(1) Net (short)/long positions in individual currencies of the Company are reported in gross, i.e. interoffice balances and transactions between the head office in Hong Kong and the Branch are not eliminated.

The Company has no option and structural positions in any particular foreign currency as at 30 June 2020 and 31 December 2019.

#### **18. PILLAR 3 DISCLOSURE**

The capital adequacy ratios of the Company were calculated in accordance with Banking (Capital) Rules ("BCR") of the Banking Ordinance. The Company uses the following approaches to calculate its capital charge for:

- (a) credit risk: Standardised (Credit Risk) Approach ("STC approach"); and
- (b) operational risk: Basic Indicator Approach ("BIA approach").

There was no risk-weighted amount ("RWA") for market risk for the Company because the Company was exempted by the HKMA from the calculation of market risk.

The following templates and tables show the standard disclosure templates and tables specified by the HKMA in relation to the Pillar 3 disclosures required under the Banking (Disclosure) Rules. Other Pillar 3 templates or tables not disclosed below either are not applicable to the Company or have no reportable amount for the period.

The disclosure on minimum capital requirement is made by multiplying the Company's RWA derived from the relevant calculation approach by 8%, not the Company's actual "regulatory capital".

Decrease in total RWA during the second quarter in 2020 was US\$53,351,000. The key driver was due to decrease in RWA for credit risk for non-securitization exposures arising from loans and advances to customers.

#### 18. PILLAR 3 DISCLOSURE (CONTINUED)

#### Template CC1: Composition of regulatory capital (continued)

Notes to the Template

		Hong Kong basis	
	Description	USD'000	USD'000
10	Deferred tax assets ("DTAs") (net of associated deferred tax liabilities)	3,858	3,858
	Explanation		

As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realised are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

Abbreviations:

CET1: Common Equity Tier 1

AT1: Additional Tier 1

2	Sum		523,484		
3	Total (Note)		1,131,690	0.463%	9,166

Note:

The geographical allocation of private sector credit exposures to the various jurisdictions is based on "ultimate risk basis". "Ultimate risk basis" means the allocation of exposures to the jurisdictions where the risk ultimately lies, as defined as the location where the "ultimate obligor" resides.

Total RWA on Row 3 represents total sum of the RWA for private sector credit exposures across all jurisdictions to which the Company is exposed, including jurisdictions with no applicable JCCyB ratio or with applicable JCCyB ratio set at zero.

The CCyB amount as at 30 June 2020 represents the Company's specific CCyB ratio multiplied by the Company's total RWA, as specified by the standard disclosure templates issued by the HKMA, instead of the Company's RWA relating to private sector credit exposure.
