

UNITED STATES SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934

*For the quarterly period ended September 30, 2017*

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934

Commission File Number 1-11758

**Morgan Stanley**

(Exact Name of Registrant as specified in its charter)

**Delaware**

(State or other jurisdiction of  
incorporation or organization)

**1585 Broadway**

**New York, NY 10036**  
(Address of principal executive  
offices, including zip code)

**36-3145972**

(I.R.S. Employer Identification No.)

**(212) 761-4000**

(Registrant's telephone number,  
including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Non-Accelerated Filer

(Do not check if a smaller reporting company)

Accelerated Filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the Registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

As of October 31, 2017, there were 1,807,899,161 shares of the Registrant's Common Stock, par value \$0.01 per share, outstanding.

## Available Information

We file annual, quarterly and current reports, proxy statements and other information with the U.S. Securities and Exchange Commission (the “SEC”). You may read and copy any document we file with the SEC at the SEC’s public reference room at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for information on the public reference room. The SEC maintains an internet site, [www.sec.gov](http://www.sec.gov), that contains annual, quarterly and current reports, proxy and information statements and other information that issuers file electronically with the SEC. Our electronic SEC filings are available to the public at the SEC’s internet site.

Our internet site is [www.morganstanley.com](http://www.morganstanley.com). You can access our Investor Relations webpage at [www.morganstanley.com/about-us-ir](http://www.morganstanley.com/about-us-ir). We make available free of charge, on or through our Investor Relations webpage, our Proxy Statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. We also make available, through our Investor Relations webpage, via a link to the SEC’s internet site, statements of beneficial ownership of our equity securities filed by our directors, officers, 10% or greater shareholders and others under Section 16 of the Exchange Act.

You can access information about our corporate governance at [www.morganstanley.com/about-us-governance](http://www.morganstanley.com/about-us-governance). Our Corporate Governance webpage includes:

- Amended and Restated Certificate of Incorporation;
- Amended and Restated Bylaws;
- Charters for our Audit Committee, Compensation, Management Development and Succession Committee, Nominating and Governance Committee, Operations and Technology Committee, and Risk Committee;
- Corporate Governance Policies;
- Policy Regarding Corporate Political Activities;
- Policy Regarding Shareholder Rights Plan;
- Equity Ownership Commitment;
- Code of Ethics and Business Conduct;
- Code of Conduct;
- Integrity Hotline Information; and
- Environmental and Social Policies.

Our Code of Ethics and Business Conduct applies to all directors, officers and employees, including our Chief Executive Officer, Chief Financial Officer and Deputy Chief Financial Officer. We will post any amendments to the Code of Ethics and Business Conduct and any waivers that are required to be disclosed by the rules of either the SEC or the New York Stock Exchange LLC (“NYSE”) on our internet site. You can request a copy of these documents, excluding exhibits, at no cost, by contacting Investor Relations, 1585 Broadway, New York, NY 10036 (212-761-4000). The information on our internet site is not incorporated by reference into this report.

## Financial Information

### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### Introduction

Morgan Stanley, a financial holding company, is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms “Morgan Stanley,” “Firm,” “us,” “we,” or “our” mean Morgan Stanley (the “Parent Company”) together with its consolidated subsidiaries.

A description of the clients and principal products and services of each of our business segments is as follows:

*Institutional Securities* provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing and market-making activities in equity and fixed income products, including prime brokerage services, global macro, credit and commodities products. Lending services include originating and/or purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, and financing extended to equities and commodities customers and municipalities. Other services include investment and research activities.

*Wealth Management* provides a comprehensive array of financial services and solutions to individual investors and

small to medium-sized businesses/institutions covering brokerage and investment advisory services, financial and wealth planning services, annuity and insurance products, credit and other lending products, banking and retirement plan services.

*Investment Management* provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined contribution plans, foundations, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are serviced through intermediaries, including affiliated and non-affiliated distributors.

The results of operations in the past have been, and in the future may continue to be, materially affected by competition; risk factors; and legislative, legal and regulatory developments; as well as other factors. These factors also may have an adverse impact on our ability to achieve our strategic objectives. Additionally, the discussion of our results of operations herein may contain forward-looking statements. These statements, which reflect management's beliefs and expectations, are subject to risks and uncertainties that may cause actual results to differ materially. For a discussion of the risks and uncertainties that may affect our future results, see “Forward-Looking Statements” immediately preceding Part I, Item 1, “Business—Competition” and “Business—Supervision and Regulation” in Part I, Item 1, “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2016 (the “2016 Form 10-K”) and “Liquidity and Capital Resources—Regulatory Requirements” herein.

Executive Summary

Overview of Financial Results

Consolidated Results

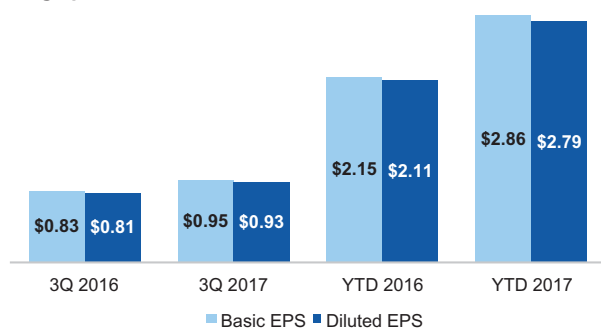

Net Revenues  
(\$ in millions)

Net Income Applicable to Morgan Stanley  
(\$ in millions)

Earnings per Common Share<sup>1</sup>

1. For the calculation of basic and diluted earnings per common share, see Note 15 to the financial statements.

- We reported net revenues of \$9,197 million in the three months ended September 30, 2017 (“current quarter,” or “3Q 2017”), compared with \$8,909 million in the three months ended September 30, 2016 (“prior year quarter,” or “3Q 2016”). For the current quarter, net income applicable to Morgan Stanley was \$1,781 million, or \$0.93 per diluted common share, compared with \$1,597 million, or \$0.81 per diluted common share, in the prior year quarter.

- We reported net revenues of \$28,445 million in the nine months ended September 30, 2017 (“current year period,” or “YTD 2017”), compared with \$25,610 million in the nine months ended September 30, 2016 (“prior year period,” or “YTD 2016”). For the current year period, net income applicable to Morgan Stanley was \$5,468 million, or \$2.79 per diluted common share, compared with \$4,313 million, or \$2.11 per diluted common share in the prior year period.

Non-interest Expenses  
(\$ in millions)

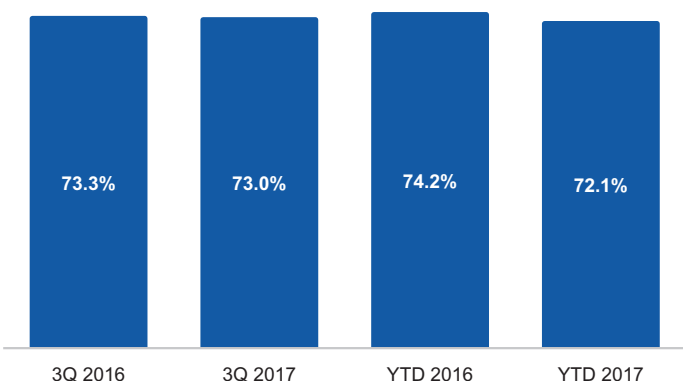

- Compensation and benefits expenses of \$4,169 million in the current quarter and \$12,887 million in the current year period increased 2% and 9%, respectively, from \$4,097 million in the prior year quarter and \$11,795 million in the prior year period. The current quarter results primarily reflected increases in the formulaic payout to Wealth Management representatives linked to higher revenues and deferred compensation associated with carried interest in the Investment Management business segment, partially offset by a decrease in discretionary incentive compensation mainly driven by lower revenues in the Institutional Securities business segment. The current year period results primarily reflected increases in the fair value of investments to which certain deferred compensation plans are referenced, discretionary incentive compensation mainly driven by higher revenues, the formulaic payout to

Wealth Management representatives linked to higher revenues, and deferred compensation associated with carried interest.

- Non-compensation expenses were \$2,546 million in the current quarter and \$7,626 million in the current year period compared with \$2,431 million in the prior year quarter and \$7,213 million in the prior year period, representing a 5% and a 6% increase, respectively. These increases were primarily as a result of higher volume-driven expenses. In addition, non-compensation expenses increased in the current year period due to a provision related to a United Kingdom (“U.K.”) indirect tax (i.e. value-added tax or “VAT”) matter and higher litigation costs. For further discussion of the U.K. VAT matter, see “Institutional Securities—Investments, Other Revenues, Non-interest Expenses and Other Items—Other Items” herein.

**Expense Efficiency Ratio**

- The expense efficiency ratio was 73.0% in the current quarter and 72.1% in the current year period. The expense efficiency ratio was 73.3% in the prior year quarter and 74.2% in the prior year period (see “Selected Non-Generally Accepted Accounting Principles (“Non-GAAP”) Financial Information” herein).

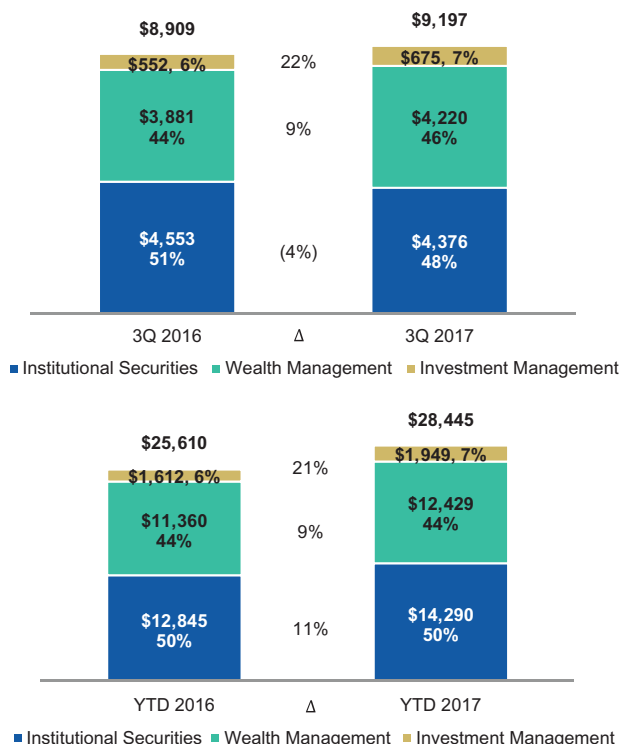

**Return on Average Common Equity**

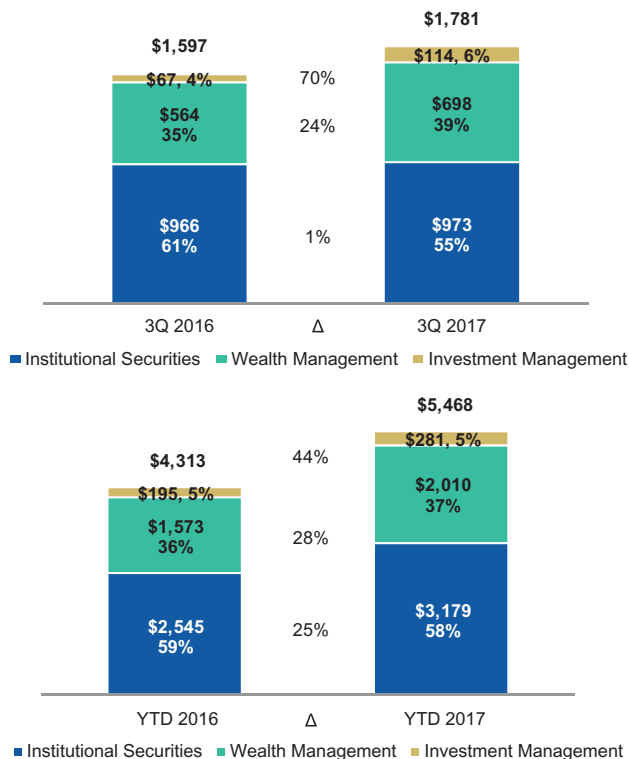

- The annualized return on average common equity (“ROE”) was 9.6% in the current quarter and 9.8% in the current year period. The annualized ROE was 8.7% in the prior year quarter and 7.7% in the prior year period (see “Selected Non-Generally Accepted Accounting Principles (“Non-GAAP”) Financial Information” herein).

**Business Segment Results**

**Net Revenues by Segment<sup>1, 2</sup>**  
(\$ in millions)

**Net Income Applicable to Morgan Stanley by Segment<sup>1, 3</sup>**  
 (\$ in millions)

- The percentages in the charts represent the contribution of each business segment to the total. Amounts do not necessarily total to 100% due to intersegment eliminations, where applicable.
- The total amount of Net Revenues by Segment also includes intersegment eliminations of \$(74) million and \$(77) million in the current quarter and prior year quarter, respectively, and \$(223) million and \$(207) million in the current year period and prior year period, respectively.
- The total amount of Net Income Applicable to Morgan Stanley by Segment also includes intersegment eliminations of \$(4) million in the current quarter and \$(2) million in the current year period.

- Institutional Securities net revenues of \$4,376 million in the current quarter and \$14,290 million in the current year period decreased 4% from the prior year quarter and increased 11% from the prior year period. The current quarter results primarily reflected lower revenues from fixed income sales and trading, partially offset by higher underwriting and advisory revenues. The current year period results primarily reflected higher revenues from underwriting and fixed income sales and trading.

- Wealth Management net revenues of \$4,220 million in the current quarter and \$12,429 million in the current year period increased 9% both from the prior year quarter and the prior year period. The current quarter and the current year period results reflected growth in asset management fee revenues and Net interest income.
- Investment Management net revenues of \$675 million in the current quarter and \$1,949 million in the current year period increased 22% from the prior year quarter and increased 21% from the prior year period. The current quarter and the current year period results primarily reflected higher carried interest and investment gains and growth in asset management fee revenues.

**Net Revenues by Region<sup>1</sup>**  
 (\$ in millions)

- EMEA—Europe, Middle East and Africa
- For a discussion of how the geographic breakdown for net revenues is determined, see Note 21 to the consolidated financial statements in the 2016 Form 10-K.

Common shares outstanding	1,812	1,852
Book value per common share <sup>3</sup>	\$ 38.87	\$ 36.99
Worldwide employees	57,702	55,311

- Amounts include loans held for investment (net of allowance) and loans held for sale but exclude loans at fair value, which are included in Trading assets in the balance sheets (see Note 7 to the financial statements).
- For a discussion of Global Liquidity Reserve, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity Risk Management Framework—Global Liquidity Reserve" in Part II, Item 7 of the 2016 Form 10-K.
- Book value per common share equals common shareholders' equity divided by common shares outstanding.

**Selected Non-Generally Accepted Accounting Principles ("Non-GAAP") Financial Information**

We prepare our financial statements using accounting principles generally accepted in the United States of America ("U.S. GAAP"). From time to time, we may disclose certain "non-GAAP financial measures" in this document, or in the course of our earnings releases, earnings and other conference calls, financial presentations, Definitive Proxy Statement and otherwise. A "non-GAAP financial measure" excludes, or includes, amounts from the most directly comparable measure calculated and presented in accordance with U.S. GAAP. We consider the non-GAAP financial measures we disclose to be useful to us, investors and analysts by providing further transparency about, or an alternate means of assessing, our financial condition, operating results, prospective regulatory capital requirements, or capital adequacy. These measures are not in accordance with, or a substitute for, U.S. GAAP and may be different from or inconsistent with non-GAAP financial measures used by other companies. Whenever we refer to a non-GAAP financial measure, we will also generally define it or present the most directly comparable financial measure calculated and presented in accordance with U.S. GAAP, along with a reconciliation of the differences between the U.S. GAAP financial measure and the non-GAAP financial measure.

The principal non-GAAP financial measures presented in this document are set forth below.

**Reconciliations from U.S. GAAP to Non-GAAP Consolidated Financial Measures**

DVA—Debt valuation adjustment represents the change in the fair value resulting from fluctuations in our credit spreads and other credit factors related to liabilities carried at fair value under the fair value option, primarily certain Long-term and Short-term borrowings.

- Beginning in 2017, with the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*, the income tax consequences related to share-based payments are required to be recognized in Provision for income taxes in the income statements upon the conversion of employee share-based awards, which primarily occur in the first quarter of each year. The impact of the income tax consequences upon conversion of the awards may be either a benefit or a provision and is treated as a discrete item. When excluding discrete tax provision (benefit) above only discrete tax provisions (benefits) other than income tax consequences arising from conversion activity are excluded as we anticipate conversion activity each quarter. See Note 2 to the financial statements for information on the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*. For further information on the discrete tax provision, see "Supplemental Financial Information and Disclosures—Income Tax Matters" herein.
- The impact of DVA on average common equity and average tangible common equity was approximately \$(775) million and \$(62) million in the current quarter and prior year quarter, respectively, and approximately \$(652) million and \$(118) million in the current year period and prior year period, respectively.
- The calculation used in determining the Firm's "ROE Target" is return on average common equity excluding DVA and discrete tax items as set forth above.
- Return on average common equity and return on average tangible common equity equal annualized net income applicable to Morgan Stanley less preferred dividends as a percentage of average common equity and average tangible common equity, respectively, on a consolidated or business segment basis as indicated. When excluding DVA, it is only excluded from the denominator. When excluding the discrete tax provision (benefit), both the numerator and denominator are adjusted.
- Tangible book value per common share equals tangible common equity divided by common shares outstanding.
- The expense efficiency ratio represents total non-interest expenses as a percentage of net revenues.
- Pre-tax profit margin represents income from continuing operations before income taxes as a percentage of net revenues.

8. Average common equity for each business segment is determined at the beginning of each year using our Required Capital framework, an internal capital adequacy measure (see "Liquidity and Capital Resources—Regulatory Requirements—Attribution of Average Common Equity According to the Required Capital Framework" herein) and remains fixed throughout the year until the next annual reset.

### Return on Equity Target

We have an ROE Target of 9% to 11% to be achieved by 2017. Our ROE Target and the related strategies and goals are forward-looking statements that may be materially affected by many factors, including, among other things: macroeconomic and market conditions; legislative and regulatory developments; industry trading and investment banking volumes; equity market levels; interest rate environment; legal expenses and the ability to reduce expenses in general; capital levels; and discrete tax items. For further information on our ROE Target and related assumptions, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Executive Summary—Return on Equity Target" in Part II, Item 7 of the 2016 Form 10-K.

### Business Segments

Substantially all of our operating revenues and operating expenses are directly attributable to the business segments.

Certain revenues and expenses have been allocated to each business segment, generally in proportion to its respective net revenues, non-interest expenses or other relevant measures.

As a result of treating certain intersegment transactions as transactions with external parties, we include an Intersegment Eliminations category to reconcile the business segment results to our consolidated results.

### *Net Revenues, Compensation Expense and Income Taxes*

For discussions of our net revenues, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Net Revenues" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Net Revenues by Segment" in Part II, Item 7 of the 2016 Form 10-K. For a discussion of our compensation expense, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Compensation Expense" in Part II, Item 7 of the 2016 Form 10-K. For a discussion of income taxes, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Income Taxes" in Part II, Item 7 of the 2016 Form 10-K.

## Institutional Securities

**Investment Banking Volumes**

\$ in billions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Completed mergers and acquisitions <sup>1</sup>	\$ 229	\$ 190	\$ 585	\$ 728
Equity and equity-related offerings <sup>2, 3</sup>	16	13	46	34
Fixed income offerings <sup>2, 4</sup>	60	72	201	185

Source: Thomson Reuters, data at October 2, 2017. Transaction volumes may not be indicative of net revenues in a given period. In addition, transaction volumes for prior periods may vary from amounts previously reported due to the subsequent withdrawal or change in the value of a transaction.

1. Amounts include transactions of \$100 million or more. Completed mergers and acquisitions volumes are based on full credit to each of the advisors in a transaction.
2. Equity and equity-related offerings and fixed income offerings are based on full credit for single book managers and equal credit for joint book managers.
3. Amounts include Rule 144A issuances and registered public offerings of common stock and convertible securities and rights offerings.
4. Amounts include non-convertible preferred stock, mortgage-backed and asset-backed securities, and taxable municipal debt. Amounts include publicly registered and Rule 144A issuances. Amounts exclude leveraged loans and self-led issuances.

Investment banking revenues are composed of fees from advisory services and revenues from the underwriting of securities offerings and syndication of loans, net of syndication expenses.

Investment banking revenues of \$1,270 million in the current quarter and \$4,100 million in the current year period increased 15% and 28% from the comparable prior year periods. The increase in the current quarter reflected both higher underwriting and advisory revenues. The increase in the current year period was due to higher underwriting revenues.

- Advisory revenues increased in the current quarter reflecting the higher volumes of completed merger, acquisition and restructuring transactions (“M&A”) (see Investment Banking Volumes table). Advisory revenues decreased in the current year period reflecting the lower volumes of completed M&A, partially offset by the positive impact of higher fee realizations.
- Equity underwriting revenues increased in the current quarter and current year period as a result of higher global market volumes in both follow-on and initial public offerings (see Investment Banking Volumes table). In the current year period, equity underwriting revenues also increased as a result of higher levels of deal activity. Fixed income underwriting revenues increased in the current quarter primarily due to higher non-investment grade bond fees and loan fees. Fixed income underwriting revenues increased in the current year period primarily due to higher bond fees and non-investment grade loan fees.

Sales and Trading Activities—Equity and Fixed Income

Following is a description of the sales and trading activities within our equities and fixed income businesses as well as how their results impact the income statement line items, followed by a presentation and explanation of results.

*Equities—Financing.* We provide financing and prime brokerage services to our clients active in the equity markets through a variety of products including margin lending, securities lending and swaps. Results from this business are largely driven by the difference between financing income earned and financing costs incurred, which are reflected in Net interest for securities and equity lending products and in Trading revenues for derivative products.

*Equities—Execution services.* We make markets for our clients in equity-related securities and derivative products, including providing liquidity and hedging products. A significant portion of the results for this business is generated by commissions and fees from executing and clearing client transactions on major stock and derivative exchanges as well as from over-the-counter (“OTC”) transactions. Market-making also generates gains and losses on inventory, which are reflected in Trading revenues.

*Fixed income—*Within fixed income we make markets in order to facilitate client activity as part of the following products and services.

- *Global macro products.* We make markets for our clients in interest rate, foreign exchange and emerging market products, including exchange-traded and OTC securities, loans and derivative instruments. The results of this market-making activity are primarily driven by gains and losses from buying and selling positions to stand ready for and satisfy client demand, and are recorded in Trading revenues.
- *Credit products.* We make markets in credit-sensitive products, such as corporate bonds and mortgage securities and

other securitized products, and related derivative instruments. The values of positions in this business are sensitive to changes in credit spreads and interest rates, which result in gains and losses reflected in Trading revenues. Due to the amount and type of the interest-bearing securities and loans making up this business, a significant portion of the results is also reflected in Net interest revenues.

- *Commodities products and Other.* We make markets in various commodity products related primarily to electricity, natural gas, oil, and precious metals, with the results primarily reflected in Trading revenues. Other activities include the results from the centralized management of our fixed income derivative counterparty exposures, which are primarily recorded in Trading revenues.

<b>Total Fixed income</b>	<b>\$ 2,782</b>	<b>\$ 115</b>	<b>\$ 752</b>	<b>\$ 3,649</b>

1. Includes Commissions and fees and Asset management, distribution and administration fees.
2. Funding costs are allocated to the businesses based on funding usage and are included in Net interest.

We manage each of the sales and trading businesses based on its aggregate net revenues, which are comprised of the income statement line items quantified in the previous table. Trading revenues are affected by a variety of market dynamics, including volumes, bid-offer spreads, and inventory prices, as well as impacts from hedging activity, which are interrelated. We provide qualitative commentary in the discussion of results that follow on the key drivers of period over period variances, as the quantitative impact of the various market dynamics typically cannot be disaggregated.

For additional information on total Trading revenues, see the table "Trading Revenues by Product Type" in Note 4 to the financial statements.

***Sales and Trading Net Revenues during the Current Quarter***

***Equity***

Equity sales and trading net revenues of \$1,891 million in the current quarter were relatively unchanged from the prior year quarter, reflecting higher results in our financing business, offset by lower results in execution services.

- Financing revenues increased 8% from the prior year quarter due to higher client activity in equity swaps reflected in Trading revenues, partially offset by lower Net interest revenues due to a shift in the mix of financing transactions.
- Execution services decreased 6% from the prior year quarter as reduced market volumes in the United States resulted in lower commissions and fees, while reduced Trading revenues from derivative products were offset by increased Trading revenues from cash equity products.

***Fixed Income***

Fixed income net revenues of \$1,167 million in the current quarter were 21% lower than the prior year quarter, primarily driven by lower results in credit and global macro products.

- Credit products decreased due to tighter corporate credit spreads and lower volatility compared with the prior year quarter, which impacted Trading revenues. In addition, Net interest revenues decreased due to a lower level of interest realized in securitized products in the current quarter.
- Global macro products decreased due to lower market and interest rate volatility, which reduced Trading revenues. In addition, Net interest revenues decreased due to the effect of interest rate products inventory management.
- Commodities products and Other remained relatively unchanged from the prior year quarter.

***Sales and Trading Net Revenues during the Current Year Period***

***Equity***

Equity sales and trading net revenues of \$6,062 million in the current year period were relatively unchanged from the prior year period, reflecting lower results in our financing business, offset by higher results in execution services.

- Financing revenues decreased 4% from the prior year period as Net interest revenues declined from higher net interest costs, reflecting increased liquidity requirements and a shift in the mix of financing transactions, partially offset by higher client activity in equity swaps reflected in Trading revenues.
- Execution services increased 3% from the prior year period primarily due to improved results in cash equity inventory management reflected in Trading revenues, partially offset by lower commissions and fees driven by reduced market volumes in the United States.

***Fixed Income***

Fixed income net revenues of \$4,120 million in the current year period were 13% higher than the prior year period, driven by higher results across all three product areas.

- Credit products increased due to the absence of inventory losses driven by a widening spread environment in the prior year period, which increased Trading revenues. This was partially offset by a lower level of interest realized in securitized products in the current year period, which reduced Net interest revenues.
- Global macro products increased due to increased Trading revenues in foreign exchange driven by market volatility, and structured interest rate products driven by higher client activity. This was partially offset by higher interest costs impacting Net interest revenues in the current year period which resulted from interest rate products inventory management.
- Commodities products and Other increased due to improved metals trading, commodities lending results and the absence of losses from counterparty risk management incurred in the prior year period.

***Investments, Other Revenues, Non-interest Expenses and Other Items***

***Investments***

- Net investment gains of \$52 million in the current quarter increased from the prior year quarter primarily as a result of higher gains on real estate investments, partially offset by lower gains on equities business related investments.

- Net investment gains of \$155 million in the current year period increased from the prior year period primarily reflecting gains on investments associated with our compensation plans in the current year period compared with losses in the prior year period and higher gains on real estate investments, partially offset by lower gains on equities business related investments.

**Other**

- Other revenues of \$143 million in the current quarter decreased from the prior year quarter primarily reflecting lower mark-to-market gains on loans held for sale. Other revenues of \$442 million in the current year period increased from the prior year period primarily reflecting a decrease in the provision on loans held for investment.

**Non-interest Expenses**

Non-interest expenses of \$3,140 million in the current quarter were relatively unchanged from the prior year quarter primarily reflecting an 8% decrease in Compensation and benefits expenses and a 6% increase in Non-compensation expenses. Non-interest expenses of \$9,881 million in the current year period increased from the prior year period reflecting a 9% increase in Compensation and benefits expenses and a 10% increase in Non-compensation expenses.

- Compensation and benefits expenses decreased in the current quarter primarily due to decreases in discretionary incentive compensation driven mainly by lower revenues,

and lower amortization of deferred cash and equity awards. Compensation and benefits expenses increased in the current year period primarily due to increases in discretionary incentive compensation driven mainly by higher revenues and the fair value of investments to which certain deferred compensation plans are referenced.

- Non-compensation expenses increased in the current quarter and current year period primarily due to higher volume-driven expenses and litigation costs. In addition to higher volume-driven expenses and litigation costs, non-compensation expenses increased in the current year period due to a provision related to the U.K. VAT matter (see Other Items below).

**Other Items**

During the second quarter, the Firm self-identified an issue regarding VAT on intercompany services provided by certain overseas affiliates to our U.K. group. The Firm is reviewing the reporting of U.K. VAT as the focus and nature of services shifted among geographic locations. In the current year period, we have recorded a provision of \$86 million that incorporates potential additional VAT, interest and penalties for this exposure. We are actively working with Her Majesty's Revenue and Customs to resolve this matter. The provision reflected is based on currently available information and analyses, and our review of this matter is continuing.

N/M – Not Meaningful

1. Effective July 1, 2016, the Institutional Securities and Wealth Management business segments entered into an agreement, whereby Institutional Securities assumed management of Wealth Management's fixed income client-driven trading activities and employees. Institutional Securities now pays fees to Wealth Management based on distribution activity (collectively, the "Fixed Income Integration"). Prior periods have not been recast for this new intersegment agreement due to immateriality.

Fee-based asset flows <sup>5</sup> (dollars in billions)	\$ 54.5	\$ 31.4

1. Fee-based client assets represent the amount of assets in client accounts where the basis of payment for services is a fee calculated on those assets.
2. Client liabilities include securities-based and tailored lending, residential real estate loans and margin lending.
3. Annualized revenues per representative equal Wealth Management's annualized revenues divided by the average representative headcount.
4. Client assets per representative equal total period-end client assets divided by period-end representative headcount.
5. Fee-based asset flows include net new fee-based assets, net account transfers, dividends, interest and client fees and exclude institutional cash management-related activity.

**Net Revenues**

**Transactional Revenues**

\$ in millions	Three Months Ended September 30,		% Change
	2017	2016	
Investment banking	\$ 125	\$ 129	(3)%
Trading	212	229	(7)%
Commissions and fees	402	433	(7)%
<b>Total</b>	<b>\$ 739</b>	<b>\$ 791</b>	<b>(7)%</b>

\$ in millions	Nine Months Ended September 30,		% Change
	2017	2016	
Investment banking	\$ 405	\$ 373	9%
Trading	657	675	(3)%
Commissions and fees	1,266	1,268	—%
<b>Total</b>	<b>\$ 2,328</b>	<b>\$ 2,316</b>	<b>1%</b>

Transactional revenues of \$739 million in the current quarter decreased 7% from the prior year quarter primarily reflecting lower Commissions and fees and Trading revenues.

Transactional revenues of \$2,328 million in the current year period increased 1% from the prior year period primarily reflecting higher revenues in Investment banking revenues, partially offset by decreased Trading revenues.

- Investment banking revenues were relatively unchanged in the current quarter. The increase in the current year period was due to higher revenues from structured products and equity syndicate activities, partially offset by lower preferred stock syndicate activity.
- Trading revenues decreased in the current quarter primarily due to lower client activity in fixed income products. In addition to lower client activity, Trading revenues decreased in the current year period due to lower revenues related to the Fixed Income Integration, partially offset by gains related to investments associated with certain employee deferred compensation plans.
- Commissions and fees decreased in the current quarter primarily due to decreased activity in equities, mutual funds and annuities. Commissions and fees were relatively unchanged in the current year period, with decreased activity in annuities and mutual funds essentially offset by the impact of the Fixed Income Integration.

**Asset Management**

- Asset management, distribution and administration fees of \$2,393 million in the current quarter and \$6,879 million in the current year period increased 12% and 10%, respectively. The increase in both periods is primarily due to market appreciation and net positive flows. See “Fee-Based Client Assets” herein.

**Net Interest**

- Net interest of \$1,025 million in the current quarter and \$3,028 million in the current year period increased 16% and 19%, respectively, primarily due to higher loan balances and higher interest rates, partially offset by higher interest paid on deposits.

**Other**

- Other revenues of \$62 million in the current quarter and \$191 million in the current year period decreased 14% and 18%, respectively, due to lower realized gains from the available for sale (“AFS”) securities portfolio.

**Non-interest Expenses**

Non-interest expenses of \$3,101 million in the current quarter and \$9,280 million in the current year period increased 4% and 5%, respectively, as a result of the increase in Compensation and benefits expenses.

- Compensation and benefits expenses increased in the current quarter primarily due to the formulaic payout to Wealth Management representatives linked to higher revenues. In addition to the higher formulaic payout, Compensation and benefits expenses increased in the current year period due to increases in the fair value of investments to which certain deferred compensation plans are referenced.
- Non-compensation expenses were relatively unchanged in the current quarter. Non-compensation expenses decreased in the current year period primarily due to lower litigation and information processing costs, partially offset by higher deposit insurance expense and higher consulting fees related to strategic initiatives.

**Fee-Based Client Assets**

For a description of fee-based client assets, including descriptions for the fee based client asset types and rollforward items in the following tables, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Wealth Management—Fee-Based Client Assets Activity and Average Fee Rate by Account Type” in Part II, Item 7 of the 2016 Form 10-K.

bps—Basis points

- Includes non-custody account values reflecting prior quarter-end balances due to a lag in the reporting of asset values by third-party custodians.
- A shift in client assets of approximately \$66 billion in the fourth quarter of 2016 from separately managed accounts to unified managed accounts resulted in a lower average fee rate for those platforms but did not impact the average fee rate for total fee-based client assets.
- Certain data enhancements made in the first quarter of 2017 resulted in a modification to the "Fee Rate" calculations. Prior periods have been restated to reflect the revised calculations.

N/M – Not Meaningful

## Net Revenues

## Investments

- Investments gains of \$114 million in the current quarter compared with \$51 million in the prior year quarter reflected higher carried interest principally in Infrastructure investments, partially offset by weaker investment performance which resulted in the reversal of previously accrued carried interest in Private Equity.
- Investments gains of \$337 million in the current year period compared with \$37 million in the prior year period reflected higher carried interest and performance gains in all asset classes.

## Asset Management, Distribution and Administration Fees

- Asset management, distribution and administration fees of \$568 million increased 12% in the current quarter compared to the prior year quarter as a result of higher average assets under management or supervision (“AUM”) across all asset classes and higher performance fees.
- Asset management, distribution and administration fees of \$1,624 million increased 5% in the current year period compared to the prior year period primarily as a result of higher average AUM.

See “Assets Under Management or Supervision” herein.

## Non-interest Expenses

Non-interest expenses of \$544 million in the current quarter and \$1,573 million in the current year period increased 20% and 16% from the comparable prior periods primarily due to higher Compensation and benefits expenses.

- Compensation and benefits expenses increased in the current quarter and current year period due to higher discretionary incentive compensation and an increase in deferred compensation associated with carried interest.
- Non-compensation expenses increased in the current quarter and current year period primarily due to higher brokerage, clearing and exchange fees.

## Assets Under Management or Supervision

For a description of the asset classes and rollforward items in the following tables, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Business Segments—Investment Management—Assets Under Management or Supervision” in Part II, Item 7 of the 2016 Form 10-K.

**Supplemental Financial Information and Disclosures**

**U.S. Bank Subsidiaries**

We provide loans to a variety of customers, from large corporate and institutional clients to high net worth individuals, primarily through our U.S. bank subsidiaries, Morgan Stanley Bank, N.A. ("MSBNA") and Morgan Stanley Private Bank, National Association ("MSPBNA") (collectively, "U.S. Bank Subsidiaries"). The lending activities in the Institutional Securities business segment primarily include loans or lending commitments to corporate clients. The lending activities in the Wealth Management business segment primarily include securities-based lending that allows clients to borrow money against the value of qualifying securities and also include residential real estate loans. We expect our lending activities to continue to grow through further market penetration of the client base within the Institutional Securities and Wealth Management business segments. For a further discussion of our credit risks, see "Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Credit Risk." For further discussion about loans and lending commitments, see Notes 7 and 11 to the financial statements.

**U.S. Bank Subsidiaries' Supplemental Financial Information Excluding Transactions with the Parent Company**

<i>\$ in billions</i>	At September 30, 2017	At December 31, 2016
U.S. Bank Subsidiaries assets <sup>1</sup>	\$ 182.2	\$ 176.8
U.S. Bank Subsidiaries investment securities portfolio:

<b>Total</b>	<b>\$ 32.4</b>	<b>\$ 30.2</b>

AFS—Available for sale

HTM—Held to maturity

1. Certain revisions have been made to prior periods to conform to the current presentation.

2. For further information on deposits, see "Liquidity and Capital Resources—Funding Management—Unsecured Financing" herein.

3. Other loans primarily include tailored lending.

**Income Tax Matters**

**Effective Tax Rate**

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
From continuing operations	28.1%	31.5%	29.7%	32.7%

The effective tax rate for the current quarter and current year period reflects a recurring-type discrete tax benefit of \$11 million and \$139 million, respectively, associated with the adoption of new accounting guidance related to employee share-based payments, and other net discrete tax benefits of \$83 million and \$65 million, respectively, primarily resulting from the remeasurement of certain deferred taxes. See Note 2 to the financial statements for information on the adoption of the accounting update *Improvements to Employee Share-Based Payment Accounting*.

**Accounting Development Updates**

The Financial Accounting Standards Board has issued certain accounting updates that apply to us but are not yet effective for the Firm. Accounting updates not listed below were assessed and determined to be either not applicable or are not expected to have a significant impact on our financial statements.

The following accounting updates are currently being evaluated to determine the potential impact of adoption:

- *Revenue from Contracts with Customers*. This accounting update aims to clarify the principles of revenue recognition, develop a common revenue recognition standard across all industries for U.S. GAAP and provide enhanced disclosures for users of the financial statements. The core principle of this guidance is that an entity should recognize revenues to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The update is not applicable to financial instruments. We will adopt the guidance on January 1, 2018 and apply the modified retrospective method of adoption.

This accounting update will change the presentation of certain costs related to underwriting and advisory activities so that such costs will be recorded in the relevant non-interest expense line item versus the current practice of netting such costs against Investment banking revenues. This change is estimated to gross up Investment banking revenues and affected expenses for the Institutional Securities segment by approximately 5%-10%. Similarly, certain costs related to the selling and distribution of investment funds will no longer be netted against Asset management, distribution and administration fees, and therefore is expected to result in a gross up of such Investment

Management revenues and affected expenses by less than 5%. These changes will not have an impact on net income.

In addition, the timing of the recognition of certain performance fees from fund management activities, not in the form of carried interest, is generally expected to be deferred within a fiscal year until the fees are no longer probable of being reversed. Thus, the recognition of such revenues, which are recorded in Asset management, distribution and administration fees within the Investment Management segment, which approximated \$60 million in 2016 and were recognized throughout the year, are generally expected to be recognized in the fourth quarter of each fiscal year based on current fee arrangements.

The recognition of performance fees from fund management activities in the form of carried interest that are subject to reversal will remain essentially unchanged. We will apply the equity method of accounting to such carried interest, thus excluding them from the scope of this standard.

We will continue to assess the impact of the new standard as we progress through the implementation process and as industry interpretations are resolved; therefore, additional impacts may be identified prior to adoption.

- *Hedge Accounting.* This accounting update aims to better align the hedge accounting requirements with an entity's risk management strategies and improve the financial reporting of hedging relationships. It will also result in simplification of the application of hedge accounting related to the assessment of hedge effectiveness. This update is effective as of January 1, 2019 with early adoption permitted.
- *Leases.* This accounting update requires lessees to recognize on the balance sheet all leases with terms exceeding one year, which results in the recognition of a right of use asset and corresponding lease liability, including for those leases that we currently classify as operating leases. The right of use asset and lease liability will initially be measured using the present value of the remaining rental payments. The accounting for leases where we are the lessor is largely unchanged. This update is effective as of January 1, 2019 with early adoption permitted.
- *Financial Instruments—Credit Losses.* This accounting update impacts the impairment model for certain financial assets measured at amortized cost by requiring a current expected credit loss (“CECL”) methodology to estimate expected credit losses over the entire life of the financial asset, recorded at inception or purchase. CECL will replace the loss model currently applicable to loans held for invest-

ment, HTM securities and other receivables carried at amortized cost.

The update also eliminates the concept of other-than-temporary impairment for AFS securities. Impairments on AFS securities will be required to be recognized in earnings through an allowance, when the fair value is less than amortized cost and a credit loss exists or the securities are expected to be sold before recovery of amortized cost.

Under the update, there may be an ability to determine there are no expected credit losses in certain circumstances, e.g., based on collateral arrangements for lending and financing transactions or based on the credit quality of the borrower or issuer.

Overall, the amendments in this update are expected to accelerate the recognition of credit losses for portfolios where CECL models will be applied. This update is effective as of January 1, 2020 with early adoption permitted as of January 1, 2019.

## Critical Accounting Policies

Our financial statements are prepared in accordance with U.S. GAAP, which requires us to make estimates and assumptions (see Note 1 to the financial statements). We believe that of our significant accounting policies (see Note 2 to the consolidated financial statements in the 2016 Form 10-K and Note 2 to the financial statements), the fair value, goodwill and intangible assets, legal and regulatory contingencies and income taxes policies involve a higher degree of judgment and complexity. For a further discussion about our critical accounting policies, see “Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in Part II, Item 7 of the 2016 Form 10-K.

## Liquidity and Capital Resources

Senior management establishes liquidity and capital policies. Through various risk and control committees, senior management reviews business performance relative to these policies, monitors the availability of alternative sources of financing, and oversees the liquidity, interest rate and currency sensitivity of our asset and liability position. The Treasury Department, Firm Risk Committee, Asset and Liability Management Committee, and other committees and control groups assist in evaluating, monitoring and controlling the impact that our business activities have on our balance sheets, liquidity and capital structure. Liquidity and capital matters are reported regularly to the Board of Directors (the “Board”) and the Board's Risk Committee.

**The Balance Sheet**

We monitor and evaluate the composition and size of our balance sheet on a regular basis. Our balance sheet management process includes quarterly planning, business-specific thresholds, monitoring of business-specific usage versus key performance metrics and new business impact assessments.

We establish balance sheet thresholds at the consolidated and business segment levels. We monitor balance sheet utilization and review variances resulting from business activity or market fluctuations. On a regular basis, we review current performance versus established thresholds and assess the need to re-allocate our balance sheet based on business unit needs. We also monitor key metrics, including asset and liability size and capital usage.

**Total Assets by Business Segment**

\$ in millions	At September 30, 2017			
	Institutional Securities	Wealth Management	Investment Management	Total

<b>Total assets</b>	<b>\$ 629,149</b>	<b>\$ 181,135</b>	<b>\$ 4,665</b>	<b>\$814,949</b>

1. Cash and cash equivalents include cash and due from banks and interest bearing deposits with banks.  
 2. Other assets primarily includes Cash deposited with clearing organizations or segregated under federal and other regulations or requirements; Other investments; Premises, equipment and software costs; Goodwill; Intangible assets and deferred tax assets.

A substantial portion of total assets consists of liquid marketable securities and short-term receivables arising principally from sales and trading activities in the Institutional Securities business segment. Total assets increased to \$853.7 billion at September 30, 2017 from \$814.9 billion at December 31, 2016, primarily driven by an increase in trading inventory within Institutional Securities, along with loan growth across both Institutional Securities and Wealth Management. The change in trading inventory reflects increased trading activity in U.S. government and agency securities and Other sovereign government obligations, along with higher market values for corporate equities compared with December 31, 2016.

**Securities Repurchase Agreements and Securities Lending**

Securities borrowed or securities purchased under agreements to resell and securities loaned or securities sold under agreements to repurchase are treated as collateralized financings (see Note 2 to the consolidated financial statements in the 2016 Form 10-K and Note 6 to the financial statements).

**Collateralized Financing Transactions**

\$ in millions	At September 30, 2017	At December 31, 2016
	Securities purchased under agreements to resell and Securities borrowed	\$ 222,998
Securities sold under agreements to repurchase and Securities loaned	\$ 69,613	\$ 70,472
Securities received as collateral <sup>1</sup>	\$ 12,995	\$ 13,737

\$ in millions	Daily Average Balance Three Months Ended	
	September 30, 2017	December 31, 2016
Securities purchased under agreements to resell and Securities borrowed	\$ 227,146	\$ 224,355
Securities sold under agreements to repurchase and Securities loaned	\$ 68,563	\$ 68,908

1. Included in Trading assets in the balance sheets.

**Customer Securities Financing**

The customer receivable portion of the securities financing transactions primarily includes customer margin loans, collateralized by customer-owned securities, which are segregated in accordance with regulatory requirements. The customer payable portion of the securities financing transactions primarily includes payables to our prime brokerage customers. Our risk exposure on these transactions is mitigated by collateral maintenance policies that limit our credit exposure to customers and liquidity reserves held against this risk exposure.

**Liquidity Risk Management Framework**

The primary goal of our Liquidity Risk Management Framework is to ensure that we have access to adequate funding across a wide range of market conditions and time horizons. The framework is designed to enable us to fulfill our financial obligations and support the execution of our business strategies.

The core components of our Liquidity Risk Management Framework are the Required Liquidity Framework, Liquidity Stress Tests and the Global Liquidity Reserve (“GLR”), which support our target liquidity profile. For further discussion about the Firm’s Required Liquidity Framework and Liquidity Stress Tests, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity Risk Management Framework” in Part II, Item 7 of the 2016 Form 10-K.

At September 30, 2017 and December 31, 2016, we maintained sufficient liquidity to meet current and contingent funding obligations as modeled in our Liquidity Stress Tests.

**Global Liquidity Reserve**

We maintain sufficient global liquidity reserves pursuant to our Required Liquidity Framework. For further discussion of our GLR, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity Risk Management Framework—Global Liquidity Reserve” in Part II, Item 7 of the 2016 Form 10-K.

**Regulatory Liquidity Framework**

**Liquidity Coverage Ratio**

The Basel Committee on Banking Supervision’s (“Basel Committee”) Liquidity Coverage Ratio (“LCR”) standard is designed to ensure that banking organizations have sufficient high-quality liquid assets (“HQLA”) to cover net cash outflows arising from significant stress over 30 calendar days. The standard’s objective is to promote the short-term resilience of the liquidity risk profile of banking organizations. We and our U.S. Bank Subsidiaries are subject to the LCR requirements issued by U.S. banking regulators (“U.S. LCR”), which are based on the Basel Committee’s LCR, including a requirement to calculate each entity’s U.S. LCR on each business day. We and our U.S. Bank Subsidiaries are compliant with the minimum required U.S. LCR of 100%.

**HQLA by Type of Asset and LCR**

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016	Daily Average Balance Three Months Ended September 30, 2017
<b>HQLA</b>			
Cash deposits with central banks	\$ 33,614	\$ 30,569	\$ 40,841
Securities <sup>1</sup>	125,426	129,524	134,363
<b>Total</b>	<b>\$ 159,040</b>	<b>\$ 160,093</b>	<b>\$ 175,204</b>
LCR			130%

1. Primarily includes U.S. Treasuries; U.S. agency mortgage-backed securities; sovereign bonds; investment-grade corporate bonds; and publicly traded common equities.

The regulatory definition of HQLA is substantially the same as our GLR. GLR includes cash placed at institutions other than central banks that is considered an inflow for LCR purposes. HQLA includes a portion of cash placed at central banks, certain unencumbered investment grade corporate bonds and publicly traded common equities, which do not meet the definition of our GLR.

**Net Stable Funding Ratio**

The objective of the Net Stable Funding Ratio ("NSFR") is to reduce funding risk over a one-year horizon by requiring banking organizations to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress.

The Basel Committee finalized the NSFR framework in 2014. In May 2016, the U.S. banking regulators issued a proposal to implement the NSFR in the U.S., which would apply to us and our U.S. Bank Subsidiaries. Our preliminary estimates, based on the current proposal, indicate that actions will be necessary to meet the requirement, which we expect to accomplish by the effective date of any final rule. For an additional discussion of NSFR, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Liquidity Framework—Net Stable Funding Ratio" in Part II, Item 7 of the 2016 Form 10-K.

**Funding Management**

We manage our funding in a manner that reduces the risk of disruption to our operations. We pursue a strategy of diversification of secured and unsecured funding sources (by product, investor and region) and attempt to ensure that the tenor of our liabilities equals or exceeds the expected holding period of the assets being financed.

We fund our balance sheet on a global basis through diverse sources. These sources may include our equity capital, long-term borrowings, securities sold under agreements to repurchase ("repurchase agreements"), securities lending, deposits, letters of credit and lines of credit. We have active financing programs for both standard and structured products targeting global investors and currencies.

**Secured Financing**

For a discussion of our secured financing activities, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Funding Management—Secured Financing" in Part II, Item 7 of the 2016 Form 10-K.

At September 30, 2017 and December 31, 2016, the weighted average maturity of our secured financing of less liquid assets was greater than 120 days.

**Unsecured Financing**

For a discussion of our unsecured financing activities, see "Management's Discussion and Analysis of Financing Condition and Results of Operations—Liquidity and Capital Resources—Funding Management—Unsecured Financing" in Part II, Item 7 of the 2016 Form 10-K and see Note 4 to the financial statements.

**Deposits**

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Savings and demand deposits:		
Brokerage sweep deposits <sup>1</sup>	\$ 135,152	\$ 153,042
Savings and other	5,555	1,517
Total Savings and demand deposits	140,707	154,559
Time deposits <sup>2</sup>	13,932	1,304
<b>Total</b>	<b>\$ 154,639</b>	<b>\$ 155,863</b>

1. Represents balances swept from client brokerage accounts. Also referred to as the Bank Deposit program.
2. Certain time deposit accounts are carried at fair value under the fair value option (see Note 3 to the financial statements).

Deposits are primarily sourced from our Wealth Management clients, and are considered to have stable, low-cost funding characteristics. Total deposits as of September 30, 2017 were relatively unchanged compared with December 31, 2016, with the decrease in brokerage sweep deposits, primarily due to client deployment of cash into the markets, largely offset by an increase in time deposits and savings and other deposits, primarily due to growth in certificates of deposits and savings products.

**Short-Term Borrowings**

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Short-term borrowings	\$ 1,087	\$ 941

Our unsecured short-term borrowings primarily consist of structured notes, bank loans and bank notes with original maturities of 12 months or less.

**Long-Term Borrowings**

We believe that accessing debt investors through multiple distribution channels helps provide consistent access to the unsecured markets. In addition, the issuance of long-term borrowings allows us to reduce reliance on short-term credit sensitive instruments. Long-term borrowings are generally managed to achieve staggered maturities, thereby mitigating refinancing risk, and to maximize investor diversification through sales to global institutional and retail clients across regions, currencies and product types. Availability and cost of financing to us can vary depending on market conditions, the volume of certain trading and lending activities, our credit ratings and the overall availability of credit.

We may engage in various transactions in the credit markets (including, for example, debt retirements) that we believe are in our investors' best interests.

**Long-term Borrowings by Maturity at September 30, 2017**

<i>\$ in millions</i>	Parent Company	Subsidiaries	Total
2017	\$ 4,605	\$ 3,685	\$ 8,290
2018	18,816	2,244	21,060
2019	21,841	2,033	23,874
2020	19,362	2,075	21,437
2021	15,862	1,449	17,311
Thereafter	88,786	10,919	99,705
<b>Total</b>	<b>\$ 169,272</b>	<b>\$ 22,405</b>	<b>\$ 191,677</b>
Maturities over next 12 months		\$	25,792

Long-term Borrowings increased to \$191,677 million as of September 30, 2017, compared with \$164,775 million at December 31, 2016. This increase is a result of issuances, partially offset by maturities and retirements, presented in the table below.

<i>\$ in millions</i>	Nine Months Ended September 30, 2017
Issued	\$ 45,334
Matured or retired	24,480

For further information on long-term borrowings, see Note 10 to the financial statements.

**Credit Ratings**

We rely on external sources to finance a significant portion of our daily operations. The cost and availability of financing generally are impacted by our credit ratings, among other things. In addition, our credit ratings can have an impact on certain trading revenues, particularly in those businesses where longer-term counterparty performance is a key consideration, such as OTC derivative transactions, including credit derivatives and interest rate swaps. Rating agencies consider company-specific factors; other industry factors such as regulatory or legislative changes and the macroeconomic environment, among other things.

Our credit ratings do not include any uplift from perceived government support from any rating agency given the significant progress of the U.S. financial reform legislation and regulations. Some rating agencies have stated that they currently incorporate various degrees of credit rating uplift from non-governmental third-party sources of potential support.

**Parent Company and MSBNA's Senior Unsecured Ratings at October 31, 2017**

	Parent Company		
	Short-term Debt	Long-term Debt	Rating Outlook
DBRS, Inc.	R-1 (middle)	A (high)	Stable
Fitch Ratings, Inc.	F1	A	Stable
Moody's Investors Service, Inc.	P-2	A3	Stable
Rating and Investment Information, Inc.	a-1	A-	Stable
Standard & Poor's Global Ratings	A-2	BBB+	Stable
	Morgan Stanley Bank, N.A.		
	Short-term Debt	Long-term Debt	Rating Outlook
Fitch Ratings, Inc.	F1	A+	Stable
Moody's Investors Service, Inc.	P-1	A1	Stable
Standard & Poor's Global Ratings	A-1	A+	Stable

In connection with certain OTC trading agreements and certain other agreements where we are a liquidity provider to certain financing vehicles associated with the Institutional Securities business segment, we may be required to provide additional collateral, immediately settle any outstanding liability balances with certain counterparties or pledge additional collateral to certain exchanges and clearing organizations in the event of a future credit rating downgrade irrespective of whether we are in a net asset or net liability position.

The additional collateral or termination payments that may be called in the event of a future credit rating downgrade vary by contract and can be based on ratings by either or both of Moody's Investors Service, Inc. ("Moody's") and Standard & Poor's Global Ratings ("S&P"). The following table shows the future potential collateral amounts and termination payments that could be called or required by counterparties or exchanges and clearing organizations in the event of one-notch or two-notch downgrade scenarios, from the lowest of Moody's or S&P ratings, based on the relevant contractual downgrade triggers.

**Incremental Collateral or Terminating Payments upon Potential Future Rating Downgrade**

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
One-notch downgrade	\$ 856	\$ 1,292
Two-notch downgrade	635	875

While certain aspects of a credit rating downgrade are quantifiable pursuant to contractual provisions, the impact it would have on our business and results of operations in future periods is inherently uncertain and would depend on a number of interrelated factors, including, among others, the magnitude of the downgrade, the rating relative to peers, the rating assigned by the relevant agency pre-downgrade, individual client behavior and future mitigating actions we might take. The liquidity impact of additional collateral requirements is included in our Liquidity Stress Tests.

**Capital Management**

We view capital as an important source of financial strength and actively manage our consolidated capital position based upon, among other things, business opportunities, risks, capital availability and rates of return together with internal capital policies, regulatory requirements and rating agency guidelines and, therefore, in the future may expand or contract our capital base to address the changing needs of our businesses. We attempt to maintain total capital, on a consolidated basis, at least equal to the sum of our operating subsidiaries’ required equity.

**Common Stock**

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Repurchases of common stock	\$ 1,250	\$ 1,250	\$ 2,500	\$ 2,500

From time to time we repurchase our outstanding common stock which includes our share repurchase program. For a description of our share repurchase program, see “Unregistered Sales of Equity Securities and Use of Proceeds.”

The Board determines the declaration and payment of dividends on a quarterly basis. On October 17, 2017, we announced that the Board declared a quarterly dividend per common share of \$0.25. The dividend is payable on November 15, 2017 to common shareholders of record on October 31, 2017.

For a description of our 2017 capital plan, see “Liquidity and Capital Resources—Regulatory Requirements—Capital Plans and Stress Tests.”

**Preferred Stock**

On September 15, 2017, we announced that the Board declared quarterly dividends for preferred stock shareholders of record on September 29, 2017 that were paid on October 16, 2017.

For additional information on preferred stock, see Note 14 to the financial statements.

**Regulatory Requirements**

**Regulatory Capital Framework**

We are a financial holding company under the Bank Holding Company Act of 1956, as amended (the “BHC Act”), and are subject to the regulation and oversight of the Board of Governors of the Federal Reserve System (the “Federal Reserve”). The Federal Reserve establishes capital requirements for us,

including well-capitalized standards, and evaluates our compliance with such capital requirements. The Office of the Comptroller of the Currency (“OCC”) establishes similar capital requirements and standards for our U.S. Bank Subsidiaries. The regulatory capital requirements are largely based on the Basel III capital standards established by the Basel Committee and also implement certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”).

The Basel Committee has published revisions to certain standards in its capital framework, and is actively considering potential revisions to other capital standards, that, if adopted by the U.S. banking agencies, could substantially change the U.S. regulatory capital framework. For additional discussion of regulatory capital framework, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Regulatory Capital Framework” in Part II, Item 7 of the 2016 Form 10-K.

**Regulatory Capital Requirements**

We are required to maintain minimum risk-based and leverage capital ratios under the regulatory capital requirements. A summary of the calculations of regulatory capital, risk-weighted assets (“RWAs”) and transition provisions follows.

*Regulatory Capital.* Minimum risk-based capital ratio requirements apply to Common Equity Tier 1 capital, Tier 1 capital and Total capital (which includes Tier 2 capital). Certain adjustments to and deductions from capital are required for purposes of determining these ratios, such as goodwill, intangible assets, certain deferred tax assets, other amounts in Accumulated other comprehensive income (loss) (“AOCI”) and investments in the capital instruments of unconsolidated financial institutions. Certain of these adjustments and deductions are also subject to transitional provisions.

In addition to the minimum risk-based capital ratio requirements, on a fully phased-in basis by 2019, we will be subject to:

- A greater than 2.5% Common Equity Tier 1 capital conservation buffer;
- The Common Equity Tier 1 global systemically important bank (“G-SIB”) capital surcharge, currently at 3%; and
- Up to a 2.5% Common Equity Tier 1 countercyclical capital buffer (“CCyB”), currently set by U.S. banking regulators at zero (collectively, the “buffers”).

In 2017, the phase-in amount for each of the buffers is 50% of the fully phased-in buffer requirement. Failure to main-

tain the buffers would result in restrictions on our ability to make capital distributions, including the payment of dividends and the repurchase of stock, and to pay discretionary bonuses to executive officers. For a further discussion of the G-SIB capital surcharge, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—G-SIB Capital Surcharge" in Part II, Item 7 of the 2016 Form 10-K.

See "Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements" herein for additional capital requirements effective January 1, 2019.

**Risk-Weighted Assets.** RWAs reflect both our on- and off-balance sheet risk as well as capital charges attributable to the risk of loss arising from the following:

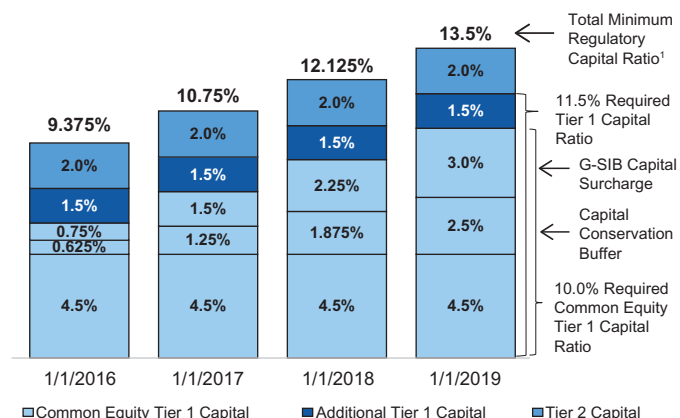

- Credit risk: The failure of a borrower, counterparty or issuer to meet its financial obligations to us;
- Market risk: Adverse changes in the level of one or more market prices, rates, indices, volatilities, correlations or other market factors, such as market liquidity; and
- Operational risk: Inadequate or failed processes or systems, human factors or from external events (e.g., fraud, theft, legal and compliance risks, cyber attacks or damage to physical assets).

For a further discussion of our market, credit and operational risks, see "Quantitative and Qualitative Disclosures about Market Risk."

Our risk-based capital ratios for purposes of determining regulatory compliance are the lower of the capital ratios computed under (i) the standardized approaches for calculating credit risk and market risk RWAs (the "Standardized Approach") and (ii) the applicable advanced approaches for calculating credit risk, market risk and operational risk RWAs (the "Advanced Approach"). The credit risk RWA calculations between the two approaches differ in that the Standardized Approach requires calculation of RWAs using prescribed risk weights, whereas the Advanced Approach utilizes models to calculate exposure amounts and risk weights. At September 30, 2017, our ratios are based on the Standardized Approach transitional rules. For prior periods, the ratios were based on the Advanced Approach transitional rules.

The methods for calculating each of our risk-based capital ratios will change through January 1, 2022 as aspects of the capital rules are phased in. These changes may result in differences in our reported capital ratios from one reporting period to the next that are independent of changes to our capital base, asset composition, off-balance sheet exposures or risk profile.

**Minimum Risk-Based Capital Ratios: Transitional Provisions**

1. These ratios assume the requirements for the G-SIB capital surcharge (3.0%) and CCyB (zero) remain at current levels. See "Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements" herein for additional capital requirements effective January 1, 2019.

**Transitional and Fully Phased-In Regulatory Capital Ratios**

\$ in millions	At September 30, 2017			
	Transitional		Pro Forma Fully Phased-In

Common Equity Tier 1 capital ratio	16.9%	17.4%	16.3%	16.7%
Tier 1 capital ratio	19.3%	19.8%	18.6%	19.1%
Total capital ratio	22.2%	22.8%	21.4%	22.0%
<b>Leverage-based capital</b>				
Adjusted average assets <sup>1</sup>	\$ 841,360	N/A	\$ 840,845	N/A
Tier 1 leverage ratio <sup>2</sup>	8.4%	N/A	8.4%	N/A

\$ in millions	At December 31, 2016			
	Transitional		Pro Forma Fully Phased-In	
	Standardized	Advanced	Standardized	Advanced
<b>Risk-based capital</b>				
Common Equity Tier 1 capital	\$ 60,398	\$ 60,398	\$ 58,616	\$ 58,616
Tier 1 capital	68,097	68,097	66,315	66,315
Total capital	78,917	78,642	77,155	76,881
Total RWAs	340,191	358,141	351,101	369,709
Common Equity Tier 1 capital ratio	17.8%	16.9%	16.7%	15.9%
Tier 1 capital ratio	20.0%	19.0%	18.9%	17.9%
Total capital ratio	23.2%	22.0%	22.0%	20.8%
<b>Leverage-based capital</b>				
Adjusted average assets <sup>1</sup>	\$811,402	N/A	\$810,288	N/A
Tier 1 leverage ratio <sup>2</sup>	8.4%	N/A	8.2%	N/A

N/A—Not Applicable

- Adjusted average assets represent the denominator of the Tier 1 leverage ratio and are composed of the average daily balance of consolidated on-balance sheet assets under U.S. GAAP during the current quarter and the quarter ended December 31, 2016 adjusted for disallowed goodwill, transitional intangible assets, certain deferred tax assets, certain investments in the capital instruments of unconsolidated financial institutions and other adjustments.
- The minimum Tier 1 leverage ratio requirement is 4.0%.

The fully phased-in pro forma estimates in the previous tables are based on our current understanding of the capital rules and other factors, which may be subject to change as we receive additional clarification and implementation guidance from the Federal Reserve and as the interpretation of the regulations evolves over time. These fully phased-in pro forma estimates are non-GAAP financial measures because they were not yet effective at September 30, 2017. These preliminary estimates are subject to risks and uncertainties that may cause actual results to differ materially and should not be taken as a projection of what our capital, capital ratios, RWAs, earnings or other results will actually be at future dates. For a discussion of risks and uncertainties that may affect our future results, see "Risk Factors" in Part I, Item 1A of the 2016 Form 10-K.

**Well-Capitalized Minimum Regulatory Capital Ratios for U.S. Bank Subsidiaries**

	At September 30, 2017
Common Equity Tier 1 risk-based capital ratio	6.5%
Tier 1 risk-based capital ratio	8.0%
Total risk-based capital ratio	10.0%
Tier 1 leverage ratio	5.0%

For us to remain a financial holding company, our U.S. Bank Subsidiaries must qualify as well-capitalized by maintaining the minimum ratio requirements set forth in the previous table. The Federal Reserve has not yet revised the well-capitalized standard for financial holding companies to reflect the higher capital standards required for us under the capital rules. Assuming that the Federal Reserve would apply the same or very similar well-capitalized standards to financial holding companies, each of our risk-based capital ratios and Tier 1 leverage ratio at September 30, 2017 would have exceeded the revised well-capitalized standard. The Federal Reserve may require us to maintain risk- and leverage-based capital ratios substantially in excess of mandated minimum levels, depending upon general economic conditions and a financial holding company's particular condition, risk profile and growth plans.

VaR—Value-at-Risk

N/A—Not Applicable

1. The RWAs for each category in the table reflect both on- and off-balance sheet exposures, where appropriate.
2. Amount reflects assets not in a defined category, non-material portfolios of exposures and unsettled transactions, as applicable.

The decrease of \$15,306 million in operational risk RWAs in the current year period under the Advanced Approach reflects a reduction in the internal loss data related to litigation utilized in the operational risk capital model.

Regulatory stressed VaR increased \$11,304 million in the current year period under both the Standardized and the Advanced Approaches. These increases were primarily driven by increases in trading inventory across the equities, global macro, and credit businesses within Institutional Securities, in response to client demand.

**Supplementary Leverage Ratio**

We and our U.S. Bank Subsidiaries are required to publicly disclose our supplementary leverage ratios, which will become effective as a capital standard on January 1, 2018. By January 1, 2018, we must also maintain a Tier 1 supplementary leverage capital buffer of at least 2% in addition to the 3% minimum supplementary leverage ratio (for a total of at least 5%), in order to avoid limitations on capital distributions, including dividends and stock repurchases, and discretionary bonus payments to executive officers. In addition, beginning in 2018, our U.S. Bank Subsidiaries must maintain a supplementary leverage ratio of 6% to be considered well-capitalized.

**Pro Forma Supplementary Leverage Exposure and Ratio**

<i>\$ in millions</i>	At September 30, 2017		At December 31, 2016	
	Transitional basis	Fully phased-in <sup>1</sup>	Transitional basis	Fully phased-in <sup>1</sup>
Average total assets <sup>2</sup>	\$ 850,616	\$ 850,616	\$ 820,536	\$ 820,536
Adjustments <sup>3, 4</sup>	237,305	236,789	242,113	240,999
Pro forma supplementary leverage exposure	\$1,087,921	\$1,087,405	\$1,062,649	\$1,061,535
Pro forma supplementary leverage ratio	6.5%	6.5%	6.4%	6.2%

1. Estimated amounts utilize fully phased-in Tier 1 capital and take into consideration the Tier 1 capital deductions that would be applicable in 2018 after the phase-in period has ended.
2. Computed as the average daily balance of consolidated total assets under U.S. GAAP during the current quarter and the quarter ended December 31, 2016.
3. Computed as the arithmetic mean of the month-end balances over the current quarter and the quarter ended December 31, 2016.
4. Adjustments are to: (i) incorporate derivative exposures, including adding the related potential future exposure (including for derivatives cleared for clients), grossing up cash collateral netting where qualifying criteria are not met and adding the effective notional principal amount of sold credit protection offset by qualifying purchased credit protection; (ii) reflect the counterparty credit risk for repo-style transactions; (iii) add the credit equivalent amount for off-balance sheet exposures; and (iv) apply other adjustments to Tier 1 capital, including disallowed goodwill, transitional intangible assets, certain deferred tax assets and certain investments in the capital instruments of unconsolidated financial institutions.

The pro forma fully phased-in supplementary leverage exposure and ratios, shown in the previous table, are based on our current understanding of rules and other factors.

**U.S. Subsidiary Banks' Pro Forma Supplementary Leverage Ratios on a Transitional Basis**

	At September 30, 2017	At December 31, 2016
MSBNA	8.9%	7.7%
MSPBNA	9.4%	10.2%

The pro forma transitional and fully phased-in supplementary leverage exposures and ratios are non-GAAP financial measures because they have not yet become effective. Our estimates are subject to risks and uncertainties that may cause actual results to differ materially from estimates based on these regulations. Further, these expectations should not be

taken as projections of what our supplementary leverage ratios, earnings, assets or exposures will actually be at future dates. For a discussion of risks and uncertainties that may affect our future results, see "Risk Factors" in Part I, Item 1A of the 2016 Form 10-K.

**Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements**

On December 15, 2016, the Federal Reserve adopted a final rule for top-tier bank holding companies of U.S. G-SIBs ("covered BHCs"), including the Parent Company, that establishes external total loss-absorbing capacity ("TLAC"), long-term debt ("LTD") and clean holding company requirements. The final rule contains various definitions and restrictions, such as requiring eligible LTD to be issued by the covered BHC and be unsecured, have a maturity of one year or more from the date of issuance and not have certain derivative-linked features typically associated with certain types of structured notes. We expect to be in compliance with all requirements of the rule by January 1, 2019, the date that compliance is required.

For a further discussion of TLAC and LTD requirements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Total Loss-Absorbing Capacity, Long-Term Debt and Clean Holding Company Requirements" in Part II, Item 7 of the 2016 Form 10-K. For discussions about the interaction between the single point of entry resolution strategy and the TLAC and LTD requirements, see "Business—Supervision and Regulation—Financial Holding Company—Resolution and Recovery Planning" in Part I, Item 1 and "Risk Factors—Legal, Regulatory and Compliance Risk" in Part I, Item 1A of the 2016 Form 10-K.

**Capital Plans and Stress Tests**

Pursuant to the Dodd-Frank Act, the Federal Reserve has adopted capital planning and stress test requirements for large bank holding companies, including us, which form part of the Federal Reserve's annual Comprehensive Capital Analysis and Review ("CCAR") framework.

We submitted our 2017 capital plan and company-run stress test results to the Federal Reserve on April 5, 2017. On June 22, 2017, the Federal Reserve published summary results of the Dodd-Frank Act supervisory stress tests of each large bank holding company, including us. On June 28, 2017, the Federal Reserve published summary results of CCAR and announced that they did not object to our 2017 Capital Plan ("Capital Plan"). The Capital Plan includes the repurchase of up to \$5.0 billion of outstanding common stock for the period beginning July 1, 2017 through June 30, 2018, an increase

from \$3.5 billion in the 2016 Capital Plan. Additionally, the Capital Plan includes an increase in our quarterly common stock dividend to \$0.25 per share from \$0.20 per share, beginning with the common stock dividend declared on July 19, 2017. We disclosed a summary of the results of our company-run stress tests on June 23, 2017 on our Investor Relations website. In addition, we submitted the results of our mid-cycle company-run stress test to the Federal Reserve on October 5, 2017 and disclosed a summary of the results on October 20, 2017 on our Investor Relations website.

The Dodd-Frank Act also requires each of our U.S. Bank Subsidiaries to conduct an annual stress test. MSBNA and MSPBNA submitted their 2017 annual company-run stress tests to the OCC on April 5, 2017 and published a summary of their stress test results on June 23, 2017 on our Investor Relations website.

For a further discussion of our capital plans and stress tests, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Requirements—Capital Plans and Stress Tests” in Part II, Item 7 of the 2016 Form 10-K.

**Attribution of Average Common Equity According to the Required Capital Framework**

Our required capital (“Required Capital”) estimation is based on the Required Capital framework, an internal capital adequacy measure. Common equity attribution to the business segments is based on capital usage calculated by the Required Capital framework, as well as each business segment’s relative contribution to our total Required Capital. Required Capital is assessed for each business segment and further attributed to product lines. This process is intended to align capital with the risks in each business segment in order to allow senior management to evaluate returns on a risk-adjusted basis.

The Required Capital framework is a risk-based and leverage use-of-capital measure, which is compared with our regulatory capital to ensure that we maintain an amount of going concern capital after absorbing potential losses from stress events, where applicable, at a point in time. We define the difference between our total average common equity and the sum of the average common equity amounts allocated to our business segments as Parent Company equity. We generally hold Parent Company equity for prospective regulatory requirements, organic growth, acquisitions and other capital needs.

Common equity estimation and attribution to the business segments are based on our pro forma fully phased-in regulatory capital estimates, including supplementary leverage, and incorporates our internal stress tests. The amount of capital

allocated to the business segments is set at the beginning of each year and remains fixed throughout the year until the next annual reset. Differences between available and Required Capital are attributed to Parent Company equity during the year.

The Required Capital framework is expected to evolve over time in response to changes in the business and regulatory environment. We will continue to evaluate the framework with respect to the impact of future regulatory requirements, as appropriate.

**Average Common Equity Attribution**

<i>\$ in billions</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Institutional Securities	\$ 40.2	\$ 43.2	\$ 40.2	\$ 43.2
Wealth Management	17.2	15.3	17.2	15.3
Investment Management	2.4	2.8	2.4	2.8
Parent Company	10.7	8.2	10.0	7.6
<b>Total<sup>1</sup></b>	<b>\$ 70.5</b>	<b>\$ 69.5</b>	<b>\$ 69.8</b>	<b>\$ 68.9</b>

1. Average common equity is a non-GAAP financial measure.

**Regulatory Developments**

**Resolution and Recovery Planning**

Pursuant to the Dodd-Frank Act, we are required to submit to the Federal Reserve and the Federal Deposit Insurance Corporation (“FDIC”) an annual resolution plan that describes our strategy for a rapid and orderly resolution under the U.S. Bankruptcy Code in the event of our material financial distress or failure.

Our preferred resolution strategy, which is set out in our 2017 resolution plan, is a single point of entry strategy. We submitted our full 2017 resolution plan on June 30, 2017. We previously submitted a status report in respect of certain shortcomings identified in our 2015 resolution plan on September 30, 2016. As indicated in our 2017 resolution plan, the Parent Company has amended and restated its support agreement with its material subsidiaries. Under the amended and restated support agreement, upon the occurrence of a resolution scenario, the Parent Company would be obligated to contribute or loan on a subordinated basis all of its material assets, other than shares in subsidiaries of the Parent Company and certain intercompany receivables, to provide capital and liquidity, as applicable, to our material subsidiaries. The obligations of the Parent Company under the amended and restated support agreement are secured on a senior basis by the assets of the Parent Company (other than shares in subsidiaries of the Parent Company). As a result, claims of our material subsidiaries against the assets of the Parent Company (other than shares in subsidiaries of the Parent Company) are effectively senior to unsecured obligations of the Parent Company.

In September 2017, the Federal Reserve and the FDIC extended the next resolution plan filing deadline for eight large domestic banks, including us, by one year to July 1, 2019.

In September 2016, the OCC issued final guidelines that establish enforceable standards for recovery planning by national banks and certain other institutions with total consolidated assets of \$50 billion or more, calculated on a rolling four-quarter average basis, including MSBNA and MSPBNA. The guidelines were effective on January 1, 2017; MSBNA must be in compliance by January 1, 2018 and MSPBNA must be in compliance by October 1, 2018.

In September 2017, the Federal Reserve issued a final rule that would impose contractual requirements on certain "qualified financial contracts" ("covered QFCs") to which U.S. G-SIBs, including us, and their subsidiaries ("covered entities") are parties. While national banks and savings associations are not "covered entities" under the final Federal Reserve rule, the OCC is expected to issue a final rule that would subject national banks that are subsidiaries of U.S. G-SIBs, including our U.S. Bank Subsidiaries, as well as certain other institutions, to substantively identical requirements. Under the Federal Reserve's final rule, covered QFCs must generally expressly provide that transfer restrictions and default rights against a covered entity are limited to the same extent as they would be under the Federal Deposit Insurance Act and Title II of the Dodd-Frank Act and their implementing regulations. In addition, covered QFCs may not, among other things, permit the exercise of any cross-default right against a covered entity based on an affiliate's entry into insolvency, resolution or similar proceedings, subject to certain creditor protections. There is a phased-in compliance schedule based on counterparty type, with the first compliance date of January 1, 2019.

For more information about resolution and recovery planning requirements and our activities in these areas, including the implications of such activities in a resolution scenario, see "Business—Supervision and Regulation—Financial Holding Company—Resolution and Recovery Planning" in Part I, Item 1, "Risk Factors—Legal, Regulatory and Compliance Risk" in Part I, Item 1A and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Developments—Resolution and Recovery Planning" in Part II, Item 7 of the 2016 Form 10-K.

#### ***Legacy Covered Funds under the Volcker Rule***

The Volcker Rule prohibits "banking entities," including us and our affiliates, from engaging in certain "proprietary trading" activities, as defined in the Volcker Rule, subject to

exemptions for underwriting, market-making-related activities, risk-mitigating hedging and certain other activities. The Volcker Rule also prohibits certain investments and relationships by banking entities with "covered funds," with a number of exemptions and exclusions. In June 2017, we received approval from the Federal Reserve of our application for a five-year extension of the transition period to conform investments in certain legacy Volcker covered funds that are also illiquid funds. The approval covers essentially all of our non-conforming investments in, and relationships with, legacy covered funds subject to the Volcker Rule.

For more information about Volcker Rule requirements and our activities in these areas, including the conformance periods applicable to certain covered funds and our application for a statutory extension, see "Business—Supervision and Regulation—Financial Holding Company—Activities Restrictions under the Volcker Rule" in Part I, Item 1 and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Regulatory Developments—Legacy Covered Funds under the Volcker Rule" in Part II, Item 7 of the 2016 Form 10-K.

#### ***U.S. Department of Labor Conflict of Interest Rule***

The U.S. Department of Labor's final Conflict of Interest Rule went into effect on June 9, 2017, with certain aspects subject to phased-in compliance. Full compliance is currently scheduled to be required by January 1, 2018, but the U.S. Department of Labor recently proposed to delay the full compliance date to July 1, 2019. In addition, the U.S. Department of Labor is undertaking an examination of the rule which may result in changes to the rule or related exemptions or a further change in the full compliance date. For a discussion of the U.S. Department of Labor Conflict of Interest Rule, see "Business—Supervision and Regulation—Institutional Securities and Wealth Management" in Part I, Item 1 of the 2016 Form 10-K.

#### ***U.K. Referendum***

Following the U.K. electorate vote to leave the European Union, the U.K. invoked Article 50 of the Lisbon Treaty on March 29, 2017. For further discussion of U.K. referendum's potential impact on our operations, see "Risk Factors—International Risk" in Part I, Item 1A of the 2016 Form 10-K. For further information regarding our exposure to the U.K., see also "Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Credit Risk—Country Risk Exposure."

### Expected Replacement of LIBOR

Central banks around the world, including the Federal Reserve, have commissioned working groups of market participants and others with the goal of finding suitable replacements for the London Interbank Offered Rate ("LIBOR") based more fully on observable market transactions. It is expected that a transition away from the widespread use of LIBOR to alternative rates will occur over the course of the next several years.

### Effects of Inflation and Changes in Interest and Foreign Exchange Rates

For a discussion of the effects of inflation and changes in interest and foreign exchange rates on our business and financial results and strategies to mitigate potential exposures, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Effects of Inflation and Changes in Interest and Foreign Exchange Rates" in Part II, Item 7 of the 2016 Form 10-K.

### Off-Balance Sheet Arrangements

We enter into various off-balance sheet arrangements, including through unconsolidated special purpose entities ("SPEs") and lending-related financial instruments (e.g., guarantees and commitments), primarily in connection with the Institutional Securities and Investment Management business segments.

We utilize SPEs primarily in connection with securitization activities. For information on our securitization activities, see Note 12 to the financial statements.

For information on our commitments, obligations under certain guarantee arrangements and indemnities, see Note 11 to the financial statements. For further information on our lending commitments, see "Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Credit Risk—Lending Activities."

## Risk Management

Management believes effective risk management is vital to the success of our business activities. For a discussion of our risk management functions, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management” in Part II, Item 7A of the 2016 Form 10-K.

### Market Risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, indices, volatilities, correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio. Generally, we incur market risk as a result of trading, investing and client facilitation activities, principally within the Institutional Securities business segment where the substantial majority of our Value-at-Risk (“VaR”) for market risk exposures is generated. In addition, we incur market risk within the Wealth Management and Investment Management business segments. The Wealth Management business segment primarily incurs non-trading market risk from lending and deposit-taking activities. The Investment Management business segment primarily incurs non-trading market risk from capital investments in real estate funds and investments in private equity vehicles. For a further discussion of market risk, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Market Risk” in Part II, Item 7A of the 2016 Form 10-K.

### VaR

The statistical technique known as VaR is one of the tools we use to measure, monitor and review the market risk exposures of our trading portfolios. The Market Risk Department calculates and distributes daily VaR-based risk measures to various levels of management.

*VaR Methodology, Assumptions and Limitations.* For information regarding our VaR methodology, assumptions and limitations, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Market Risk—Sales and Trading and Related Activities—VaR Methodology, Assumptions and Limitations” in Part II, Item 7A of the 2016 Form 10-K.

We utilize the same VaR model for risk management purposes and for regulatory capital calculations. Our regulators have approved our VaR model for use in regulatory calculations.

The portfolio of positions used for our VaR for risk management purposes (“Management VaR”) differs from that used for regulatory capital requirements (“Regulatory VaR”).

Management VaR contains certain positions that are excluded from Regulatory VaR. Examples include counterparty credit valuation adjustment (“CVA”) and related hedges, as well as loans that are carried at fair value and associated hedges.

The following table presents the Management VaR for the Trading portfolio, on a period-end, quarterly average and quarterly high and low basis. To further enhance the transparency of the traded market risk, the Credit Portfolio VaR has been disclosed as a separate category from the Primary Risk Categories. The Credit Portfolio includes counterparty CVA and related hedges, as well as loans that are carried at fair value and associated hedges.

### Trading Risks

#### 95% / One-Day Management VaR

\$ in millions	95%/One-Day VaR for the Three Months Ended September 30, 2017			
	Period End	Average	High	Low
Interest rate and credit spread	\$ 28	\$ 31	\$ 42	\$ 25
Equity price	13	14	18	12
Foreign exchange rate	9	9	13	6
Commodity price	9	9	10	7
Less: Diversification benefit <sup>1, 2</sup>	(26)	(25)	N/A	N/A
Primary Risk Categories	\$ 33	\$ 38	\$ 47	\$ 32
Credit Portfolio	10	11	11	10
Less: Diversification benefit <sup>1, 2</sup>	(6)	(6)	N/A	N/A
Total Management VaR	\$ 37	\$ 43	\$ 50	\$ 36

\$ in millions	95%/One-Day VaR for the Three Months Ended June 30, 2017			
	Period End	Average	High	Low
Interest rate and credit spread	\$ 35	\$ 35	\$ 44	\$ 27
Equity price	15	18	26	15
Foreign exchange rate	10	11	15	8
Commodity price	9	9	10	8
Less: Diversification benefit <sup>1, 2</sup>	(27)	(27)	N/A	N/A
Primary Risk Categories	\$ 42	\$ 46	\$ 60	\$ 36
Credit Portfolio	11	12	14	11
Less: Diversification benefit <sup>1, 2</sup>	(7)	(7)	N/A	N/A
Total Management VaR	\$ 46	\$ 51	\$ 64	\$ 41

N/A—Not Applicable

1. Diversification benefit equals the difference between the total Management VaR and the sum of the component VaRs. This benefit arises because the simulated one-day losses for each of the components occur on different days; similar diversification benefits also are taken into account within each component.
2. The high and low VaR values for the total Management VaR and each of the component VaRs might have occurred on different days during the quarter, and therefore, the diversification benefit is not an applicable measure.

## Risk Disclosures

The average total Management VaR for the three months ended September 30, 2017 (“current quarter”) was \$43 million compared with \$51 million for the three months ended June 30, 2017 (“last quarter”). The average Management VaR for the Primary Risk Categories for the current quarter was \$38 million compared with \$46 million last quarter. These decreases were primarily driven by reduced market volatility and decreases in trading inventory across the equities and credit businesses within Institutional Securities.

*Distribution of VaR Statistics and Net Revenues for the Current Quarter.* One method of evaluating the reasonableness of our VaR model as a measure of our potential volatility of net revenues is to compare VaR with corresponding actual trading revenues. Assuming no intraday trading, for a 95%/one-day VaR, the expected number of times that trading losses should exceed VaR during the year is 13, and, in general, if trading losses were to exceed VaR more than 21 times in a year, the adequacy of the VaR model would be questioned. We evaluate the reasonableness of our VaR model by comparing the potential declines in portfolio values generated by the model with corresponding actual trading results for the Firm, as well as individual business units. For days where losses exceed the VaR statistic, we examine the drivers of trading losses to evaluate the VaR model’s accuracy relative to realized trading results.

The distribution of VaR Statistics and Net Revenues is presented in the following histograms for the Total Trading populations.

*Total Trading.* As shown in the 95%/One-Day Management VaR table on the preceding page, the average 95%/one-day total Management VaR for the current quarter was \$43 million. The following histogram presents the distribution of the daily 95%/one-day total Management VaR for the current quarter, which was in a range between \$35 million and \$50 million for approximately 97% of trading days during the current quarter.

**Daily 95% / One-day Total Management VaR for the Three Months Ended September 30, 2017**  
(\$ in millions)

The following histogram shows the distribution for the current quarter of daily net trading revenues, including profits and losses from Interest rate and credit spread, Equity price, Foreign exchange rate, Commodity price, and Credit Portfolio positions and intraday trading activities, for our Trading businesses. Daily net trading revenues also include intraday trading activities but exclude certain items not captured in the VaR model, such as fees, commissions and net interest income. Daily net trading revenues differ from the definition of revenues required for Regulatory VaR backtesting, which further excludes intraday trading. During the current quarter, we experienced net trading losses on three days, which were not in excess of the 95%/one-day Total Management VaR.

**Daily Net Trading Revenues for the Three Months Ended September 30, 2017**  
(\$ in millions)

### Non-Trading Risks

We believe that sensitivity analysis is an appropriate representation of our non-trading risks. Reflected below is this analysis covering substantially all of the non-trading risk in our portfolio.

*Counterparty Exposure Related to Our Own Credit Spread.* The credit spread risk sensitivity of the counterparty exposure related to our own credit spread corresponded to an increase in value of approximately \$6 million for each 1 basis point widening in our credit spread level at both September 30, 2017 and June 30, 2017.

*Funding Liabilities.* The credit spread risk sensitivity of our mark-to-market structured note liabilities corresponded to an increase in value of approximately \$28 million and \$26 million for each 1 basis point widening in our credit spread level at September 30, 2017 and June 30, 2017, respectively.

*Interest Rate Risk Sensitivity.* The following table presents an analysis of selected instantaneous upward and downward parallel interest rate shocks on net interest income over the next 12 months for our U.S. Bank Subsidiaries. These shocks

are applied to our 12-month forecast for our U.S. Bank Subsidiaries, which incorporates market expectations of interest rates and our forecasted business activity, including our deposit deployment strategy and asset-liability management hedges.

#### U.S. Bank Subsidiaries' Net Interest Income Sensitivity Analysis

<i>\$ in millions</i>	At September 30, 2017	At June 30, 2017
<b>Basis point change</b>		
+200	\$ 566	\$ 716
+100	433	413
-100	(647)	(577)

We do not manage to any single rate scenario but rather manage net interest income in our U.S. Bank Subsidiaries to optimize across a range of possible outcomes. The sensitivity analysis assumes that we take no action in response to these scenarios, assumes there are no changes in other macroeconomic variables normally correlated with changes in interest rates, and includes subjective assumptions regarding customer and market re-pricing behavior and other factors. The change in sensitivity to interest rates between June 30, 2017 and September 30, 2017 is related to overall changes in our asset-liability positioning and higher market rates.

*Investments.* We have exposure to public and private companies through direct investments, as well as through funds that invest in these assets. These investments are predominantly equity positions with long investment horizons, a portion of which are for business facilitation purposes. The market risk related to these investments is measured by estimating the potential reduction in net income associated with a 10% decline in investment values and related impact on performance fees.

#### Investments Sensitivity, Including Related Performance Fees

<i>\$ in millions</i>	10% Sensitivity	
	At September 30, 2017	At June 30, 2017
Investments related to Investment Management activities	\$ 321	\$ 326
Other investments:		
Mitsubishi UFJ Morgan Stanley Securities Co., Ltd.	174	171
Other Firm investments	155	151

*Equity Market Sensitivity.* In the Wealth Management and Investment Management business segments, certain fee-based revenue streams are driven by the value of clients' equity holdings. The overall level of revenues for these streams also depends on multiple additional factors that include, but are not limited to, the level and duration of the equity market increase or decline, price volatility, the geographic and industry mix of client assets, the rate and magnitude of client investments and redemptions, and the impact of such market increase or decline and price volatility on client behavior. Therefore, overall revenues do not correlate completely with changes in the equity markets.

#### Credit Risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to us. We primarily incur credit risk exposure to institutions and individuals through our Institutional Securities and Wealth Management business segments. For a further discussion of our credit risks, see "Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Credit Risk" in Part II, Item 7A of the 2016 Form 10-K. Also, see Notes 7 and 11 to the financial statements for additional information about our loans and lending commitments, respectively.

#### *Lending Activities included in Loans and Trading Assets*

We provide loans and lending commitments to a variety of customers, from large corporate and institutional clients to high net worth individuals. In addition, we purchase loans in the secondary market. In the balance sheets, these loans and lending commitments are carried as held for investment, which are recorded at amortized cost; as held for sale, which are recorded at the lower of cost or fair value; or at fair value with changes in fair value recorded in earnings. Loans held for investment and loans held for sale are classified in Loans, and loans held at fair value are classified in Trading assets in the balance sheets. See Notes 3, 7 and 11 to the financial statements for further information.

## Loans and Lending Commitments

	At September 30, 2017			
<i>\$ in millions</i>	IS	WM	IM <sup>1</sup>	Total

IS—Institutional Securities  
 WM—Wealth Management  
 IM—Investment Management

- Loans in Investment Management are entered into in conjunction with certain investment advisory activities.
- Lending commitments represent the notional amount of legally binding obligations to provide funding to clients for lending transactions. Since commitments associated with these business activities may expire unused or may not be utilized to full capacity, they do not necessarily reflect the actual future cash funding requirements.
- For syndications led by us, any lending commitments accepted by the borrower but not yet closed are net of amounts syndicated. For syndications that we participate in and do not lead, any lending commitments accepted by the borrower but not yet closed include only the amount that we expect will be

allocated from the lead syndicate bank. Due to the nature of our obligations under the commitments, these amounts include certain commitments participated to third parties.

Our credit exposure from our loans and lending commitments is measured in accordance with our internal risk management standards. Risk factors considered in determining the aggregate allowance for loan and commitment losses include the borrower's financial strength, seniority of the loan, collateral type, volatility of collateral value, debt cushion, loan-to-value ratio, debt service ratio, covenants and counterparty type. Qualitative and environmental factors such as economic and business conditions, nature and volume of the portfolio and lending terms, and volume and severity of past due loans may also be considered.

## Allowance for Loans and Lending Commitments Held for Investment

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Loans	\$ 245	\$ 274
Commitments	181	190

The aggregate allowance for loan and commitment losses decreased during the current year period primarily due to the charge-off of an energy industry related loan. See Note 7 to the financial statements for further information.

## Status of Loans Held for Investment

	At September 30, 2017		At December 31, 2016	
	IS	WM	IS	WM
Current	99.4%	99.9%	98.6%	99.9%
Non-accrual <sup>1</sup>	0.6%	0.1%	1.4%	0.1%

- These loans are on nonaccrual status because the loans were past due for a period of 90 days or more or payment of principal or interest was in doubt.

## Institutional Securities

In connection with certain Institutional Securities business segment activities, we provide loans and lending commitments to a diverse group of corporate and other institutional clients. These activities include originating and purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, financing extended to equities and commodities customers and municipalities. These loans and lending commitments may have varying terms; may be senior or subordinated; may be secured or unsecured; are generally contingent upon representations, warranties and contractual conditions applicable to the borrower; and may be syndicated, traded or hedged by us.

We also participate in securitization activities whereby we extend short-term or long-term funding to clients through

loans and lending commitments that are secured by the assets of the borrower and generally provide for over-collateralization, including commercial real estate loans, loans secured by loan pools, commercial company loans, and secured lines of revolving credit. Credit risk with respect to these loans and lending commitments arises from the failure of a borrower to perform according to the terms of the loan agreement or a decline in the underlying collateral value. See Note 12 to the financial statements for information about our securitization activities. In addition, a collateral management group monitors collateral levels against requirements and oversees the administration of the collateral function. See Note 6 to the financial statements for additional information about our collateralized transactions.

Institutional Securities loans and lending commitments are mainly related to relationship-based and event-driven lending to select corporate clients. Relationship-based loans and lending commitments are used for general corporate purposes, working capital and liquidity purposes by our investment banking clients and typically consist of revolving lines of credit, letter of credit facilities and term loans. In connection with the relationship-based lending activities, we had hedges (which included single-name and index hedges) with a notional amount of \$17.1 billion and \$20.2 billion at September 30, 2017 and December 31, 2016, respectively.

Event-driven loans and lending commitments are associated with a particular event or transaction, such as to support client merger, acquisition, recapitalization and project finance activities. Event-driven loans and lending commitments typically consist of revolving lines of credit, term loans and bridge loans.

*Institutional Securities Lending Exposures Related to the Energy Industry.* At September 30, 2017, Institutional Securities' loans and lending commitments related to the energy industry were \$11.1 billion, of which approximately 68% are accounted for as held for investment and 32% are accounted for as either held for sale or at fair value. Additionally, approximately 55% of the total energy industry loans and lending commitments were to investment grade counterparties.

At September 30, 2017, the energy industry portfolio included \$1.1 billion in loans and \$2.1 billion in lending commitments to Oil and Gas Exploration and Production ("E&P") companies. The E&P loans were to non-investment grade counterparties, which are generally subject to periodic borrowing base reassessments based on the value of the underlying oil and gas reserves pledged as collateral. In limited situations, we may extend the period related to borrowing base reassessments typically in conjunction with taking certain risk mitigating actions with the borrower. Approximately 51% of the E&P lending commitments were to investment grade counterparties. To the extent oil and natural gas prices deteriorate, we may incur lending losses.

*Wealth Management*

The principal Wealth Management lending activities include securities-based lending and residential real estate loans.

Securities-based lending provided to our retail clients is primarily conducted through our Portfolio Loan Account ("PLA") and Liquidity Access Line ("LAL") platforms. For more information about our securities-based lending and residential real estate loans, see "Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Credit Risk—Lending Activities" in Part II, Item 7A of the 2016 Form 10-K.

For the current quarter, loans and lending commitments associated with the Wealth Management business segment lending activities increased by approximately 3%, primarily due to growth in securities-based lending and other loans.

## Wealth Management Loans and Lending Commitments by Remaining Contractual Maturity

1. PLA and LAL platforms had an outstanding loan balance of \$31.8 billion and \$29.7 billion at September 30, 2017 and December 31, 2016, respectively.

*Lending Activities included in Customer and Other Receivables*

## Margin Loans

\$ in millions	At September 30, 2017		
	Institutional Securities	Wealth Management	Total
Net customer receivables representing margin loans	\$ 16,613	\$ 11,996	\$ 28,609

\$ in millions	At December 31, 2016		
	Institutional Securities	Wealth Management	Total
Net customer receivables representing margin loans	\$ 11,876	\$ 12,483	\$ 24,359

Institutional Securities and Wealth Management provide margin lending arrangements which allow the client to borrow against the value of qualifying securities. Margin lending activities generally have minimal credit risk due to the value of collateral held and their short-term nature.

Employee Loans

<i>\$ in millions (except repayment terms)</i>	At September 30, 2017	At December 31, 2016
Employee loans:		
Balance	\$ 4,317	\$ 4,804
Allowance for loan losses	(79)	(89)
Balance, net	\$ 4,238	\$ 4,715
Repayment term range, in years	1 to 20	1 to 12

Employee loans are generally granted to retain and recruit certain employees, are full recourse and generally require periodic repayments. We establish an allowance for loan amounts to terminated employees that we do not consider recoverable, which is recorded in Compensation and benefits expense. See Note 7 to the financial statements for a further description of our employee loans.

Credit Exposure—Derivatives

We incur credit risk as a dealer in OTC derivatives. Credit risk with respect to derivative instruments arises from the possibility that a counterparty may fail to perform according to the terms of the contract. In connection with our OTC derivative activities, we generally enter into master netting agreements and collateral arrangements with counterparties. These agreements provide us with the ability to demand collateral, as well as to liquidate collateral and offset receivables and payables covered under the same master netting agreement in the event of counterparty default.

Fair values as shown below represent the Firm’s net exposure to counterparties related to its OTC derivative products. Obligor credit ratings are determined internally by the Credit Risk Management Department.

1. Amounts represent the netting of receivable balances with payable balances for the same counterparty across maturity categories. Receivable and payable balances with the same counterparty in the same maturity category are netted within such maturity category, where appropriate. Cash collateral received is netted on a counterparty basis, provided legal right of offset exists.
2. Fair value is shown net of collateral received (primarily cash and U.S. government and agency securities).

1. The amounts included in the December 31, 2016 industry categories have been revised due to previous misclassifications. The total remains unchanged.
2. Industry categories are based on the Global Industry Classification Standard®.
3. Amounts include mutual funds, pension funds, private equity and real estate funds, exchanges and clearinghouses, consumer finance, mortgage finance and other diversified financial services.
4. For further information on derivative instruments and hedging activities, see Note 4 to the financial statements.

We manage our trading positions by employing a variety of risk mitigation strategies. These strategies include diversification of risk exposures and hedging. Hedging activities consist of the purchase or sale of positions in related securities and financial instruments, including a variety of derivative products (e.g., futures, forwards, swaps and options). For a discussion of our credit exposure and related credit derivative contracts, see “Quantitative and Qualitative Disclosures about Market Risk–Risk Management–Credit Risk–Credit Exposure–Derivatives” in Part II, Item 7A of the 2016 Form 10-K.

Banks and securities firms	\$ 8,516	\$ 9,397	\$ (881)	\$ 319,830	\$ 273,462
Insurance and other financial institutions	3,619	3,901	(282)	144,527	151,999
Non-financial entities	94	127	(33)	5,832	4,269
<b>Total</b>	<b>\$ 12,229</b>	<b>\$ 13,425</b>	<b>\$ (1,196)</b>	<b>\$ 470,189</b>	<b>\$ 429,730</b>

1. Our Credit Default Swaps (“CDS”) are classified in either Level 2 or Level 3 of the fair value hierarchy. Approximately 4% of receivable fair values represented Level 3 amounts at September 30, 2017 and December 31, 2016. Approximately 7% of payable fair values represented Level 3 amounts at September 30, 2017 and December 31, 2016. See Note 3 to the financial statements for further information.

The fair values shown in the previous table are before the application of contractual netting or collateral. For additional credit exposure information on our credit derivative portfolio, see Note 4 to the financial statements.

## Country Risk Exposure

Country risk exposure is the risk that events in, or that affect, a foreign country (any country other than the U.S.) might adversely affect us. We actively manage country risk exposure through a comprehensive risk management framework that combines credit and market fundamentals and allows us to effectively identify, monitor and limit country risk. Country risk exposure before and after hedging is monitored and managed. For a further discussion of our country risk exposure see, “Quantitative and Qualitative Disclosures about Market Risk–Risk Management–Country Risk Exposure” in Part II, Item 7A of the 2016 Form 10-K.

Our sovereign exposures consist of financial instruments entered into with sovereign and local governments. Our non-sovereign exposures consist of exposures to primarily corporations and financial institutions. The following table shows our 10 largest non-U.S. country risk net exposures at September 30, 2017. Index credit derivatives are included in the country risk exposure table. Each reference entity within an index is allocated to that reference entity’s country of risk. Index exposures are allocated to the underlying reference entities in proportion to the notional weighting of each reference entity in the index, adjusted for any fair value receivable/payable for that reference entity. Where credit risk crosses multiple jurisdictions, for example, a CDS purchased from an issuer in a specific country that references bonds issued by an entity in a different country, the fair value of the CDS is reflected in the Net Counterparty Exposure column based on the country of the CDS issuer. Further, the notional amount of the CDS adjusted for the fair value of the receivable/payable is reflected in the Net Inventory column based on the country of the underlying reference entity.

1. Net inventory represents exposure to both long and short single-name and index positions (*i.e.*, bonds and equities at fair value and CDS based on a notional amount assuming zero recovery adjusted for any fair value receivable or payable).

2. Net counterparty exposure (*i.e.*, repurchase transactions, securities lending and OTC derivatives) takes into consideration legally enforceable master netting agreements and collateral.

3. Amounts represent CDS hedges (purchased and sold) on net counterparty exposure and lending executed by trading desks responsible for hedging counterparty and lending credit risk exposures for us. Amounts are based on the CDS notional amount assuming zero recovery adjusted for any fair value receivable or payable. For a further description of the contractual terms for purchased credit protection and whether they may limit the effectiveness of our hedges, see "Credit Exposure—Derivatives" herein.

As a market maker, we may transact in CDS positions to facilitate client trading. Exposures related to single-name and index credit derivatives for those countries shown in the previous table were as follows:

#### Credit Derivatives Included in Net Inventory

<i>\$ in millions</i>	<b>At September 30, 2017</b>
Gross purchased protection	\$ (61,795)
Gross written protection	60,031
Net exposure	\$ (1,764)

Net counterparty exposure shown in the Top Ten Country Exposure table above includes the benefit of collateral received, which is typically composed of cash and government obligations.

#### Benefit of Collateral Received Against Counterparty Credit Exposure

<i>\$ in millions</i>	<b>At September 30, 2017</b>
U.K. <sup>1</sup>	\$ 8,334
Japan <sup>2</sup>	4,824
Other <sup>3</sup>	5,133

1. Primarily obligations of the U.K., the U.S. and Italy.

2. Primarily obligations of Japan.

3. Primarily obligations of the Netherlands and the U.K.

*Country Risk Exposures Related to the United Kingdom.* At September 30, 2017, our country risk exposures in the U.K. included net exposures of \$14,961 million as shown in the table above, and overnight deposits of \$7,137 million. The \$14,725 million of exposures to non-sovereigns were diversified across both names and sectors. Of these exposures, \$4,699 million were to U.K. focused counterparties that generate more than one-third of their revenues in the U.K., \$4,858 million were to geographically diversified counterparties, and \$4,934 million were to exchanges and clearing houses.

*Country Risk Exposures Related to Brazil.* At September 30, 2017, our country risk exposures in Brazil included net exposures of \$4,978 million as shown in the table above. Our sovereign net exposures in Brazil were principally in the form of local currency government bonds held onshore to support client activity. The \$1,260 million of exposures to non-sovereigns were diversified across both names and sectors.

#### Operational Risk

Operational risk refers to the risk of loss, or of damage to our reputation, resulting from inadequate or failed processes or systems, human factors or from external events (e.g., fraud,

theft, legal and compliance risks, cyber attacks or damage to physical assets). We may incur operational risk across the full scope of our business activities, including revenue-generating activities (e.g., sales and trading) and support and control groups (e.g., information technology and trade processing). For a further discussion about our operational risk, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Operational Risk” in Part II, Item 7A of the 2016 Form 10-K.

#### Model Risk

Model risk refers to the potential for adverse consequences from decisions based on incorrect or misused model outputs. Model risk can lead to financial loss, poor business and strategic decision making, or damage to the Firm’s reputation. The risk inherent in a model is a function of the materiality, complexity and uncertainty around inputs and assumptions. Model risk is generated from the use of models impacting financial statements, regulatory filings, capital adequacy assessments and the formulation of business strategies. For a further discussion about our model risk, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Model Risk” in Part II, Item 7A of the 2016 Form 10-K.

#### Liquidity Risk

Liquidity risk refers to the risk that we will be unable to finance our operations due to a loss of access to the capital markets or difficulty in liquidating our assets. Liquidity risk also encompasses our ability (or perceived ability) to meet our financial obligations without experiencing significant business disruption or reputational damage that may threaten our viability as a going concern. For a further discussion about our liquidity risk, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Liquidity Risk” in Part II, Item 7A of the 2016 Form 10-K and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” in Part I, Item 2.

#### Legal and Compliance Risk

Legal and compliance risk includes the risk of legal or regulatory sanctions, material financial loss, including fines, penalties, judgments, damages and/or settlements, or loss to reputation that we may suffer as a result of failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk, such as the risk that a counterparty’s performance obligations will be unenforceable. It also includes compliance with anti-money laundering and terrorist financing rules and regulations. For a further discussion about our legal and compliance risk, see “Quantitative and Qualitative Disclosures about Market Risk—Risk Management—Legal and Compliance Risk” in Part II, Item 7A of the 2016 Form 10-K.

## Controls and Procedures

Under the supervision and with the participation of the Firm's management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the Firm's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

No change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) occurred during the period covered by this report that materially affected, or is reasonably likely to materially affect, the Firm's internal control over financial reporting.

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Morgan Stanley:

We have reviewed the accompanying condensed consolidated balance sheet of Morgan Stanley and subsidiaries (the “Firm”) as of September 30, 2017, and the related condensed consolidated income statements and comprehensive income statements for the three-month and nine-month periods ended September 30, 2017 and 2016, and the cash flow statements and statements of changes in total equity for the nine-month periods ended September 30, 2017 and 2016. These condensed consolidated interim financial statements are the responsibility of the management of the Firm.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Firm as of December 31, 2016, and the consolidated income statement, comprehensive income statement, cash flow statement and statement of changes in total equity for the year then ended (not presented herein) included in the Firm’s Annual Report on Form 10-K; and in our report dated February 27, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

- The cumulative adjustment relates to the adoption of the following accounting updates on January 1, 2017: *Improvements to Employee Share-Based Payment Accounting*, for which the Firm recorded a cumulative catch-up adjustment to reflect its election to account for forfeitures as they occur (see Note 2 for further information); and *Intra-Entity Transfers of Assets Other Than Inventory*, for which the Firm recorded a cumulative catch-up adjustment to reflect the tax impact from an intercompany sale of assets.
- Debt valuation adjustment ("DVA") represents the change in the fair value resulting from fluctuations in the Firm's credit spreads and other credit factors related to liabilities carried at fair value under the fair value option, primarily related to certain Long-term and Short-term borrowings. In accordance with the early adoption of a provision of the accounting update *Recognition and Measurement of Financial Assets and Financial Liabilities*, a cumulative catch-up adjustment was recorded as of January 1, 2016 to move the cumulative unrealized DVA amount, net of noncontrolling interests and tax, related to outstanding liabilities under the fair value option election from Retained earnings into Accumulated other comprehensive income (loss) ("AOCI"). See Note 2 to the consolidated financial statements in the Firm's Annual Report on Form 10-K for the year ended December 31, 2016 (the "2016 Form 10-K") and Note 14 for further information.
- In accordance with the accounting update *Amendments to the Consolidation Analysis*, a net adjustment was recorded as of January 1, 2016 to both consolidate and deconsolidate certain entities under the new guidance. See Note 2 to the consolidated financial statements in the 2016 Form 10-K for further information.

## Supplemental Disclosure of Cash Flow Information

Cash payments for interest were **\$3,422 million** and \$1,784 million.

Cash payments for income taxes, net of refunds, were **\$967 million** and \$504 million.

## **1. Introduction and Basis of Presentation**

### **The Firm**

Morgan Stanley, a financial holding company, is a global financial services firm that maintains significant market positions in each of its business segments—Institutional Securities, Wealth Management and Investment Management. Morgan Stanley, through its subsidiaries and affiliates, provides a wide variety of products and services to a large and diversified group of clients and customers, including corporations, governments, financial institutions and individuals. Unless the context otherwise requires, the terms “Morgan Stanley” or the “Firm” mean Morgan Stanley (the “Parent Company”) together with its consolidated subsidiaries.

A description of the clients and principal products and services of each of the Firm’s business segments is as follows:

*Institutional Securities* provides investment banking, sales and trading, lending and other services to corporations, governments, financial institutions, and high to ultra-high net worth clients. Investment banking services consist of capital raising and financial advisory services, including services relating to the underwriting of debt, equity and other securities, as well as advice on mergers and acquisitions, restructurings, real estate and project finance. Sales and trading services include sales, financing and market-making activities in equity and fixed income products, including prime brokerage services, global macro, credit and commodities products. Lending services include originating and/or purchasing corporate loans, commercial and residential mortgage lending, asset-backed lending, and financing extended to equities and commodities customers and municipalities. Other services include investment and research activities.

*Wealth Management* provides a comprehensive array of financial services and solutions to individual investors and small to medium-sized businesses/institutions covering brokerage and investment advisory services, financial and wealth planning services, annuity and insurance products, credit and other lending products, banking and retirement plan services.

*Investment Management* provides a broad range of investment strategies and products that span geographies, asset classes, and public and private markets to a diverse group of clients across institutional and intermediary channels. Strategies and products include equity, fixed income, liquidity and alternative/other products. Institutional clients include defined benefit/defined contribution plans, foundations, endowments, government entities, sovereign wealth funds, insurance companies, third-party fund sponsors and corporations. Individual clients are serviced through intermediaries, including affiliated and non-affiliated distributors.

### **Basis of Financial Information**

The unaudited consolidated financial statements (“financial statements”) are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”), which require the Firm to make estimates and assumptions regarding the valuations of certain financial instruments, the valuation of goodwill and intangible assets, compensation, deferred tax assets, the outcome of legal and tax matters, allowance for credit losses and other matters that affect its financial statements and related disclosures. The Firm believes that the estimates utilized in the preparation of its financial statements are prudent and reasonable. Actual results could differ materially from these estimates. Intercompany balances and transactions have been eliminated. Certain reclassifications have been made to prior periods to conform to the current presentation.

The accompanying financial statements should be read in conjunction with the Firm’s consolidated financial statements and notes thereto included in the 2016 Form 10-K. Certain footnote disclosures included in the 2016 Form 10-K have been condensed or omitted from these financial statements as they are not required for interim reporting under U.S. GAAP. The financial statements reflect all adjustments of a normal, recurring nature that are, in the opinion of management, necessary for the fair presentation of the results for the interim period. The results of operations for interim periods are not necessarily indicative of results for the entire year.

### **Consolidation**

The financial statements include the accounts of the Firm, its wholly owned subsidiaries and other entities in which the Firm has a controlling financial interest, including certain variable interest entities (“VIE”) (see Note 12). For consolidated subsidiaries that are less than wholly owned, the third-party holdings of equity interests are referred to as noncontrolling interests. The net income attributable to noncontrolling interests for such subsidiaries is presented as Net income applicable to noncontrolling interests in the consolidated income statements (“income statements”). The portion of shareholders’ equity that is attributable to noncontrolling interests for such subsidiaries is presented as noncontrolling interests, a component of total equity, in the consolidated balance sheets (“balance sheets”).

For a discussion of the Firm’s involvement with VIEs and its significant regulated U.S. and international subsidiaries, see Notes 1 and 2 to the consolidated financial statements in the 2016 Form 10-K.

## **2. Significant Accounting Policies**

For a detailed discussion about the Firm's significant accounting policies, see Note 2 to the consolidated financial statements in the 2016 Form 10-K.

During the nine months ended September 30, 2017 ("current year period"), other than the following, there were no significant updates made to the Firm's significant accounting policies.

### **Accounting Standards Adopted**

The Firm adopted the following accounting update on January 1, 2017.

- ***Improvements to Employee Share-Based Payment Accounting.*** This accounting update simplifies the accounting for employee share-based payments, including the recognition of forfeitures, the classification of income tax consequences, and the classification within the consolidated cash flow statements ("cash flow statements").

Beginning in 2017, the income tax consequences related to share-based payments are required to be recognized in Provision for income taxes in the income statements upon the conversion of employee share-based awards instead of additional paid-in capital. The impact of the income tax consequences upon conversion of the awards may be either a benefit or a provision. Conversion of employee share-based awards to Firm shares will primarily occur in the first quarter of each year. The impact of recognizing excess tax benefits upon conversion of awards in the quarter in which the accounting update was adopted (three months ended March 31, 2017) was a \$112 million benefit to Provision for income taxes. The classification of cash flows from excess tax benefits was moved from the financing section to the operating section of the cash flow statements, and was applied on a retrospective basis.

In addition, this accounting update permits an entity to elect whether to continue to estimate the total forfeitures, or to account for forfeitures on an actual basis as they occur. The Firm has elected to account for forfeitures on an actual basis as they occur. This change is required to be applied using a modified retrospective approach, and upon adoption, the Firm recorded a cumulative catch-up adjustment, decreasing Retained earnings by approximately \$30 million net of tax, increasing Additional paid-in capital by approximately \$45 million and increasing deferred tax assets by approximately \$15 million.

### **Goodwill**

The Firm completed its annual goodwill impairment testing as of July 1, 2017. The Firm's impairment testing did not indicate any goodwill impairment, as each of the Firm's reporting units with goodwill had a fair value that was substantially in excess of its carrying value.

AFS—Available for sale

CDO—Collateralized debt obligations, including collateralized loan obligations

- For positions with the same counterparty that cross over the levels of the fair value hierarchy, both counterparty netting and cash collateral netting are included in the column titled "Netting." Positions classified within the same level that are with the same counterparty are netted within that level. For further information on derivative instruments and hedging activities, see Note 4.
- During the current year period, the Firm transferred from Level 2 to Level 1 \$1.3 billion and \$1.8 billion of Trading assets—Other sovereign government obligations and Trading liabilities—Other sovereign government obligations, respectively, due to increased market activity in these instruments.
- For further breakdown by type, see the following Loans and Lending Commitments at Fair Value table.
- For trading purposes, the Firm holds or sells short equity securities issued by entities in diverse industries and of varying sizes.
- Amounts exclude certain investments that are measured at fair value using the net asset value ("NAV") per share, which are not classified in the fair value hierarchy. For additional disclosure about such investments, see "Fair Value of Investments Measured at NAV" herein.

<b>Long</b>		
Customer and other receivables	\$ 977	\$ 784
<b>Short</b>		
Customer and other payables	\$ 140	\$ 174

1. These contracts are primarily Level 1, actively traded, valued based on quoted prices from the exchange and are excluded from the previous recurring fair value tables.

For a description of the valuation techniques applied to the Firm's major categories of assets and liabilities measured at fair value on a recurring basis, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. During the current year period, there were no significant updates made to the Firm's valuation techniques.

## Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present additional information about Level 3 assets and liabilities measured at fair value on a recurring basis for the three months ended September 30, 2017

("current quarter"), the three months ended September 30, 2016 ("prior year quarter"), the current year period and the nine months ended September 30, 2016 ("prior year period"). Level 3 instruments may be hedged with instruments classified in Level 1 and Level 2. As a result, the realized and unrealized gains (losses) for assets and liabilities within the Level 3 category presented in the following tables do not reflect the related realized and unrealized gains (losses) on hedging instruments that have been classified by the Firm within the Level 1 and/or Level 2 categories.

Additionally, both observable and unobservable inputs may be used to determine the fair value of positions that the Firm has classified within the Level 3 category. As a result, the unrealized gains (losses) during the period for assets and liabilities within the Level 3 category presented in the following tables herein may include changes in fair value during the period that were attributable to both observable and unobservable inputs. Total realized and unrealized gains (losses) are primarily included in Trading revenues in the income statements.

Significant Unobservable Inputs Used in Recurring and Nonrecurring Level 3 Fair Value Measurements

The following disclosures provide information on the valuation techniques, significant unobservable inputs, and their ranges and averages for each major category of assets and liabilities measured at fair value on a recurring and nonrecurring basis with a significant Level 3 balance. The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory. Further, the range of unobservable inputs may differ across firms in the financial services industry because of diversity in the types of products included in each firm's inventory. For

qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. There are no predictable relationships between multiple significant unobservable inputs attributable to a given valuation technique. A single amount is disclosed when there is no significant difference between the minimum, maximum and average (weighted average or simple average / median).

bps—Basis points. One basis point equals 1/100<sup>th</sup> of 1%.

Points—Percentage of par

MWh—Megawatt hours

EBITDA—Earnings before interest, taxes, depreciation and amortization

N/A—Not Applicable

N/M—Not Meaningful

1. Amounts represent weighted averages except where simple averages and the median of the inputs are provided when more relevant.

2. Credit valuation adjustment (“CVA”) and funding valuation adjustments (“FVA”) are included in the balance but excluded from the Valuation Technique(s) and Significant Unobservable Inputs in the previous table. CVA is a Level 3 input when the underlying counterparty credit curve is unobservable. FVA is a Level 3 input in its entirety given the lack of observability of funding spreads in the principal market.

3. Includes derivative contracts with multiple risks (i.e., hybrid products).

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

For a description of the Firm's significant unobservable inputs and related sensitivity, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. The following significant unobservable inputs were added during the current year period.

- *Contingency probability*—probability associated with the realization of an underlying event upon which the value of an asset is contingent. In general, an increase (decrease) to the contingency probability for an asset would result in a higher (lower) fair value.
- *Recovery rate*—amount expressed as a percentage of par that is expected to be received when a credit event occurs. In general, an increase (decrease) to the recovery rate for an asset would result in a higher (lower) fair value.

### Fair Value of Investments Measured at NAV

For a description of the Firm's investments in private equity funds, real estate funds and hedge funds measured at fair value based on NAV, see Note 3 to the consolidated financial statements in the 2016 Form 10-K.

### Investments in Certain Funds Measured at NAV per Share

\$ in millions	At September 30, 2017		At December 31, 2016	
	Fair Value	Commitment	Fair Value	Commitment
Private equity	\$ 1,580	\$ 359	\$ 1,566	\$ 335
Real estate	885	168	1,103	136
Hedge <sup>1</sup>	87	4	147	4
<b>Total</b>	<b>\$ 2,552</b>	<b>\$ 531</b>	<b>\$ 2,816</b>	<b>\$ 475</b>

1. Investments in hedge funds may be subject to initial period lock-up or gate provisions, which restrict an investor from withdrawing from the fund during a certain initial period or restrict the redemption amount on any redemption date, respectively.

### Nonredeemable Funds by Contractual Maturity

\$ in millions	Fair Value at September 30, 2017	
	Private Equity	Real Estate
Less than 5 years	\$ 408	\$ 77
5-10 years	1,005	490
Over 10 years	167	318
<b>Total</b>	<b>\$ 1,580</b>	<b>\$ 885</b>

### Fair Value Option

The Firm elected the fair value option for certain eligible instruments that are risk managed on a fair value basis to mitigate income statement volatility caused by measurement basis differences between the elected instruments and their associated risk management transactions or to eliminate complexities of applying certain accounting models.

### Earnings Impact of Instruments under the Fair Value Option

Securities sold under agreements to repurchase	(5)	(9)	(14)
Long-term borrowings	(3,322)	(385)	(3,707)

Gains (losses) are mainly attributable to changes in foreign currency rates or interest rates or movements in the reference price or index for short-term and long-term borrowings before the impact of related hedges.

The amounts in the previous table are included within Net revenues and do not reflect any gains or losses on related hedging instruments. In addition to the amounts in the previous table, as discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K, instruments within Trading assets or Trading liabilities are measured at fair value.

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

### Gains (Losses) Due to Changes in Instrument-Specific Credit Risk

<i>\$ in millions</i>	Three Months Ended September 30,			
	2017		2016	
	Trading Revenues	OCI	Trading Revenues	OCI

Securities sold under agreements to repurchase <sup>1</sup>	—	(3)	—	(3)
Loans and other debt <sup>2</sup>	49	—	26	—
Lending commitments <sup>3</sup>	—	—	—	—

<i>\$ in millions</i>	Nine Months Ended September 30,			
	2017		2016	
	Trading Revenues	OCI	Trading Revenues	OCI
Short-term and long-term borrowings <sup>1</sup>	\$ 1	\$(493)	\$ 36	\$ 405
Securities sold under agreements to repurchase <sup>1</sup>	—	(6)	—	—
Loans and other debt <sup>2</sup>	94	—	(88)	—
Lending commitments <sup>3</sup>	—	—	3	—

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Cumulative pre-tax DVA gain (loss) recognized in AOCI	\$ (1,420)	\$ (921)

OCI—Other comprehensive income (loss)

- Unrealized DVA gains (losses) are recorded in OCI and, when realized, in Trading revenues. See Note 2 to the consolidated financial statements in the 2016 Form 10-K and Note 14 for further information.
- Loans and other debt instrument-specific credit gains (losses) were determined by excluding the non-credit components of gains and losses.
- Gains (losses) on lending commitments were generally determined based on the difference between estimated expected client yields and contractual yields at each respective period-end.

### Short-Term and Long-Term Borrowings Measured at Fair Value on a Recurring Basis

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
<b>Business Unit Responsible for Risk Management</b>		
Equity	\$ 25,300	\$ 21,066
Interest rates	19,822	16,051
Foreign exchange	782	1,114
Credit	753	647
Commodities	232	264
<b>Total</b>	<b>\$ 46,889</b>	<b>\$ 39,142</b>

### Excess of Contractual Principal Amount Over Fair Value

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Loans and other debt <sup>1</sup>	\$ 12,911	\$ 13,495
Loans 90 or more days past due and/or on nonaccrual status <sup>1</sup>	11,116	11,502
Short-term and long-term borrowings <sup>2</sup>	906	720

- The majority of the difference between principal and fair value amounts for loans and other debt relates to distressed debt positions purchased at amounts well below par.
- Short-term and long-term borrowings do not include structured notes where the repayment of the initial principal amount fluctuates based on changes in a reference price or index.

### Fair Value Loans on Nonaccrual Status

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Nonaccrual loans	\$ 1,429	\$ 1,536
Nonaccrual loans 90 or more days past due	\$ 760	\$ 787

The previous tables exclude non-recourse debt from consolidated VIEs, liabilities related to failed sales of financial assets, pledged commodities and other liabilities that have specified assets attributable to them.

## Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

### Gains (Losses)<sup>1</sup>

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
<b>Assets</b>				
Loans <sup>2</sup>	\$ —	\$ 111	\$ 41	\$ 41
Other Assets—Other investments <sup>3</sup>	(6)	(3)	(6)	(44)
Other assets—Premises, equipment and software costs <sup>4</sup>	(1)	(29)	(7)	(56)
Intangible assets <sup>5</sup>	—	(2)	—	(2)
<b>Total</b>	<b>\$ (7)</b>	<b>\$ 77</b>	<b>\$ 28</b>	<b>\$ (61)</b>
<b>Liabilities</b>				
Other liabilities and accrued expenses—Lending commitments <sup>2</sup>	\$ 4	\$ 52	\$ 64	\$ 98
<b>Total</b>	<b>\$ 4</b>	<b>\$ 52</b>	<b>\$ 64</b>	<b>\$ 98</b>

- Gains and losses for Loans and Other assets—Other investments are classified in Other revenues. For other items, gains and losses are recorded in Other revenues if the item is held for sale, otherwise in Other expenses.
- Nonrecurring changes in the fair value of loans and lending commitments were calculated as follows: for the held for investment category, based on the value of the underlying collateral; and for the held for sale category, based on recently executed transactions, market price quotations, valuation models that incorporate market observable inputs where possible, such as comparable loan or debt prices and credit default swap spread levels adjusted for any basis difference between cash and derivative instruments, or default recovery analysis where such transactions and quotations are unobservable.
- Losses related to Other assets—Other investments were determined using techniques that included discounted cash flow models, methodologies that incorporate multiples of certain comparable companies and recently executed transactions.
- Losses related to Other assets—Premises, equipment and software costs were determined using techniques that included a default recovery analysis and recently executed transactions.
- Losses related to Intangible assets were determined using techniques that included discounted cash flow models and methodologies that incorporate multiples of certain comparable companies.

		Total	Level 2	Level 3
<b>September 30, 2017</b>	<b>\$ 96,939</b>	<b>\$ 1,084</b>	<b>\$ 636</b>	<b>\$ 448</b>
December 31, 2016	97,409	1,241	973	268

1. For further discussion on lending commitments, see Note 11.

The previous tables exclude certain financial instruments such as equity method investments and all non-financial assets and liabilities such as the value of the long-term relationships with the Firm's deposit customers. For further discussion of the contents and valuation techniques of financial instruments not measured at fair value, see Note 3 to the consolidated financial statements in the 2016 Form 10-K. During the current year period, there were no significant updates made to the Firm's valuation techniques for financial instruments not measured at fair value.

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

OTC—Over-the-counter

- Effective in the first quarter of 2017, the Chicago Mercantile Exchange amended its rulebook for cleared OTC derivatives, resulting in the characterization of variation margin transfers as settlement payments as opposed to cash posted as collateral. In the quarter of adoption, the cleared OTC gross derivative assets and liabilities, and related counterparty and cash collateral netting amounts in total decreased by approximately \$13 billion and \$20 billion, respectively. Effective in the third quarter of 2017, derivatives cleared through LCH Clearnet Limited became subject to the rulebook under which variation margin transfers are settlement payments. As a result, cleared OTC gross derivative assets and liabilities, and related counterparty and cash collateral netting amounts in total decreased by approximately \$62 billion and \$59 billion, respectively.
- Amounts relate to master netting agreements and collateral agreements that have been determined by the Firm to be legally enforceable in the event of default but where certain other criteria are not met in accordance with applicable offsetting accounting guidance.
- Net amounts include transactions that are either not subject to master netting agreements or collateral agreements, or are subject to such agreements but the Firm has not determined the agreements to be legally enforceable.

See Note 3 for information related to the unsettled fair value of futures contracts not designated as accounting hedges, which are excluded from the table above.

<b>Total</b>	<b>\$ 2,704</b>	<b>\$ 2,609</b>	<b>\$ 8,870</b>	<b>\$ 7,420</b>

1. Dividend income is included within equity security and index contracts.

The previous table summarizes gains and losses included in Trading revenues in the income statements. These activities include revenues related to derivative and non-derivative financial instruments. The Firm generally utilizes financial instruments across a variety of product types in connection with its market-making and related risk management strategies. Accordingly, the trading revenues presented in the previous table are not representative of the manner in which the Firm manages its business activities and are prepared in a manner similar to the presentation of trading revenues for regulatory reporting purposes.

**Credit Risk-Related Contingencies**

In connection with certain OTC trading agreements, the Firm may be required to provide additional collateral or immediately settle any outstanding liability balances with certain counterparties in the event of a credit rating downgrade of the Firm.

The following table presents the aggregate fair value of certain derivative contracts that contain credit risk-related contingent features that are in a net liability position for which the Firm has posted collateral in the normal course of business.

**Net Derivative Liabilities and Collateral Posted**

\$ in millions	At September 30, 2017	At December 31, 2016
Net derivative liabilities with credit risk-related contingent features	\$ 19,359	\$ 22,939
Collateral posted	14,499	17,040

The additional collateral or termination payments that may be called in the event of a future credit rating downgrade vary by contract and can be based on ratings by either or both of Moody's Investors Service, Inc. ("Moody's") and Standard & Poor's Global Ratings ("S&P"). The following table shows the future potential collateral amounts and termination payments that could be called or required by counterparties or exchange and clearing organizations in the event of one-notch or two-notch downgrade scenarios based on the relevant contractual downgrade triggers.

**Incremental Collateral or Termination Payments upon Potential Future Ratings Downgrade**

\$ in millions	At September 30, 2017 <sup>1</sup>
One-notch downgrade	\$ 592
Two-notch downgrade	512

1. Amounts include \$873 million related to bilateral arrangements between the Firm and other parties where upon the downgrade of one party, the downgraded party must deliver collateral to the other party. These bilateral downgrade arrangements are used by the Firm to manage the risk of counterparty downgrades.

**Credit Derivatives and Other Credit Contracts**

The Firm enters into credit derivatives, principally credit default swaps, under which it receives or provides protection against the risk of default on a set of debt obligations issued by a specified reference entity or entities. A majority of the Firm's counterparties for these derivatives are banks, broker-dealers, and insurance and other financial institutions.

For further information on credit derivatives and other credit contracts, see Note 4 to the consolidated financial statements in the 2016 Form 10-K.

**Protection Sold and Purchased with Credit Default Swaps**

\$ in millions	At September 30, 2017

Portion of single name and non-tranched index and basket with identical underlying reference obligations	\$395,536	—	\$389,221	—

Fair value amounts as shown in the table below are on a gross basis prior to cash collateral or counterparty netting. In order to provide an indication of the current payment status or performance risk of the credit default swaps, a breakdown of credit default swaps based on the Firm's internal credit ratings by investment grade and non-investment grade is provided. Internal credit ratings serve as the Credit Risk Management Department's assessment of credit risk and the basis for a comprehensive credit limits framework used to control credit risk. The Firm uses quantitative models and judgment to estimate the various risk parameters related to each obligor.

As discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K, AFS and HTM securities with a current fair value less than their amortized cost are analyzed as part of the Firm's ongoing assessment of temporarily versus other-than-temporarily impaired at the individual security level.

The Firm believes there are no securities in an unrealized loss position that are other-than-temporarily-impaired at September 30, 2017 and December 31, 2016 for the reasons discussed herein.

For AFS debt securities, the Firm does not intend to sell the securities and is not likely to be required to sell the securities prior to recovery of amortized cost basis. For AFS and HTM debt securities, the securities have not experienced credit losses as the net unrealized losses reported in the previous table are primarily due to higher interest rates since those securities were purchased.

Additionally, for U.S. government and agency securities, the existence of an explicit and implicit guarantee provided by the U.S. government is considered and the Firm does not expect to experience a credit loss (as discussed in Note 2 to the consolidated financial statements in the 2016 Form 10-K). The risk of credit loss on securities in an unrealized loss position is considered minimal because the Firm's U.S. government and agency securities, as well as ABS, CMBS and CLO, are highly rated and because corporate bonds are all investment grade.

For AFS equity securities, the Firm has the intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in market value.

See Note 12 for additional information on securities issued by VIEs, including U.S. agency mortgage-backed securities, non-agency CMBS, auto loan ABS, CLO and FFELP student loan ABS.

Gross realized gains and losses are recognized in Other revenues in the income statements.

## 6. Collateralized Transactions

The Firm enters into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, acquire securities to cover short positions and settle other securities obligations, to accommodate customers' needs and to finance its inventory positions. For further discussion of the Firm's collateralized transactions, see Note 6 to the consolidated financial statements in the 2016 Form 10-K.

### Offsetting of Certain Collateralized Transactions

\$ in millions	At September 30, 2017				
	Gross Amounts	Amounts Offset	Net Amounts Presented	Amounts Not Offset <sup>1</sup>	Net Amounts
<b>Assets</b>					
Securities purchased under agreements to resell	\$174,387	\$(84,281)	\$ 90,106	\$(84,895)	\$ 5,211

#### Assets Pledged

The Firm pledges its trading assets and loans to collateralize securities sold under agreements to repurchase, securities loaned, other secured financings and derivatives. Counterparties may or may not have the right to sell or repledge the collateral.

Pledged financial instruments that can be sold or repledged by the secured party are identified as Trading assets (pledged to various parties) in the balance sheets.

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

### Carrying Value of Assets Loaned or Pledged without Counterparty Right to Sell or Repledge

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Trading assets	\$ 37,800	\$ 41,358
Loans (gross of allowance for loan losses)	570	—
<b>Total</b>	<b>\$ 38,370</b>	<b>\$ 41,358</b>

### Collateral Received

The Firm receives collateral in the form of securities in connection with securities purchased under agreements to resell, securities borrowed, derivative transactions, customer margin loans and securities-based lending. In many cases, the Firm is permitted to sell or repledge these securities held as collateral and use the securities to secure securities sold under agreements to repurchase, to enter into securities lending and derivative transactions or for delivery to counterparties to cover short positions.

The Firm also receives securities as collateral in connection with certain securities-for-securities transactions. In instances where the Firm is the lender and permitted to sell or repledge these securities, it reports the fair value of the collateral received and the related obligation to return the collateral included in Trading assets and Trading liabilities, respectively, in its balance sheets.

### Fair Value of Collateral Received with Right to Sell or Repledge

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Collateral received with right to sell or repledge	\$ 575,915	\$ 561,239
Collateral that was sold or repledged	470,555	430,911

### Customer Margin Lending and Other

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Net customer receivables representing margin loans	\$ 28,609	\$ 24,359

The Firm engages in margin lending to clients that allows the client to borrow against the value of qualifying securities. Margin loans are included within Customer and other receivables in the balance sheets. Under these agreements and transactions, the Firm receives collateral, including U.S. government and agency securities, other sovereign government obligations, corporate and other debt, and corporate equities. Customer receivables generated from margin lending activities are collateralized by customer-owned securities held by the Firm. The Firm monitors required margin levels and established credit terms daily and, pursuant to such guidelines,

requires customers to deposit additional collateral, or reduce positions, when necessary.

For a further discussion of the Firm's margin lending activities, see Note 6 to the consolidated financial statements in the 2016 Form 10-K.

The Firm has additional secured liabilities. For a further discussion of other secured financings, see Note 10.

### Cash and Securities Deposited with Clearing Organizations or Segregated

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Segregated securities <sup>1</sup>	\$ 17,491	\$ 23,756
Other assets—Cash deposited with clearing organizations or segregated under federal and other regulations or requirements	32,731	33,979
<b>Total</b>	<b>\$ 50,222</b>	<b>\$ 57,735</b>

1. Securities segregated under federal regulations for the Firm's U.S. broker-dealers are sourced from Securities purchased under agreements to resell and Trading assets in the balance sheets.

## 7. Loans and Allowance for Credit Losses

### Loans

The Firm's loans held for investment are recorded at amortized cost, and its loans held for sale are recorded at the lower of cost or fair value in the balance sheets. For a further description of these loans, refer to Note 7 to the consolidated financial statements in the 2016 Form 10-K. See Note 3 for further information regarding Loans and lending commitments held at fair value.

### Loans by Type

<i>\$ in millions</i>	At September 30, 2017

Substandard	1,259	—	40	190	1,489
Doubtful	69	—	—	—	69
Loss	—	—	—	—	—
<b>Total</b>	<b>\$ 25,025</b>	<b>\$ 24,866</b>	<b>\$ 24,385</b>	<b>\$ 7,702</b>	<b>\$81,978</b>

The following loans and lending commitments have been evaluated for a specific allowance. All remaining loans and lending commitments are assessed under the inherent allowance methodology.

### Impaired Loans and Lending Commitments Before Allowance

\$ in millions	At September 30, 2017		
	Corporate	Residential Real Estate	Total
<b>Loans</b>			
With allowance	\$ 15	\$ —	\$ 15
Without allowance <sup>1</sup>	146	46	192
Unpaid principal balance <sup>2</sup>	170	47	217
<b>Lending Commitments</b>			
With allowance	\$ 1	\$ —	\$ 1
Without allowance <sup>1</sup>	221	—	221

\$ in millions	At December 31, 2016		
	Corporate	Residential Real Estate	Total
<b>Loans</b>			
With allowance	\$ 104	\$ —	\$ 104
Without allowance <sup>1</sup>	206	35	241
Unpaid principal balance <sup>2</sup>	316	38	354
<b>Lending Commitments</b>			
With allowance	\$ —	\$ —	\$ —
Without allowance <sup>1</sup>	89	—	89

- At September 30, 2017 and December 31, 2016, no allowance was recorded for these loans and lending commitments as the present value of the expected future cash flows (or, alternatively, the observable market price of the instrument or the fair value of the collateral held) equaled or exceeded the carrying value.
- The impaired loans unpaid principal balance differs from the aggregate amount of impaired loan balances with and without allowance due to various factors, including charge-offs and net deferred loan fees or costs.

- The Firm recorded a release of \$6 million, and a provision of \$6 million for lending commitments for the current quarter and prior year quarter, respectively.

## Employee Loans

<i>\$ in millions</i>	At September 30, 2017		At December 31, 2016	
Balance	\$	4,317	\$	4,804
Allowance for loan losses		(79)		(89)
Balance, net	\$	4,238	\$	4,715
Repayment term range, in years		1 to 20		1 to 12

Employee loans are granted in conjunction with a program established to retain and recruit certain employees, are full recourse and generally require periodic repayments. These loans are recorded in Customer and other receivables in the balance sheets. The Firm establishes an allowance for loan amounts it does not consider recoverable, and the related provision is recorded in Compensation and benefits expense.

## 8. Equity Method Investments

### Overview

The Firm's investments accounted for under the equity method of accounting (see Note 1 to the consolidated financial statements in the 2016 Form 10-K) are included in Other assets in the balance sheets. Income (loss) from equity method investments is included in Other revenues in the income statements.

### Equity Method Investment Balances

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Investments	\$ 2,766	\$ 2,837

<i>\$ in millions</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016

Securitization representations and warranties	91	—
General partner guarantees	53	—

1. These amounts include certain issued standby letters of credit participated to third parties, totaling \$0.7 billion of notional and collateral/recourse, due to the nature of the Firm's obligations under these arrangements.

2. Carrying amounts of derivative contracts are shown on a gross basis prior to cash collateral or counterparty netting. For further information on derivative contracts, see Note 4.

The Firm also has obligations under certain guarantee arrangements, including contracts and indemnification agreements, that contingently require the Firm to make payments to the guaranteed party based on changes in an underlying measure (such as an interest or foreign exchange rate, security or commodity price, an index, or the occurrence or non-occurrence of a specified event) related to an asset, liability or equity security of a guaranteed party. Also included as guarantees are contracts that contingently require the Firm to make payments to the guaranteed party based on another entity's failure to perform under an agreement, as well as indirect guarantees of the indebtedness of others.

In certain situations, collateral may be held by the Firm for those contracts that meet the definition of a guarantee. Generally, the Firm sets collateral requirements by counterparty so that the collateral covers various transactions and products and is not allocated specifically to individual contracts. Also, the Firm may recover amounts related to the underlying asset delivered to the Firm under the derivative contract.

For more information on the nature of the obligation and related business activity for market value guarantees, liquidity facilities, whole loan sales guarantees and general partner guarantees related to certain investment management funds, as well as the other products in the previous table, see Note 12 to the consolidated financial statements in the 2016 Form 10-K.

#### **Other Guarantees and Indemnities**

In the normal course of business, the Firm provides guarantees and indemnifications in a variety of transactions. These provisions generally are standard contractual terms. Certain of these guarantees and indemnifications related to indemnities, exchange/clearinghouse member guarantees and merger and acquisition guarantees are described in Note 12 to the consolidated financial statements in the 2016 Form 10-K.

In addition, in the ordinary course of business, the Firm guarantees the debt and/or certain trading obligations (including obligations associated with derivatives, foreign exchange contracts and the settlement of physical commodities) of certain subsidiaries. These guarantees generally are entity or product specific and are required by investors or trading counterparties. The activities of the Firm's subsidiaries covered by these guarantees (including any related debt or trading obligations) are included in the financial statements.

#### **Finance Subsidiary**

The Parent Company fully and unconditionally guarantees the securities issued by Morgan Stanley Finance LLC, a 100%-owned finance subsidiary.

#### **Contingencies**

*Legal.* In the normal course of business, the Firm has been named, from time to time, as a defendant in various legal actions, including arbitrations, class actions and other litigation, arising in connection with its activities as a global diversified financial services institution. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the entities that would otherwise be the primary defendants in such cases are bankrupt or are in financial distress. These actions have included, but are not limited to, residential mortgage and credit-crisis related matters.

Over the last several years, the level of litigation and investigatory activity (both formal and informal) by governmental and self-regulatory agencies has increased materially in the financial services industry. As a result, the Firm expects that it will continue to be the subject of elevated claims for damages and other relief and, while the Firm has identified below any individual proceedings where the Firm believes a material loss to be reasonably possible and reasonably estimable, there can be no assurance that material losses will not be incurred from claims that have not yet been asserted or are not yet determined to be probable or possible and reasonably estimable losses.

The Firm contests liability and/or the amount of damages as appropriate in each pending matter. Where available information indicates that it is probable a liability had been incurred at the date of the consolidated financial statements and the Firm can reasonably estimate the amount of that loss, the Firm accrues the estimated loss by a charge to income.

In many proceedings and investigations, however, it is inherently difficult to determine whether any loss is probable or even possible or to estimate the amount of any loss. In addition, even where a loss is possible or an exposure to loss exists in excess of the liability already accrued with respect to a previously recognized loss contingency, it is not always possible to reasonably estimate the size of the possible loss or range of loss.

For certain legal proceedings and investigations, the Firm cannot reasonably estimate such losses, particularly for proceedings and investigations where the factual record is being developed or contested or where plaintiffs or governmental entities seek substantial or indeterminate damages, restitution, disgorgement or penalties. Numerous issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, determination of issues related to class certification and the

calculation of damages or other relief, and by addressing novel or unsettled legal questions relevant to the proceedings or investigations in question, before a loss or additional loss or range of loss or additional range of loss can be reasonably estimated for a proceeding or investigation.

For certain other legal proceedings and investigations, the Firm can estimate reasonably possible losses, additional losses, ranges of loss or ranges of additional loss in excess of amounts accrued, but does not believe, based on current knowledge and after consultation with counsel, that such losses will have a material adverse effect on the Firm's consolidated financial statements as a whole, other than the matters referred to in the following paragraphs.

On July 15, 2010, China Development Industrial Bank ("CDIB") filed a complaint against the Firm, styled *China Development Industrial Bank v. Morgan Stanley & Co. Incorporated et al.*, which is pending in the Supreme Court of the State of New York, New York County ("Supreme Court of NY"). The complaint relates to a \$275 million credit default swap referencing the super senior portion of the STACK 2006-1 CDO. The complaint asserts claims for common law fraud, fraudulent inducement and fraudulent concealment and alleges that the Firm misrepresented the risks of the STACK 2006-1 CDO to CDIB, and that the Firm knew that the assets backing the CDO were of poor quality when it entered into the credit default swap with CDIB. The complaint seeks compensatory damages related to the approximately \$228 million that CDIB alleges it has already lost under the credit default swap, rescission of CDIB's obligation to pay an additional \$12 million, punitive damages, equitable relief, fees and costs. On February 28, 2011, the court denied the Firm's motion to dismiss the complaint. Based on currently available information, the Firm believes it could incur a loss in this action of up to approximately \$240 million plus pre- and post-judgment interest, fees and costs.

On August 8, 2012, U.S. Bank, in its capacity as trustee, filed a complaint on behalf of Morgan Stanley Mortgage Loan Trust 2006-14SL, Mortgage Pass-Through Certificates, Series 2006-14SL, Morgan Stanley Mortgage Loan Trust 2007-4SL and Mortgage Pass-Through Certificates, Series 2007-4SL against the Firm styled *Morgan Stanley Mortgage Loan Trust 2006-14SL, et al. v. Morgan Stanley Mortgage Capital Holdings LLC, as successor in interest to Morgan Stanley Mortgage Capital Inc.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trusts, which had original principal balances of approximately \$354 million and \$305 million respectively, breached various representations and warranties. The complaint seeks, among other relief, rescission of the mortgage loan purchase agreements under-

lying the transactions, specific performance and unspecified damages and interest. On August 16, 2013, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On August 16, 2016, the Firm moved for summary judgment and the plaintiffs moved for partial summary judgment. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$527 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands that it did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On May 3, 2013, plaintiffs in *Deutsche Zentral-Genossenschaftsbank AG et al. v. Morgan Stanley et al.* filed a complaint against the Firm, certain affiliates, and other defendants in the Supreme Court of NY. The complaint alleges that defendants made material misrepresentations and omissions in the sale to plaintiffs of certain mortgage pass-through certificates backed by securitization trusts containing residential mortgage loans. The total amount of certificates allegedly sponsored, underwritten and/or sold by the Firm to plaintiff was approximately \$644 million. The complaint alleges causes of action against the Firm for common law fraud, fraudulent concealment, aiding and abetting fraud, negligent misrepresentation, and rescission and seeks, among other things, compensatory and punitive damages. On June 10, 2014, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On June 20, 2017 the Appellate Division, First Department, affirmed the lower court's June 10, 2014 order. On July 28, 2017, the Firm filed a motion for leave to appeal that decision to the New York Court of Appeals. On October 3, 2017, the Appellate Division, First Department denied the Firm's motion for leave to appeal. At September 25, 2017, the current unpaid balance of the mortgage pass-through certificates at issue in this action was approximately \$232 million, and the certificates had incurred actual losses of approximately \$87 million. Based on currently available information, the Firm believes it could incur a loss in this action up to the difference between the \$232 million unpaid balance of these certificates (plus any losses incurred) and their fair market value at the time of a judgment against the Firm, or upon sale, plus pre- and post-judgment interest, fees and costs. The Firm may be entitled to be indemnified for some of these losses.

On July 8, 2013, U.S. Bank National Association, in its capacity as trustee, filed a complaint against the Firm styled *U.S. Bank National Association, solely in its capacity as Trustee of the Morgan Stanley Mortgage Loan Trust 2007-2AX (MSM 2007-2AX) v. Morgan Stanley Mortgage Capital Holdings LLC, as Successor-by-Merger to Morgan Stanley*

*Mortgage Capital Inc. and GreenPoint Mortgage Funding, Inc.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$650 million, breached various representations and warranties. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction documents, unspecified damages and interest. On August 22, 2013, the Firm filed a motion to dismiss the complaint, which was granted in part and denied in part on November 24, 2014. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$240 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands that it did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On December 30, 2013, Wilmington Trust Company, in its capacity as trustee for Morgan Stanley Mortgage Loan Trust 2007-12, filed a complaint against the Firm styled *Wilmington Trust Company v. Morgan Stanley Mortgage Capital Holdings LLC et al.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$516 million, breached various representations and warranties. The complaint seeks, among other relief, unspecified damages, attorneys' fees, interest and costs. On February 28, 2014, the defendants filed a motion to dismiss the complaint, which was granted in part and denied in part on June 14, 2016. The plaintiff filed a notice of appeal of that order on August 17, 2016, and the appeal was fully briefed on May 5, 2017. On July 11, 2017, the Appellate Division, First Department affirmed in part and reversed in part the trial court's order that granted in part the Firm's motion to dismiss. On August 10, 2017, plaintiff filed a motion for leave to appeal the Appellate Division, First Department's July 11, 2017 decision and order. On September 26, 2017, the Appellate Division, First Department denied plaintiff's motion for leave to appeal. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$152 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands that it did not repurchase, plus attorney's fees, costs and interest, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On April 28, 2014, Deutsche Bank National Trust Company, in its capacity as trustee for Morgan Stanley Structured Trust I 2007-1, filed a complaint against the Firm styled *Deutsche Bank National Trust Company v. Morgan Stanley Mortgage*

*Capital Holdings LLC*, pending in the United States District Court for the Southern District of New York. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$735 million, breached various representations and warranties. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction documents, unspecified compensatory and/or rescissory damages, interest and costs. On April 3, 2015, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On May 8, 2017, the Firm moved for summary judgment. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$292 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands that it did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On September 19, 2014, Financial Guaranty Insurance Company ("FGIC") filed a complaint against the Firm in the Supreme Court of NY, styled *Financial Guaranty Insurance Company v. Morgan Stanley ABS Capital I Inc. et al.* relating to a securitization issued by Basket of Aggregated Residential NIMS 2007-1 Ltd. The complaint asserts claims for breach of contract and alleges, among other things, that the net interest margin securities ("NIMS") in the trust breached various representations and warranties. FGIC issued a financial guaranty policy with respect to certain notes that had an original balance of approximately \$475 million. The complaint seeks, among other relief, specific performance of the NIMS breach remedy procedures in the transaction documents, unspecified damages, reimbursement of certain payments made pursuant to the transaction documents, attorneys' fees and interest. On November 24, 2014, the Firm filed a motion to dismiss the complaint, which the court denied on January 19, 2017. On February 24, 2017, the Firm filed a notice of appeal of the court's order. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$126 million, the unpaid balance of these notes, plus pre- and post-judgment interest, fees and costs, as well as claim payments that FGIC has made and will make in the future.

On September 23, 2014, FGIC filed a complaint against the Firm in the Supreme Court of NY styled *Financial Guaranty Insurance Company v. Morgan Stanley ABS Capital I Inc. et al.* relating to the Morgan Stanley ABS Capital I Inc. Trust 2007-NC4. The complaint asserts claims for breach of contract and fraudulent inducement and alleges, among other things, that the loans in the trust breached various representations and warranties and defendants made untrue statements

and material omissions to induce FGIC to issue a financial guaranty policy on certain classes of certificates that had an original balance of approximately \$876 million. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction documents, compensatory, consequential and punitive damages, attorneys' fees and interest. On January 23, 2017, the court denied the Firm's motion to dismiss the complaint. On February 24, 2017, the Firm filed a notice of appeal of the court's order. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$277 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands from a certificate holder and FGIC that the Firm did not repurchase, plus pre- and post-judgment interest, fees and costs, as well as claim payments that FGIC has made and will make in the future. In addition, plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

On January 23, 2015, Deutsche Bank National Trust Company, in its capacity as trustee, filed a complaint against the Firm styled *Deutsche Bank National Trust Company solely in its capacity as Trustee of the Morgan Stanley ABS Capital I Inc. Trust 2007-NC4 v. Morgan Stanley Mortgage Capital Holdings LLC as Successor-by-Merger to Morgan Stanley Mortgage Capital Inc., and Morgan Stanley ABS Capital I Inc.*, pending in the Supreme Court of NY. The complaint asserts claims for breach of contract and alleges, among other things, that the loans in the trust, which had an original principal balance of approximately \$1.05 billion, breached various representations and warranties. The complaint seeks, among other relief, specific performance of the loan breach remedy procedures in the transaction documents, compensatory, consequential, rescissory, equitable and punitive damages, attorneys' fees, costs and other related expenses, and interest. On December 11, 2015, the court granted in part and denied in part the Firm's motion to dismiss the complaint. On February 11, 2016, plaintiff filed a notice of appeal of that order, and the appeal was fully briefed on August 19, 2016. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately \$277 million, the total original unpaid balance of the mortgage loans for which the Firm received repurchase demands from a certificate holder and a monoline insurer that the Firm did not repurchase, plus pre- and post-judgment interest, fees and costs, but plaintiff is seeking to expand the number of loans at issue and the possible range of loss could increase.

In matters styled *Case number 15/3637* and *Case number 15/4353*, the Dutch Tax Authority ("Dutch Authority") is challenging, in the District Court in Amsterdam, the prior set-off by the Firm of approximately €124 million (plus accrued interest) of withholding tax credits against the Firm's corporation tax liabilities for the tax years 2007 to 2013. The Dutch Authority alleges that the Firm was not entitled to receive the withholding tax credits on the basis, inter alia, that a Firm subsidiary did not hold legal title to certain securities subject to withholding tax on the relevant dates. The Dutch Authority has also alleged that the Firm failed to provide certain information to the Dutch Authority and keep adequate books and records. The Firm does not agree with these allegations. A hearing took place on September 19, 2017. Based on currently available information, the Firm believes that it could incur a loss in this action of up to approximately €124 million (plus accrued interest).

## 12. Variable Interest Entities and Securitization Activities

### Overview

For a discussion of the Firm's VIEs, the determination and structure of VIEs and securitization activities, see Note 13 to the consolidated financial statements in the 2016 Form 10-K.

### Consolidated VIEs

#### Assets and Liabilities by Type of Activity

\$ in millions	At September 30, 2017		At December 31, 2016	
	VIE Assets	VIE Liabilities	VIE Assets	VIE Liabilities
Credit-linked notes	\$ 100	\$ —	\$ 501	\$ —
Other structured financings	398	3	602	10
MABS <sup>1</sup>	90	69	397	283
Other <sup>2</sup>	1,156	260	910	25
<b>Total</b>	<b>\$ 1,744</b>	<b>\$ 332</b>	<b>\$ 2,410</b>	<b>\$ 318</b>

1. Amounts include transactions backed by residential mortgage loans, commercial mortgage loans and other types of assets, including consumer or commercial assets. The value of assets is determined based on the fair value of the liabilities and the interests owned by the Firm in such VIEs because the fair values for the liabilities and interests owned are more observable.
2. Other primarily includes certain operating entities, investment funds and structured transactions.

<b>Total</b>	<b>\$</b>	<b>332</b>	<b>\$</b>	<b>318</b>

Consolidated VIE assets and liabilities are presented in the previous tables after intercompany eliminations. Most assets owned by consolidated VIEs cannot be removed unilaterally by the Firm and are not generally available to the Firm. Most related liabilities issued by consolidated VIEs are non-recourse to the Firm. In certain other consolidated VIEs, the Firm either has the unilateral right to remove assets or provides additional recourse through derivatives such as total return swaps, guarantees or other forms of involvement.

In general, the Firm's exposure to loss in consolidated VIEs is limited to losses that would be absorbed on the VIE's net assets recognized in its financial statements, net of amounts absorbed by third-party variable interest holders.

### Select Information Related to Consolidated VIEs

<i>\$ in millions</i>	At September 30, 2017		At December 31, 2016	
Noncontrolling interests	\$	197	\$	228
Maximum exposure to losses <sup>1</sup>		—		78

1. Primarily related to certain derivatives, commitments, guarantees and other forms of involvement not recognized in the financial statements.

### Non-consolidated VIEs

The following tables include all VIEs in which the Firm has determined that its maximum exposure to loss is greater than specific thresholds or meets certain other criteria and exclude exposure to loss from liabilities due to immateriality. Most of the VIEs included in the following tables are sponsored by unrelated parties; the Firm's involvement generally is the result of its secondary market-making activities, securities held in its Investment securities portfolio (see Note 5) and certain investments in funds.

### Non-consolidated VIEs

<i>\$ in millions</i>	At September 30, 2017

### Non-consolidated VIE Mortgage- and Asset-Backed Securitization Assets

<i>\$ in millions</i>	At September 30, 2017		At December 31, 2016	
	Unpaid Principal Balance	Debt and Equity Interests	Unpaid Principal Balance	Debt and Equity Interests
Residential mortgages	\$ 13,043	\$ 910	\$ 4,775	\$ 458
Commercial mortgages	43,920	1,964	54,021	2,656
U.S. agency collateralized mortgage obligations	12,015	2,723	14,796	2,758
Other consumer or commercial loans	9,156	3,311	28,324	5,371
<b>Total</b>	<b>\$ 78,134</b>	<b>\$ 8,908</b>	<b>\$101,916</b>	<b>\$ 11,243</b>

The Firm's maximum exposure to loss presented above often differs from the carrying value of the variable interests held by the Firm. The maximum exposure to loss presented above is dependent on the nature of the Firm's variable interest in the VIEs and is limited to the notional amounts of certain liquidity facilities, other credit support, total return swaps,

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

written put options, and the fair value of certain other derivatives and investments the Firm has made in the VIEs. Liabilities issued by VIEs generally are non-recourse to the Firm. Where notional amounts are utilized in quantifying the maximum exposure related to derivatives, such amounts do not reflect fair value write-downs already recorded by the Firm.

The Firm's maximum exposure to loss presented above does not include the offsetting benefit of any financial instruments that the Firm may utilize to hedge these risks associated with its variable interests. In addition, the Firm's maximum exposure to loss presented above is not reduced by the amount of collateral held as part of a transaction with the VIE or any party to the VIE directly against a specific exposure to loss.

Securitization transactions generally involve VIEs. Primarily as a result of its secondary market-making activities, the Firm owned additional VIE assets mainly issued by securitization SPEs for which the maximum exposure to loss is less than specific thresholds. These additional assets totaled \$11.9 billion and \$11.7 billion at September 30, 2017 and December 31, 2016, respectively.

These assets were either retained in connection with transfers of assets by the Firm, acquired in connection with secondary market-making activities, held as AFS securities in its Investment securities portfolio (see Note 5), or held as investments in funds. At September 30, 2017 and December 31, 2016, these assets consisted of securities backed by residential mortgage loans, commercial mortgage loans or other consumer loans, such as credit card receivables, automobile loans and student loans, CDOs or CLOs, and investment funds.

The Firm's primary risk exposure is to the securities issued by the SPE owned by the Firm, with the highest risk on the most subordinate class of beneficial interests. These assets generally are included in Trading assets—Corporate and other debt, Trading assets—Investments or AFS securities within its Investment securities portfolio and are measured at fair value (see Note 3). The Firm does not provide additional support in these transactions through contractual facilities, such as liquidity facilities, guarantees or similar derivatives. The Firm's maximum exposure to loss generally equals the fair value of the assets owned.

Transactions with SPEs in which the Firm, acting as principal, transferred financial assets with continuing involvement and received sales treatment are shown in the following tables.

### Transfers of Assets with Continuing Involvement

<i>\$ in millions</i>	At September 30, 2017

Transferred assets are carried at fair value prior to securitization, and any changes in fair value are recognized in the income statements. The Firm may act as underwriter of the beneficial interests issued by these securitization vehicles. Investment banking underwriting net revenues are recognized in connection with these transactions. The Firm may retain interests in the securitized financial assets as one or more tranches of the securitization. These retained interests are generally carried at fair value in the balance sheets with changes in fair value recognized in the income statements.

### Proceeds from New Securitization Transactions and Sales of Loans

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
New transactions <sup>1</sup>	\$ 6,875	\$ 6,819	\$ 17,622	\$ 13,695
Retained interests	648	768	1,607	1,901
Sales of corporate loans to CLO SPEs <sup>1,2</sup>	56	199	148	230

1. Net gains on new transactions and sales of corporate loans to CLO entities at the time of the sale were not material for all periods presented.
2. Sponsored by non-affiliates.

The Firm has provided, or otherwise agreed to be responsible for, representations and warranties regarding certain assets transferred in securitization transactions sponsored by the Firm (see Note 11).

The Firm also enters into transactions in which it sells equity securities and contemporaneously enters into bilateral OTC equity derivatives with the purchasers of the securities, through which it retains the exposure to the securities as shown in the following table.

### Assets Sold with Retained Exposure

\$ in millions	At September 30, 2017	At December 31, 2016
Carrying value of assets derecognized at the time of sale and gross cash proceeds	\$ 14,458	\$ 11,209
<b>Fair value</b>		
Assets sold	14,618	11,301
Derivative assets recognized in the balance sheets	177	128
Derivative liabilities recognized in the balance sheets	17	36

### Failed Sales

For transfers that fail to meet the accounting criteria for a sale, the Firm continues to recognize the assets in Trading assets at fair value, and the Firm recognizes the associated liabilities in Other secured financings at fair value in the balance sheets (see Note 10).

The assets transferred to certain unconsolidated VIEs in transactions accounted for as failed sales cannot be removed unilaterally by the Firm and are not generally available to the Firm. The related liabilities are also non-recourse to the Firm. In certain other failed sale transactions, the Firm has the right to remove assets or provides additional recourse through derivatives such as total return swaps, guarantees or other forms of involvement.

### Carrying Value of Assets and Liabilities Related to Failed Sales

	Assets	Liabilities	Assets	Liabilities
Failed sales	\$ 858	\$ 858	\$ 285	\$ 285

## 13. Regulatory Requirements

### Regulatory Capital Framework and Requirements

For a discussion of the Firm's regulatory capital framework, see Note 14 to the consolidated financial statements in the 2016 Form 10-K.

The Firm is required to maintain minimum risk-based and leverage capital ratios under the regulatory capital requirements. A summary of the calculations of regulatory capital, risk-weighted assets ("RWAs") and transition provisions follows.

The Firm's risk-based capital ratios for purposes of determining regulatory compliance are the lower of the capital ratios computed under (i) the standardized approaches for calculating credit risk and market risk RWAs (the "Standardized Approach") and (ii) the applicable advanced approaches for calculating credit risk, market risk and operational risk RWAs (the "Advanced Approach").

## Notes to Consolidated Financial Statements (Unaudited)

Minimum risk-based capital ratio requirements apply to Common Equity Tier 1 capital, Tier 1 capital and Total capital. Certain adjustments to and deductions from capital are required for purposes of determining these ratios, such as goodwill, intangible assets, certain deferred tax assets, other amounts in AOCI and investments in the capital instruments of unconsolidated financial institutions. Certain of these adjustments and deductions are also subject to transitional provisions.

In addition to the minimum risk-based capital ratio requirements, on a fully phased-in basis by 2019, the Firm will be subject to:

- A greater than 2.5% Common Equity Tier 1 capital conservation buffer;
- The Common Equity Tier 1 global systemically important bank capital surcharge, currently at 3%; and
- Up to a 2.5% Common Equity Tier 1 countercyclical capital buffer, currently set by U.S. banking regulators at zero (collectively, the “buffers”).

In 2017, the phase-in amount for each of the buffers is 50% of the fully phased-in buffer requirement. Failure to maintain the buffers will result in restrictions on the Firm’s ability to make capital distributions, including the payment of dividends and the repurchase of stock, and to pay discretionary bonuses to executive officers.

The methods for calculating each of the Firm’s risk-based capital ratios will change through January 1, 2022 as aspects of the capital rules are phased in. These changes may result in differences in the Firm’s reported capital ratios from one reporting period to the next that are independent of changes to its capital base, asset composition, off-balance sheet exposures or risk profile.

For a further discussion of the Firm’s calculation of risk-based capital ratios, see Note 14 to the consolidated financial statements in the 2016 Form 10-K.

### ***The Firm’s Regulatory Capital and Capital Ratios***

At September 30, 2017, the Firm’s ratios are based on the Standardized Approach transitional rules. At December 31, 2016, the Firm’s ratios were based on the Advanced Approach transitional rules.

### **Regulatory Capital**

<i>\$ in millions</i>	At September 30, 2017		
	Amount	Ratio	Minimum Capital Ratio <sup>1</sup>

N/A—Not Applicable

1. Percentages represent minimum regulatory capital ratios under the transitional rules.

2. Adjusted average assets represent the denominator of the Tier 1 leverage ratio and are composed of the average daily balance of consolidated on-balance sheet assets under U.S. GAAP during the current quarter and the quarter ended December 31, 2016, respectively, adjusted for disallowed goodwill, transitional intangible assets, certain deferred tax assets, certain investments in the capital instruments of unconsolidated financial institutions and other adjustments.

### ***U.S. Bank Subsidiaries’ Regulatory Capital and Capital Ratios***

Morgan Stanley Bank, N.A. (“MSBNA”) and Morgan Stanley Private Bank, National Association (“MSPBNA”) (collectively, “U.S. Bank Subsidiaries”) are subject to similar regulatory capital requirements as the Firm. Failure to meet minimum capital requirements can initiate certain mandatory and discretionary actions by regulators that, if undertaken, could have a direct material effect on the U.S. Bank Subsidiaries’ financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, each of the U.S. Bank Subsidiaries must meet specific capital guidelines that involve quantitative measures of its assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices.

Each U.S. depository institution subsidiary of the Firm must be well-capitalized in order for the Firm to continue to qualify as a financial holding company and to continue to engage in the broadest range of financial activities permitted for financial holding companies. Under regulatory capital requirements adopted by the U.S. federal banking agencies, U.S. depository institutions must maintain certain minimum capital ratios in order to be considered well-capitalized. At September 30, 2017 and December 31, 2016, the Firm’s U.S. Bank Subsidi-

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

aries maintained capital at levels sufficiently in excess of the universally mandated well-capitalized requirements to address any additional capital needs and requirements identified by the U.S. federal banking regulators.

At September 30, 2017 and December 31, 2016, the U.S. Bank Subsidiaries' ratios are based on the Standardized Approach transitional rules.

### MSBNA's Regulatory Capital

At September 30, 2017			
<i>\$ in millions</i>	Amount	Ratio	Minimum Capital Ratio <sup>1</sup>

1. Capital ratios that are required in order to be considered well-capitalized for U.S. regulatory purposes.

## U.S. Broker-Dealer Regulatory Capital Requirements

### MS&Co. Regulatory Capital

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Net capital	\$ 10,613	\$ 10,311
Excess net capital	8,558	8,034

Morgan Stanley & Co. LLC ("MS&Co.") is a registered U.S. broker-dealer and registered futures commission merchant and, accordingly, is subject to the minimum net capital requirements of the U.S. Securities and Exchange Commission ("SEC") and the U.S. Commodity Futures Trading Commission ("CFTC"). MS&Co. has consistently operated with capital in excess of its regulatory capital requirements.

As an Alternative Net Capital broker-dealer, and in accordance with the market and credit risk standards of Appendix E of SEC Rule 15c3-1, MS&Co. is subject to minimum net capital and tentative net capital requirements. In addition, MS&Co. must notify the SEC if its tentative net capital falls below certain levels. At September 30, 2017 and December 31, 2016, MS&Co. has exceeded its net capital requirement and has tentative net capital in excess of the minimum and notification requirements.

### MSSB LLC Regulatory Capital

<i>\$ in millions</i>	At September 30, 2017	At December 31, 2016
Net capital	\$ 2,573	\$ 3,946
Excess net capital	2,415	3,797

Morgan Stanley Smith Barney LLC ("MSSB LLC") is a registered U.S. broker-dealer and introducing broker for the futures business and, accordingly, is subject to the minimum net capital requirements of the SEC. MSSB LLC has consistently operated with capital in excess of its regulatory capital requirements.

### Other Regulated Subsidiaries

Morgan Stanley & Co. International plc ("MSIP"), a London-based broker-dealer subsidiary, is subject to the capital requirements of the Prudential Regulation Authority, and Morgan Stanley MUFG Securities Co., Ltd. ("MSMS"), a Tokyo-based broker-dealer subsidiary, is subject to the capital requirements of the Financial Services Agency. MSIP and MSMS have consistently operated with capital in excess of their respective regulatory capital requirements.

Certain other U.S. and non-U.S. subsidiaries of the Firm are subject to various securities, commodities and banking regulations, and capital adequacy requirements promulgated by the regulatory and exchange authorities of the countries in which they operate. These subsidiaries have consistently operated with capital in excess of their local capital adequacy requirements.

## 14. Total Equity

### Dividends and Share Repurchases

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Repurchases of common stock	\$ 1,250	\$ 1,250	\$ 2,500	\$ 2,500

On June 28, 2017, the Board of Governors of the Federal Reserve System (the “Federal Reserve”) announced that they did not object to the Firm’s 2017 capital plan (“Capital Plan”). The Capital Plan includes the share repurchase of up to \$5.0 billion of outstanding common stock for the period beginning July 1, 2017 through June 30, 2018, an increase from \$3.5 billion in the 2016 Capital Plan. Additionally, the Capital Plan includes an increase in the quarterly common stock dividend to \$0.25 per share from \$0.20 per share, beginning with the common stock dividend declared on July 19, 2017.

On October 17, 2017, the Firm announced that the Board of Directors (the “Board”) declared a quarterly dividend per common share of \$0.25. The dividend is payable on November 15, 2017 to common shareholders of record on October 31, 2017.

### Preferred Stock

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Dividends declared	\$ 93	\$ 78	\$ 353	\$ 312

For a description of Series A through Series K preferred stock issuances, see Note 15 to the consolidated financial statements in the 2016 Form 10-K. On September 15, 2017, the Firm announced that the Board declared quarterly dividends for preferred stock shareholders of record on September 29, 2017 that were paid on October 16, 2017. The Firm is authorized to issue 30 million shares of preferred stock. The preferred stock has a preference over the common stock upon liquidation. The Firm’s preferred stock qualifies as Tier 1 capital in accordance with regulatory capital requirements (see Note 13).

*Series K Preferred Stock.* The Series K Preferred Stock offering (net of related issuance costs) in January 2017 resulted in proceeds of approximately \$994 million.

### Preferred Stock Outstanding

\$ in millions, except per share data	Shares Outstanding		Carrying Value	
	At September 30, 2017	Liquidation Preference per Share	At September 30, 2017	At December 31, 2016
<b>Series</b>

<b>Net interest</b>	<b>\$ 783</b>	<b>\$ 1,003</b>	<b>\$ 2,305</b>	<b>\$ 2,815</b>

1. Interest income and Interest expense are classified in the income statements based on the nature of the instrument and related market conventions. When included as a component of the instrument's fair value, interest is included within Trading revenues or Investments revenues. Otherwise, it is included within Interest income or Interest expense.
2. Includes fees paid on Securities borrowed.
3. Includes interest from customer receivables and cash deposited with clearing organizations or segregated under federal and other regulations or requirements.
4. Includes fees received on Securities loaned.
5. Includes fees received from prime brokerage customers for stock loan transactions incurred to cover customers' short positions.

## 17. Employee Benefit Plans

The Firm sponsors various retirement plans for the majority of its U.S. and non-U.S. employees. The Firm provides certain other postretirement benefits, primarily health care and life insurance, to eligible U.S. employees.

### Components of the Net Periodic Benefit Expense (Income) for Pension and Other Postretirement Plans

\$ in millions	Three Months Ended September 30,		Nine Months Ended September 30,

Net amortization of actuarial loss	4	3	12	9
<b>Net periodic benefit expense (income)</b>	<b>\$ 12</b>	<b>\$ 12</b>	<b>\$ 37</b>	<b>\$ 34</b>

## 18. Income Taxes

The Firm is under continuous examination by the Internal Revenue Service (the “IRS”) and other tax authorities in certain countries, such as Japan and the United Kingdom (“U.K.”), and in states in which it has significant business operations, such as New York. The Firm has established a liability for unrecognized tax benefits, and associated interest, if applicable (“tax liabilities”), that it believes is adequate in relation to the potential for additional assessments. Once established, the Firm adjusts such tax liabilities only when new information is available or when an event occurs necessitating a change.

The Firm is currently at various levels of field examination with respect to audits by the IRS, as well as New York State and New York City, for tax years 2009-2012 and 2007-2014, respectively. In April 2016, the Firm received a notification from the IRS that the Congressional Joint Committee on Taxation approved the final report of an Appeals Office review of matters from tax years 1999-2005. In June 2016, the Firm received an amended Revenue Agent’s Report for tax years 2006-2008. Over the next 12 months the Firm expects to receive new information related to multi-year IRS field audit examinations that may prompt an overall net decrease in the Firm’s recorded tax liabilities.

The Firm believes that the resolution of the above tax matters will not have a material effect on the annual financial statements, although a resolution could have a material impact on the income statements and effective tax rate for any period in which such resolution occurs.

In March 2017, the Firm filed claims with the IRS to contest certain items associated with tax years 1999-2005, the resolution of which is not expected to have a material impact on the annual financial statements or effective tax rate. Additionally, during 2017, the Firm expects to reach a conclusion with the U.K. tax authorities on substantially all issues through tax year 2010, the resolution of which is not expected to have a material impact on the annual financial statements or effective tax rate.

See Note 11 regarding the Dutch Tax Authority’s challenge, in the District Court in Amsterdam (matters styled *Case number 15/3637* and *Case number 15/4353*), of the Firm’s entitlement to certain withholding tax credits which may impact the balance of unrecognized tax benefits.

## 19. Segment and Geographic Information

### Segment Information

For a discussion about the Firm’s business segments, see Note 21 to the consolidated financial statements in the 2016 Form 10-K.

IS—Institutional Securities  
WM—Wealth Management  
IM—Investment Management  
I/E—Intersegment eliminations

- For further information on fee waiver amounts see the table below.
- For further information on net unrealized performance-based fee amounts see the table below.
- During the current year period, the Firm recorded a provision of \$86 million for potential additional value-added tax, interest and penalties in relation to certain intercompany service activities provided to our U.K. group.
- Effective July 1, 2016, the Institutional Securities and Wealth Management business segments entered into an agreement, whereby Institutional Securities assumed management of Wealth Management's fixed income client-driven trading activities and employees. Institutional Securities now pays fees to Wealth Management based on distribution activity (collectively, the "Fixed Income Integration"). Prior periods have not been recast for this new intersegment agreement due to immateriality.

The Firm waives a portion of its fees in the Investment Management business segment from certain registered money market funds that comply with the requirements of Rule 2a-7 of the Investment Company Act of 1940.

**Reduction of Fees due to Fee Waivers**

<i>\$ in millions</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Fee waivers	\$ 20	\$ 26	\$ 66	\$ 61

In certain management fee arrangements, the Firm is entitled to receive performance-based fees (also referred to as incentive fees and includes carried interest) when the return on assets under management exceeds certain benchmark returns or other performance targets. In such arrangements, performance fee revenues are accrued (or reversed) quarterly based on measuring account/fund performance to date versus the performance benchmark stated in the investment management

## Notes to Consolidated Financial Statements (Unaudited)

Morgan Stanley

agreement. The Firm's portion of net unrealized cumulative performance-based fees (for which the Firm is not obligated to pay compensation) are at risk of reversing if the fund performance falls below the stated investment management agreement benchmarks. See Note 11 for information regarding general partner guarantees, which include potential obligations to return performance fee distributions previously received.

## Other Information

### Legal Proceedings

The following new matters and developments have occurred since previously reporting certain matters in the Firm's Annual Report on Form 10-K for the year ended December 31, 2016 (the "Form 10-K"), the Firm's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2017 (the "First Quarter Form 10-Q") and the Firm's Quarterly Report on Form 10-Q for the period ending June 30, 2017 (the "Second Quarter Form 10-Q"). See also the disclosures set forth under "Legal Proceedings" in Part I, Item 3 of the Form 10-K and Part II, Item 1 of the First Quarter Form 10-Q and the Second Quarter Form 10-Q.

#### Residential Mortgage and Credit Crisis Related Matters

On August 10, 2017, the plaintiff in *Wilmington Trust Company v. Morgan Stanley Mortgage Capital Holdings LLC et al.* filed a motion for leave to appeal the Appellate Division, First Department's July 11, 2017 decision and order granting in part and denying in part the Firm's motion to dismiss. On September 26, 2017, the Appellate Division, First Department denied plaintiff's motion for leave to appeal.

On August 25, 2017, the parties in *Morgan Stanley Mortgage Loan Trust 2006-4SL, et al. v. Morgan Stanley Mortgage Capital Inc. and Morgan Stanley Mortgage Loan Trust 2006-10SL, et al. v. Morgan Stanley Mortgage Capital Holdings LLC, as successor in interest to Morgan Stanley Mortgage Capital Inc.* entered into agreements to settle the litigations, which are subject to court approval.

On September 11, 2017, the Firm moved to dismiss the second amended complaint in *Phoenix Light SF Limited, et al. v. Morgan Stanley, et al.*

On October 3, 2017, the Appellate Division, First Department denied the Firm's motion for leave to appeal in *Deutsche Zentral-Genossenschaftsbank AG et al. v. Morgan Stanley et al.*

#### Other Matters

On September 8, 2017, the court in *In Re Foreign Exchange Benchmark Rates Antitrust Litigation* granted an order preliminarily approving the Firm's settlement.

On October 5, 2017, various institutional investors filed a claim against the Firm and another bank in a matter styled *Case number BS 99-6998/2017*, filed in the City Court of Copenhagen, Denmark concerning their roles as underwriters of the initial public offering ("IPO") in March 2014 of the Danish company OW Bunker A/S. The claim is based on alleged prospectus liability and seeks damages of DKK 534,270,456 (approximately US\$85 million) plus interest in respect of alleged losses arising from investing in shares in OW Bunker, which entered into bankruptcy in November 2014. Separately, on September 12, 2017, representatives of another group of institutional investors gave formal notice of their intention to commence legal proceedings against the Firm and the other bank. The investors are expected to join the Firm and the other bank to pending proceedings in Copenhagen, Denmark against various other parties involved in the IPO in a matter styled *Case number B-2073-16*. The investors are expected to claim damages of DKK 766,066,012 (approximately US\$121 million) plus interest, also on the basis of alleged prospectus liability.

On October 12, 2017, the Firm reached a settlement in principle with the Environmental Protection Agency in the amount of approximately \$1 million on the Firm's self-disclosure regarding certain reformulated blendstock the Firm blended and sold during 2013 and 2014.

On November 3, 2017, the Firm intends to file its opposition to plaintiffs' motion for class certification in *Alaska Electrical Pension Fund et al. v. Bank of America et al.* (formerly styled *Genesee County Employees' Retirement System v. Bank of America Corporation et al.*).

## Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the information with respect to purchases made by or on behalf of the Firm of its common stock during the quarterly period ended September 30, 2017.

### Issuer Purchases of Equity Securities

<i>\$ in millions, except per share data</i>	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs <sup>1</sup>	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs
<b>Month #1 (July 1, 2017—July 31, 2017)</b>				
Share Repurchase Program <sup>2</sup>	2,729,000	\$ 47.07	2,729,000	\$ 4,872
Employee transactions <sup>3</sup>	769,637	\$ 46.21	—	—
<b>Month #2 (August 1, 2017—August 31, 2017)</b>				
Share Repurchase Program <sup>2</sup>	13,740,000	\$ 46.56	13,740,000	\$ 4,232
Employee transactions <sup>3</sup>	96,764	\$ 46.66	—	—
<b>Month #3 (September 1, 2017—September 30, 2017)</b>				
Share Repurchase Program <sup>2</sup>	10,448,247	\$ 46.12	10,448,247	\$ 3,750
Employee transactions <sup>3</sup>	192,674	\$ 46.11	—	—
<b>Quarter ended at September 30, 2017</b>				
Share Repurchase Program <sup>2</sup>	26,917,247	\$ 46.44	26,917,247	\$ 3,750
Employee transactions <sup>3</sup>	1,059,075	\$ 46.23	—	—

1. Share purchases under publicly announced programs are made pursuant to open-market purchases, Rule 10b5-1 plans or privately negotiated transactions (including with employee benefit plans) as market conditions warrant and at prices the Firm deems appropriate and may be suspended at any time.

2. The Firm's Board of Directors has authorized the repurchase of the Firm's outstanding stock under a share repurchase program (the "Share Repurchase Program"). The Share Repurchase Program is a program for capital management purposes that considers, among other things, business segment capital needs, as well as equity-based compensation and benefit plan requirements. The Share Repurchase Program has no set expiration or termination date. Share repurchases by the Firm are subject to regulatory approval. On June 28, 2017, the Board of Governors of the Federal Reserve System (the "Federal Reserve") announced that they did not object to our 2017 capital plan, which included a share repurchase of up to \$5.0 billion of the Firm's outstanding common stock during the period beginning July 1, 2017 through June 30, 2018. During the quarter ended September 30, 2017, the Firm repurchased approximately \$1.25 billion of the Firm's outstanding common stock as part of its Share Repurchase Program. For further information, see "Liquidity and Capital Resources—Capital Management" in Part I, Item 2.

3. Includes shares acquired by the Firm in satisfaction of the tax withholding obligations on stock-based awards and the exercise of stock options granted under the Firm's stock-based compensation plans.
