

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2019

Commission File Number 1-11758

Morgan Stanley

(Exact Name of Registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

1585 Broadway

New York, NY 10036
(Address of principal executive offices, including zip code)

36-3145972

(I.R.S. Employer Identification No.)

(212) 761-4000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of exchange on which registered	Trading Symbol(s)
Common Stock, \$0.01 par value	New York Stock Exchange	MS
Depository Shares, each representing 1/1,000th interest in a share of Floating Rate Non-Cumulative Preferred Stock, Series A, \$0.01 par value	New York Stock Exchange	MS/PA
Depository Shares, each representing 1/1,000th interest in a share of Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series E, \$0.01 par value	New York Stock Exchange	MS/PE
Depository Shares, each representing 1/1,000th interest in a share of Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series F, \$0.01 par value	New York Stock Exchange	MS/PF
Depository Shares, each representing 1/1,000th interest in a share of 6.625% Non-Cumulative Preferred Stock, Series G, \$0.01 par value	New York Stock Exchange	MS/PG
Depository Shares, each representing 1/1,000th interest in a share of Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series I, \$0.01 par value	New York Stock Exchange	MS/PI
Depository Shares, each representing 1/1,000th interest in a share of Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series K, \$0.01 par value	New York Stock Exchange	MS/PK
Global Medium-Term Notes, Series A, Fixed Rate Step-Up Senior Notes Due 2026 of Morgan Stanley Finance LLC (and Registrant's guarantee with respect thereto)	New York Stock Exchange	MS/26C
Market Vectors ETNs due March 31, 2020 (two issuances)	NYSE Arca, Inc.	URR/DDR
Market Vectors ETNs due April 30, 2020 (two issuances)	NYSE Arca, Inc.	CNY/INR
Morgan Stanley Cushing® MLP High Income Index ETNs due March 21, 2031	NYSE Arca, Inc.	MLPY

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the Registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2019, there were 1,682,234,555 shares of the Registrant's Common Stock, par value \$0.01 per share, outstanding.

Available Information

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains an internet site, www.sec.gov, that contains annual, quarterly and current reports, proxy and information statements and other information that issuers file electronically with the SEC. Our electronic SEC filings are available to the public at the SEC's internet site.

Our internet site is www.morganstanley.com. You can access our Investor Relations webpage at www.morganstanley.com/about-us-ir. We make available free of charge, on or through our Investor Relations webpage, our Proxy Statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to the Securities Exchange Act of 1934, as amended ("Exchange Act"), as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. We also make available, through our Investor Relations webpage, via a link to the SEC's internet site, statements of beneficial ownership of our equity securities filed by our directors, officers, 10% or greater shareholders and others under Section 16 of the Exchange Act.

You can access information about our corporate governance at www.morganstanley.com/about-us-governance. Our Corporate Governance webpage includes:

- Amended and Restated Certificate of Incorporation;
- Amended and Restated Bylaws;
- Charters for our Audit Committee, Compensation, Management Development and Succession Committee, Nominating and Governance Committee, Operations and Technology Committee, and Risk Committee;
- Corporate Governance Policies;
- Policy Regarding Corporate Political Activities;
- Policy Regarding Shareholder Rights Plan;
- Equity Ownership Commitment;
- Code of Ethics and Business Conduct;
- Code of Conduct;
- Integrity Hotline Information; and
- Environmental and Social Policies.

Our Code of Ethics and Business Conduct applies to all directors, officers and employees, including our Chief Executive Officer, Chief Financial Officer and Deputy Chief Financial Officer. We will post any amendments to the Code of Ethics and Business Conduct and any waivers that are required to be disclosed by the rules of either the SEC or the New York Stock Exchange LLC ("NYSE") on our internet site. You can request a copy of these documents, excluding exhibits, at no cost, by contacting Investor Relations, 1585 Broadway, New York, NY 10036 (212-761-4000). The information on our internet site is not incorporated by reference into this report.

Management’s Discussion and Analysis of Financial Condition and Results of Operations

Introduction

Morgan Stanley is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms “Morgan Stanley,” “Firm,” “us,” “we” or “our” mean Morgan Stanley (the “Parent Company”) together with its consolidated subsidiaries. We define the following as part of our consolidated financial statements (“financial statements”): consolidated income statements (“income statements”), consolidated balance sheets (“balance sheets”) and consolidated cash flow statements (“cash flow statements”). See the “Glossary of Common Acronyms” for the definition of certain acronyms used throughout this Form 10-Q.

A description of the clients and principal products and services of each of our business segments is as follows:

Institutional Securities provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing, prime brokerage and market-making activities in equity and fixed income products, including foreign exchange and commodities. Lending activities include originating corporate loans, commercial mortgage lending, providing secured lending facilities and extending financing to sales and trading customers. Other activities include investments and research.

Wealth Management provides a comprehensive array of financial services and solutions to individual investors and small to medium-sized businesses and institutions covering brokerage and investment advisory services; financial and wealth planning services; annuity and insurance products; securities-based lending, residential real estate loans and other lending products; banking and retirement plan services.

Investment Management provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined contribution plans, foundations, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are served through intermediaries, including affiliated and non-affiliated distributors.

The results of operations in the past have been, and in the future may continue to be, materially affected by competition; risk factors; and legislative, legal and regulatory developments; as well as other factors. These factors also may have an adverse impact on our ability to achieve our strategic objectives. Additionally, the discussion of our results of operations herein may contain forward-looking statements. These statements, which reflect management’s beliefs and expectations, are subject to risks and uncertainties that may cause actual results to differ materially. For a discussion of the risks and uncertainties that may affect our future results, see “Forward-Looking Statements,” “Business—Competition,” “Business—Supervision and Regulation,” and “Risk Factors” in the 2018 Form 10-K, and “Liquidity and Capital Resources—Regulatory Requirements” herein.

Executive Summary

Overview of Financial Results

Consolidated Results

Net Revenues

(\$ in millions)

Net Income Applicable to Morgan Stanley

(\$ in millions)

Earnings per Common Share¹

1. For the calculation of basic and diluted EPS, see Note 15 to the financial statements.

- We reported net revenues of \$10,286 million in the quarter ended March 31, 2019 (“current quarter,” or “1Q 2019”), compared with \$11,077 million in the quarter ended March 31, 2018 (“prior year quarter,” or “1Q 2018”). For the current quarter, net income applicable to Morgan Stanley was \$2,429 million, or \$1.39 per diluted common share, compared with \$2,668 million or \$1.45 per diluted common share, in the prior year quarter.

Non-interest Expenses¹

(\$ in millions)

1. The percentages on the bars in the chart represent the contribution of compensation and benefits expenses and non-compensation expenses to total non-interest expenses.

- Compensation and benefits expenses of \$4,651 million in current quarter decreased 5% from \$4,914 million in the prior year quarter, primarily due to decreases in discretionary incentive compensation and the formulaic payout to Wealth Management representatives, both driven by lower revenues. These decreases were partially offset by increases in the fair value of investments to which certain deferred compensation plans are referenced and higher salaries.
- Non-compensation expenses were \$2,680 million in the current quarter compared with \$2,743 million in the prior year quarter, representing a 2% decrease. This decrease was primarily due to lower litigation and volume-related expenses, partially offset by increased investment in technology.

Income Taxes

The current quarter includes intermittent net discrete tax benefits of \$101 million, primarily associated with the remeasurement of reserves and related interest due to new information with regard to multi-jurisdiction tax examinations. For further information, see “Supplemental Financial Information and Disclosures—Income Tax Matters” herein.

Selected Financial Information and Other Statistical Data

\$ in millions	Three Months Ended March 31,

	At March 31, 2019	At December 31, 2018
Capital ratios⁶		
Common Equity Tier 1 capital	16.7%	16.9%
Tier 1 capital	19.0%	19.2%
Total capital	21.6%	21.8%
Tier 1 leverage	8.4%	8.4%
SLR	6.5%	6.5%

- The expense efficiency ratio represents total non-interest expense as a percentage of net revenues.
- Represents a non-GAAP measure. See “Selected Non-GAAP Financial Information” herein.
- For a discussion of the GLR, see “Liquidity and Capital Resources—Liquidity Risk Management Framework—Global Liquidity Reserve” herein.
- Amounts include loans held for investment (net of allowance) and loans held for sale but exclude loans at fair value, which are included in Trading assets in the balance sheets (see Note 7 to the financial statements).
- Book value per common share and tangible book value per common share equal common shareholders’ equity and tangible common shareholders’ equity, respectively, divided by common shares outstanding.
- At March 31, 2019 and December 31 2018, our risk-based capital ratios are based on the Standardized Approach rules. For a discussion of our capital ratios, see “Liquidity and Capital Resources—Regulatory Requirements” herein.

Business Segment Results

Net Revenues by Segment^{1, 2}
(\$ in millions)

Net Income Applicable to Morgan Stanley by Segment^{1, 3}
(\$ in millions)

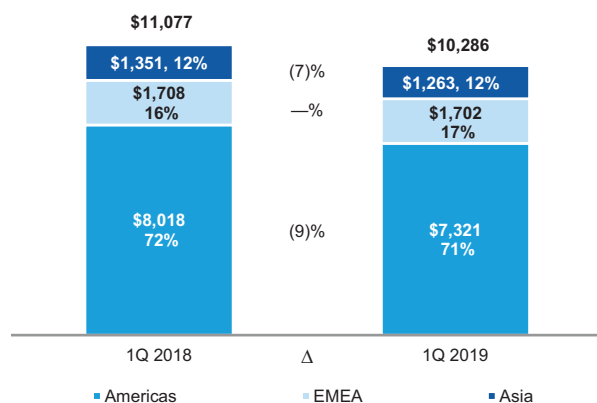

- The percentages on the bars in the charts represent the contribution of each business segment to the total of the applicable financial category and may not total to 100% due to intersegment eliminations.
- The total amount of Net Revenues by Segment includes intersegment eliminations of \$(103) million and \$(115) million in the current quarter and prior year quarter, respectively.
- The total amount of Net Income Applicable to Morgan Stanley by Segment includes intersegment eliminations of \$(2) million in the current quarter.

- Institutional Securities net revenues of \$5,196 million in the current quarter decreased 15% from the prior year quarter, primarily reflecting lower revenues from both sales and trading and Investment banking.
- Wealth Management net revenues were relatively unchanged from the prior year quarter.
- Investment Management net revenues of \$804 million in the current quarter increased 12% from the prior year quarter, primarily reflecting higher revenues from Investments.

Net Revenues by Region^{1, 2}

(\$ in millions)

1. For a discussion of how the geographic breakdown of net revenues is determined, see Note 18 to the financial statements.
2. The percentages on the bars in the charts represent the contribution of each region to the total.

Selected Non-GAAP Financial Information

We prepare our financial statements using U.S. GAAP. From time to time, we may disclose certain “non-GAAP financial measures” in this document or in the course of our earnings releases, earnings and other conference calls, financial presentations, Definitive Proxy Statement and otherwise. A “non-GAAP financial measure” excludes, or includes, amounts from the most directly comparable measure calculated and presented in accordance with U.S. GAAP. We consider the non-GAAP financial measures we disclose to be useful to us, analysts, investors and other stakeholders by providing further transparency about, or an alternate means of assessing, our financial condition, operating results, prospective regulatory capital requirements or capital adequacy.

These measures are not in accordance with, or a substitute for, U.S. GAAP and may be different from or inconsistent with non-GAAP financial measures used by other companies. Whenever we refer to a non-GAAP financial measure, we will also generally define it or present the most directly comparable financial measure calculated and presented in accordance with U.S. GAAP, along with a reconciliation of the differences between the U.S. GAAP financial measure and the non-GAAP financial measure.

The principal non-GAAP financial measures presented in this document are set forth in the following tables.

Consolidated	14.9%	17.2%

- Adjusted amounts exclude intermittent net discrete tax provisions (benefits). We consider certain income tax consequences associated with employee share-based awards recognized in Provision for income taxes in the income statements to be recurring-type ("Recurring") discrete tax items, as we anticipate some level of conversion activity each quarter. Accordingly, these Recurring discrete tax provisions (benefits) are not part of the adjustment for intermittent net discrete tax provisions (benefits). For further information on the net discrete tax provisions (benefits), see "Supplemental Financial Information and Disclosures—Income Tax Matters" herein.
- ROE and ROTCE represent annualized net income applicable to Morgan Stanley less preferred dividends as a percentage of average common equity and average tangible common equity, respectively. When excluding intermittent net discrete tax provisions (benefits), both the numerator and average denominator are adjusted.
- The calculations used in determining our "ROE and ROTCE Targets" referred to in the following section are the Adjusted ROE and Adjusted ROTCE amounts shown in this table.
- Pre-tax margin represents income from continuing operations before income taxes as a percentage of net revenues.
- Average common equity and average tangible common equity for each business segment are determined using our Required Capital framework (see "Liquidity and Capital Resources—Regulatory Requirements—Attribution of Average Common Equity According to the Required Capital Framework" herein).
- The calculation of ROE and ROTCE by segment uses net income applicable to Morgan Stanley by segment less preferred dividends allocated to each segment as a percentage of average common equity and average tangible common equity, respectively, allocated to each segment.

Return on Equity and Tangible Common Equity Targets

We have established an ROE Target of 10% to 13% and an ROTCE Target of 11.5% to 14.5%.

Our ROE and ROTCE Targets are forward-looking statements that may be materially affected by many factors, including, among other things: macroeconomic and market conditions; legislative and regulatory developments; industry trading and investment banking volumes; equity market levels; interest rate environment; outsized legal expenses or penalties and the ability to maintain a reduced level of expenses; and capital levels. For further information on our ROE and ROTCE Targets and related assumptions, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Executive Summary—Return on Equity and Tangible Common Equity Targets" in the 2018 Form 10-K.

Business Segments

Substantially all of our operating revenues and operating expenses are directly attributable to our business segments. Certain revenues and expenses have been allocated to each business segment, generally in proportion to its respective net revenues, non-interest expenses or other relevant measures.

For an overview of the components of our business segments, net revenues, compensation expense and income taxes, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments" in the 2018 Form 10-K.

With respect to Institutional Securities sales and trading activities, Commodities products and Other also includes Trading revenues from managing derivative counterparty credit risk on behalf of clients, in addition to results from the centralized management of our fixed income derivative counterparty exposures.

	2019	2018	
Advisory	\$ 406	\$ 574	(29)%
Underwriting:			
Equity	339	421	(19)%
Fixed income	406	518	(22)%
Total Underwriting	745	939	(21)%
Total Investment banking	\$ 1,151	\$ 1,513	(24)%

Investment Banking Volumes

\$ in billions	Three Months Ended March 31,	
	2019	2018
Completed mergers and acquisitions ¹	\$ 187	\$ 170
Equity and equity-related offerings ^{2,3}	14	22
Fixed income offerings ^{2,4}	54	58

Source: Refinitiv (formerly Thomson Reuters Financial & Risk), data as of April 1, 2019. Transaction volumes may not be indicative of net revenues in a given period. In addition, transaction volumes for prior periods may vary from amounts previously reported due to the subsequent withdrawal, change in value, or change in timing of certain transactions.

1. Includes transactions of \$100 million or more. Based on full credit to each of the advisors in a transaction.
2. Based on full credit for single book managers and equal credit for joint book managers.
3. Includes Rule 144A issuances and registered public offerings of common stock and convertible securities and rights offerings.
4. Includes Rule 144A and publicly registered issuances, non-convertible preferred stock, mortgage-backed and asset-backed securities, and taxable municipal debt. Excludes leveraged loans and self-led issuances.

Investment banking revenues of \$1,151 million in the current quarter decreased 24%, reflecting lower results in both our advisory and underwriting businesses.

- Advisory revenues decreased in the current quarter primarily due to the effect of lower fee realizations.
- Equity underwriting revenues decreased in the current quarter primarily as a result of lower volumes. Revenues decreased primarily in initial public offerings, follow-ons and convertible issuances, partially offset by an increase in secondary block share trades.
- Fixed income underwriting revenues decreased in the current quarter due to the effect of lower fee realizations and lower volumes. Revenues decreased primarily in non-investment grade loan fees.

See "Investment Banking Volumes" herein.

1. Includes Commissions and fees and Asset management revenues.
2. Includes funding costs, which are allocated to the businesses based on funding usage.

As discussed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Net Revenues by Segment” in the 2018 Form 10-K, we manage each of the sales and trading businesses based on its aggregate net revenues. We provide qualitative commentary in the discussion of results that follow on the key drivers of period over period variances, as the quantitative impact of the various market dynamics typically cannot be disaggregated.

For additional information on total Trading revenues, see the table “Trading Revenues by Product Type” in Note 18 to the financial statements.

Equity

Equity sales and trading net revenues of \$2,015 million in the current quarter decreased 21% from the prior year quarter, reflecting lower results in both our financing and execution services businesses.

- Financing decreased from the prior year quarter, primarily due to lower average client balances, which resulted in lower Trading and Net interest revenues. Additionally, Net interest revenues decreased due to higher funding costs attributable to higher rates and changes in funding mix.
- Execution services decreased from the prior year quarter, reflecting lower Trading revenues as a result of less favorable inventory management and lower client activity in derivatives products. In addition, Commissions and fees decreased due to lower client activity in cash equities products.

Fixed Income

Fixed income net revenues of \$1,710 million in the current quarter were 9% lower than the prior year quarter, primarily driven by lower revenues in global macro products and lower Net interest revenues due to higher funding costs, partially offset by higher revenues in credit products and commodities products and other.

- Global macro products revenues decreased reflecting unfavorable inventory management while the level of client activity remained consistent.
- Credit products Trading revenues increased primarily in corporate credit products driven by higher client activity, partially offset by lower client activity in securitized products.
- Commodities products and Other Trading revenues increased primarily as a result of gains from client structuring activity within derivatives counterparty credit risk management and effective inventory management in commodities, partially offset by decreased client activity in structured transactions within commodities.

Other

- Other sales and trading net gains of \$17 million in the current quarter increased from the prior year quarter, primarily due to an increase in the fair value of investments to which certain deferred compensation plans are referenced, partially offset by higher losses on hedges associated with corporate loans.

Investments, Other Revenues, Non-interest Expenses, and Income Tax Items

Investments

- Net investment gains of \$81 million in the current quarter increased from the prior year quarter as a result of higher revenues driven by a fund distribution and gains on real estate limited partnership investments.

Other Revenues

- Other revenues of \$222 million in the current quarter increased from the prior year quarter, primarily reflecting higher mark-to-market gains on held for sale loans, partially offset by lower results from certain equity method investments.

Non-interest Expenses

Non-interest expenses of \$3,601 million in the current quarter decreased from the prior year quarter, reflecting a 16% decrease in Compensation and benefits expenses and a 3% decrease in Non-compensation expenses.

- Compensation and benefits expenses decreased in the current quarter, primarily due to decreases in discretionary incentive compensation driven by lower revenues, partially offset by increases in the fair value of investments to which certain deferred compensation plans are referenced and higher salaries.
- Non-compensation expenses decreased in the current quarter, primarily due to lower litigation and volume-related expenses, partially offset by increased investment in technology and higher professional service expenses.

Income Tax Items

The current quarter includes intermittent net discrete tax benefits of \$101 million. For further information, see "Supplemental Financial Information and Disclosures—Income Tax Matters" herein.

Client assets (\$ in millions) ⁴	\$ 158	\$ 151
Fee-based asset flows (\$ in billions) ⁵	\$ 14.8	\$ 18.2

1. Fee-based client assets represent the amount of assets in client accounts where the fee for services is calculated based on those assets.
2. Client liabilities include securities-based and tailored lending, residential real estate loans and margin lending.
3. Revenues per representative equal Wealth Management's annualized net revenues divided by the average number of representatives.
4. Client assets per representative equal total period-end client assets divided by period-end number of representatives.
5. For a description of the Inflows and Outflows included within Fee-based asset flows, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Wealth Management—Fee-Based Client Assets" in the 2018 Form 10-K. Excludes institutional cash management-related activity.

Transactional Revenues

\$ in millions	Three Months Ended March 31,		
	2019	2018	% Change
Investment banking	\$ 109	\$ 140	(22)%
Trading	302	109	177%
Commissions and fees	406	498	(18)%
Total	\$ 817	\$ 747	9%
Transactional revenues as a % of Net revenues	19%	17%	

Net Revenues

Transactional Revenues

Transactional revenues of \$817 million in the current quarter increased 9% from the prior year quarter as a result of higher Trading revenues, partially offset by lower Commissions and fees and Investment banking revenues.

- Investment banking revenues decreased in the current quarter primarily due to lower revenues from structured products issuances.
- Trading revenues increased in the current quarter primarily due to gains related to investments associated with certain employee deferred compensation plans compared with losses in the prior year quarter.
- Commissions and fees decreased in the current quarter primarily due to decreased client activity in equities.

Asset Management

Asset management revenues of \$2,361 million in the current quarter decreased 5% from the prior year quarter primarily reflecting lower fee-based client assets levels at the beginning of the current quarter due to fourth quarter market depreciation, partially offset by positive net flows.

See "Fee-Based Client Assets—Rollforwards" herein.

Net Interest

Net interest of \$1,130 million in the current quarter increased 6% from the prior year quarter primarily as a result of higher interest rates on loans and cash management activities and higher investment securities balances, partially offset by the effect of higher interest rates on Deposits due to changes in funding mix.

In addition, we centralized certain internal treasury activities as of January 1, 2019, which partially offset the increases in Interest income and Interest expense compared with the prior year quarter. This impact is expected to continue in future periods. The effect on Net interest income was not significant in the current quarter, nor is it expected to be for the full year 2019.

Non-interest Expenses

Non-interest expenses of \$3,201 million were relatively unchanged from the prior year quarter.

- Compensation and benefits expenses increased modestly from the prior year quarter, reflecting increases in the fair value of investments to which certain deferred compensation plans are referenced and salaries, offset by decreases in the formulaic payout to Wealth Management representatives linked to lower revenues and the roll-off of certain merger-related employee retention loans.
- Non-compensation expenses decreased due to lower consulting fees and deposit insurance expenses.

Net Revenues

Investments

Investments gains of \$191 million in the current quarter increased 148% from the prior year quarter primarily as a result of higher carried interest in certain Asia private equity and infrastructure funds.

Asset Management

Asset management revenues of \$617 million in the current quarter were relatively unchanged from the prior year quarter, as average AUM and average fee rates remained stable.

See "Assets Under Management or Supervision" herein.

Non-interest Expenses

Non-interest expenses of \$630 million in the current quarter increased 11% from the prior year quarter primarily as a result of higher compensation and benefits expenses.

- Compensation and benefits expenses increased in the current quarter primarily due to deferred compensation associated with carried interest.
- Non-compensation expenses were relatively unchanged from the prior year quarter.

Supplemental Financial Information and Disclosures

Income Tax Matters

Effective Tax Rate from Continuing Operations

\$ in millions	Three Months Ended March 31,	
	2019	2018
U.S. GAAP	16.5%	20.9%
Adjusted effective income tax rate—non-GAAP ¹	19.9%	20.9%
Net discrete tax provisions/(benefits)		
Recurring ²	\$ (107)	\$ (147)
Intermittent ³	\$ (101)	\$ —

- Adjusted effective income tax rate is a non-GAAP measure that excludes intermittent net discrete tax provisions (benefits). For further information on non-GAAP measures, see "Selected Non-GAAP Financial Information" herein.
- We consider certain income tax consequences associated with employee share-based awards recognized in Provision for income taxes in the income statements to be Recurring discrete tax items as we anticipate some level of conversion activity each quarter. Accordingly, these Recurring discrete tax provisions (benefits) are not part of the adjustment for intermittent net discrete tax provisions (benefits).
- Includes all tax provisions (benefits) that have been determined to be discrete, other than Recurring items as defined above.

The current quarter includes intermittent net discrete tax benefits primarily associated with the remeasurement of reserves and related interest due to new information with regard to multi-jurisdiction tax examinations.

U.S. Bank Subsidiaries

Our U.S. bank subsidiaries, Morgan Stanley Bank N.A. ("MSBNA") and Morgan Stanley Private Bank, National Association ("MSPBNA") (collectively, "U.S. Bank Subsidiaries") accept deposit accounts, provide loans to a variety of customers, from large corporate and institutional clients to high net worth individuals, and invest in securities. The lending activities in the Institutional Securities business segment primarily include loans and lending commitments to corporate clients. The lending activities in the Wealth Management business segment primarily include securities-based lending, which allows clients to borrow money against the value of qualifying securities, and residential real estate loans.

We expect our lending activities to continue to grow through further market penetration of our client base. For a further discussion of our credit risks, see "Quantitative and Qualitative Disclosures about Risk—Credit Risk." For a further discussion about loans and lending commitments, see Notes 7 and 11 to the financial statements.

- Other loans primarily include tailored lending.
- Prior periods have been conformed to the current presentation.
- For a further discussion of Corporate loans in the Institutional Securities business segment, see "Credit Risk—Institutional Securities Corporate Loans" herein.

Accounting Development Updates

The Financial Accounting Standards Board has issued certain accounting updates that apply to us. Accounting updates not listed below were assessed and determined to be either not applicable or are not expected to have a significant impact on our financial statements.

The following accounting update is currently being evaluated to determine the potential impact of adoption:

- Financial Instruments—Credit Losses.** This accounting update impacts the impairment model for certain financial assets measured at amortized cost by requiring a CECL methodology to estimate expected credit losses over the entire life of the financial asset, recorded at inception or purchase. CECL will replace the loss model currently applicable to loans held for investment, HTM securities and other receivables carried at amortized cost, such as employee loans.

The update also eliminates the concept of other-than-temporary impairment for AFS securities. Impairments on AFS securities will be required to be recognized in earnings through an allowance when the fair value is less than amortized cost and a credit loss exists or the securities are expected to be sold before recovery of amortized cost.

For certain portfolios, we have determined that there are no expected credit losses, for example based on collateral arrangements for lending and financing transactions such as for Securities borrowed, Securities purchased under agreements to resell and certain other portfolios. Also, we have a zero loss expectation for certain financial assets based on the credit quality of the borrower or issuer such as U.S. government and agency securities.

We expect the following portfolios to be primarily impacted: employee loans, commercial real estate, corporate and residential real estate. The models we expect to use for these portfolios in the future are in the process of being tested. Based on preliminary analyses and estimates, we do not expect the increase in the allowance for credit losses resulting from the adoption of this standard will be significant to our financial statements. The ultimate impact will depend upon macroeconomic conditions, forecasts and our portfolios at the adoption date. This update is effective as of January 1, 2020.

Critical Accounting Policies

Our financial statements are prepared in accordance with U.S. GAAP, which requires us to make estimates and assumptions (see Note 1 to the financial statements). We believe that of our significant accounting policies (see Note 2 to the financial statements in the 2018 Form 10-K and Note 2 to the financial statements), the fair value, goodwill and intangible assets, legal and regulatory contingencies and income taxes policies involve a higher degree of judgment and complexity. For a further discussion about our critical accounting policies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies" in the 2018 Form 10-K.

Liquidity and Capital Resources

Senior management, with oversight by the Asset/Liability Management Committee and the Board of Directors ("Board"), establishes and maintains our liquidity and capital policies. Through various risk and control committees, senior management reviews business performance relative to these policies, monitors the availability of alternative sources of financing, and oversees the liquidity, interest rate and currency sensitivity of our asset and liability position. Our Treasury department, Firm Risk Committee, Asset/Liability Management Committee, and other committees and control groups assist in evaluating, monitoring and controlling the impact that our business activities have on our balance sheet, liquidity and capital structure. Liquidity and capital matters are reported regularly to the Board and the Risk Committee of the Board.

Balance Sheet

We monitor and evaluate the composition and size of our balance sheet on a regular basis. Our balance sheet management process includes quarterly planning, business-specific thresholds, monitoring of business-specific usage versus key performance metrics and new business impact assessments.

We establish balance sheet thresholds at the consolidated and business segment levels. We monitor balance sheet utilization and review variances resulting from business activity and market fluctuations. On a regular basis, we review current performance versus established thresholds and assess the need to re-allocate our balance sheet based on business unit needs. We also monitor key metrics, including asset and liability size and capital usage.

IS—Institutional Securities

WM—Wealth Management

IM—Investment Management

1. Cash and cash equivalents includes Cash and due from banks, Interest bearing deposits with banks and Restricted cash.
2. Amounts include loans held for investment (net of allowance) and loans held for sale but exclude loans at fair value, which are included in Trading assets in the balance sheets (see Note 7 to the financial statements).
3. Other assets primarily includes Goodwill, Intangible assets, premises, equipment, software, other investments, ROU assets related to leases and deferred tax assets.

A substantial portion of total assets consists of liquid marketable securities and short-term receivables arising principally from sales and trading activities in the Institutional Securities business segment. Total assets increased to \$876 billion at March 31, 2019 from \$854 billion at December 31, 2018, primarily due to higher Securities borrowed and Securities purchased under agreements to resell in the Institutional Securities business segment as a result of higher period-end client balances and Trading liabilities. These increases were partially offset by lower Securities purchased under agreements to resell within the Wealth Management business segment as a result of lower Deposits.

Liquidity Risk Management Framework

The core components of our Liquidity Risk Management Framework are the Required Liquidity Framework, Liquidity Stress Tests and the GLR, which support our target liquidity profile. For a further discussion about the Firm's Required Liquidity Framework and Liquidity Stress Tests, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity Risk Management Framework" in the 2018 Form 10-K.

At March 31, 2019 and December 31, 2018, we maintained sufficient liquidity to meet current and contingent funding obligations as modeled in our Liquidity Stress Tests.

Global Liquidity Reserve

We maintain sufficient liquidity reserves to cover daily funding needs and to meet strategic liquidity targets sized by

the Required Liquidity Framework and Liquidity Stress Tests. For a further discussion of our GLR, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity Risk Management Framework—Global Liquidity Reserve" in the 2018 Form 10-K.

Total	\$ 233,148	\$ 249,735	\$ 242,425

Regulatory Liquidity Framework

Liquidity Coverage Ratio

We and our U.S. Bank Subsidiaries are subject to LCR requirements, including a requirement to calculate each entity's LCR on each business day. The requirements are designed to ensure that banking organizations have sufficient HQLA to cover net cash outflows arising from significant stress over 30 calendar days, thus promoting the short-term resilience of the liquidity risk profile of banking organizations.

The regulatory definition of HQLA is substantially the same as our GLR. GLR includes cash placed at institutions other than central banks that is considered an inflow for LCR purposes. HQLA includes a portion of cash placed at central banks, certain unencumbered investment grade corporate bonds and publicly traded common equities, which do not meet the definition of our GLR.

Based on our daily calculations, we and our U.S. Bank Subsidiaries are compliant with the minimum required LCR of 100%.

HQLA by Type of Asset and LCR

<i>\$ in millions</i>	Average Daily Balance Three Months Ended	
	March 31, 2019	December 31, 2018
HQLA		
Cash deposits with central banks	\$ 37,070	\$ 44,225
Securities ¹	155,713	150,792
Total	\$ 192,783	\$ 195,017
LCR	150%	145%

1. Primarily includes U.S. Treasuries, U.S. agency mortgage-backed securities, sovereign bonds and investment grade corporate bonds.

The increase in the LCR in the current quarter is due to a reduction in net outflows (i.e., the denominator of the ratio) primarily driven by higher cash inflows from Securities borrowed and Securities purchased under agreements to resell, and due to certain securities-for-securities transactions.

Net Stable Funding Ratio

The Basel Committee on Banking Supervision (“Basel Commit-tee”) has previously finalized the NSFR framework. In May 2016, the U.S. banking agencies issued a proposal to implement the NSFR in the U.S. however, a final rule has not yet been issued in the U.S. For an additional discussion of the NSFR, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Liquidity Framework—Net Stable Funding Ratio” in the 2018 Form 10-K.

Funding Management

We manage our funding in a manner that reduces the risk of disruption to our operations. We pursue a strategy of diversification of secured and unsecured funding sources (by product, investor and region) and attempt to ensure that the tenor of our liabilities equals or exceeds the expected holding period of the assets being financed.

We fund our balance sheet on a global basis through diverse sources. These sources include our equity capital, borrowings, securities sold under agreements to repurchase, securities lending, deposits, letters of credit and lines of credit. We have active financing programs for both standard and structured products targeting global investors and currencies.

Secured Financing

For a discussion of our secured financing activities, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Re-sources—Funding Management—Secured Financing” in the 2018 Form 10-K.

Collateralized Financing Transactions

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Securities purchased under agreements to resell and Securities borrowed	\$ 235,461	\$ 214,835
Securities sold under agreements to repurchase and Securities loaned	\$ 60,456	\$ 61,667
Securities received as collateral ¹	\$ 5,426	\$ 7,668

<i>\$ in millions</i>	Average Daily Balance Three Months Ended	
	March 31, 2019	December 31, 2018
Securities purchased under agreements to resell and Securities borrowed	\$ 219,062	\$ 213,974
Securities sold under agreements to repurchase and Securities loaned	\$ 58,965	\$ 57,677

1. Securities received as collateral are included in Trading assets in the balance sheets.

See Note 2 to the financial statements in the 2018 Form 10-K and Note 6 to the financial statements for more details on collateralized financing transactions.

In addition to the collateralized financing transactions shown in the previous table, we engage in financing transactions collateralized by customer-owned securities, which are segregated in accordance with regulatory requirements. Receivables under these financing transactions, primarily margin loans, are included in Customer and other receivables in the balance sheets, and payables under these financing transactions, primarily to prime brokerage customers, are included in Customer and other payables in the balance sheets. Our risk exposure on these transactions is mitigated by collateral maintenance policies that limit our credit exposure to customers and liquidity reserves held against this risk exposure.

Unsecured Financing

For a discussion of our unsecured financing activities, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Funding Management—Unsecured Financing” in the 2018 Form 10-K.

Deposits

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Savings and demand deposits:		
Brokerage sweep deposits ¹	\$ 127,678	\$ 141,255
Savings and other	15,523	13,642
Total Savings and demand deposits	143,201	154,897
Time deposits	36,530	32,923
Total	\$ 179,731	\$ 187,820

1. Amounts represent balances swept from client brokerage accounts.

Deposits are primarily sourced from our Wealth Management clients and are considered to have stable, low-cost funding characteristics. Total deposits at March 31, 2019 decreased compared with December 31, 2018, due to a decrease in Brokerage sweep deposits driven by redeployment of client cash partially offset by increases in Time deposits and Savings and other deposits driven by promotional offerings.

Borrowings by Remaining Maturity at March 31, 2019¹

<i>\$ in millions</i>	Parent Company	Subsidiaries	Total
Original maturities of one year or less	\$ —	\$ 1,498	\$ 1,498
Original maturities greater than one year			
2019	\$ 14,187	\$ 3,937	\$ 18,124
2020	15,690	4,082	19,772
2021	21,256	3,936	25,192
2022	14,952	2,322	17,274
2023	11,624	2,642	14,266
Thereafter	75,346	19,219	94,565
Total	\$ 153,055	\$ 36,138	\$ 189,193
Total Borrowings	\$ 153,055	\$ 37,636	\$ 190,691
Maturities over next 12 months ²			26,068

1. Original maturity in the table is generally based on contractual final maturity. For borrowings with put options, remaining maturity represents the earliest put date.

2. Includes only borrowings with original maturities greater than one year.

Borrowings of \$190,691 million as of March 31, 2019 were relatively unchanged compared with \$189,662 million at December 31, 2018.

We believe that accessing debt investors through multiple distribution channels helps provide consistent access to the unsecured markets. In addition, the issuance of borrowings with original maturities greater than one year allows us to reduce reliance on short-term credit sensitive instruments. Borrowings with original maturities greater than one year are generally managed to achieve staggered maturities, thereby mitigating refinancing risk, and to maximize investor diversification through sales to global institutional and retail clients across regions, currencies and product types.

The availability and cost of financing to us can vary depending on market conditions, the volume of certain trading and lending activities, our credit ratings and the overall availability of credit. We also engage in, and may continue to engage in, repurchases of our borrowings in the ordinary course of business.

For further information on Borrowings, see Note 10 to the financial statements.

Credit Ratings

We rely on external sources to finance a significant portion of our daily operations. The cost and availability of financing generally are impacted by our credit ratings, among other things. In addition, our credit ratings can have an impact on certain trading revenues, particularly in those businesses where longer-term counterparty performance is a key consideration, such as OTC derivative transactions, including credit derivatives and interest rate swaps. When determining credit ratings, rating agencies consider company-specific factors, other industry factors such as regulatory or legislative changes and the macroeconomic environment, among other things.

Our credit ratings do not include any uplift from perceived government support from any rating agency given the significant progress of U.S. financial reform legislation and regulations. Some rating agencies have stated that they currently incorporate various degrees of credit rating uplift from non-governmental third-party sources of potential support.

Parent Company and U.S. Bank Subsidiaries' Senior Unsecured Ratings at April 30, 2019

	Parent Company		
	Short-Term Debt	Long-Term Debt	Rating Outlook
DBRS, Inc.	R-1 (middle)	A (high)	Stable

Incremental Collateral or Terminating Payments

In connection with certain OTC derivatives and certain other agreements where we are a liquidity provider to certain financing vehicles associated with the Institutional Securities business segment, we may be required to provide additional collateral, immediately settle any outstanding liability balances with certain counterparties or pledge additional collateral to certain clearing organizations in the event of a future credit rating downgrade irrespective of whether we are in a net asset or net liability position. See Note 4 to the financial statements for additional information on OTC derivatives that contain such contingent features.

While certain aspects of a credit rating downgrade are quantifiable pursuant to contractual provisions, the impact it would have on our business and results of operations in future periods is inherently uncertain and would depend on a number of interrelated factors, including, among other things, the magnitude of the downgrade, the rating relative to peers, the rating assigned by the relevant agency pre-downgrade, individual client behavior and future mitigating actions we might take. The liquidity impact of additional collateral requirements is included in our Liquidity Stress Tests.

Capital Management

We view capital as an important source of financial strength and actively manage our consolidated capital position based upon, among other things, business opportunities, risks, capital availability and rates of return together with internal capital policies, regulatory requirements and rating agency guidelines. In the future, we may expand or contract our capital base to address the changing needs of our businesses.

Common Stock Repurchases

<i>in millions, except for per share data</i>	Three Months Ended March 31,	
	2019	2018
Repurchases	\$ 1,180	\$ 1,250
Number of shares	28	22
Average price per share	\$ 42.19	\$ 55.98

From time to time we repurchase our outstanding common stock as part of our Share Repurchase Program. A portion of common stock repurchases in the current quarter was conducted under a sales plan with Mitsubishi UFJ Financial Group, Inc. (“MUFG”), whereby MUFG sold shares of the Firm’s common stock to us, as part of our Share Repurchase Program. The sales plan is only intended to maintain MUFG’s ownership percentage below 24.9% in order to comply with MUFG’s passivity commitments to the Board of Governors of the Federal Reserve System (“Federal Reserve”) and has no impact on the strategic alliance between MUFG and us, including our joint ventures in Japan. For a description of our Share Repurchase Program, see “Unregistered Sales of Equity Securities and Use of Proceeds.”

For a description of our capital plan, see “Liquidity and Capital Resources—Regulatory Requirements—Capital Plans and Stress Tests.”

Date paid	April 15, 2019
Shareholders of record as of	March 29, 2019

For additional information on common and preferred stock, see Note 14 to the financial statements.

Off-Balance Sheet Arrangements and Contractual Obligations

Off-Balance Sheet Arrangements

We enter into various off-balance sheet arrangements, including through unconsolidated SPEs and lending-related financial instruments (e.g., guarantees and commitments), primarily in connection with the Institutional Securities and Investment Management business segments.

We utilize SPEs primarily in connection with securitization activities. For information on our securitization activities, see Note 12 to the financial statements.

For information on our commitments, obligations under certain guarantee arrangements and indemnities, see Note 11 to the financial statements. For further information on our lending commitments, see “Quantitative and Qualitative Disclosures about Risk—Credit Risk—Loans and Lending Commitments.”

Contractual Obligations

For a discussion about our contractual obligations, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Contractual Obligations” in the 2018 Form 10-K.

Regulatory Requirements**Regulatory Capital Framework**

We are an FHC under the Bank Holding Company Act of 1956, as amended (“BHC Act”), and are subject to the regulation and oversight of the Federal Reserve. The Federal Reserve establishes capital requirements for us, including “well-capitalized” standards, and evaluates our compliance with such capital requirements. The OCC establishes similar capital requirements and standards for our U.S. Bank Subsidiaries. For us to remain an FHC, we must remain well-capitalized in accordance with standards established by the Federal Reserve and our U.S. Bank Subsidiaries must remain well-capitalized in accordance with standards established by the OCC. For additional information on regulatory capital requirements for our U.S. Bank Subsidiaries, see Note 13 to the financial statements.

Regulatory capital requirements established by the Federal Reserve are largely based on the Basel III capital standards established by the Basel Committee and also implement certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”).

Regulatory Capital Requirements

We are required to maintain minimum risk-based capital, leverage-based capital and total loss-absorbing capacity (“TLAC”) ratios. For more information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Capital Requirements” in the 2018 Form 10-K. For additional information on TLAC, see Total Loss-Absorbing Capacity herein.

Risk-Based Regulatory Capital. Minimum risk-based capital ratio requirements apply to Common Equity Tier 1 capital, Tier 1 capital and Total capital (which includes Tier 2 capital). Certain adjustments to and deductions from capital are required for purposes of determining these ratios, such as goodwill, intangible assets, certain deferred tax assets, other amounts in AOCI and investments in the capital instruments of unconsolidated financial institutions.

In addition to the minimum risk-based capital ratio requirements, we are subject to the following buffers in 2019:

- A greater than 2.5% Common Equity Tier 1 capital conservation buffer;
- The Common Equity Tier 1 G-SIB capital surcharge, currently at 3%; and
- Up to a 2.5% Common Equity Tier 1 CCyB, currently set by U.S. banking agencies at zero.

In 2018, each of these buffers was 75% of the fully phased-in 2019 requirement noted above. Failure to maintain the buffers would result in restrictions on our ability to make capital distributions, including the payment of dividends and the repurchase of stock, and to pay discretionary bonuses to executive officers. For a further discussion of the G-SIB capital surcharge, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—G-SIB Capital Surcharge” in the 2018 Form 10-K.

Our risk-based capital ratios for purposes of determining regulatory compliance are the lower of the capital ratios computed under (i) the standardized approaches for calculating credit risk and market risk RWA (“Standardized Approach”) and (ii) the applicable advanced approaches for calculating credit risk, market risk and operational risk RWA (“Advanced Approach”). The credit risk RWA calculations between the two approaches differ in that the Standardized Approach requires calculation of RWA using prescribed risk weights, whereas the Advanced Approach utilizes models to calculate exposure amounts and risk weights. At March 31, 2019 and December 31, 2018, our ratios for determining regulatory compliance are based on the Standardized Approach rules.

Leverage-Based Regulatory Capital. Minimum leverage-based capital requirements include a Tier 1 leverage ratio and an SLR. We are required to maintain a Tier 1 SLR of 5%, inclusive of an enhanced SLR capital buffer of at least 2% in order to avoid potential limitations on capital distributions, including dividends and stock repurchases, and discretionary bonus payments to executive officers.

Regulatory Capital Ratios

\$ in millions	At March 31, 2019		
	Required Ratio ¹	Standardized	Advanced
Risk-based capital			
Common Equity Tier 1 capital		\$ 63,344	\$ 63,344
Tier 1 capital		71,910	71,910
Total capital		81,570	81,284
Total RWA		378,420	366,353
Common Equity Tier 1 capital ratio	10.0%	16.7%	17.3%
Tier 1 capital ratio	11.5%	19.0%	19.6%
Total capital ratio	13.5%	21.6%	22.2%
Leverage-based capital			
Adjusted average assets ²		\$ 855,192	N/A
Tier 1 leverage ratio	4.0%	8.4%	N/A
Supplementary leverage exposure ³		N/A	\$1,104,264
SLR	5.0%	N/A	6.5%

\$ in millions	At December 31, 2018		
	Required Ratio ¹	Standardized	Advanced
Risk-based capital			
Common Equity Tier 1 capital		\$ 62,086	\$ 62,086
Tier 1 capital		70,619	70,619
Total capital		80,052	79,814
Total RWA		367,309	363,054
Common Equity Tier 1 capital ratio	8.6%	16.9%	17.1%
Tier 1 capital ratio	10.1%	19.2%	19.5%
Total capital ratio	12.1%	21.8%	22.0%
Leverage-based capital			
Adjusted average assets ²		\$ 843,074	N/A
Tier 1 leverage ratio	4.0%	8.4%	N/A
Supplementary leverage exposure ³		N/A	\$1,092,672
SLR	5.0%	N/A	6.5%

1. Required ratios are inclusive of any buffers applicable as of the date presented. For 2018, the minimum required regulatory capital ratios for risk-based capital are under the transitional rules.
2. Adjusted average assets represents the denominator of the Tier 1 leverage ratio and is composed of the average daily balance of consolidated on-balance sheet assets under U.S. GAAP during the quarters ended March 31, 2019 and December 31, 2018, adjusted for disallowed goodwill, intangible assets, certain deferred tax assets, certain investments in the capital instruments of unconsolidated financial institutions and other capital deductions.
3. Supplementary leverage exposure is the sum of Adjusted average assets used in the Tier 1 leverage ratio and other adjustments, primarily (i) potential future exposure for derivative exposures, gross-up for cash collateral netting where qualifying criteria are not met, and the effective notional principal amount of sold credit protection offset by qualifying purchased credit protection; (ii) the counterparty credit risk for repo-style transactions; and (iii) the credit equivalent amount for off-balance sheet exposures.

Regulatory Capital

\$ in millions	At March 31, 2019	At December 31, 2018	Change
Common Equity Tier 1 capital

Change in operational risk RWA	N/A	(8,172)
Balance at March 31, 2019	N/A	\$ 102,430
Total RWA	\$ 378,420	\$ 366,353

Regulatory VaR—VaR for regulatory capital requirements

- The RWA for each category reflects both on- and off-balance sheet exposures, where appropriate.
- Amount reflects assets not in a defined category, non-material portfolios of exposures and unsettled transactions, as applicable.

Credit risk RWA increased in the current quarter under the Standardized and Advanced Approaches primarily due to increased exposures in Securities financing transactions and Derivatives, and an increase in Other credit risk mainly driven by the Firm's adoption of the *Leases* accounting update on January 1, 2019. Under the Advanced Approach, the increased derivatives exposure also led to increased RWA related to CVA.

Market risk RWA decreased in the current quarter under the Standardized and Advanced Approaches primarily due to a decrease in the Incremental risk charge driven by reduced exposures and improved hedging in credit products.

The decrease in operational risk RWA under the Advanced Approach in the current quarter reflects a continued reduction in the magnitude of internal losses utilized in the operational risk capital model related to litigation.

Total Loss-Absorbing Capacity. The Federal Reserve has established external TLAC, long-term debt ("LTD") and clean holding company requirements for top-tier BHCs of U.S. G-SIBs ("covered BHCs"), including the Parent Company. These requirements include various definitions and restrictions, such as requiring eligible LTD to be issued by the covered BHC and be unsecured, have a maturity of one year or more from the date of issuance and not have certain derivative-linked features typically associated with certain types of structured notes. A covered BHC is required to maintain minimum levels of external TLAC and eligible LTD, as well as certain TLAC buffer requirements. Failure to maintain the TLAC buffers would result in restrictions on capital distributions and discretionary bonus payments to executive officers.

Required and Actual TLAC and Eligible LTD Ratios

\$ in millions	At March 31, 2019	
	Required Ratio ¹	Actual Amount/Ratio
Total Loss-Absorbing Capacity		
External TLAC ²		\$ 198,965
External TLAC as a % of RWA	21.5%	52.6%
External TLAC as a % of leverage exposure	9.5%	18.0%
Eligible LTD ³		\$ 120,983
Eligible LTD as a % of RWA	9.0%	32.0%
Eligible LTD as a % of leverage exposure	4.5%	11.0%

- Required ratios are inclusive of any buffers applicable as of the date presented.
- External TLAC consists of Common Equity Tier 1 capital and Additional Tier 1 capital (each excluding any noncontrolling minority interests), as well as eligible LTD.
- Consists of TLAC-eligible LTD reduced by 50% for amounts of unpaid principal due to be paid in more than one year but less than two years from March 31, 2019.

For a further discussion of TLAC and related requirements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Regulatory Capital Requirements" in the 2018 Form 10-K.

Capital Plans and Stress Tests

Pursuant to the Dodd-Frank Act, the Federal Reserve has adopted capital planning and stress test requirements for large BHCs, including us, which form part of the Federal Reserve's annual CCAR framework.

We submitted our 2019 Capital Plan ("Capital Plan") and company-run stress test results to the Federal Reserve on April 5, 2019. We expect that the Federal Reserve will provide its response to our 2019 Capital Plan by June 30, 2019. There could be a range of potential outcomes to our Capital Plan whereby the Federal Reserve could object to, or otherwise require us to modify, such plan. See "Risk Factors"

in the 2018 Form 10-K. The Federal Reserve is expected to publish summary results of the CCAR and Dodd-Frank Act supervisory stress tests of each large BHC, including us, by June 30, 2019. We are required to disclose a summary of the results of our company-run stress tests within 15 days of the date the Federal Reserve discloses the results of the supervisory stress tests. In addition, we must submit the results of our mid-cycle company-run stress test to the Federal Reserve by October 5, 2019 and disclose a summary of the results within 30 days of the submission date.

For a further discussion of our capital plans and stress tests, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Capital Plans and Stress Tests" in the 2018 Form 10-K.

Attribution of Average Common Equity According to the Required Capital Framework

Our required capital ("Required Capital") estimation is based on the Required Capital framework, an internal capital adequacy measure. Common equity attribution to the business segments is based on capital usage calculated under the Required Capital framework, as well as each business segment's relative contribution to our total Required Capital.

The Required Capital framework is a risk-based and leverage use-of-capital measure, which is compared with our regulatory capital to ensure that we maintain an amount of going concern capital after absorbing potential losses from stress events, where applicable, at a point in time. The amount of capital allocated to the business segments is generally set at the beginning of each year and remains fixed throughout the year until the next annual reset unless a significant business change occurs (*e.g.*, acquisition or disposition). We define the difference between our total average common equity and the sum of the average common equity amounts allocated to our business segments as Parent common equity. We generally hold Parent common equity for prospective regulatory requirements, organic growth, acquisitions and other capital needs.

The Required Capital framework is expected to evolve over time in response to changes in the business and regulatory environment, for example, to incorporate changes in stress testing or enhancements to modeling techniques. We will continue to evaluate the framework with respect to the impact of future regulatory requirements, as appropriate.

Average Common Equity Attribution¹

\$ in billions	Three Months Ended March 31,	
	2019	2018
Institutional Securities	\$ 40.4	\$ 40.8
Wealth Management	18.2	16.8
Investment Management	2.5	2.6
Parent	10.5	8.8
Total	\$ 71.6	\$ 69.0

1. Average common equity is a non-GAAP financial measure. See "Selected Non-GAAP Financial Information" herein.

Resolution and Recovery Planning

Pursuant to the Dodd-Frank Act, we are required to periodically submit to the Federal Reserve and the FDIC a resolution plan that describes our strategy for a rapid and orderly resolution under the U.S. Bankruptcy Code in the event of our material financial distress or failure.

Our preferred resolution strategy is an SPOE strategy. Currently, upon the occurrence of a resolution scenario, the Parent Company would be obligated, under a support agreement with its material entities, to contribute or loan on a subordinated basis all of its contributable material assets, other than shares in subsidiaries of the Parent Company and certain intercompany receivables, to provide capital and liquidity, as applicable, to our material entities.

The obligations of the Parent Company under the existing support agreement are in most cases secured on a senior basis by the assets of the Parent Company (other than shares in subsidiaries of the Parent Company). As a result, claims of our material entities against the assets of the Parent Company (other than shares in subsidiaries of the Parent Company) are effectively senior to unsecured obligations of the Parent Company.

In further development of our SPOE strategy, we have created a wholly owned, direct subsidiary of the Parent Company, MS Holdings LLC (the "Funding IHC"), to serve as a resolution funding vehicle. We expect that, prior to the submission of our 2019 resolution plan by July 1, 2019, the Parent Company will contribute certain of its assets to the Funding IHC and enter into an updated support agreement with the Funding IHC as well as certain other subsidiaries to facilitate the execution of our SPOE strategy. The updated agreement will

obligate the Parent Company to transfer capital and liquidity to the Funding IHC, and that the Parent Company and/or the Funding IHC will recapitalize and provide liquidity to material entities in the event of our material financial distress or failure.

For more information about resolution and recovery planning requirements and our activities in these areas, including the implications of such activities in a resolution scenario, see “Business—Supervision and Regulation—Financial Holding Company—Resolution and Recovery Planning” and “Risk Factors—Legal, Regulatory and Compliance Risk” in the 2018 Form 10-K.

Regulatory Developments

Proposed Revisions to the Regulatory Capital Treatment for Investments in Certain Unsecured Debt Instruments Issued by G-SIBs

The Federal Reserve, the OCC and the FDIC have issued a proposed rule that would, among other things, modify the regulatory capital framework for Advanced Approach banking organizations, including us. Such firms would be required to make certain deductions from regulatory capital for their investments in certain unsecured debt instruments (including eligible LTD in the TLAC framework) issued by the Parent Company and other G-SIBs.

Proposed Revisions to Resolution Planning Requirements

The Federal Reserve and the FDIC have issued a proposed rule that would change our resolution planning obligations under the Dodd-Frank Act. The proposed rule would require us to file resolution plans once every two years and would allow us to alternate between submitting a full, detailed resolution plan and a streamlined, targeted resolution plan. The proposed rule also makes certain changes to the information required to be included in our resolution plan.

For a discussion of other regulatory developments, see “Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Regulatory Developments” in the 2018 Form 10-K.

Other Matters

U.K. Withdrawal from the E.U.

Following the U.K. electorate vote to leave the E.U., the U.K. invoked Article 50 of the Lisbon Treaty on March 29, 2017, which triggered a two-year period during which the U.K. government negotiated a form of withdrawal agreement with the E.U. The U.K. government and the E.U. have agreed to delay the U.K.'s scheduled withdrawal from the E.U. until October 31, 2019. However, if the U.K. does not hold elections to the European Parliament in accordance with applicable E.U. law and ratify the withdrawal agreement by the applicable deadlines, the U.K.'s withdrawal date would become June 1, 2019. Absent any further changes to this time schedule, the U.K. is expected to leave the E.U. by October 31, 2019 at the latest. Discussions are ongoing within the U.K. Parliament on the negotiated withdrawal agreement and the alternatives to it, and between the U.K. government and the E.U.

For more information on the U.K.'s withdrawal from the E.U., our related preparations and the potential impact on our operations, see “Quantitative and Qualitative Disclosures about Risk—Country Risk” herein, and see “Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Other Matters” and “Risk Factors—International Risk” in the 2018 Form 10-K.

Expected Replacement of London Interbank Offered Rate and Replacement or Reform of Other Interest Rates

Central banks around the world, including the Federal Reserve, have commissioned working groups of market participants and official sector representatives with the goal of finding suitable replacements for LIBOR and replacements or reforms of other interest rate benchmarks, such as EURIBOR and EONIA (collectively, the “IBORs”).

For a further discussion of the expected replacement of the IBORs and/or reform of interest rate benchmarks, and the related risks and our transition plan, see “Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Regulatory Developments” and “Risk Factors—Legal, Regulatory and Compliance Risk,” respectively, in the 2018 Form 10-K.

Management believes effective risk management is vital to the success of our business activities. For a discussion of our risk management functions, see “Quantitative and Qualitative Disclosures about Risk—Risk Management” in the 2018 Form 10-K.

Market Risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, indices, volatilities, correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio. Generally, we incur market risk as a result of trading, investing and client facilitation activities, principally within the Institutional Securities business segment where the substantial majority of our VaR for market risk exposures is generated. In addition, we incur market risk within the Wealth Management and Investment Management business segments. The Wealth Management business segment primarily incurs non-trading market risk from lending and deposit-taking activities. The Investment Management business segment primarily incurs non-trading market risk from capital investments in alternative and other funds. For a further discussion of market risk, see “Quantitative and Qualitative Disclosures about Risk—Market Risk” in the 2018 Form 10-K.

Trading Risks

Value-at-Risk. The statistical technique known as VaR is one of the tools we use to measure, monitor and review the market risk exposures of our trading portfolios. The Market Risk Department calculates and distributes daily VaR-based risk measures to various levels of management.

For information regarding our VaR methodology, assumptions and limitations, see “Quantitative and Qualitative Disclosures about Risk—Market Risk—Trading Risks—Value-at-Risk” in the 2018 Form 10-K.

We utilize the same VaR model for risk management purposes and for regulatory capital calculations. Our regulators have approved our VaR model for use in regulatory calculations.

The portfolio of positions used for our VaR for risk management purposes (“Management VaR”) differs from that used for regulatory capital requirements (“Regulatory VaR”). Management VaR contains certain positions that are excluded from Regulatory VaR. Examples include CVA and related hedges, as well as loans that are carried at fair value and associated hedges.

The following table presents the Management VaR for the Trading portfolio. To further enhance the transparency of traded market risk, the Credit Portfolio VaR has been disclosed as a separate category from the Primary Risk Categories. The Credit Portfolio includes counterparty CVA

and related hedges, as well as loans that are carried at fair value and associated hedges.

95%/One-Day Management VaR

<i>\$ in millions</i>	Three Months Ended March 31, 2019			
	Period End	Average	High ²	Low ²
Interest rate and credit spread	\$ 32	\$ 32	\$ 39	\$ 26
Equity price	15	16	19	12
Foreign exchange rate	15	14	16	11
Commodity price	9	10	12	9
Less: Diversification benefit ¹	(32)	(32)	N/A	N/A
Primary Risk Categories	\$ 39	\$ 40	\$ 48	\$ 36
Credit Portfolio	17	16	18	14
Less: Diversification benefit ¹	(12)	(10)	N/A	N/A
Total Management VaR	\$ 44	\$ 46	\$ 55	\$ 42

<i>\$ in millions</i>	Three Months Ended December 31, 2018			
	Period End	Average	High ²	Low ²
Interest rate and credit spread	\$ 38	\$ 36	\$ 51	\$ 25
Equity price	14	13	18	12
Foreign exchange rate	13	13	16	11
Commodity price	13	12	18	7
Less: Diversification benefit ¹	(27)	(30)	N/A	N/A
Primary Risk Categories	\$ 51	\$ 44	\$ 62	\$ 34
Credit Portfolio	15	13	16	11
Less: Diversification benefit ¹	(9)	(8)	N/A	N/A
Total Management VaR	\$ 57	\$ 49	\$ 67	\$ 39

1. Diversification benefit equals the difference between the total Management VaR and the sum of the component VaRs. This benefit arises because the simulated one-day losses for each of the components occur on different days; similar diversification benefits also are taken into account within each component.
2. The high and low VaR values for the total Management VaR and each of the component VaRs might have occurred on different days during the quarter, and therefore, the diversification benefit is not an applicable measure.

Average total Management VaR and average Management VaR for the Primary Risk Categories decreased from the three-months ended December 31, 2018, primarily as a result of reduced interest rate and credit spread exposure in the Fixed Income Division of the Institutional Securities business segment.

Distribution of VaR Statistics and Net Revenues

One method of evaluating the reasonableness of our VaR model as a measure of our potential volatility of net revenues is to compare VaR with corresponding actual trading revenues. Assuming no intraday trading, for a 95%/one-day VaR, the expected number of times that trading losses should exceed VaR during the year is 13, and, in general, if trading losses were to exceed VaR more than 21 times in a year, the adequacy of the VaR model would be questioned.

We evaluate the reasonableness of our VaR model by comparing the potential declines in portfolio values generated by the model with corresponding actual trading results for the Firm, as well as individual business units. For days where losses exceed the VaR statistic, we examine the drivers of trading losses to evaluate the VaR model’s accuracy relative to realized trading results. There were no days with trading losses in the current quarter.

Daily 95%/One-Day Total Management VaR for the Current Quarter¹

(\$ in millions)

1. The average 95%/one-day total Management VaR for the current quarter was \$46 million.

Daily Net Trading Revenues for the Current Quarter

(\$ in millions)

The previous histogram shows the distribution for the current quarter of daily net trading revenues. Daily net trading revenues include profits and losses from Interest rate and credit spread, Equity price, Foreign exchange rate, Commodity price, and Credit Portfolio positions and intraday trading activities for our trading businesses. Certain items such as fees, commissions and net

interest income are excluded from daily net trading revenues and the VaR model. Revenues required for Regulatory VaR backtesting further exclude intraday trading.

Non-Trading Risks

We believe that sensitivity analysis is an appropriate representation of our non-trading risks. The following sensitivity analyses cover substantially all of the non-trading risk in our portfolio.

Credit Spread Risk Sensitivity¹

\$ in millions	At March 31, 2019	At December 31, 2018
Derivatives	\$ 6	\$ 6
Funding liabilities ²	37	34

1. Amounts represent the potential gain for each 1 bps widening of our credit spread.

2. Relates to structured note liabilities carried at fair value.

U.S. Bank Subsidiaries’ Net Interest Income Sensitivity Analysis

\$ in millions	At March 31, 2019	At December 31, 2018
Basis point change		
+200	\$ 484	\$ 340
+100	274	182
- 100	(619)	(428)

The previous table presents an analysis of selected instantaneous upward and downward parallel interest rate shocks on net interest income over the next 12 months for our U.S. Bank Subsidiaries. These shocks are applied to our 12-month forecast for our U.S. Bank Subsidiaries, which incorporates market expectations of interest rates and our forecasted business activity.

We do not manage to any single rate scenario but rather manage net interest income in our U.S. Bank Subsidiaries to optimize across a range of possible outcomes, including non-parallel rate change scenarios. The sensitivity analysis assumes that we take no action in response to these scenarios, assumes there are no changes in other macroeconomic variables normally correlated with changes in interest rates, and includes subjective assumptions regarding customer and market re-pricing behavior and other factors. The change in sensitivity to interest rates between March 31, 2019 and December 31, 2018 is primarily driven by a flatter yield curve, expectations of deposit pricing and changes in our asset-liability profile.

Investments Sensitivity, Including Related Carried Interest

<i>\$ in millions</i>	Loss from 10% Decline	
	At March 31, 2019	At December 31, 2018
Investments related to Investment Management activities	\$ 334	\$ 298
Other investments:		
MUMSS	164	165
Other Firm investments	187	179

MUMSS—Mitsubishi UFJ Morgan Stanley Securities Co., Ltd.

We have exposure to public and private companies through direct investments, as well as through funds that invest in these assets. These investments are predominantly equity positions with long investment horizons, a portion of which is for business facilitation purposes. The market risk related to these investments is measured by estimating the potential reduction in net income associated with a 10% decline in investment values and related impact on carried interest. The change in investments sensitivity related to Investment Management activities between December 31, 2018 and March 31, 2019 is primarily the result of higher carried interest.

Equity Market Sensitivity

In the Wealth Management and Investment Management business segments, certain fee-based revenue streams are driven by the value of clients' equity holdings. The overall level of revenues for these streams also depends on multiple additional factors that include, but are not limited to, the level and duration of the equity market increase or decline, price volatility, the geographic and industry mix of client assets, the rate and magnitude of client investments and redemptions, and the impact of such market increase or decline and price volatility on client behavior. Therefore, overall revenues do not correlate completely with changes in the equity markets.

Credit Risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to us. We primarily incur credit risk exposure to institutions and individuals through our Institutional Securities and Wealth Management business segments. For a further discussion of our credit risks, see "Quantitative and Qualitative Disclosures about Risk—Credit Risk" in the 2018 Form 10-K.

Loans and Lending Commitments

<i>\$ in millions</i>	At March 31, 2019

Total loans and lending commitments²	\$ 149,349	\$ 82,857	\$ 26	\$ 232,232

1. Investment Management business segment loans are entered into in conjunction with certain investment advisory activities.
2. Due to the nature of our obligations under the commitments, these amounts include certain commitments participated to third parties.
3. Beginning in 2019, loans previously referred to as Wholesale real estate are referred to as Commercial real estate.

Risk Disclosures

We provide loans and lending commitments to a variety of customers, from large corporate and institutional clients to high net worth individuals. In addition, we purchase loans in the secondary market. In the balance sheets, these loans and lending commitments are carried as held for investment, which are recorded at amortized cost; as held for sale, which are recorded at the lower of cost or fair value; or at fair value with changes in fair value recorded in earnings. Loans held for investment and loans held for sale are classified in Loans, and loans held at fair value are classified in Trading assets in the balance sheets. Total loans and lending commitments increased by approximately \$10 billion primarily due to increases in event-driven lending commitments within the Institutional Securities business segment.

Credit exposure arising from our loans and lending commitments is measured in accordance with our internal risk management standards. Risk factors considered in determining the aggregate allowance for loan and commitment losses include the borrower's financial strength, industry, facility structure, loan-to-value ratio, debt service ratio, collateral and covenants. Qualitative and environmental factors such as economic and business conditions, nature and volume of the portfolio and lending terms, and volume and severity of past due loans may also be considered.

See Notes 3, 7 and 11 to the financial statements for further information.

Allowance for Loans and Lending Commitments Held for Investment

\$ in millions	At	
	March 31, 2019	December 31, 2018
Loans	\$ 259	\$ 238
Lending commitments	211	203
Total allowance for loans and lending commitments	\$ 470	\$ 441

The aggregate allowance for loans and lending commitments increased in the current quarter primarily in Institutional Securities as a result of select downgrades within Corporate loans as well as growth in lending commitments. See Notes 7 and 11 to the financial statements for further information.

Status of Loans Held for Investment

Total	\$ 158,250	\$ 149,349

In connection with certain Institutional Securities business segment activities, we provide loans and lending commitments to a diverse group of corporate and other institutional clients. We also purchase a variety of loans in the secondary market. Our loans and lending commitments may have varying terms; may be senior or subordinated; may be secured or unsecured; are generally contingent upon representations, warranties and contractual conditions applicable to the borrower; and may be syndicated, traded or hedged by us.

We also participate in securitization activities, whereby we extend short- or long-term collateralized lines of credit and term loans with various types of collateral, including residential real estate, commercial real estate, corporate and financial assets. These collateralized loans and lending commitments generally provide for over-collateralization. Credit risk with respect to these loans and lending commitments arises from the failure of a borrower to perform according to the terms of the loan agreement or a decline in the underlying collateral value. The Firm monitors collateral levels against the requirements of lending agreements. See Note 12 to the financial statements for information about our securitization activities.

Institutional Securities Corporate Loans¹

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018

Event-driven loans and lending commitments, which comprise a portion of corporate loans and lending commitments within the Institutional Securities business segment, are associated with a particular event or transaction, such as to support client merger, acquisition, recapitalization or project finance activities. Event-driven loans and lending commitments typically consist of revolving lines of credit, term loans and bridge loans. Amounts may fluctuate as they are transaction-specific, the timing and size of which can vary from period to period.

Risk Disclosures

The principal Wealth Management lending activities include securities-based lending and residential real estate loans.

Securities-based lending provided to our clients is primarily conducted through our Liquidity Access Line (“LAL”) platform. For more information about our securities-based lending and residential real estate loans, see “Quantitative and Qualitative Disclosures about Risk—Credit Risk—Wealth Management” in the 2018 Form 10-K.

For the current quarter, Loans and Lending commitments associated with the Wealth Management business segment were relatively unchanged.

Customer and Other Receivables

Margin Loans

\$ in millions	At March 31, 2019		
	IS	WM	Total
Customer receivables representing margin loans	\$ 16,800	\$ 10,627	\$ 27,427

\$ in millions	At December 31, 2018		
	IS	WM	Total
Customer receivables representing margin loans	\$ 14,842	\$ 11,383	\$ 26,225

The Institutional Securities and Wealth Management business segments provide margin lending arrangements, which allow customers to borrow against the value of qualifying securities. Margin lending activities generally have minimal credit risk due to the value of collateral held and their short-term nature. Amounts may fluctuate from period to period as overall client balances change as a result of market levels, client positioning and leverage.

Employee Loans

\$ in millions	At March 31, 2019	At December 31, 2018
	Balance	\$ 3,011
Allowance for loan losses	(64)	(63)
Balance, net	\$ 2,947	\$ 3,352
Repayment term range, in years	1 to 20	1 to 20

Employee loans are granted in conjunction with a program established primarily to recruit certain Wealth Management representatives, are full recourse and generally require periodic repayments. We establish an allowance for loan amounts to terminated employees that we do not consider recoverable, which is recorded in Compensation and benefits expense.

1. Obligor credit ratings are determined internally by CRM.

Risk Disclosures

We incur credit risk as a dealer in OTC derivatives. Credit risk with respect to derivative instruments arises from the possibility that a counterparty may fail to perform according to the terms of the contract. For more information on derivatives, see “Quantitative and Qualitative Disclosures about Risk—Credit Risk—Derivatives” in the 2018 Form 10-K and Note 4 to the financial statements.

Country Risk

Country risk exposure is the risk that events in, or that affect, a foreign country (any country other than the U.S.) might adversely affect us. We actively manage country risk exposure through a comprehensive risk management framework that combines credit and market fundamentals and allows us to effectively identify, monitor and limit country risk. For a further discussion of our country risk exposure see, “Quantitative and Qualitative Disclosures about Risk—Country Risk” in the 2018 Form 10-K.

Our sovereign exposures consist of financial contracts and obligations entered into with sovereign and local governments. Our non-sovereign exposures consist of financial contracts and obligations entered into primarily with corporations and financial institutions. Index credit derivatives are included in the following country risk exposure table. Each reference entity within an index is allocated to that reference entity’s country of risk. Index exposures are allocated to the underlying reference entities in proportion to the notional weighting of each reference entity in the index, adjusted for any fair value receivable or payable for that reference entity. Where credit risk crosses multiple jurisdictions, for example, a CDS purchased from an issuer in a specific country that references bonds issued by an entity in a different country, the fair value of the CDS is reflected in the Net Counterparty Exposure row based on the country of the CDS issuer. Further, the notional amount of the CDS adjusted for the fair value of the receivable or payable is reflected in the Net Inventory row based on the country of the underlying reference entity.

1. Net inventory represents exposure to both long and short single-name and index positions (i.e., bonds and equities at fair value and CDS based on a notional amount assuming zero recovery adjusted for the fair value of any receivable or payable).
2. Net counterparty exposure (e.g., repurchase transactions, securities lending and OTC derivatives) takes into consideration legally enforceable master netting agreements and collateral. Net counterparty exposure is net of the benefit of collateral received. For more information, see "Additional Information—Top 10 Non-U.S. Country Exposures" herein.
3. Amounts represent CDS hedges (purchased and sold) on net counterparty exposure and lending executed by trading desks responsible for hedging counterparty and lending credit risk exposures. Amounts are based on the CDS notional amount assuming zero recovery adjusted for any fair value receivable or payable. For a further description of the contractual terms for purchased credit protection and whether they may limit the effectiveness of our hedges, see "Quantitative and Qualitative Disclosures about Risk—Credit Risk—Derivatives" in the 2018 Form 10-K.

Country Risk Exposures Related to the U.K.

At March 31, 2019, our country risk exposures in the U.K. included net exposures of \$14,882 million as shown in the Top 10 Country Exposures table, and overnight deposits of \$7,605 million. The \$15,912 million of exposures to non-sovereigns were diversified across both names and sectors. Of these exposures, \$6,377 million were to U.K.-focused counterparties that generate more than one-third of their revenues in the U.K., \$3,586 million were to geographically diversified counterparties, and \$5,671 million were to exchanges and clearinghouses.

Operational Risk

Operational risk refers to the risk of loss, or of damage to our reputation, resulting from inadequate or failed processes or systems, from human factors or from external events (e.g., fraud, theft, legal and compliance risks, cyber attacks or damage to physical assets). We may incur operational risk across the full scope of our business activities, including revenue-generating activities (e.g., sales and trading) and support and control groups (e.g., information technology and trade processing). For a further discussion about our operational risk, see "Quantitative and Qualitative Disclosures about Risk—Operational Risk" in the 2018 Form 10-K.

Model Risk

Model risk refers to the potential for adverse consequences from decisions based on incorrect or misused model outputs. Model risk can lead to financial loss, poor business and strategic decision making, or damage to a firm's reputation. The risk inherent in a model is a function of the materiality, complexity and uncertainty around inputs and assumptions. Model risk is generated from the use of models impacting financial statements, regulatory filings, capital adequacy assessments and the formulation of strategy. For a further discussion about our model risk, see "Quantitative and Qualitative Disclosures about Risk—Model Risk" in the 2018 Form 10-K.

Liquidity Risk

Liquidity risk refers to the risk that we will be unable to finance our operations due to a loss of access to the capital markets or difficulty in liquidating our assets. Liquidity risk also encompasses our ability (or perceived ability) to meet our financial obligations without experiencing significant business disruption or reputational damage that may threaten our viability as a going concern. For a further discussion about our liquidity risk, see “Quantitative and Qualitative Disclosures about Risk—Liquidity Risk” in the 2018 Form 10-K and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” herein.

Legal and Compliance Risk

Legal and compliance risk includes the risk of legal or regulatory sanctions, material financial loss, including fines, penalties, judgments, damages and/or settlements, or loss to reputation that we may suffer as a result of failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk, such as the risk that a counterparty’s performance obligations will be unenforceable. It also includes compliance with AML, terrorist financing, and anti-corruption rules and regulations. For a further discussion about our legal and compliance risk, see “Quantitative and Qualitative Disclosures about Risk—Legal and Compliance Risk” in the 2018 Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Morgan Stanley:

Results of Review of Interim Financial Information

We have reviewed the accompanying condensed consolidated balance sheet of Morgan Stanley and subsidiaries (the “Firm”) as of March 31, 2019, and the related condensed consolidated income statements, comprehensive income statements, cash flow statements and statements of changes in total equity for the three-month periods ended March 31, 2019 and 2018, and the related notes (collectively referred to as the “interim financial information”). Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial information for it to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheet of the Firm as of December 31, 2018, and the related consolidated income statement, comprehensive income statement, cash flow statement and statement of changes in total equity for the year then ended (not presented herein) included in the Firm’s Annual Report on Form 10-K; and in our report dated February 26, 2019, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2018 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ Deloitte & Touche LLP

New York, New York
May 3, 2019

Basis for Review Results

This interim financial information is the responsibility of the Firm’s management. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Firm in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our reviews in accordance with the standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

1. Introduction and Basis of Presentation

The Firm

Morgan Stanley is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms “Morgan Stanley” or the “Firm” mean Morgan Stanley (the “Parent Company”) together with its consolidated subsidiaries. See the “Glossary of Common Acronyms” for definitions of certain acronyms used throughout this Form 10-Q.

A description of the clients and principal products and services of each of the Firm’s business segments is as follows:

Institutional Securities provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing, prime brokerage and market-making activities in equity and fixed income products, including foreign exchange and commodities. Lending activities include originating corporate loans, commercial mortgage lending, providing secured lending facilities and extending financing to sales and trading customers. Other activities include investments and research.

Wealth Management provides a comprehensive array of financial services and solutions to individual investors and small to medium-sized businesses and institutions covering brokerage and investment advisory services; financial and wealth planning services; annuity and insurance products; securities-based lending, residential real estate loans and other lending products; banking and retirement plan services.

Investment Management provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined

contribution plans, foundations, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are served through intermediaries, including affiliated and non-affiliated distributors.

Basis of Financial Information

The unaudited consolidated financial statements (“financial statements”) are prepared in accordance with U.S. GAAP, which requires the Firm to make estimates and assumptions regarding the valuations of certain financial instruments, the valuation of goodwill and intangible assets, compensation, deferred tax assets, the outcome of legal and tax matters, allowance for credit losses and other matters that affect its financial statements and related disclosures. The Firm believes that the estimates utilized in the preparation of its financial statements are prudent and reasonable. Actual results could differ materially from these estimates. Intercompany balances and transactions have been eliminated. Certain reclassifications have been made to prior periods to conform to the current presentation.

The accompanying financial statements should be read in conjunction with the Firm’s financial statements and notes thereto included in the 2018 Form 10-K. Certain footnote disclosures included in the 2018 Form 10-K have been condensed or omitted from these financial statements as they are not required for interim reporting under U.S. GAAP. The financial statements reflect all adjustments of a normal, recurring nature that are, in the opinion of management, necessary for the fair presentation of the results for the interim period. The results of operations for interim periods are not necessarily indicative of results for the entire year.

Consolidation

The financial statements include the accounts of the Firm, its wholly owned subsidiaries and other entities in which the Firm has a controlling financial interest, including certain VIEs (see Note 12). For consolidated subsidiaries that are not wholly owned, the third-party holdings of equity interests are referred to as noncontrolling interests. The net income attributable to noncontrolling interests for such subsidiaries is presented as Net income applicable to noncontrolling interests in the consolidated income statements (“income statements”). The portion of shareholders’ equity that is attributable to noncontrolling interests for such subsidiaries is presented as noncontrolling interests, a component of total equity, in the consolidated balance sheets (“balance sheets”).

For a discussion of the Firm’s involvement with VIEs and its significant regulated U.S. and international subsidiaries, see Note 1 to the financial statements in the 2018 Form 10-K.

2. Significant Accounting Policies

For a detailed discussion about the Firm's significant accounting policies, see Note 2 to the financial statements in the 2018 Form 10-K.

During the three months ended March 31, 2019 ("current quarter"), there were no significant revisions to the Firm's significant accounting policies, other than for the accounting updates adopted.

Accounting Updates Adopted

The Firm adopted the following accounting updates on January 1, 2019. Prior periods are presented under previous policies.

Leases

The Firm adopted *Leases*, and recognized leases with terms exceeding one year in the March 31, 2019 balance sheet as right-of-use ("ROU") assets and corresponding liabilities. The adoption resulted in an increase to Retained earnings of approximately \$63 million, net of tax, related to deferred revenue from previously recorded sale-leaseback transactions. At transition on January 1, 2019, the adoption also resulted in a balance sheet gross-up of approximately \$4 billion reflected in Other assets and Other liabilities and accrued expenses. See Note 11 for lease disclosures, including amounts reflected in the March 31, 2019 balance sheet. Prior period amounts were not restated.

As allowed by the guidance, the Firm elected not to reassess the following at transition: whether existing contracts are or contain leases, and for existing leases, lease classification and initial direct costs. In addition, the Firm continues to account for existing land easements as service contracts.

Both at transition and for new leases thereafter, ROU assets and lease liabilities are initially recognized based on the present value of the future minimum lease payments over the lease term, including non-lease components such as fixed common area maintenance costs and other fixed costs such as real estate taxes and insurance.

The discount rates used in determining the present value of leases are the Firm's incremental borrowing rates, developed based upon each lease's term and currency of payment. The lease term includes options to extend or terminate the lease when it is reasonably certain that the Firm will exercise that option. For operating leases, the ROU assets also include any

prepaid lease payments and initial direct costs incurred and are reduced by lease incentives. For these leases, lease expense is recognized on a straight-line basis over the lease term if the ROU asset has not been impaired or abandoned.

Derivatives and Hedging (ASU 2018-16)

The amendments in this update permit use of the OIS rate based on the Secured Overnight Financing Rate as a U.S. benchmark interest rate for hedge accounting purposes. The Firm adopted this update on a prospective basis for qualifying new or redesignated hedging relationships. This update did not impact the Firm's pre-existing hedges.

MABS—Mortgage- and asset-backed securities

- For positions with the same counterparty classified in different levels of the fair value hierarchy, both counterparty netting and cash collateral netting are included in the column titled "Netting." Positions classified within the same level that are with the same counterparty are netted within the column for that level. For further information on derivative instruments and hedging activities, see Note 4.
- For a further breakdown by type, see the following Loans and Lending Commitments at Fair Value table.
- For trading purposes, the Firm holds or sells short equity securities issued by entities in diverse industries and of varying sizes.
- Amounts exclude certain investments that are measured based on NAV per share, which are not classified in the fair value hierarchy. For additional disclosure about such investments, see "Net Asset Value Measurements—Fund Interests" herein.

Level 3 instruments may be hedged with instruments classified in Level 1 and Level 2. The realized and unrealized gains (losses) for assets and liabilities within the Level 3 category presented in the previous tables do not reflect the

related realized and unrealized gains (losses) on hedging instruments that have been classified by the Firm within the Level 1 and/or Level 2 categories.

The unrealized gains (losses) during the period for assets and liabilities within the Level 3 category may include changes in fair value during the period that were attributable to both observable and unobservable inputs. Total realized and unrealized gains (losses) are primarily included in Trading revenues in the income statements.

Additionally, in the previous tables, consolidations of VIEs are included in Purchases and deconsolidations of VIEs are included in Settlements.

Points—Percentage of par
IR—Interest rate
FX—Foreign exchange

1. Amounts represent weighted averages except where simple averages and the median of the inputs are more relevant.
2. Includes derivative contracts with multiple risks (i.e., hybrid products).

The previous tables provide information for each major category of assets and liabilities measured at fair value on a recurring and nonrecurring basis with a significant Level 3 balance. The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory. Further, the range of unobservable inputs may differ across firms in the financial services industry because of diversity in the types of products included in each firm's inventory. There are no predictable relationships between multiple significant unobservable inputs attributable to a given valuation technique. A single amount is disclosed when there is no significant difference between the minimum, maximum and average.

For a description of the Firm's significant unobservable inputs and qualitative information about the effect of hypothetical changes in the values of those inputs, see Note 3 to the financial statements in the 2018 Form 10-K. During the current quarter, there were no significant revisions made to the descriptions of the Firm's significant unobservable inputs.

Net Asset Value Measurements

Fund Interests

\$ in millions	At March 31, 2019		At December 31, 2018	
	Carrying Value	Commitment	Carrying Value	Commitment
Private equity	\$ 1,455	\$ 314	\$ 1,374	\$ 316
Real estate	1,248	149	1,105	161
Hedge ¹	102	4	103	4
Total	\$ 2,805	\$ 467	\$ 2,582	\$ 481

1. Investments in hedge funds may be subject to initial period lock-up or gate provisions, which restrict an investor from withdrawing from the fund during a certain initial period or restrict the redemption amount on any redemption date, respectively.

For a description of the Firm's investments in private equity funds, real estate funds and hedge funds, which are measured based on NAV, see Note 3 to the financial statements in the 2018 Form 10-K.

Amounts in the previous table represent the Firm's carrying value of general and limited partnership interests in fund investments, as well as any carried interest. The carrying amounts are measured based on the NAV of the fund taking into account the distribution terms applicable to the interest held. This same measurement applies whether the fund investments are accounted for under the equity method or fair value.

See Note 11 for information regarding general partner guarantees, which include potential obligations to return performance-based fees in the form of carried interest previously received. See Note 18 for information regarding carried interest at risk of reversal.

Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

Nonredeemable Funds by Contractual Maturity

<i>\$ in millions</i>	Carrying Value at March 31, 2019	
	Private Equity	Real Estate
Less than 5 years	\$ 705	\$ 634
5-10 years	723	555
Over 10 years	27	59
Total	\$ 1,455	\$ 1,248

Fair Value Option

The Firm elected the fair value option for certain eligible instruments that are risk managed on a fair value basis to mitigate income statement volatility caused by measurement basis differences between the elected instruments and their associated risk management transactions or to eliminate the complexities of applying certain accounting models.

Borrowings Measured at Fair Value on a Recurring Basis

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Business Unit Responsible for Risk Management		
Equity	\$ 27,807	\$ 24,494

The Firm believes that the notional amounts of derivative contracts generally overstate its exposure. In most circumstances notional amounts are only used as a reference point from which to calculate amounts owed between the parties to the contract. Furthermore, notional amounts do not reflect the benefit of legally enforceable netting arrangements or risk mitigating transactions.

For a discussion of the Firm's derivative instruments and hedging activities, see Note 4 to the financial statements in the 2018 Form 10-K.

Gains (Losses) on Accounting Hedges

Net Derivative Liabilities and Collateral Posted

\$ in millions	Years to Maturity at December 31, 2018	
	At March 31, 2019	At December 31, 2018
Net derivative liabilities with credit risk-related contingent features	\$ 18,373	\$ 16,403
Collateral posted	14,473	11,981

The previous table presents the aggregate fair value of certain derivative contracts that contain credit risk-related contingent features that are in a net liability position for which the Firm has posted collateral in the normal course of business.

Incremental Collateral and Termination Payments upon Potential Future Ratings Downgrade

\$ in millions	At March 31, 2019	
	One-notch downgrade	Two-notch downgrade
One-notch downgrade	\$ 452	
Two-notch downgrade		277
Bilateral downgrade agreements included in the amounts above ¹	\$ 685	

1. Amount represents arrangements between the Firm and other parties where upon the downgrade of one party, the downgraded party must deliver collateral to the other party. These bilateral downgrade arrangements are used by the Firm to manage the risk of counterparty downgrades.

The additional collateral or termination payments that may be called in the event of a future credit rating downgrade vary by contract and can be based on ratings by either or both of Moody's Investors Service, Inc. ("Moody's") and S&P Global Ratings. The previous table shows the future potential collateral amounts and termination payments that could be called or required by counterparties or exchange and clearing organizations in the event of one-notch or two-notch downgrade scenarios based on the relevant contractual downgrade triggers.

Total credit protection sold	\$ 201	\$ 201	\$ (1,398)	\$ (1,398)

1. Investment grade/non-investment grade determination is based on the internal credit rating of the reference obligation. Internal credit ratings serve as the Credit Risk Management Department's assessment of credit risk and the basis for a comprehensive credit limits framework used to control credit risk. The Firm uses quantitative models and judgement to estimate the various risk parameters related to each obligor.

Notes to Consolidated Financial Statements (Unaudited)

The Firm enters into credit derivatives, principally CDS, under which it receives or provides protection against the risk of default on a set of debt obligations issued by a specified reference entity or entities. A majority of the Firm's counterparties for these derivatives are banks, broker-dealers, and insurance and other financial institutions.

The fair value amounts as shown in the previous tables are prior to cash collateral or counterparty netting. For further information on credit derivatives and other contracts, see Note 4 to the financial statements in the 2018 Form 10-K.

Notes to Consolidated Financial Statements (Unaudited)

The Firm believes there are no securities in an unrealized loss position that are other-than-temporarily impaired after performing the analysis described in Note 2 to the financial statements in the 2018 Form 10-K. For AFS securities, the Firm does not intend to sell the securities and is not likely to be required to sell the securities prior to recovery of the amortized cost basis. Furthermore, for both AFS and HTM securities, the securities have not experienced credit losses as the unrealized losses reported in the previous table are primarily due to higher interest rates since those securities were purchased.

See Note 12 for additional information on securities issued by VIEs, including U.S. agency mortgage-backed securities, non-agency CMBS and FFELP student loan ABS.

Notes to Consolidated Financial Statements (Unaudited)

Carrying Value of Assets Loaned or Pledged without Counterparty Right to Sell or Repledge

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Trading assets	\$ 35,543	\$ 39,430

The Firm pledges its trading assets to collateralize securities sold under agreements to repurchase, securities loaned, other secured financings and derivatives and to cover customer short sales. Counterparties may or may not have the right to sell or repledge the collateral.

Pledged financial instruments that can be sold or repledged by the secured party are identified as Trading assets (pledged to various parties) in the balance sheets.

Fair Value of Collateral Received with Right to Sell or Repledge

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Collateral received with right to sell or repledge	\$ 697,669	\$ 639,610
Collateral that was sold or repledged ¹	553,625	487,983

1. Does not include securities used to meet federal regulations for the Firm's U.S. broker-dealers.

Restricted Cash and Segregated Securities

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Restricted cash	\$ 30,712	\$ 35,356
Segregated securities ¹	24,752	26,877
Total	\$ 55,464	\$ 62,233

1. Securities segregated under federal regulations for the Firm's U.S. broker-dealers are sourced from Securities purchased under agreements to resell and Trading assets in the balance sheets.

The Firm receives collateral in the form of securities in connection with securities purchased under agreements to resell, securities borrowed, securities-for-securities transactions, derivative transactions, customer margin loans and securities-based lending. In many cases, the Firm is permitted to sell or repledge these securities held as collateral and use the securities to secure securities sold under agreements to repurchase, to enter into securities lending and derivative transactions or for delivery to counterparties to cover short positions.

Customer Margin Lending

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Customer receivables representing margin loans	\$ 27,427	\$ 26,225

The Firm provides margin lending arrangements which allow customers to borrow against the value of qualifying securities. Receivables under margin lending arrangements are included within Customer and other receivables in the balance sheets. Under these agreements and transactions, the Firm receives collateral, including U.S. government and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. Customer receivables generated from margin lending activities are collateralized by customer-owned securities held by the Firm. The Firm monitors required margin levels and established credit terms daily and, pursuant to such guidelines, requires customers to deposit additional collateral, or reduce positions, when necessary.

For a further discussion of the Firm's margin lending activities, see Note 6 to the financial statements in the 2018 Form 10-K.

The Firm has additional secured liabilities. For a further discussion of other secured financings, see Notes 10 and 12.

For a further discussion of the Firm's loans, including loan types and categories, as well as the Firm's allowance methodology, refer to Notes 2 and 7 to the financial statements in the 2018 Form 10-K. See Note 3 for further information regarding Loans and lending commitments held at fair value. See Note 11 for details of current commitments to lend in the future.

Employee Loans

\$ in millions	At	At
	March 31, 2019	December 31, 2018
Balance	\$ 3,011	\$ 3,415
Allowance for loan losses	(64)	(63)
Balance, net	\$ 2,947	\$ 3,352
Repayment term range, in years	1 to 20	1 to 20

Employee loans are granted in conjunction with a program established primarily to recruit certain Wealth Management representatives, are full recourse and generally require periodic repayments. These loans are recorded in Customer and other receivables in the balance sheets. The Firm establishes an allowance for loan amounts it does not consider recoverable, and the related provision is recorded in Compensation and benefits expense.

8. Equity Method Investments

Equity Method Investment Balances

\$ in millions	At	At
	March 31, 2019	December 31, 2018
Investments	\$ 2,391	\$ 2,432
	Three Months Ended March 31,	
	2019	2018
Income (loss)	\$ (10)	\$ 50

Equity method investments, other than certain investments in funds, are summarized above and are included in Other assets in the balance sheets with related income or loss included in Other revenues in the income statements. See "Net Asset Value Measurements—Fund Interests" in Note 3 for the carrying value of the Firm's fund interests, which are comprised of general and limited partnership interests, as well as any related carried interest.

Japanese Securities Joint Venture

\$ in millions	Three Months Ended March 31,	
	2019	2018
Income from investment in MUMSS	\$ 3	\$ 56

The Firm and Mitsubishi UFJ Financial Group, Inc. ("MUFG") formed a joint venture in Japan comprising their respective investment banking and securities businesses by forming two joint venture companies, Mitsubishi UFJ Morgan Stanley Securities Co., Ltd. ("MUMSS") and Morgan Stanley MUFG Securities Co., Ltd. ("MSMS") (the "Joint Venture"). The Firm owns a 40% economic interest in the Joint Venture and MUFG owns the other 60%.

The Firm's 40% voting interest in MUMSS is accounted for under the equity method within the Institutional Securities business segment, and is included in the equity method investment balances above. The Firm consolidates MSMS into the Institutional Securities business segment, based on its 51% voting interest.

The Firm engages in transactions in the ordinary course of business with MUFG and its affiliates, for example investment banking, financial advisory, sales and trading, derivatives, investment management, lending, securitization and other financial services transactions. Such transactions are on substantially the same terms as those that would be available to unrelated third parties for comparable transactions.

9. Deposits

Deposits

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Savings and demand deposits	\$ 143,201	\$ 154,897

Total	\$ 36,530

10. Borrowings and Other Secured Financings

Borrowings

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Original maturities of one year or less	\$ 1,498	\$ 1,545
Original maturities greater than one year		
Senior	\$ 178,926	\$ 178,027
Subordinated	10,267	10,090
Total	\$ 189,193	\$ 188,117
Total borrowings	\$ 190,691	\$ 189,662
Weighted average stated maturity, in years ¹	6.7	6.5

1. Only includes borrowings with original maturities greater than one year.

Other Secured Financings

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Original maturities:		
Greater than one year	\$ 5,254	\$ 6,772
One year or less	2,074	2,036
Failed sales	715	658
Total	\$ 8,043	\$ 9,466

Other secured financings include the liabilities related to certain ELNs, transfers of financial assets that are accounted for as financings rather than sales, pledged commodities, consolidated VIEs where the Firm is deemed to be the primary beneficiary and other secured borrowings. These liabilities are generally payable from the cash flows of the related assets accounted for as Trading assets. See Note 12 for further information on other secured financings related to VIEs and securitization activities.

For transfers that fail to meet the accounting criteria for a sale, the Firm continues to recognize the assets in Trading assets at fair value, and the Firm recognizes the associated liabilities in Other secured financings at fair value in the balance sheets.

The assets transferred to certain unconsolidated VIEs in transactions accounted for as failed sales cannot be removed unilaterally by the Firm and are not generally available to the Firm. The related liabilities are also non-recourse to the Firm. In certain other failed sale transactions, the Firm has the right to remove assets or provides additional recourse through derivatives such as total return swaps, guarantees or other forms of involvement.

11. Commitments, Leases, Guarantees and Contingencies

Commitments

<i>\$ in millions</i>	Years to Maturity at March 31, 2019				Total

Standby letters of credit and other financial guarantees issued ¹	222	6,350
Market value guarantees	—	107
Liquidity facilities	6	7,620
Whole loan sales guarantees	(9)	—
Securitization representations and warranties ³	(42)	—
General partner guarantees	(71)	—

1. These amounts include certain issued standby letters of credit participated to third parties, totaling \$0.6 billion of notional and collateral/recourse, due to the nature of the Firm's obligations under these arrangements.

2. Carrying amounts of derivative contracts are shown on a gross basis prior to cash collateral or counterparty netting. For further information on derivative contracts, see Note 4.

3. Primarily related to residential mortgage securitizations.

The Firm has obligations under certain guarantee arrangements, including contracts and indemnification agreements, that contingently require the Firm to make payments to the guaranteed party based on changes in an underlying measure (such as an interest or foreign exchange rate, security or commodity price, an index, or the occurrence or non-occurrence of a specified event) related to an asset, liability or equity security of a guaranteed party. Also included as guarantees are contracts that contingently require the Firm to make payments to the guaranteed party based on another entity's failure to perform under an agreement, as well as indirect guarantees of the indebtedness of others.

In certain situations, collateral may be held by the Firm for those contracts that meet the definition of a guarantee. Generally, the Firm sets collateral requirements by counterparty so that the collateral covers various transactions and products and is not allocated specifically to individual contracts. Also, the Firm may recover amounts related to the underlying asset delivered to the Firm under a derivative contract.

For more information on the nature of the obligation and related business activity for market value guarantees, liquidity facilities, whole loan sales guarantees and general partner guarantees related to certain investment management funds, as well as the other products in the previous table, see Note 12 to the financial statements in the 2018 Form 10-K.

Other Guarantees and Indemnities

In the normal course of business, the Firm provides guarantees and indemnifications in a variety of transactions. These provisions generally are standard contractual terms. Certain of these guarantees and indemnifications related to indemnities, exchange and clearinghouse member guarantees and merger and acquisition guarantees are described in Note 12 to the financial statements in the 2018 Form 10-K.

In addition, in the ordinary course of business, the Firm guarantees the debt and/or certain trading obligations (including obligations associated with derivatives, foreign exchange contracts and the settlement of physical commodities) of certain subsidiaries. These guarantees generally are entity or product specific and are required by investors or trading counterparties. The activities of the Firm's subsidiaries covered by these guarantees (including any related debt or trading obligations) are included in the financial statements.

Finance Subsidiary

The Parent Company fully and unconditionally guarantees the securities issued by Morgan Stanley Finance LLC, a 100%-owned finance subsidiary.

Contingencies

Legal. In addition to the matters described below, in the normal course of business, the Firm has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a global diversified financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the entities that would otherwise be the primary defendants in such cases are bankrupt or are in financial distress. These actions have included, but are not limited to, residential mortgage and credit crisis-related matters.

While the Firm has identified below any individual proceedings where the Firm believes a material loss to be reasonably possible and reasonably estimable, there can be no assurance that material losses will not be incurred from claims that have not yet been asserted or are not yet determined to be probable or possible and reasonably estimable losses.

The Firm contests liability and/or the amount of damages as appropriate in each pending matter. Where available information indicates that it is probable a liability had been incurred at the date of the financial statements and the Firm can reasonably estimate the amount of that loss, the Firm accrues the estimated loss by a charge to income.

In many proceedings and investigations, however, it is inherently difficult to determine whether any loss is probable or even possible or to estimate the amount of any loss. In addition, even where a loss is possible or an exposure to loss exists in excess of the liability already accrued with respect to a previously recognized loss contingency, it is not always possible to reasonably estimate the size of the possible loss or range of loss.

For certain legal proceedings and investigations, the Firm cannot reasonably estimate such losses, particularly for proceedings and investigations where the factual record is being developed or contested or where plaintiffs or government entities seek substantial or indeterminate damages, restitution, disgorgement or penalties. Numerous issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, determination of issues related to class certification and the calculation of damages or other relief, and by addressing novel or unsettled legal questions relevant to the proceedings or investigations in question, before a loss or additional loss or range of loss or additional range of loss can be reasonably estimated for a proceeding or investigation.

For certain other legal proceedings and investigations, the Firm can estimate reasonably possible losses, additional losses, ranges of loss or ranges of additional loss in excess of amounts accrued but does not believe, based on current knowledge and after consultation with counsel, that such losses will have a material adverse effect on the Firm's financial statements as a whole, other than the matters referred to in the following paragraphs.

On July 15, 2010, China Development Industrial Bank ("CDIB") filed a complaint against the Firm, styled *China Development Industrial Bank v. Morgan Stanley & Co. Incorporated et al.*, which is pending in the Supreme Court of the State of New York, New York County ("Supreme Court of NY"). The complaint relates to a \$275 million CDS referencing the super senior portion of the STACK 2006-1 CDO. The complaint asserts claims for common law fraud, fraudulent inducement and fraudulent concealment and alleges that the Firm misrepresented the risks of the STACK 2006-1 CDO to CDIB, and that the Firm knew that the assets backing the CDO were of poor quality when it entered into the CDS with CDIB. The complaint seeks compensatory damages related to the approximately \$228 million that CDIB alleges it has already lost under the CDS, rescission of CDIB's obligation to pay an additional \$12 million, punitive damages, equitable relief, fees and costs. On February 28, 2011, the court denied the Firm's motion to dismiss the complaint. On December 21, 2018, the court denied the Firm's motion for summary judgment and granted in part the Firm's motion for sanctions relating to spoliation of evidence. On January 24, 2019, CDIB filed a notice of appeal from the court's December 21, 2018 order, and on January 25, 2019, the Firm filed a notice of appeal from the same order. On March 7, 2019, the court denied the relief that CDIB sought in a motion to clarify and resettle the portion of the court's December 21, 2018 order granting spoliation sanctions. Based on currently available information, the Firm believes it could incur a loss in this action of up to approximately \$240 million plus pre- and post-judgment interest, fees and costs.

On July 8, 2013, U.S. Bank National Association, in its capacity as trustee, filed a complaint against the Firm styled *U.S. Bank National Association, solely in its capacity as Trustee of the Morgan Stanley Mortgage Loan Trust 2007-2AX (MSM 2007-2AX) v. Morgan Stanley Mortgage Capital Holdings LLC, Successor-by-Merger to Morgan Stanley Mortgage Capital Inc. and GreenPoint Mortgage Funding, Inc.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$650 million, breached various representations and warranties. The complaint seeks, among other relief, specific performance of

the loan breach remedy procedures in the transaction documents, unspecified damages and interest. On November 24, 2014, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On April 4, 2019, the court denied the Firm's motion to renew its motion to dismiss. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$240 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands that it did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On September 19, 2014, Financial Guaranty Insurance Company ("FGIC") filed a complaint against the Firm in the Supreme Court of NY, styled *Financial Guaranty Insurance Company v. Morgan Stanley ABS Capital I Inc. et al.* relating to a securitization issued by Basket of Aggregated Residential NIMS 2007-1 Ltd. The complaint asserts claims for breach of contract and alleges, among other things, that the net interest margin securities ("NIMS") in the trust breached various representations and warranties. FGIC issued a financial guaranty policy with respect to certain notes that had an original balance of approximately \$475 million. The complaint seeks, among other relief, specific performance of the NIMS breach remedy procedures in the transaction documents, unspecified damages, reimbursement of certain payments made pursuant to the transaction documents, attorneys' fees and interest. On November 24, 2014, the Firm filed a motion to dismiss the complaint, which the court denied on January 19, 2017. On September 13, 2018, the Appellate Division, First Department, affirmed the lower court's order denying the Firm's motion to dismiss. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$126 million, the unpaid balance of these notes, plus pre- and post-judgment interest, fees and costs, as well as claim payments that FGIC has made and will make in the future.

On September 23, 2014, FGIC filed a complaint against the Firm in the Supreme Court of NY styled *Financial Guaranty Insurance Company v. Morgan Stanley ABS Capital I Inc. et al.* relating to the Morgan Stanley ABS Capital I Inc. Trust 2007-NC4. The complaint asserts claims for breach of contract and fraudulent inducement and alleges, among other things, that the loans in the trust breached various representations and warranties and defendants made untrue statements and material omissions to induce FGIC to issue a financial guaranty policy on certain classes of certificates that had an original balance of approximately \$876 million. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction

documents, compensatory, consequential and punitive damages, attorneys' fees and interest. On January 23, 2017, the court denied the Firm's motion to dismiss the complaint. On September 13, 2018, the Appellate Division, First Department, affirmed in part and reversed in part the lower court's order denying the Firm's motion to dismiss. On December 20, 2018, the Appellate Division denied plaintiff's motion for leave to appeal the decision of the Appellate Division, First Department, to the New York Court of Appeals or, in the alternative, for re-argument. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$277 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands from a certificate holder and FGIC that the Firm did not repurchase, plus pre- and post-judgment interest, fees and costs, as well as claim payments that FGIC has made and will make in the future. In addition, plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On January 23, 2015, Deutsche Bank National Trust Company, in its capacity as trustee, filed a complaint against the Firm styled *Deutsche Bank National Trust Company solely in its capacity as Trustee of the Morgan Stanley ABS Capital I Inc. Trust 2007-NC4 v. Morgan Stanley Mortgage Capital Holdings LLC as Successor-by-Merger to Morgan Stanley Mortgage Capital Inc., and Morgan Stanley ABS Capital I Inc.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$1.05 billion, breached various representations and warranties. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction documents, compensatory, consequential, rescissory, equitable and punitive damages, attorneys' fees, costs and other related expenses, and interest. On December 11, 2015, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On October 19, 2018, the court granted the Firm's motion for leave to amend its answer and to stay the case pending resolution of Deutsche Bank National Trust Company's appeal to the New York Court of Appeals in another case. On January 17, 2019, the First Department reversed the trial court's order to the extent that it had granted in part the Firm's motion to dismiss the complaint. On February 15, 2019, the Firm filed a motion for leave to appeal, or in the alternative, for the re-argument of the First

Department's decision. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$277 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands from a certificate holder and a monoline insurer that the Firm did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

In matters styled *Case number 15/3637* and *Case number 15/4353*, the Dutch Tax Authority ("Dutch Authority") has challenged, in the District Court in Amsterdam, the prior set-off by the Firm of approximately €124 million (approximately \$139 million) plus accrued interest of withholding tax credits against the Firm's corporation tax liabilities for the tax years 2007 to 2013. The Dutch Authority alleges that the Firm was not entitled to receive the withholding tax credits on the basis, inter alia, that a Firm subsidiary did not hold legal title to certain securities subject to withholding tax on the relevant dates. The Dutch Authority has also alleged that the Firm failed to provide certain information to the Dutch Authority and keep adequate books and records. A hearing took place in this matter on September 19, 2017. On April 26, 2018, the District Court in Amsterdam issued a decision dismissing the Dutch Authority's claims. On June 4, 2018, the Dutch Authority filed an appeal before the Court of Appeal in Amsterdam in matters re-styled *Case number 18/00318* and *Case number 18/00319*. A hearing of the Dutch Authority's appeal has been scheduled for June 26, 2019. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately €124 million (approximately \$139 million) plus accrued interest.

Matters settled. On April 1, 2016, the California Attorney General's Office filed an action against the Firm in California state court styled *California v. Morgan Stanley, et al.*, on behalf of California investors, including the California Public Employees' Retirement System and the California Teachers' Retirement System. The complaint alleges that the Firm made misrepresentations and omissions regarding RMBS and notes issued by the Cheyne SIV, and asserts violations of the California False Claims Act and other state laws and seeks treble damages, civil penalties, disgorgement, and injunctive relief. On April 24, 2019, the parties reached an agreement to settle the litigation.

OSF—Other structured financings

1. Amounts include transactions backed by residential mortgage loans, commercial mortgage loans and other types of assets, including consumer or commercial assets. The value of assets is determined based on the fair value of the liabilities and the interests owned by the Firm in such VIEs as the fair values for the liabilities and interests owned are more observable.

2. Other primarily includes certain operating entities, investment funds and structured transactions.

Other liabilities and accrued expenses	32	22
Total	\$ 81	\$ 86
Noncontrolling interests	\$ 115	\$ 106

Consolidated VIE assets and liabilities are presented in the previous tables after intercompany eliminations. Most assets owned by consolidated VIEs cannot be removed unilaterally by the Firm and are not generally available to the Firm. Most related liabilities issued by consolidated VIEs are non-recourse to the Firm. In certain other consolidated VIEs, the Firm either has the unilateral right to remove assets or provides additional recourse through derivatives such as total return swaps, guarantees or other forms of involvement.

In general, the Firm's exposure to loss in consolidated VIEs is limited to losses that would be absorbed on the VIE net assets

recognized in its financial statements, net of amounts absorbed by third-party variable interest holders.

MTOB—Municipal tender option bonds

- Where notional amounts are utilized in quantifying the maximum exposure related to derivatives, such amounts do not reflect changes in fair value recorded by the Firm.
- Additional VIE assets owned represents the carrying value of total exposure to non-consolidated VIEs for which the maximum exposure to loss is less than specific thresholds, primarily interests issued by securitization SPEs. The Firm's primary risk exposure is to the most subordinate class of beneficial interest and maximum exposure to loss generally equals the fair value of the assets owned. These assets are primarily included in Trading assets and Investment securities and are measured at fair value (see Note 3). The Firm does not provide additional support in these transactions through contractual facilities, guarantees or similar derivatives.

Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

The majority of the VIEs included in the previous tables are sponsored by unrelated parties; the Firm's involvement generally is the result of its secondary market-making activities and securities held in its Investment securities portfolio (see Note 5).

The Firm's maximum exposure to loss is dependent on the nature of the Firm's variable interest in the VIE and is limited to:

- notional amounts of certain liquidity facilities;
- other credit support;
- total return swaps;
- written put options; and
- fair value of certain other derivatives and investments the Firm has made in the VIE.

The Firm's maximum exposure to loss in the previous tables does not include the offsetting benefit of hedges or any reductions associated with the amount of collateral held as part of a transaction with the VIE or any party to the VIE directly against a specific exposure to loss.

Liabilities issued by VIEs generally are non-recourse to the Firm.

The transfers of assets with continuing involvement tables include transactions with SPEs in which the Firm, acting as principal, transferred financial assets with continuing involvement and received sales treatment.

Transferred assets are carried at fair value prior to securitization, and any changes in fair value are recognized in the income statements. The Firm may act as underwriter of the beneficial interests issued by these securitization vehicles,

Notes to Consolidated Financial Statements (Unaudited)

for which Investment banking revenues are recognized. The Firm may retain interests in the securitized financial assets as one or more tranches of the securitization. These retained interests are generally carried at fair value in the balance sheets with changes in fair value recognized in the income statements.

Proceeds from New Securitization Transactions and Sales of Loans

\$ in millions	Three Months Ended March 31,	
	2019	2018
New transactions ¹	\$ 4,733	\$ 6,134
Retained interests	2,887	481
Sales of corporate loans to CLO SPEs ^{1,2}	—	94

1. Net gains on new transactions and sales of corporate loans to CLO entities at the time of the sale were not material for all periods presented.
2. Sponsored by non-affiliates.

The Firm has provided, or otherwise agreed to be responsible for, representations and warranties regarding certain assets transferred in securitization transactions sponsored by the Firm (see Note 11).

Assets Sold with Retained Exposure

\$ in millions	At March 31, 2019	At December 31, 2018
Gross cash proceeds from sale of assets ¹	\$ 27,444	\$ 27,121
Fair value		
Assets sold	\$ 27,560	\$ 26,524
Derivative assets recognized in the balance sheets	264	164
Derivative liabilities recognized in the balance sheets	73	763

1. The carrying value of assets derecognized at the time of sale approximates gross cash proceeds.

The Firm enters into transactions in which it sells securities, primarily equities and contemporaneously enters into bilateral OTC derivatives with the purchasers of the securities, through which it retains exposure to the sold securities.

For a discussion of the Firm's VIEs, the determination and structure of VIEs and securitization activities, see Note 13 to the financial statements in the 2018 Form 10-K.

13. Regulatory Requirements

Regulatory Capital Framework and Requirements

For a discussion of the Firm's regulatory capital framework, see Note 14 to the financial statements in the 2018 Form 10-K.

The Firm is required to maintain minimum risk-based and leverage-based capital ratios under regulatory capital requirements. A summary of the calculations of regulatory capital, RWA and transition provisions follows.

Minimum risk-based capital ratio requirements apply to Common Equity Tier 1 capital, Tier 1 capital and Total capital (which includes Tier 2 capital). Certain adjustments to and deductions from capital are required for purposes of determining these ratios, such as goodwill, intangible assets, certain deferred tax assets, other amounts in AOCI and investments in the capital instruments of unconsolidated financial institutions.

In addition to the minimum risk-based capital ratio requirements, the Firm is subject to the following buffers in 2019:

- A greater than 2.5% Common Equity Tier 1 capital conservation buffer;
- The Common Equity Tier 1 G-SIB capital surcharge, currently at 3%; and
- Up to a 2.5% Common Equity Tier 1 CCyB, currently set by U.S. banking agencies at zero.

In 2018, each of these buffers was 75% of the fully phased-in 2019 requirement noted above. Failure to maintain the buffers would result in restrictions on the Firm's ability to make capital distributions, including the payment of dividends and the repurchase of stock, and to pay discretionary bonuses to executive officers.

The Firm's Regulatory Capital and Capital Ratios

\$ in millions	At March 31, 2019		
	Required Ratio ¹	Amount	Ratio
Risk-based capital			
Common Equity Tier 1 capital	10.0%	\$ 63,344	16.7%
Tier 1 capital	11.5%	71,910	19.0%
Total capital	13.5%	81,570	21.6%
Total RWA		378,420	
Leverage-based capital			
Tier 1 leverage	4.0%	\$ 71,910	8.4%
Adjusted average assets ²		855,192	
SLR	5.0%	71,910	6.5%
Supplementary leverage exposure ³		1,104,264	

Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

<i>\$ in millions</i>	At December 31, 2018		
	Required Ratio ¹	Amount	Ratio
Risk-based capital			
Common Equity Tier 1 capital	8.6%	\$ 62,086	16.9%
Tier 1 capital	10.1%	70,619	19.2%
Total capital	12.1%	80,052	21.8%
Total RWA		367,309	
Leverage-based capital			
Tier 1 leverage	4.0%	\$ 70,619	8.4%
Adjusted average assets ²		843,074	
SLR	5.0%	70,619	6.5%
Supplementary leverage exposure ³		1,092,672	

1. Required ratios are inclusive of any buffers applicable as of the date presented. For 2018, the minimum required regulatory capital ratios for risk-based capital are under the transitional rules.
2. Adjusted average assets represents the denominator of the Tier 1 leverage ratio and is composed of the average daily balance of consolidated on-balance sheet assets under U.S. GAAP during the quarters ended March 31, 2019 and December 31, 2018, adjusted for disallowed goodwill, intangible assets, certain deferred tax assets, certain investments in the capital instruments of unconsolidated financial institutions and other adjustments.
3. Supplementary leverage exposure is the sum of Adjusted average assets used in the Tier 1 leverage ratio and other adjustments, primarily (i) potential future exposure for derivative exposures, gross-up for cash collateral netting where qualifying criteria are not met, and the effective notional principal amount of sold credit protection offset by qualifying purchased credit protection; (ii) the counterparty credit risk for repo-style transactions; and (iii) the credit equivalent amount for off-balance sheet exposures.

At March 31, 2019 and December 31, 2018, the Firm's risk-based capital ratios are based on the Standardized Approach rules.

U.S. Bank Subsidiaries' Regulatory Capital and Capital Ratios

The OCC establishes capital requirements for the Firm's U.S. Bank Subsidiaries and evaluates their compliance with such capital requirements. Regulatory capital requirements for the U.S. Bank Subsidiaries are calculated in a similar manner to the Firm's regulatory capital requirements, although G-SIB capital surcharge requirements do not apply to the U.S. Bank Subsidiaries.

The OCC's regulatory capital framework includes Prompt Corrective Action ("PCA") standards, including "well-capitalized" PCA standards that are based on specified regulatory capital ratio minimums. For the Firm to remain an FHC, the U.S. Bank Subsidiaries must remain well-capitalized in accordance with the OCC's PCA standards. In addition, failure by the U.S. Bank Subsidiaries to meet minimum capital requirements may result in certain mandatory and discretionary actions by regulators that, if undertaken, could have a direct material effect on the U.S. Bank Subsidiaries' and the Firm's financial statements.

At March 31, 2019 and December 31, 2018, the U.S. Bank Subsidiaries' risk-based capital ratios are based on the Standardized Approach rules, and in each period, the ratios exceeded well-capitalized requirements.

U.S. Broker-Dealer Regulatory Capital Requirements

MS&Co. Regulatory Capital

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Net capital	\$ 13,925	\$ 13,797
Excess net capital	11,403	11,333

MS&Co. is a registered U.S. broker-dealer and registered futures commission merchant and, accordingly, is subject to the minimum net capital requirements of the SEC and the CFTC. MS&Co. has consistently operated with capital in excess of its regulatory capital requirements.

As an Alternative Net Capital broker-dealer, and in accordance with the market and credit risk standards of Appendix E of SEC Rule 15c3-1, MS&Co. is subject to minimum net capital and tentative net capital requirements. In addition, MS&Co. must notify the SEC if its tentative net capital falls below certain levels. At March 31, 2019 and December 31, 2018, MS&Co. has exceeded its net capital requirement and has tentative net capital in excess of the minimum and notification requirements.

MSSB LLC Regulatory Capital

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Net capital	\$ 3,041	\$ 3,455
Excess net capital	2,901	3,313

MSSB LLC is a registered U.S. broker-dealer and introducing broker for the futures business and, accordingly, is subject to the minimum net capital requirements of the SEC. MSSB LLC has consistently operated with capital in excess of its regulatory capital requirements.

Other Regulated Subsidiaries

MSIP, a London-based broker-dealer subsidiary, is subject to the capital requirements of the PRA, and MSMS, a Tokyo-based broker-dealer subsidiary, is subject to the capital requirements of the Financial Services Agency. MSIP and MSMS have consistently operated with capital in excess of their respective regulatory capital requirements.

Certain other U.S. and non-U.S. subsidiaries of the Firm are subject to various securities, commodities and banking regulations, and capital adequacy requirements promulgated by the regulatory and exchange authorities of the countries in which they operate. These subsidiaries have consistently operated with capital in excess of their local capital adequacy requirements.

14. Total Equity

Share Repurchases

<i>\$ in millions</i>	Three Months Ended March 31,	
	2019	2018
Repurchases of common stock under our Share Repurchase Program	\$ 1,180	\$ 1,250

The Firm's 2018 Capital Plan ("Capital Plan") includes the share repurchase of up to \$4.7 billion of outstanding common stock for the period beginning July 1, 2018 through June 30, 2019. Additionally, the Capital Plan includes quarterly common stock dividends of up to \$0.30 per share.

A portion of common stock repurchases in the current quarter was conducted under a sales plan with MUFG, whereby MUFG sold shares of the Firm's common stock to the Firm, as part of the Firm's Share Repurchase Program. The sales plan is only intended to maintain MUFG's ownership percentage below 24.9% in order to comply with MUFG's passivity commitments to the Board of Governors of the Federal Reserve System and has no impact on the strategic alliance between MUFG and the Firm, including the joint ventures in Japan.

Preferred Stock Outstanding

K	40,000	25,000	1,000	1,000
Total			\$ 8,520	\$ 8,520

1. Series C is composed of the issuance of 1,160,791 shares of Series C Preferred Stock to MUFG for an aggregate purchase price of \$911 million, less the redemption of 640,909 shares of Series C Preferred Stock of \$503 million, which were converted to common shares of approximately \$705 million.

For a description of Series A through Series K preferred stock issuances, see Note 15 to the financial statements in the 2018 Form 10-K. The Firm is authorized to issue 30 million shares of preferred stock. The preferred stock has a preference over the common stock upon liquidation. The Firm's preferred stock qualifies as Tier 1 capital in accordance with regulatory capital requirements (see Note 13).

- Amounts are net of tax and exclude noncontrolling interests.
- The cumulative adjustment for accounting changes is primarily the effect of the adoption of the accounting update *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. This adjustment was recorded as of January 1, 2018 to reclassify certain income tax effects related to enactment of the Tax Act from AOCI to Retained earnings, primarily related to the remeasurement of deferred tax assets and liabilities resulting from the reduction in the corporate income tax rate to 21%. See Note 2 for further information.

Earnings per diluted common share	\$ 1.39	\$ 1.45
Weighted average antidilutive RSUs (excluded from the computation of diluted EPS)	6	1

16. Interest Income and Interest Expense

<i>\$ in millions</i>	Three Months Ended March 31,	
	2019	2018
Interest income		
Investment securities	\$ 475	\$ 424
Loans	1,195	938
Securities purchased under agreements to resell and Securities borrowed ¹	947	215
Trading assets, net of Trading liabilities	713	540
Customer receivables and Other ²	960	743
Total interest income	\$ 4,290	\$ 2,860
Interest expense		
Deposits	\$ 462	\$ 159
Borrowings	1,380	1,138
Securities sold under agreements to repurchase and Securities loaned ³	600	402
Customer payables and Other ⁴	834	186
Total interest expense	\$ 3,276	\$ 1,885
Net interest	\$ 1,014	\$ 975

1. Includes fees paid on Securities borrowed.

2. Includes interest from Customer receivables and Cash and cash equivalents.

3. Includes fees received on Securities loaned.

4. Includes fees received from prime brokerage customers for stock loan transactions entered into to cover customers' short positions.

Interest income and Interest expense are classified in the income statements based on the nature of the instrument and related market conventions. When included as a component of the instrument's fair value, interest is included within Trading revenues or Investments revenues. Otherwise, it is included within Interest income or Interest expense.

17. Income Taxes

The Firm is under continuous examination by the IRS and other tax authorities in certain countries, such as Japan and the U.K., and in states and localities in which it has significant business operations, such as New York. The Firm has established a liability for unrecognized tax benefits, and associated interest, if applicable ("tax liabilities"), that it believes is adequate in relation to the potential for additional assessments. Once established, the Firm adjusts such tax liabilities only when new information is available or when an event occurs necessitating a change.

The Firm believes that the resolution of the above tax examinations will not have a material effect on the annual financial statements, although a resolution could have a material impact in the income statements and on the effective tax rate for any period in which such resolution occurs.

See Note 11 regarding the Dutch Tax Authority's challenge, in the District Court in Amsterdam (matters styled *Case number 15/3637* and *Case number 15/4353*), of the Firm's entitlement to certain withholding tax credits which may impact the balance of unrecognized tax benefits.

It is reasonably possible that significant changes in the balance of unrecognized tax benefits occur within the next 12 months. At this time, however, it is not possible to reasonably estimate the expected change to the total amount of unrecognized tax benefits and the impact on the Firm's effective tax rate over the next 12 months.

The Firm's effective tax rate for the current quarter included recurring-type discrete tax benefits associated with employee share-based payments of \$107 million. The Firm's effective tax rate for the current quarter included an intermittent net discrete tax benefit of \$101 million primarily associated with the remeasurement of reserves and related interest due to new information with regard to multi-jurisdiction tax examinations.

I/E—Intersegment Eliminations

- Approximately 85% of Investment banking revenues and substantially all of Commissions and fees and Asset management revenues in the current quarter and prior year quarter were accounted for under the *Revenues from Contracts with Customers* accounting update.
- Current quarter Institutional Securities Investment banking revenues are composed of \$406 million of Advisory and \$745 million of Underwriting revenues. Prior year quarter Institutional Securities Investment banking revenues are composed of \$574 million of Advisory and \$939 million of Underwriting revenues.
- The Firm enters into certain contracts which contain a current obligation to perform services in the future. Excluding contracts where billing is commensurate with the value of the services performed at each stage of the contract, contracts with variable consideration that is subject to reversal, and contracts with less than one year duration, we expect to record the following approximate revenues in the future: \$105 million in the remainder of 2019 and \$105 million in 2020; between \$40 million and \$70 million per year in 2021 through 2025; and \$10 million per year thereafter through 2035. These revenues are primarily related to certain commodities contracts with customers.
- Includes \$671 million and \$902 million in revenue recognized in the current quarter and prior year quarter, respectively, where some or all services were performed in prior periods. This amount is primarily composed of investment banking advisory fees and distribution fees.

For a discussion about the Firm's business segments, see Note 21 to the financial statements in the 2018 Form 10-K.

Americas	\$ 7,321	\$ 8,018
EMEA	1,702	1,708
Asia	1,263	1,351
Total	\$ 10,286	\$ 11,077

For a discussion about the Firm's geographic net revenues, see Note 21 to the financial statements in the 2018 Form 10-K.

Revenue Information

Trading Revenues by Product Type

<i>\$ in millions</i>	Three Months Ended March 31,	
	2019	2018
Interest rate	\$ 785	\$ 871
Foreign exchange	241	261
Equity security and index ¹	1,451	1,877
Commodity and other	422	435
Credit	542	326
Total	\$ 3,441	\$ 3,770

1. Dividend income is included within equity security and index contracts.

The previous table summarizes gains and losses included in Trading revenues in the income statements. These activities include revenues related to derivative and non-derivative financial instruments. The Firm generally utilizes financial instruments across a variety of product types in connection with its market-making and related risk management strategies. The trading revenues presented in the table are not representative of the manner in which the Firm manages its business activities and are prepared in a manner similar to the presentation of trading revenues for regulatory reporting purposes.

Receivables related to Revenues from Contracts with Customers

<i>\$ in millions</i>	At March 31, 2019	At December 31, 2018
Customer and other receivables	\$ 2,206	\$ 2,308

Receivables from contracts with customers, which are included within Customer and other receivables in the balance sheets, arise when the Firm has both recorded revenues and has the right per the contract to bill the customer.

19. Subsequent Events

The Firm has evaluated subsequent events for adjustment to or disclosure in the financial statements through the date of this report and has not identified any recordable or disclosable events not otherwise reported in these financial statements or the notes thereto.

1. Amounts include primarily U.S. balances.

2. Includes fees paid on Securities borrowed.

3. Excludes non-interest earning assets and non-interest bearing liabilities, such as equity securities.

4. Includes interest from Customer receivables and Cash and cash equivalents. Prior period amounts have been revised to conform to the current presentation.

5. Includes structured notes, whose interest expense is considered part of its value and therefore is recorded within Trading revenues.

6. Includes fees received on Securities loaned. The annualized average rate was calculated using (a) interest expense incurred on all securities sold under agreements to repurchase and securities loaned transactions, whether or not such transactions were reported in the balance sheets and (b) net average on-balance sheet balances, which exclude certain securities-for-securities transactions.

7. Includes fees received from prime brokerage customers for stock loan transactions entered into to cover customers' short positions.

Other Information

Legal Proceedings

The following new matters and developments have occurred since previously reporting certain matters in the Firm's 2018 Form 10-K. See also the disclosures set forth under "Legal Proceedings" in the 2018 Form 10-K.

Residential Mortgage and Credit Crisis Related Matters

On February 15, 2019, the Firm filed a motion for leave to appeal, or in the alternative, for the re-argument of the First Department's January 17, 2019 decision in *Deutsche Bank National Trust Company solely in its capacity as Trustee of the Morgan Stanley ABS Capital I Inc. Trust 2007-NC4 v. Morgan Stanley Mortgage Capital Holdings LLC as Successor-by-Merger to Morgan Stanley Mortgage Capital Inc., and Morgan Stanley ABS Capital I Inc.*

On March 7, 2019, in the matter styled *China Development Industrial Bank v. Morgan Stanley & Co, Incorporated, et al*, the court denied the relief that CDIB sought in a motion to clarify and resettle the portion of the court's December 21, 2018 order granting spoliation sanctions.

On April 4, 2019, the court denied the Firm's motion to renew its motion to dismiss in *U.S. Bank National Association, solely in its capacity as Trustee of the Morgan Stanley Mortgage Loan Trust 2007-2AX (MSM 2007-2AX) v. Morgan Stanley Mortgage Capital Holdings LLC, Successor-by-Merger to Morgan Stanley Mortgage Capital Inc. and GreenPoint Mortgage Funding, Inc.*

On April 24, 2019, the parties in *California v. Morgan Stanley, et al.*, reached an agreement to settle the litigation.

Antitrust Related Matter

Beginning on March 25, 2019, the Firm was named as a defendant in a series of putative class action complaints filed in the Southern District of New York, the first of which is styled *Alaska Electrical Pension Fund v. BofA Secs., Inc., et al.* Each complaint alleges a conspiracy to fix prices and restrain competition in the market for unsecured bonds issued by the following Government-Sponsored Enterprises: the Federal National Mortgage Associate; the Federal Home Loan Mortgage Corporation; the Federal Farm Credit Banks Funding Corporation; and the Federal Home Loan Banks. The purported class period for each suit is from January 1, 2012 to June 1, 2018. Each complaint raises a claim under Section 1 of the Sherman Act and seeks, among other things, injunctive relief and treble compensatory damages.

European Matters

On March 7, 2019, the Appellate Division of the Court of Accounts for the Republic of Italy issued a decision in the matter styled *Case No. 2012/00406/MNV* affirming the decision below declining jurisdiction and dismissing the claim against the Firm. On April 19, 2019, the public prosecutor filed an appeal with the Italian Supreme Court seeking to overturn this decision.

On March 11, 2019, the plaintiff in the matter styled *Banco Popolare Società Cooperativa v Morgan Stanley & Co. International plc & others* filed an appeal in the Court of Appeal of Milan against the lower Milan court's decision dated September 11, 2018 dismissing the claim against the Firm.

Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the information with respect to purchases made by or on behalf of the Firm of its common stock during the current quarter ended March 31, 2019.

Issuer Purchases of Equity Securities

<i>\$ in millions, except per share data</i>	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ¹	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs

Employee transactions ³	156,953	\$ 42.01	—	—
Quarter ended at March 31, 2019				
Share Repurchase Program ²	27,966,806	\$ 42.19	27,966,806	\$ 1,180
Employee transactions ³	10,955,848	\$ 42.49	—	—

1. Share purchases under publicly announced programs are made pursuant to open-market purchases, Rule 10b5-1 plans or privately negotiated transactions (including with employee benefit plans) as market conditions warrant and at prices the Firm deems appropriate and may be suspended at any time. On April 18, 2018, the Firm entered into a sales plan with Mitsubishi UFJ Financial Group, Inc. ("MUFG") and Morgan Stanley & Co. LLC ("MS&Co.") whereby MUFG sold shares of the Firm's common stock to the Firm, through the Firm's agent MS&Co., as part of the Company's Share Repurchase Program (as defined below). The sales plan is only intended to maintain MUFG's ownership percentage below 24.9% in order to comply with MUFG's passivity commitments to the Board of Governors of the Federal Reserve System (the "Federal Reserve") and has no impact on the strategic alliance between MUFG and the Firm, including the joint ventures in Japan.

2. The Firm's Board of Directors has authorized the repurchase of the Firm's outstanding stock under a share repurchase program (the "Share Repurchase Program"). The Share Repurchase Program is a program for capital management purposes that considers, among other things, business segment capital needs, as well as equity-based compensation and benefit plan requirements. The Share Repurchase Program has no set expiration or termination date. Share repurchases by the Firm are subject to regulatory approval. On June 28, 2018, the Federal Reserve published summary results of CCAR and the Firm received a conditional non-objection to its 2018 Capital Plan, where the only condition was that the Firm's capital distributions not exceed the greater of the actual distributions it made over the previous four calendar quarters or the annualized average of actual distributions over the previous eight calendar quarters. As a result, the Firm's 2018 Capital Plan includes a share repurchase of up to \$4.7 billion of its outstanding common stock during the period beginning July 1, 2018 through June 30, 2019. During the quarter ended March 31, 2019, the Firm repurchased approximately \$1.2 billion of the Firm's outstanding common stock as part of its Share Repurchase Program. For further information, see "Liquidity and Capital Resources—Capital Management."

3. Includes shares acquired by the Firm in satisfaction of the tax withholding obligations on stock-based awards granted under the Firm's stock-based compensation plans.

Controls and Procedures

Under the supervision and with the participation of the Firm's management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the Firm's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

No change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) occurred during the period covered by this report that materially affected, or is reasonably likely to materially affect, the Firm's internal control over financial reporting.

Exhibits

EXHIBIT 15

To the Board of Directors and Shareholders of Morgan Stanley:

We have reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the unaudited condensed consolidated interim financial statements of Morgan Stanley and subsidiaries (the “Firm”) for the three-month periods ended March 31, 2019 and 2018, as indicated in our report dated May 3, 2019; because we did not perform an audit, we expressed no opinion on that information.

We are aware that our report referred to above, which is included in your Quarterly Report on Form 10-Q for the quarter ended March 31, 2019, is incorporated by reference in the following Registration Statements of the Firm:

**Morgan Stanley
Morgan Stanley Finance LLC
Registration Statement on Form S-3 (Registration Statement No. 333-221595)**

Ladies and Gentlemen:

We have acted as tax counsel to Morgan Stanley (the “Company”) and Morgan Stanley Finance LLC (“MSFL”) in connection with the issuance from time to time of (i) the Company’s debt securities, units, warrants, purchase contracts, preferred stock and common stock and (ii) MSFL’s debt securities, units, warrants and purchase contracts (collectively, the “Program Securities”) pursuant to a shelf registration statement on Form S-3 (Registration Statement No. 333-221595, the “Registration Statement”) filed with the Securities and Exchange Commission (the “SEC”) on November 16, 2017. We did not advise the Company or MSFL in connection with the preparation and filing of the Registration Statement, including the preparation and filing of a form of prospectus, dated November 16, 2017 (the “Prospectus”), for the purpose of registering the issuance of Program Securities under the Securities Act of 1933, as amended (the “Securities Act”).

We hereby consent to references to Shearman & Sterling LLP, solely in our capacity as tax counsel to the Company and MSFL, or any opinion of ours delivered in that capacity, in a pricing supplement or prospectus supplement forming part of the Prospectus prepared and filed by the Company or MSFL with the SEC relating to the offer and sale of any Program Securities. The issuance of such consent does not concede that we are “Experts” for purposes of the Securities Act.

Very truly yours,

/s/ Shearman & Sterling LLP

Certification

I, James P. Gorman, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Morgan Stanley;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
