$813 million would be required in the event of a two-notch downgrade. Of these amounts, \$1,681 million relates to bilateral arrangements between the Company and other parties where upon the downgrade of one party, the downgraded party must deliver incremental collateral to the other. These bilateral downgrade arrangements are a risk management tool used extensively by the Company as credit exposures are reduced if counterparties are downgraded.

As of April 2, 2008, the Company's senior unsecured credit ratings were as follows:

	<u>Short-Term Debt</u>	<u>Long-Term Debt</u>	<u>Rating Outlook</u>
Dominion Bond Rating Service Limited	R-1 (middle)	AA (low)	Stable
Fitch Ratings	F1+	AA-	Negative
Moody's Investors Service	P-1	Aa3	Negative
Rating and Investment Information, Inc.	a-1+	AA	Negative
Standard & Poor's	A-1+	AA-	Negative

Commitments.

The Company's commitments associated with outstanding letters of credit and other financial guarantees obtained to satisfy collateral requirements, investment activities, corporate lending and financing arrangements and mortgage lending as of February 29, 2008 are summarized below by period of expiration. Since commitments associated with these instruments may expire unused, the amounts shown do not necessarily reflect the actual future cash funding requirements:

	<u>Years to Maturity</u>				<u>Total</u>
	<u>Less than 1</u>	<u>1-3</u>	<u>3-5</u>	<u>Over 5</u>	<u>February 29, 2008</u>
	(dollars in millions)				
Letters of credit and other financial guarantees obtained to satisfy collateral requirements	\$ 11,719	\$ 11	\$ —	\$ 1	\$ 11,731
Investment activities	527	220	97	699	1,543
Primary lending commitments(1)	14,687	7,894	26,350	10,594	59,525
Secondary lending commitments(1)	5	17	228	275	525
Commitments for secured lending transactions	2,710	4,143	2,610	23	9,486
Commitments to enter into reverse repurchase agreements	115,036	—	—	—	115,036
Commercial and residential mortgage-related commitments(1)	4,654	—	—	—	4,654
Other commitments	1,062	13	5	—	1,080
Total	<u>\$150,400</u>	<u>\$12,298</u>	<u>\$29,290</u>	<u>\$11,592</u>	<u>\$203,580</u>

(1) These commitments are recorded at fair value within Financial instruments owned and Financial instruments sold, not yet purchased in the condensed consolidated statements of financial condition (see Note 2 to the condensed consolidated financial statements).

For further description of these commitments, see Note 8 to the condensed consolidated financial statements.

Regulatory Requirements.

The Company is a consolidated supervised entity ("CSE") as defined by the SEC. As such, the Company is subject to group-wide supervision and examination by the SEC and to minimum capital requirements on a consolidated basis. As of February 29, 2008, the Company was in compliance with the CSE capital requirements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Market Risk.

The Company uses Value-at-Risk (“VaR”) as one of a range of risk management tools. VaR values should be interpreted in light of the method’s strengths and limitations, which include, but are not limited to: historical changes in market risk factors may not be accurate predictors of future market conditions; VaR estimates represent a one-day measurement and do not reflect the risk of positions that cannot be liquidated or hedged in one day; and VaR estimates may not fully incorporate the risk of more extreme market events that are outsized relative to observed historical market behavior or reflect the historical distribution of results beyond the 95% confidence interval. A small proportion of market risk generated by trading positions is not included in VaR, and the modeling of the risk characteristics of some positions relies upon approximations that, under certain circumstances, could produce significantly different VaR results from those produced using more precise measures. For a further discussion of the Company’s VaR methodology and its limitations, and the Company’s risk management policies and control structure, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management” in Part II, Item 7A of the Form 10-K.

The tables below present the following: the Company’s quarter-end Aggregate (Trading and Non-trading), Trading and Non-trading VaR (see Table 1 below); the Company’s quarterly average, high, and low Trading VaR (see Table 2 below); and the VaR statistics that would result if the Company were to adopt alternative parameters for its calculations, such as the reported confidence level (95% vs. 99%) for the VaR statistic or a shorter historical time series (four years vs. one year) of market data upon which it bases its simulations (see Table 3 below). Aggregate VaR also incorporates (a) the interest rate risk generated by funding liabilities related to institutional trading positions, (b) public company equity positions recorded as investments by the Company and (c) corporate loan exposures that are awaiting distribution to the market. Investments made by the Company that are not publicly traded are not reflected in the VaR results presented below. Aggregate VaR also excludes certain funding liabilities primarily related to fixed and other non-trading assets as well as the credit spread risk generated by the Company’s funding liabilities. As of February 29, 2008, the notional amount of funding liabilities related to non-trading assets (including premises, equipment and software, goodwill, deferred tax assets and intangible assets) was approximately \$7.8 billion, with a duration of approximately 10 years. The credit spread risk sensitivity generated by the Company’s funding liabilities (*i.e.*, those funding both trading and non-trading assets) corresponded to an increase in value of approximately \$79 million for each +1 basis point (or 1/100th of a percentage point) widening in the Company’s credit spread level as of February 29, 2008.

The table below presents 95%/one-day VaR for each of the Company’s primary risk exposures and on an aggregate basis at February 29, 2008 and November 30, 2007.

Table 1: 95% Total VaR	Aggregate (Trading and Non-trading)		Trading		Non-trading	
	95%/One-Day VaR at		95%/One-Day VaR at		95%/One-Day VaR at	
	February 29, 2008	November 30, 2007	February 29, 2008	November 30, 2007	February 29, 2008	November 30, 2007
Primary Market Risk Category	(dollars in millions)					
Interest rate and credit spread	\$ 83	\$ 52	\$ 74	\$ 45	\$ 33	\$ 33
Equity price	36	40	35	39	6	4
Foreign exchange rate	24	24	24	25	1	1
Commodity price	40	34	40	34	—	—
Subtotal	183	150	173	143	40	38
Less diversification benefit(1)	76	67	73	65	6	5
Total VaR	\$107	\$ 83	\$100	\$ 78	\$ 34	\$ 33

(1) Diversification benefit equals the difference between Total VaR and the sum of the VaRs for the four risk categories. This benefit arises because the simulated one-day losses for each of the four primary market risk categories occur on different days; similar diversification benefits also are taken into account within each category.

The Company's Aggregate VaR at February 29, 2008 was \$107 million compared with \$83 million at November 30, 2007, The Company's Trading VaR at February 29, 2008 was \$100 million compared with \$78 million at November 30, 2007. The increases in Aggregate VaR and Trading VaR were driven predominantly by an increase in interest rate and credit spread VaR. The increase in interest rate and credit spread VaR reflects higher levels of realized price volatility in securities that reference subprime mortgage pools and related financial instruments, whose change in value is modeled as a function of the underlying securities.

The Company views average Trading VaR over a period of time as more representative of trends in the business than VaR at any single point in time. Table 2 below, which presents the high, low and average 95%/one-day Trading VaR during the quarters ended February 29, 2008 and November 30, 2007, represents substantially all of the Company's trading activities. Certain market risks included in the year-end Aggregate VaR discussed above are excluded from these measures (e.g., equity price risk in public company equity positions recorded as principal investments by the Company and certain funding liabilities related to trading positions).

Average Trading VaR for the quarter ended February 29, 2008 increased to \$97 million from \$89 million for the quarter ended November 30, 2007, primarily driven by increases in interest rate and credit spread VaR, foreign exchange rate VaR, and commodity price VaR. The increase in interest rate and credit spread VaR was predominantly driven by increased volatility in securitized product and corporate credit markets, which resulted in a higher VaR, despite a reduction in risk exposures during the quarter. The increase in interest rate and credit spread VaR during the quarter also reflects the reclassification effective November 30, 2007 of the Company's bank subsidiaries portfolio of securities available for sale to Financial instruments owned in the condensed consolidated statement of financial condition. The increase in foreign exchange rate VaR was driven by increased exposure to foreign currencies. The increase in commodity price VaR was predominantly driven by increased exposure to petroleum products.

Table 2: 95% High/Low/Average Trading VaR

<u>Primary Market Risk Category</u>	<u>Daily 95%/One-Day VaR for the Quarter Ended February 29, 2008</u>			<u>Daily 95%/One-Day VaR for the Quarter Ended November 30, 2007</u>		
	<u>High</u>	<u>Low</u>	<u>Average</u>	<u>High</u>	<u>Low</u>	<u>Average</u>
	(dollars in millions)					
Interest rate and credit spread	\$ 74	\$42	\$ 59	\$ 68	\$40	\$53
Equity price	44	31	37	50	31	41
Foreign exchange rate	40	18	30	33	15	25
Commodity price	44	33	38	42	31	35
Trading VaR	110	78	97	107	74	89
Non-trading VaR	48	29	37	61	21	36
Total VaR	116	82	103	123	77	98

VaR Statistics Under Varying Assumptions.

VaR statistics are not readily comparable across firms because of differences in the breadth of products included in each firm's VaR model, in the statistical assumptions made when simulating changes in market factors, and in the methods used to approximate portfolio revaluations under the simulated market conditions. These differences can result in materially different VaR estimates for similar portfolios. As a result, VaR statistics are more reliable and relevant when used as indicators of trends in risk taking within a firm rather than as a basis for inferring differences in risk taking across firms. Table 3 below presents the VaR statistics that would result if the Company were to adopt alternative parameters for its calculations, such as the reported confidence level (95% versus 99%) for the VaR statistic or a shorter historical time series (four years versus one year) for market data upon which it bases its simulations:

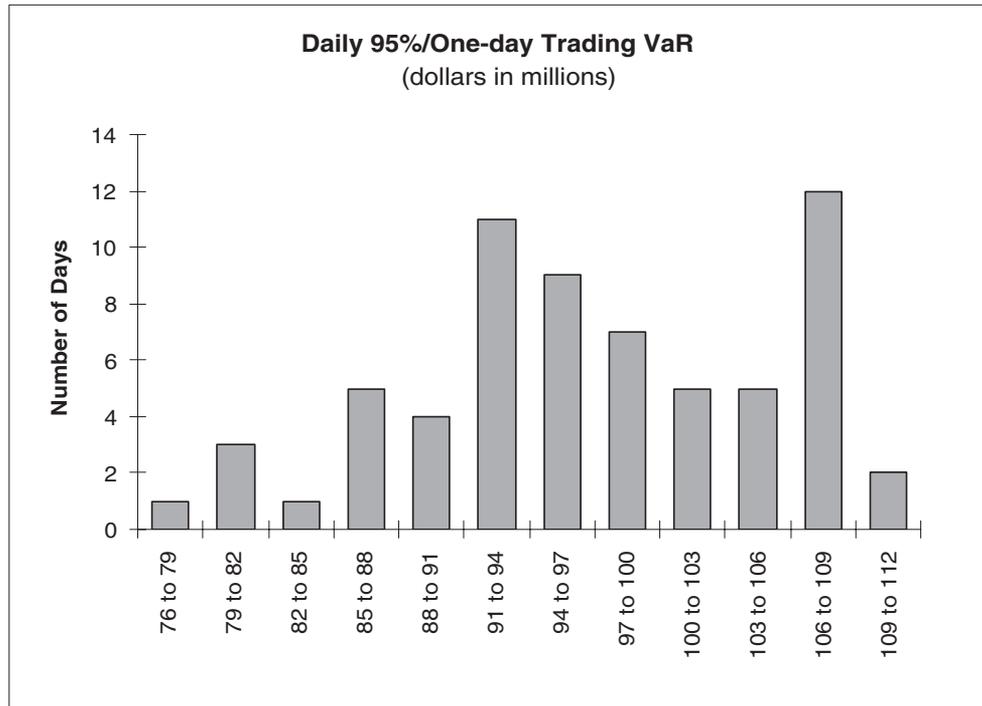

Table 3: Average 95% and 99% Trading VaR with Four-Year/One-Year Historical Time Series

<u>Primary Market Risk Category</u>	<u>Average 95%/One-Day VaR for the Quarter Ended February 29, 2008</u>		<u>Average 99%/One-Day VaR for the Quarter Ended February 29, 2008</u>	
	<u>Four-Year Factor History</u>	<u>One-Year Factor History</u>	<u>Four-Year Factor History</u>	<u>One-Year Factor History</u>
	(dollars in millions)			
Interest rate and credit spread	\$59	\$147	\$168	\$308
Equity price	37	42	58	80
Foreign exchange rate	30	26	43	35
Commodity price	38	35	59	47
Trading VaR	97	134	168	316

In addition, if the Company were to report Trading VaR (using a four-year historical time series) with respect to a 10-day holding period, the Company's 95% and 99% Average Trading VaR for the quarter ended February 29, 2008 would have been \$306 million and \$531 million, respectively.

Distribution of VaR Statistics and Net Revenues for the quarter ended February 29, 2008.

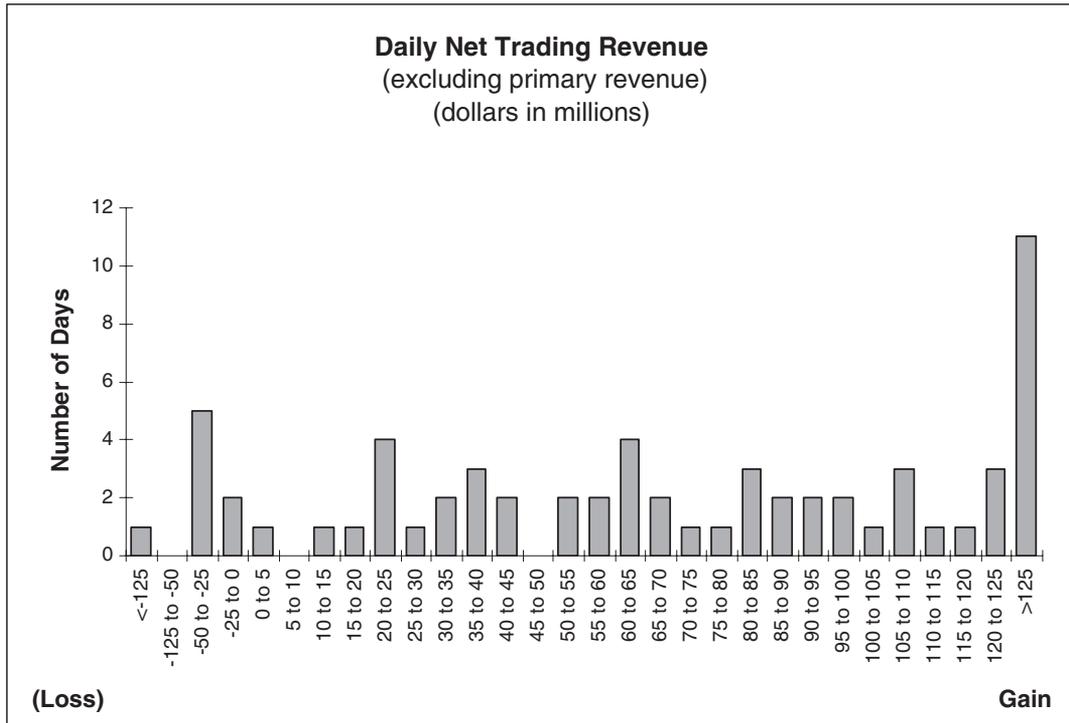

As shown in Table 2 above, the Company's average 95%/one-day Trading VaR for the quarter ended February 29, 2008 was \$97 million. The histogram below presents the distribution of the Company's daily 95%/one-day Trading VaR for the quarter ended February 29, 2008. The most frequently occurring value was between \$106 million and \$109 million, while for approximately 91% of trading days during the quarter, VaR ranged between \$82 million and \$109 million.

One method of evaluating the reasonableness of the Company's VaR model as a measure of the Company's potential volatility of net revenue is to compare the VaR with actual trading revenue. Assuming no intra-day trading, for a 95%/one-day VaR, the expected number of times that trading losses should exceed VaR during the fiscal year is 13, and, in general, if trading losses were to exceed VaR more than 21 times in a year, the accuracy of the VaR model could be questioned. Accordingly, the Company evaluates the reasonableness of its VaR model by comparing the potential declines in portfolio values generated by the model with actual trading results. For days where losses exceed the 95% or 99% VaR statistic, the Company examines the drivers of trading losses to evaluate the VaR model's accuracy relative to realized trading results.

The Company incurred daily trading losses in excess of the 95%/one-day Trading VaR on one day during the quarter ended February 29, 2008. Over the longer term, trading losses are expected to exceed VaR an average of three times per quarter at the 95% confidence level. The Company bases its VaR calculations on the long term (or unconditional) distribution, and therefore evaluates its risk from a longer term perspective, which avoids understating risk during periods of relatively lower volatility in the market.

The histogram below shows the distribution of daily net trading revenue during the quarter ended February 29, 2008 for the Company’s trading businesses (including net interest and non-agency commissions but excluding certain non-trading revenues such as primary, fee-based and prime brokerage revenue credited to the trading businesses). During the quarter ended February 29, 2008, the Company experienced net trading losses on eight days.

Credit Risk.

For a further discussion of the Company’s credit risks, see “Quantitative and Qualitative Disclosures about Market Risks—Credit Risk” in Part II, Item 7A of the Form 10-K.

Credit Exposure—Corporate Lending. In connection with certain of its Institutional Securities business activities, the Company provides loans or lending commitments (including bridge financing) to selected clients. Such loans and commitments can generally be classified as either “event-driven” or “relationship-driven.”

“Event-driven” loans and commitments refer to activities associated with a particular event or transaction, such as to support client merger, acquisition or recapitalization transactions. The commitments associated with these “event-driven” activities may not be indicative of the Company’s actual funding requirements, since funding is contingent upon a proposed transaction being completed. In addition, the borrower may not fully utilize the commitment or the Company’s portion of the commitment may be reduced through the syndication process. The borrower’s ability to draw on the commitment is also subject to certain terms and conditions, among other factors. The borrowers of “event-driven” lending transactions may be investment grade or non-investment grade. The Company risk manages its exposures in connection with “event-driven” lending transactions through various means, including syndication, distribution and/or hedging.

“Relationship-driven” loans and commitments are generally made to expand business relationships with select clients. The commitments associated with “relationship-driven” activities may not be indicative of the Company’s actual funding requirements, as the commitment may expire unused or the borrower may not fully

utilize the commitment. The borrowers of “relationship-driven” lending transactions may be investment grade or non-investment grade. The Company may hedge its exposures in connection with “relationship-driven” transactions.

The following table presents information about the Company’s corporate loans and commitments as of February 29, 2008. The “total corporate lending exposure” column includes both lending commitments and funded loans. Funded loans represent loans that have been drawn by the borrower and that were outstanding as of February 29, 2008. Lending commitments represent legally binding obligations to provide funding to clients as of February 29, 2008 for both “relationship-driven” and “event-driven” lending transactions. As discussed above, these loans and commitments have varying terms, may be senior or subordinated, may be secured or unsecured, are generally contingent upon representations, warranties and contractual conditions applicable to the borrower, and may be syndicated, traded or hedged by the Company.

At February 29, 2008 and November 30, 2007, the aggregate amount of investment grade loans was \$15.6 billion and \$13.0 billion, respectively, and the aggregate amount of non-investment grade loans was \$10.7 billion and \$10.9 billion, respectively. At February 29, 2008 and November 30, 2007, the aggregate amount of lending commitments outstanding was \$59.5 billion and \$70.2 billion, respectively. In connection with these business activities (which include corporate funded loans and lending commitments), the Company had hedges (which include “single name,” “sector” and “index” hedges) with a notional amount of \$40.6 billion and \$37.6 billion at February 29, 2008 and November 30, 2007, respectively. The table below shows the Company’s credit exposure from its corporate lending positions and commitments as of February 29, 2008. Since commitments associated with these business activities may expire unused, they do not necessarily reflect the actual future cash funding requirements:

Corporate Lending Commitments and Funded Loans

Credit Rating(1)	Years to Maturity				Total Corporate Lending Exposure(2)(3)	Corporate Funded Loans	Total Corporate Lending Commitments
	Less than 1	1-3	3-5	Over 5			
	(dollars in millions)						
AAA	\$ 581	\$ 260	\$ 1,239	\$ 425	\$ 2,505	\$ 364	\$ 2,141
AA	6,248	559	3,664	333	10,804	1,621	9,183
A	7,674	3,349	8,481	224	19,728	2,431	17,297
BBB	8,393	5,068	12,400	937	26,798	11,138	15,660
Investment grade	22,896	9,236	25,784	1,919	59,835	15,554	44,281
Non-investment grade	4,086	1,647	4,979	15,243	25,955	10,711	15,244
Total	<u>\$26,982</u>	<u>\$10,883</u>	<u>\$30,763</u>	<u>\$17,162</u>	<u>\$85,790</u>	<u>\$26,265</u>	<u>\$59,525</u>

- (1) Obligor credit ratings are determined by the Institutional Credit Department using methodologies generally consistent with those employed by external rating agencies.
- (2) Total corporate lending exposure includes both lending commitments and funded loans. Amounts exclude approximately \$41 billion of notional amount of hedges.
- (3) Total corporate lending exposure includes “event-driven” funded loans of \$14.6 billion and “event-driven” lending commitments of \$16.0 billion. Included in the \$16.0 billion of “event-driven” loan commitments were \$8.2 billion of commitments to non-investment grade borrowers that were accepted by the borrower but not yet closed, including amounts related to Clear Channel Communications, Inc.

Credit Exposure—Derivatives. The table below presents a summary by counterparty credit rating and remaining contract maturity of the fair value of OTC derivatives in a gain position as of February 29, 2008. Fair value represents the risk reduction arising from master netting agreements, where applicable, and, in the final column, net of collateral received (principally cash and U.S. government and agency securities):

OTC Derivative Products—Financial Instruments Owned(1)

Credit Rating(2)	Years to Maturity				Cross-Maturity and Cash Collateral Netting(3)	Net Exposure Post-Cash Collateral	Net Exposure Post- Collateral
	Less than 1	1-3	3-5	Over 5			
	(dollars in millions)						
AAA	\$ 1,354	\$ 2,287	\$ 3,550	\$11,444	\$ (4,866)	\$13,769	\$13,423
AA	15,775	15,084	8,568	30,116	(39,376)	30,167	27,589
A	6,614	4,697	4,748	9,440	(11,757)	13,742	13,341
BBB	4,709	4,120	2,196	3,106	(4,630)	9,501	8,102
Non-investment grade	8,447	5,259	5,132	3,995	(8,184)	14,649	9,982
Unrated(4)	1,741	568	116	365	(368)	2,422	184
Total	<u>\$38,640</u>	<u>\$32,015</u>	<u>\$24,310</u>	<u>\$58,466</u>	<u>\$(69,181)</u>	<u>\$84,250</u>	<u>\$72,621</u>

- (1) Fair values shown present the Company's exposure to counterparties related to the Company's OTC derivative products. The table does not include the effect of any related hedges utilized by the Company. The table also excludes fair values corresponding to other credit exposures, such as those arising from the Company's lending activities.
- (2) Obligor credit ratings are determined by the Institutional Credit Department using methodologies generally consistent with those employed by external rating agencies.
- (3) Amounts represent the netting of receivable balances with payable balances for the same counterparty across maturity categories. Receivable and payable balances with the same counterparty in the same maturity category are netted within such maturity category, where appropriate. Cash collateral received is netted on a counterparty basis, provided legal right of offset exists.
- (4) In lieu of making an individual assessment of the creditworthiness of unrated companies, the Company makes a determination that the collateral held with respect to such obligations is sufficient to cover a substantial portion of its exposure.

The following tables summarize the fair values of the Company's OTC derivative products recorded in Financial instruments owned and Financial instruments sold, not yet purchased by product category and maturity as of February 29, 2008, including on a net basis, where applicable, reflecting the fair value of related non-cash collateral for financial instruments owned:

OTC Derivative Products—Financial Instruments Owned

Product Type	Years to Maturity				Cross-Maturity and Cash Collateral Netting(1)	Net Exposure Post-Cash Collateral	Net Exposure Post- Collateral
	Less than 1	1-3	3-5	Over 5			
	(dollars in millions)						
Interest rate and currency swaps, interest rate options, credit derivatives and other fixed income securities contracts	\$ 5,811	\$17,252	\$19,294	\$55,749	\$(50,520)	\$47,586	\$43,758
Foreign exchange forward contracts and options ...	11,543	1,383	155	91	(2,216)	10,956	9,127
Equity securities contracts (including equity swaps, warrants and options) ...	9,429	2,809	449	777	(6,631)	6,833	3,526

- (1) Since these amounts are liabilities of the Company, they do not result in credit exposures.
(2) Amounts represent the netting of receivable balances with payable balances for the same counterparty across maturity and product categories. Receivable and payable balances with the same counterparty in the same maturity category are netted within the maturity category, where appropriate. Cash collateral paid is netted on a counterparty basis, provided legal right of offset exists.

The Company's derivatives (both listed and OTC) at February 29, 2008 and November 30, 2007 are summarized in the table below, showing the fair value of the related assets and liabilities by product:

<u>Product Type</u>	<u>At February 29, 2008</u>		<u>At November 30, 2007</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
	(dollars in millions)			
Interest rate and currency swaps, interest rate options, credit derivatives and other fixed income securities contracts	\$47,776	\$29,504	\$33,804	\$19,515
Foreign exchange forward contracts and options	10,956	10,955	7,755	9,372
Equity securities contracts (including equity swaps, warrants and options)	20,777	30,156	19,913	27,887
Commodity forwards, options and swaps	19,965	18,777	15,531	14,830
Total	<u>\$99,474</u>	<u>\$89,392</u>	<u>\$77,003</u>	<u>\$71,604</u>

Each category of derivative products in the above tables includes a variety of instruments, which can differ substantially in their characteristics. Instruments in each category can be denominated in U.S. dollars or in one or more non-U.S. currencies.

The Company determines the fair values recorded in the above tables using various pricing models. For a discussion of fair value as it affects the condensed consolidated financial statements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies" in Part I, Item 2 and Note 1 to the condensed consolidated financial statements.

Country Exposure. The Company monitors its credit exposure to individual countries. Credit exposure to a country arises from the Company's primary lending activities and derivatives activities in a country. At February 29, 2008, based on the domicile of the counterparty, approximately 6% of the Company's credit

exposure (for credit exposure arising from corporate loans and lending commitments as discussed above and current exposure arising from the Company's OTC derivatives contracts) was to emerging markets, and no one emerging market country accounted for more than 2% of the Company's credit exposure. The Company defines emerging markets to include generally all countries that are not members of the Organization for Economic Co-operation and Development and includes as well the Czech Republic, Hungary, Korea, Mexico, Poland, the Slovak Republic and Turkey but excludes countries rated AA and Aa2 or above by Standard & Poor's and Moody's Investors Service, respectively.

Industry Exposure. The Company also monitors its credit exposure to individual industries. At February 29, 2008, the Company's material credit exposure (for credit exposure arising from corporate loans and lending commitments as discussed above and current exposure arising from the Company's OTC derivatives contracts) was to entities engaged in the following industries: financial institutions, banks, consumer-related entities, utilities, sovereign, energy-related entities and telecommunications.

Item 4. Controls and Procedures

Under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

No change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) occurred during the period covered by this report that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II OTHER INFORMATION

Item 1. Legal Proceedings

In addition to the matters described in the Company's Annual Report on Form 10-K for the fiscal year ended November 30, 2007 (the "Form 10-K") and those described below, in the normal course of business, the Company has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions, and other litigation, arising in connection with its activities as a global diversified financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or in financial distress.

The Company is also involved, from time to time, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding the Company's business, including, among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

The Company contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, the Company cannot predict with certainty the loss or range of loss, if any, related to such matters, how or if such matters will be resolved, when they will ultimately be resolved, or what the eventual settlement, fine, penalty or other relief, if any, might be. Subject to the foregoing, the Company believes, based on current knowledge and after consultation with counsel, that the outcome of the pending matters will not have a material adverse effect on the consolidated financial condition of the Company, although the outcome of such matters could be material to the Company's operating results for a particular future period, depending on, among other things, the level of the Company's revenues or income for such period.

The following developments have occurred with respect to certain matters previously reported in the Form 10-K.

IPO Fee Litigation.

On remand, plaintiffs filed a motion for class certification on October 17, 2007, which defendants opposed.

Subprime-related Matters.

A shareholder derivative lawsuit was filed in the U.S. District Court for the Southern District of New York (the "SDNY") during November 2007 asserting claims related in large part to losses caused by certain subprime-related trading positions and related matters. The complaint in that lawsuit, which is styled *Steve Staehr, Derivatively on Behalf of Morgan Stanley v. John J. Mack, et al.*, was served on the Company on February 15, 2008. In January and February 2008, two purported class action complaints were filed in the SDNY asserting claims on behalf of participants in the Company's 401(k) plan and employee stock ownership plan against the Company and other parties, including certain present and former directors and officers, under the Employee Retirement Income Security Act of 1974 ("ERISA"). The complaints are similar to certain ERISA-related complaints filed in the SDNY in December 2007 insofar as they relate in large part to subprime-related losses, and allege, among other things, that the Company's stock was not a prudent investment and that risks associated with the Company's stock and its financial condition were not adequately disclosed. On February 11, 2008, all of the pending actions asserting claims under ERISA related to the Company's 401(k) and employee stock ownership plan were consolidated in a single proceeding in the SDNY, which is styled *In re Morgan Stanley ERISA Litigation*.

Item 1A. Risk Factors

For a discussion of the risk factors affecting the Company, see “Risk Factors” in Part I, Item 1A of the Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below sets forth the information with respect to purchases made by or on behalf of the Company of its common stock during the quarterly period ended February 29, 2008.

Issuer Purchases of Equity Securities

(dollars in millions, except per share amounts)

Share Repurchase Program (A)	—	N/A	—	\$2,271
Employee Transactions (B)	983,618	\$48.76	N/A	N/A

(A) On December 19, 2006, the Company announced that its Board of Directors authorized the repurchase of up to \$6 billion of the Company’s outstanding stock under a new share repurchase program (the “Share Repurchase Program”). The Share Repurchase Program is a program for capital management purposes that considers, among other things, business segment capital needs, as well as equity-based compensation and benefit plan requirements. The Share repurchase program has no set expiration or termination date.

(B) Includes: (1) shares delivered or attested to in satisfaction of the exercise price and/or tax withholding obligations by holders of employee stock options (granted under employee stock compensation plans) who exercised options; (2) restricted shares withheld (under the terms of grants under employee stock compensation plans) to offset tax withholding obligations that occur upon vesting and release of restricted shares; and (3) shares withheld (under the terms of grants under employee stock compensation plans) to offset tax withholding obligations that occur upon the delivery of outstanding shares underlying restricted stock units. The Company’s employee stock compensation plans provide that the value of the shares delivered or attested, or withheld, shall be valued using the fair market value of the Company common stock on the date the relevant transaction occurs, using a valuation methodology established by the Company.

(C) Share purchases under publicly announced programs are made pursuant to open-market purchases, Rule 10b5-1 plans or privately negotiated transactions (including with employee benefit plans) as market conditions warrant and at prices the Company deems appropriate.

Item 6. Exhibits

An exhibit index has been filed as part of this Report on Page E-1.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
