## CLIENT BROCHURE

Date of Brochure: March 28, 2024

This Brochure provides information about the qualifications and business practices of **Sage Advisory Services, Ltd. Co.** If you have questions about the contents of this Brochure, please contact us at (512) 327-5530.

The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (SEC) or by any state securities authority.

Additional information about Sage is available on the SEC's website at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov). The SEC's web site also provides information about any persons affiliated with, registered, and required to be registered as investment adviser representatives of Sage.

Sage is a registered investment adviser. The registration of an investment adviser does not imply any level of skill or training. The oral and written communications made to you by Sage, including the information contained in this Brochure, should provide you with information to determine whether to hire or retain Sage as your adviser.

Please be aware during your review of our Brochure when we use the words "Sage", "we" and "our" we are referring to **Sage Advisory Services, Ltd. Co.** When we use the words "you", "your" and "client" we are referring to you as our client or our prospective client. We use the term "Associated Person" when referring to our officers, employees, and all individuals providing investment advice on behalf of Sage.

## ITEM 2 – MATERIAL CHANGES

The following is a summary of material changes made to our Brochure since our last annual update dated March 27, 2023.

### Item 4 – Advisory Business

#### Principal Owners –

In December 2023, Sage completed an agreement with Kudu Investment US, LLC (Kudu) to purchase a minority stake in Sage. As a result of Kudu's minority investment, Sage's ownership structure now consists of Common Shares with voting rights and a newly issued Class A revenue shares with no voting rights. All Common Shares with voting rights are owned entirely by Sage employees. All Class A shares which contain no voting rights are owned by Kudu. Kudu will not be involved in the day-to-day management of Sage and does not have any input in the investment decision making process. The Sage Executive Owners are:

- Robert G. Smith III, its President and Co-Chief Investment Officer
- Thomas Urano, Co-Chief Investment Officer
- Robert Williams, Managing Member
- Michael Walton, Managing Member
- Robert Moser, Managing Member

In addition, Sage has eleven other Managing Members that participate in the management of the firm.

#### Other Information – Operational/Cybersecurity/Information Security Risks

Sage added disclosures to "Other Information" section of the Brochure to disclose operational, cybersecurity and information security risks to current clients and prospects. Successful cyberattacks against Sage or third-party service providers could cause systems to fail, not operate properly or become disabled, overloaded or damaged as a result of a number of factors, including events that are wholly or partially beyond our control, which could have a negative effect on our ability to conduct business activities. While the firm employs resources to protect assets and personally identifiable information, the firm cannot guarantee the protection of all such information, nor assure against all related losses in consideration of the real and evolving cybersecurity risks.

## ITEM 4 – ADVISORY BUSINESS

SAGE ADVISORY SERVICES, LTD. CO. is a Securities and Exchange Commission (SEC) registered investment adviser located in Austin, Texas. Sage was founded in 1996 and is organized as a Texas Limited Liability Company.

Sage strictly offers registered investment advisory services and is not affiliated with any broker-dealer and does not provide investment banking or broker-dealer services.

Sage specializes in domestic and international fixed income, balanced and equity portfolio management for individual and institutional clients. Sage offers a commonsense approach toward investing by utilizing strong risk-control disciplines and a process that is repeatable.

Sage's belief is a conscientiously monitored investment management program designed specifically for each client can satisfy clients' constantly changing investment needs. Sage seeks to add value through its investment management process applied based upon each client's investment risk constraints.

Sage's investment management process combines fundamental economic analysis with quantitative security and yield curve valuation techniques to produce a comprehensive core management style.

### PRINCIPAL OWNERS

In December 2023, Sage completed an agreement with Kudu Investment US, LLC (Kudu) to purchase a minority stake in Sage. As a result of Kudu's minority investment, Sage's ownership structure now consists of Common Shares with voting rights and a newly issued Class A revenue shares with no voting rights. All Common Shares with voting rights are owned entirely by Sage employees. All Class A shares which contain no voting rights are owned by Kudu. Kudu will not be involved in the day-to-day management of Sage and does not have any input in the investment decision making process. Sage remains 100% controlled and operated by Sage employees. The Sage Executive Owners are:

- Robert G. Smith III, its President and Co-Chief Investment Officer
- Thomas Urano, Co-Chief Investment Officer

- Robert Williams, Managing Member
- Michael Walton, Managing Member
- Robert Moser, Managing Member

In addition, Sage has eleven other Managing Members that participate in the management of the firm.

### EDUCATION AND EXPERIENCE

Sage's Associated Persons are expected to have education and business backgrounds that enable them to perform their respective responsibilities effectively. In assigning responsibilities, Sage considers academic background (including studies in college and graduate schools, as well as degrees earned), industry training, licenses and certifications.

Work experience in a related field, such as investments, commodities, insurance, banking or accounting, is also considered.

No formal, specific standards have been set, but appropriate education and experience are required. See ADV Form Part 2B for additional information.

### ASSETS UNDER MANAGEMENT & ASSETS UNDER ADVISEMENT (AUM/AUA)

As of December 31, 2023, Sage manages \$24,629,800,000 in total client assets of which, \$22,607,384,000 is managed on a discretionary basis, \$1,935,802,000 is managed on a model provision basis, and \$86,614,000 is managed on a non-discretionary basis.

### OVERVIEW OF ADVISORY SERVICES

Sage offers investment management services to individuals and high net worth individuals as well as institutional clients, including those clients managed through wrap programs, corporate pension and profit-sharing plans, Taft-Hartley plans, insurance companies, charitable institutions, foundations, endowments, municipalities, registered mutual funds, exchange traded funds, unitized funds, collective investment funds, trust programs, and other U.S. and international institutions.

While Sage generally makes investment decisions on behalf of clients, Sage does permit clients to impose restrictions on investing certain securities or other limitations as mutually agreed upon.

Sage also offers advisory services to clients seeking liability directed investment solutions, fiduciary (3(38)) services, and insurance company specific services.

All clients are subject to a written agreement which describes the nature of our services, limitations, objectives, fees and other matters.

---

## INVESTMENT MANAGEMENT

Sage offers a common sense and client objective-driven approach toward investing with strong risk-control disciplines utilizing a repeatable process. Sage distinguishes itself in the following areas:

- Investment Management - Sage seeks to manage each client's portfolio separately and individually to assist them in obtaining their safety, liquidity, income, tax sensitivity, total return and risk expectations.
- Disciplined Process - Sage adheres to a process that focuses on each client's financial objectives within a mutually understood risk tolerance.
- Client Education - Sage educates clients on market trends, economic forces and investment fundamentals to foster a better understanding of investment decisions.
- Investment Reporting - Sage provides clients with convenient password protected access to their account information anytime, from anywhere via Sage's website.

Sage offers certain investment management services to employers sponsoring defined contribution retirement plans with participant-directed investments. As the plan's fiduciary and investment manager, Sage selects and monitors the exchange traded funds that are offered as investment options to participants under the plan's investment menu.

---

## INVESTMENT PROCESS AND COMMITTEE

Investment decisions are made by Sage's Investment Committee which is chaired by Co-Chief Investment Officers.

Decisions with regard to the broad market outlook, investment strategy and client portfolio positioning are determined by the Investment Committee and recorded in the minutes of the semi-monthly meetings.

The Investment Committee's investment decision process is supplemented regularly with economic and quantitative market analysis along with proprietary ESG analysis provided by Sage's internal research analysts and its external economic and analytic consultants.

After the Investment Committee decides on the duration target, the sector allocation and the security characteristics desired, the portfolio managers, operating on a team basis, implement the decisions reached by the Investment Committee.

Each portfolio is managed separately and tailored to assist respective clients in meeting their safety, liquidity and total return expectations.

It is Sage's belief that only an individually designed and monitored investment management program can satisfy the constantly changing investment needs of each client.

In addition to the Investment Committee, when a client or prospect engages with Sage, they could be interacting with our Portfolio Management team, our Client Service team, or our Institutional and Regional Consultants. Our Institutional and Regional Consultants receive incentive pay that is based on a percentage of revenue derived from the clients that become contracted with Sage.

Please see Item 8 for additional information regarding our investment strategies and please see Item 16 for more information regarding investment discretion and client investment restrictions.

---

## RESPONSIBLE INVESTING INTEGRATION AND METHODOLOGY

Sage believes environmental, social and governance (ESG) considerations are an important driver of long-term investment returns from both an opportunity and risk mitigation perspective. These considerations are integrated across our core business and built into the principles that guide our investment process on behalf of our clients. Sage believes investing with ESG factors in mind allows us to better and more thoroughly understand the issuers that we are investing in and increases our ability to comprehend risks that may be inherent to an industry or are issuer specific.

Fixed Income - For fixed income securities, Sage applies a proprietary framework, the Sage ESG Leaf Score, that provides an assessment of each issue in terms of its preparedness and performance across a range of ESG indicators. Specifically, the process considers the following: financial materiality and ESG risk factors, climate disclosures, relative ranking within an industry peer group, recent involvement in controversies, and ESG trend analysis. The framework incorporates data and analysis provided by the Sage in-house research team and portfolio management team which is supported by third party information and data sources. The Sage ESG Leaf Score assigns each fixed income issuer an ESG score from 1 to 5 leaves where 1 leaf issuers are considered ESG laggards and 5 leaf issuers are considered ESG leaders. Sage ESG Leaf Scores are generated for all issuers in Sage's fixed income universe regardless of whether such securities are held in an account which are managed to an ESG strategy. Generally, to be included in Sage's dedicated ESG strategies an issuer must be assigned a leaf score of 3 or greater. For strategies that are not managed based on ESG factors, Sage ESG Leaf Scores inform investment decisions but are not determining factors.

Actively Managed Exchange Traded Funds (ETF) - Sage's evaluation of ESG is informed by both a stewardship engagement that we conduct with the ETF sponsors as well as ESG data.

First, the stewardship survey, which we conduct annually aims to help us gain a better understanding of how each ETF Sponsor developed and executed its core fiduciary policies and stewardship practices across six core focus areas: voting practices, engagement practices, stewardship professionals, disclosure, climate initiatives, and Diversity, Equity and Inclusion (DEI) policies. Each ETF Sponsor that completes the stewardship survey is assigned a letter grade (A,B,C,D,F) which reflects the relative strength of their respective answers within the peer group for the key focus areas. Each of the focus area grades are then combined to create the cumulative Sage Stewardship Grade for each ETF Sponsor.

Secondly, we leverage data from trusted ESG-data providers, primarily ISS in evaluating the ETF across 3 categories:

- **ISS ESG Fund Rating:** ISS evaluates issuer performance across key ESG criteria. ISS provides grades for each ETF on a 5-star system with the top 10% as 5-Star, 20% as 4-star, and middle 40% as 3-star.
- **Governance Quality:** ISS provides numeric scores for governance risk across four categories: board structure, compensation, shareholder rights, and audit/risk oversight.
- **Carbon and Climate:** ISS provides numeric scores based on ETF alignment with carbon emission budget limits as well as emissions performance across total carbon emissions as well as carbon intensity.

After evaluating data from the stewardship survey as well as ESG performance, governance quality and carbon and climate factors, the ESG research team determines whether the ETF is appropriate for inclusion in the ESG Target Risk ETF models. There is no specific numeric score or grade an ETF is required to have to be included in an ESG Target Risk ETF model, rather the ESG research team comes to a consensus based on a holistic analysis of the stewardship survey results and ISS data.

Impact Investing - Our Impact strategies seek primarily to provide positive environmental and social outcomes. The investable universe is designed using a comprehensive framework that considers use of proceeds, third-party verification, and an issuer-level ESG assessment. For taxable fixed income impact investing strategies, our investible universe includes bonds that are labeled green, social, sustainability, or sustainability linked. These labels identify bonds that are devoted to financing new and existing projects or activities with positive environmental or social impacts. For municipal fixed income impact investing strategies, our investible universe includes municipal issuers whose use of proceeds are directed to financing new and existing projects or activities with positive environmental or social impacts. For all impact investing strategies, post issuance reporting is compared to pre-issuance reporting to ensure the issuer is following through with stated intention.

Socially Responsible Investing (SRI) – SRI investing seeks to avoid investing in businesses perceived to have negative social effects. This type of investing is implemented using an overlay approach to our traditional

strategies, which excludes specific social justice issues specified by the client. Sage currently offers the following SRI screens to our clients: Alcohol, Adult Entertainment, Abortion, Gaming, Tobacco and Weapons. The companies included on these screens are identified by the product and services these companies offer along with company profits derived from such activities.

---

## INVESTMENT STRATEGIES

Sage offers the following actively managed investment strategies:

- Taxable Fixed Income - Sage's client's objectives range from cash management to total return and high total income. Sage also delivers investment strategies in short, intermediate, core duration and ESG profiles. Investment instruments include, but are not limited to, U.S. Government debt, U.S. Corporate debt, U.S. Municipal debt and Securitized Assets, such as mortgage-backed securities and to-be-announced transactions in mortgage-backed securities and other securities ("TBA Transactions").
- Municipal Fixed Income - Sage's client's objectives range from cash management to after-tax total return and high after-tax total income. Sage offers investment strategies in short, intermediate, core duration, laddered, state preference and ESG profiles. Investment instruments include, but are not limited to, U.S. Treasury debt, tax-exempt municipal general obligation debt, and tax-exempt municipal revenue debt.
- Actively Managed Exchange Traded Funds (ETF) - Sage's client's objectives range from long-term total return to low-volatility income generation. Sage offers strategies in multi asset income, core plus equity, core plus fixed income and balanced accounts. Investment instruments include, but are not limited to, equity, fixed income and alternative ETFs. These strategies include Target Risk, Cash Balance strategies, Income Solutions, ESG Target Risk and certain proprietary accounts.

Please see Item 8 for additional information regarding our investment strategies.

---

## WRAP ACCOUNTS

Sage manages wrap accounts using the same investment process described above.

The wrap fee program sponsor pays Sage a portion of the wrap fee they receive for investment management services.

While wrap accounts utilizing the same investment strategy generally perform similarly to the applicable Sage institutional composites, there are expected to be performance differences between them. Actual performance results can differ depending on the size of the account, investment guidelines and/or restrictions, inception date, timing of transactions and other factors. Portfolio Managers, the Systems and Operations Department and Compliance perform regular reviews of performance return dispersion in order to reasonably ensure that certain clients are not favored over other clients.

When managing assets for a wrap platform, Sage will trade away with brokers other than the wrap program sponsor. Trading with other brokers is known as trading away (or engaging in "step out" trades). These trades generally involve fixed income securities and do not include commissions. Please see Item 12 for additional information regarding our Brokerage Practices.

---

## MODEL PROVISION SERVICES

Sage offers model provision ETF allocation services to clients whereby Sage provides the client with an updated model as Sage makes changes to the model. The investment and research process for the Sage Tactical ETF strategies follows the same investment strategy as Sage's Actively Managed ETF strategies described above.

In addition, Sage offers model provision Taxable and Municipal Fixed Income allocation services to clients whereby Sage provides the client analysis on specific fixed income securities to purchase for the portfolio. The investment and research process follows the same investment strategy as the Taxable and Municipal Fixed Income strategies described above.

While model provision accounts that utilize the same investment strategy generally perform similarly to the applicable Sage composites, there are expected to be performance differences between them because Sage

does not have trading discretion over these accounts. Actual performance results can differ depending on the size of the account, investment guidelines and/or restrictions, inception date, timing of transactions and other factors.

### **SAGE COLLECTIVE INVESTMENT FUNDS (CIF)**

Collective Investment Funds (CIFs) are institutional investment vehicles that are solely available for ERISA retirement plans. Like mutual funds, CIFs allow investors efficient access to an investment strategy, offer daily valuation and are easily traded through the National Securities Clearing Corporation (NSCC). Relative to mutual funds, CIFs offer a transparent institutional fee structure and more flexible record keeper pass-through arrangements.

Sage has CIFs created and sponsored by Reliance Trust Company, that invests in the strategies of Sage Advisory Services, Ltd. Co., which serves as a co-subadvisor along with SageView Investment Services to the CIFs.

In addition, Sage has CIFs created by the Hand Composite Employee Benefit Trust and sponsored by Hand Benefits & Trust Company, a BPAS company, that invests in the strategies of Sage Advisory Services, Ltd. Co. which serves as the subadvisor to the CIFs.

These CIFs are available for investment by eligible qualified retirement plan trusts only and have been created specifically for employer-sponsored retirement plan investors.

### **LIABILITY DIRECTED INVESTMENT SOLUTIONS**

In addition to traditional investment management services, Sage offers a comprehensive and innovative combination of analytic, investing and reporting services which focus on the key concerns in building an effective Liability Directed Investment management strategy.

Specifically, Sage offers two categories of services:

- Asset/Liability Analysis, and
- Liability Driven Investing.

Sage provides these services independently or conjunctively for its clients. For example, Sage has clients for whom it solely performs Asset/Liability Analysis, clients for whom it solely provides Liability Driven Investing, and finally, clients for whom it

performs Asset/Liability Analysis and provides Liability Driven Investing.

Asset/Liability Analysis is the first step in Asset/Liability Management and involves assessing a client's liability structure and existing asset solution given the current applicable regulatory environment by employing the following analyses:

- Term structure assessment
- Dynamic cash flow modeling
- Interest rate & inflation risk sensitivity analysis
- Customized liability benchmark creation
- Gap analysis & risk budget creation
- Deterministic and stochastic modeling of asset returns
- Accounting and statutory projections using actuarial forecasting software (optional)

Liability Driven Investing is the second step in Asset/Liability Management and involves developing and implementing a particular investment management solution given the client's liability structure, funded status and goals. The investment solution will include as warranted:

- Liability targeted investments
- Long duration portfolio management
- Excess alpha and low correlation investment strategies
- A broad range of investments such as futures, swaps and other derivative instruments, if warranted

If a client retains Sage to perform Asset/Liability Analysis, Liability Driven Investing or both, Sage provides reporting and administration services as follows:

- Daily online investment valuation and activity reports
- Year-round investment compliance and oversight reports
- Customized periodic performance evaluations
- Monthly liability benchmark updates

- Assessment & negotiation of derivative agreements, if required

### **FIDUCIARY (3(38)) SERVICES**

ERISA Plan Fiduciaries can engage Sage as a co-fiduciary to provide one or more of the following services: investment policy statement assistance, selection and monitoring of investment options, creation and monitoring of investment strategies, asset/liability analytics, and comprehensive reporting.

Specifically, Sage offers two categories of services:

- Fiduciary Services for DC Plans; and
- Pension Risk Management for DB Plans.

#### Fiduciary Services

Sage Fiduciary Services provide plan fiduciaries of DC plans with investment selection support, a flexible suite of Qualified Default Investment Alternative (QDIA) options, and comprehensive reporting. Plan investment solutions are generally implemented with index-based mutual funds, ETFs, or CITs which are low-cost, efficient, and transparent. Additionally, as needed, Sage Fiduciary Services will provide non-fiduciary services, including but not limited to employee enrollment and education.

#### Pension Risk Management

Sage serves as a fiduciary partner to plan fiduciaries of DB plans by providing asset/liability analytics, an appropriate pension investment solution, and supportive monitoring and reporting. Plan investment solutions are implemented entirely with ETFs which are low-cost, efficient, and transparent.

### **INSURANCE COMPANY SERVICES**

Sage offers a comprehensive and innovative combination of analytic, investing and reporting services which focus on the key concerns in building an effective management strategy for insurance organizations.

#### Insurance Liability Assessment and Analysis

- Term structure analysis
- Dynamic cash flow modeling
- Interest rate & inflation risk sensitivity analysis
- Customized liability benchmark creation
- Gap analysis & risk budget creation

- Balance sheet and income statement projections
- Tax efficiency analysis

#### Insurance Investment Management

- Liability targeted investments
- Long duration portfolio management
- Excess alpha and low correlation investment strategies
- Tax sensitive portfolio management

#### Insurance Reporting and Administration

- Daily online investment valuation and activity reports
- Year-round investment compliance and oversight reports
- Customized quarterly performance evaluations
- Monthly liability benchmark updates
- Statutory insurance reporting, including Schedule D reporting
- Investment Accounting

### **INVESTMENT ADVISORY SERVICES TO REGISTERED INVESTMENT COMPANIES**

Sage acts as a sub-advisor to registered Funds that are advised by Touchstone Investments, LLC and Envestnet Asset Management, Inc. For its sub-advisory services to these Funds, Sage receives an annual sub-advisory fee based on the average daily value of the assets under management in the Fund(s). Sage currently sub-advises the Touchstone Core Municipal Bond Fund (TOHAX) advised by Touchstone Advisors and part of the Touchstone Strategic Trust. Sage also sub-advises the ActivePassive Core Bond ETF (APCB) advised by Envestnet Asset Management, Inc. and part of the Trust for Professional Managers. Please see the respective Fund's prospectus and Statement of Additional Information for additional information regarding objectives, investments, fees, risks and other additional disclosures.

### **ITEM 5 – FEES AND COMPENSATION**

Sage is compensated by receiving a mutually agreed upon percentage of the assets under management or by receiving a fixed fee.

**INVESTMENT MANAGEMENT FEE CALCULATION & PAYMENT PROCEDURE**

Sage manages accounts for a variety of individual and institutional clients on a discretionary and/or non-discretionary basis, subject to the investment guidelines contained in their respective client agreement.

- The amounts and specific manner in which fees are charged is negotiated and memorialized in each client’s agreement with Sage.
- Sage does not deduct fees from client accounts.
- Sage invoices clients directly.
- Sage generally invoices clients in advance on a quarterly basis and will also invoice in arrears or prorate fees for capital contributions and withdrawals.
- Accounts initiated or terminated during a calendar quarter will be charged a prorated fee.
- On the termination date of an account, any prepaid, unearned fees will be promptly refunded and earned, unpaid fees will be due and payable.
- Sage’s client agreement typically requires 30 days’ notice for termination.

Sage uses account market values to calculate investment performance and client fees, where applicable. Sage uses pricing information provided by Bloomberg Valuation Services (“BVAL”) to value client portfolios. In instances where Sage is unable to determine a price for a security or determines a price received from BVAL is not reflective of fair market value, Sage will determine a fair value for that security according to the methodology outlined in Sage’s Portfolio Valuation Policy.

There are inherent conflicts of interest when Sage values client accounts, as higher security prices increase market values, thereby enhancing performance results and increasing fees. In addition, because clients pay different fees based on differing fee schedules or the size of the account, Sage has an incentive to favor those accounts where it earns the highest fees. Sage maintains investment, trade allocation and account valuation (including fair valuation) policies and procedures to address such conflicts of interest. Further, investment performance return dispersion is reviewed regularly by Portfolio Managers, the Systems and Operations Department and Compliance to

reasonably ensure certain clients are not favored over other clients.

When providing investment management services to employers sponsoring defined contribution plans with participant-directed investments, Sage will invoice clients directly or as expressly directed by the plan sponsor in the investment management agreement.

**INVESTMENT MANAGEMENT FEE SCHEDULES**

Sage’s standard fee schedules (including those for its Model Provision ETF and Wrap Program account clients) are provided below. However, in some instances, Sage will negotiate from its standard fee schedule, or waive fees, based upon the circumstances. Sage maintains investment, trade allocation and account valuation policies and procedures designed to address potential conflicts of interest related to the fact that clients pay varying fees.

Fixed Income Strategies	ETF Strategies
Cash Duration .20 of 1% to \$10 Million .15 of 1% to \$15 Million Negotiable over \$25 Million	All Cap Core Plus Equity Core Plus Fixed Income Target Risk Portfolios ESG Target Risk Portfolios Multi Asset Income Multi Sector Income .40 of 1% to \$10 Million .35 of 1% on next \$15 Million .25 of 1% on next \$25 Million Negotiable over \$50 Million
Short Duration Moderate Duration Intermediate Duration Core Duration Long Duration .35 of 1% to \$10 Million .25 of 1% on next \$15 Million .20 of 1% on next \$25 Million Negotiable over \$50 Million	Cash Balance .40 of 1% to \$3 Million .35 of 1% on next \$7 Million .30 of 1% over \$10 Million Negotiable over \$25 Million
Liability Driven Investment (LDI) Management (6+ Years Duration) High Yield Portfolios .40 of 1% to \$10 Million .35 of 1% on next \$15 Million .25 of 1% on next \$25 Million Negotiable over \$50 Million	Municipal Laddered Strategies .20 of 1% for balance

Sage’s investment management fee for employers sponsoring defined contribution plans with participant-directed investments is negotiable for each particular plan client’s situation and other relevant factors,

including but not limited to the size of the plan, number of participants and the plan's custodial and recordkeeping arrangement.

Clients who select Sage to manage their SMA assets through a wrap fee program will typically do so under a single contract that the client enters into with the sponsor of the wrap fee program ("Sponsor Firm"). Under this kind of arrangement, the client pays an asset-based fee to the Sponsor Firm and, out of that fee, the Sponsor Firm is responsible for paying an investment advisory fee to Sage pursuant to the fee agreed upon in the sub-advisory agreement between Sage and the Sponsor Firm. Sage's advisory fees are negotiated separately with each Sponsor Firm and will vary from wrap program to wrap program. Further, the fees paid to Sponsor Firms by clients participating in wrap programs will vary and Sage does not have control or influence over the fees charged to clients by Sponsor Firms.

#### **FEE SCHEDULE FOR ASSET/LIABILITY ANALYSIS & ANALYTICS**

Asset/Liability Study:

- Initial Asset/Liability Study Base Fee: \$15,000
- Subsequent Annual Study Fee: \$15,000
- Semi-Annual or Quarterly Update Fee: \$2,500

(Per each inter-period update other than an initial or annual report)

Fees for Asset/Liability Analysis & Analytics will be increased above the fee schedule amount based on Sage's determination of the novelty, complexity and/or time required to perform these analyses. Additionally, any requested revisions, including additional assumption testing and/or scenarios, will result in additional fees depending on the nature and extent of the revisions.

Fixed income management assignments of at least \$25 million requesting the Asset/Liability Study above will be provided the study as part of the overall investment management fee as outlined in the investment management fee schedule above.

In the event the fixed income assignment is less than \$25 million the fees for each of the services will be billed separately as outlined in the Investment Management Fee Schedule and the Fee Schedule for Asset Liability Analysis & Analytics sections above.

In some instances, Sage will negotiate from its standard fee schedule based upon the circumstances. Fees for the Asset Liability services will be billed upon completion and paid prior to sending the final report.

#### **FEE SCHEDULE FOR FIDUCIARY SERVICES**

Fiduciary Services for DC plans:

- .45 of 1% to \$10 Million
- .35 of 1% on next \$15 Million
- .25 of 1% on next \$25 Million
- Negotiable over \$50 Million

Fees for 3(38) fiduciary services are assessed at the plan level and where Sage-managed CITs are components in the plan investment line-up, Sage will charge zero sub-advisor fees for assets placed in the Sage-managed CITs.

Sage, from time to time, selects and works with certain subcontractors to provide Fiduciary Services to DC Plans. In those situations, the subcontractor provides certain related assistance and supporting services to the DC plan on behalf of Sage as an unaffiliated subcontractor to the Sage. As compensation for these services, the subcontractor will receive a portion of the fee payable to the Sage. These fee sharing payments are made from Sage's assets. As a result, the payments from Sage to a subcontractor do not directly impact any DC plan's assets or result in the DC plan's payment of an additional fee.

Pension Risk Management:

- .40 of 1% to \$15 Million
- Minimum fee of \$20,000

#### **SCHEDULE D REPORTING FOR INSURANCE CLIENTS FEE SCHEDULE**

The minimum fee for Schedule D services for Insurance Companies is:

- 2.5 basis points on the net asset value of the entire investment portfolio subject to an annual minimum fee of \$15,000.
- Additional fees are generally charged for additional entities and services, including automated general ledger accounting and backloading data.
- In the event there is more than one investment manager for the portfolio the fee may be higher and is subject to negotiation.

- The fee will be billed quarterly in advance based on the net asset value of the portfolio on the last business day of the preceding quarter.
- If the Schedule D services are terminated (generally upon 7 days' notice) before the end of a quarter, fees paid in advance will be pro-rated for the period and the excess refunded promptly to the client.

#### **CLIENT'S RESPONSIBILITY OF THIRD-PARTY FEES**

Sage's investment management fees are exclusive of brokerage commissions, transaction fees, and other related costs and expenses which shall be incurred by the client. Clients will incur certain charges imposed by custodians, brokers, third party investment advisers and other third parties. Please see Item 12 for additional information about Sage's brokerage practices.

Mutual funds and exchange traded funds also charge internal management fees and other expenses which are disclosed in the fund's prospectus.

Such charges, fees and commissions are exclusive of Sage's fee. Sage does not receive any portion of these commissions, fees and expenses.

#### **ITEM 6 – PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT**

Sage does not charge any performance-based management fees.

#### **ITEM 7 – TYPES OF CLIENTS**

Sage offers investment management services to individuals and high net worth individuals as well as institutional clients, including those clients managed through wrap programs, corporate pension and profit-sharing plans, Taft-Hartley plans, insurance companies, charitable institutions, foundations, endowments, municipalities, registered mutual funds, exchange-traded funds, unitized funds, collective investment funds, trust programs, and other U.S. and international institutions.

Sage generally requires the account minimums listed below; however, account minimums are subject to negotiation.

Client Type	Minimum Account Size
Wrap Program Clients	\$75,000
Wrap Program ESG Clients	\$100,000
Model Provision ETF Clients	\$25,000
Model Provision ETF ESG Clients	\$25,000
Taxable Clients	\$1 million
Municipal Clients	\$1 million
ESG Clients	\$1 million
Actively Managed ETF	\$1 million
Liability Driven Investing	\$10 million
Pension Risk Management	\$1 million
Fiduciary Services for DC Plans	\$1 million
Insurance Company Clients	\$1 million

Sage manages certain proprietary accounts which are traded alongside client accounts which creates an incentive for Sage to favor proprietary accounts over other client accounts. Sage employees are allowed to invest in the Fund(s) for which Sage provides sub advisory services. Sage maintains investment, trade allocation and account valuation (including fair valuation) policies and procedures to address conflicts of interest related to these accounts.

#### **ITEM 8 – METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS**

##### **ANALYSIS METHODS**

Security analysis methods utilized by Sage include the following:

## FUNDAMENTAL

Fundamental analysis maintains that markets may misprice a security in the short run, but that the "correct" price will eventually be reached by the market. The fundamental analysis of a business involves analyzing a business's financial statements and health, management and competitive advantages, and competitors and markets.

When applied to futures and foreign exchange, it focuses on the overall state of the economy, interest rates, production, earnings, and management.

## SOURCES OF INFORMATION

Sources of information Sage uses to analyze investment strategies include, but are not limited to, the following:

- Proprietary in-house research.
- Quantitative analytics & forecasting.
- NRSRO - Nationally Recognized Statistical Rating Organizations.
- Third party research materials & reports.
- Standard & subscribed databases.
- Financial newspapers and magazines
- Annual reports, prospectuses and Securities & Exchange Commission filings.

## INVESTMENT STRATEGY RISKS

### TAXABLE FIXED INCOME

**Principal Investment Risks.** Losing a portion or all of an investment is a risk of investing in taxable fixed income securities. The following principal risks could affect the value of a client's investment:

- **Debt Securities Risk.** Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.

- **U.S. Government Obligations Risk.** If a government-sponsored entity is unable to meet its obligations, the performance of the strategy that holds securities of the entity will be adversely impacted. U.S. Government obligations are viewed as having minimal or no credit risk but are still subject to interest rate risk.
- **Mortgage and Asset-Backed Securities Risk.** Mortgage and asset-backed securities risk includes market risk, interest rate risk, credit risk, prepayment risk (*i.e.*, homeowners whose mortgages collateralize the securities held by the Funds may be able to prepay principal due on these mortgages), counterparty-risk and risks related to collateral posted in transactions such as TBA Transactions, as well as the risk that the structure of certain mortgage-backed securities may make their reaction to interest rates and other factors difficult to predict, making their prices very volatile.
- **Issuer Risk.** The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods and services.
- **Liquidity Risk.** Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.
- **High Yield Bond Risk.** While high yield bonds generally pay higher interest rates than other fixed income securities, there is a higher risk of income and principal loss.

### MUNICIPAL FIXED INCOME

**Principal Investment Risks.** Losing a portion or all of an investment is a risk of investing in municipal fixed income securities. The following principal risks could affect the value of a client's investment:

- **Municipal Securities Risk.** Municipal securities rely on the creditworthiness or revenue production of their issuers or auxiliary credit enhancement features. Municipal securities may be difficult to obtain because of limited supply, which may increase the cost of such securities and effectively reduce a portfolio's yield. Typically, less information is available about a municipal issuer than is available for other types of securities issuers.

- *Debt Securities Risk.* Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.
- *Tax Risk.* A strategy that invests in municipal securities may be more adversely impacted by changes in tax rates and policies than other strategies. Because interest income on municipal obligations is normally not subject to regular federal income taxation, the attractiveness of municipal obligations in relation to other investment alternatives is affected by changes in federal income tax rates applicable to, or the continuing tax-exempt status of, such interest income.
- *Issuer Risk.* The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods and services.
- *Liquidity Risk.* Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

#### LIABILITY DRIVEN INVESTING, FIDUCIARY SERVICES, AND INSURANCE COMPANY SERVICES

- *Debt Securities Risk.* Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.
- *Futures Risk.* On occasion, Sage may recommend its Liability Driven Investing clients invest in futures to help lengthen duration. Risks in such

transactions include but are not limited to counterparty failures and risks related to collateral or margin. The use of futures can magnify the risk of loss in an unfavorable market. Futures may not always be successful hedges and their prices can be highly volatile. Using futures could lower the client's total return, and the potential loss can exceed a strategy's initial investment in such contracts.

- *Liability Risk.* The measurement of liabilities, whether pension fund, insurance, or non-profit, involve certain forward-looking assumptions and actuarial data. Actuarial data are affected by many factors, such as changes to fund provisions, participant population, and actuarial assumptions, and therefore are subject to change. Liability forecasts, and the current pricing of those forecasts, will be subject to change and should be monitored accordingly.
- *Issuer Risk.* The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods and services.
- *Liquidity Risk.* Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

#### EXCHANGE TRADED FUNDS

- *ETF Trading Risk.* This strategy invests in ETFs. ETFs are investment companies that are bought and sold on a national securities exchange. Unlike mutual funds, ETFs do not necessarily trade at the net asset values of their underlying securities, which means an ETF could potentially trade above or below the value of the underlying portfolios. Additionally, because ETFs trade like stocks on exchanges, they are subject to trading and commission costs unlike mutual funds. Also, both mutual funds and ETFs have management fees that are part of their costs, and the strategy will indirectly bear its proportionate share of these costs.
- *Issuer Risk.* The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial

leverage, and reduced demand for the issuer's goods and services.

- *Liquidity Risk.* Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

### ESG INVESTMENT STRATEGY RISK

ESG Investment Strategy Risk. The ESG investment strategy limits the types and number of investment opportunities available and, as a result, may underperform other funds that do not have an ESG focus. The ESG investment strategy may result in the strategy investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, the Index Provider may be unsuccessful in creating an index composed of companies that exhibit positive ESG characteristics. Lastly, given the increased market demand for ESG-related and/or ESG driven investment portfolios, publicly traded companies have an incentive to "greenwash" their practices (i.e. to describe neutral or unsustainable practices as "green") in order to be considered for ESG strategies which could result in Sage selecting securities and/or creating an ESG portfolio that does not meet its stated ESG criteria.

### OTHER INFORMATION

In addition to the strategy specific risks identified above, client accounts are subject to general market risk and investing in securities involves risk of loss that clients should be prepared to bear. Securities purchased and held in client accounts may decline in value because of a general decline in the market. Securities markets move in cycles, with periods of rising prices followed by periods of falling prices. The value of the securities held in client accounts will tend to increase or decrease in response to these movements. Sage does not offer any products or services that guarantee rates of return on investments for any time period to any client. All clients assume the risk that investment returns may be negative or below the rates of return of other investment advisers, market indices or investment products.

### ITEM 9 – DISCIPLINARY INFORMATION

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to the evaluation of Sage or the integrity of Sage. Sage has never had disciplinary information disclosures applicable to this item.

### ITEM 10 – OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

Sage provides investment management services to registered investment companies on a sub-advised basis. Sage also sub-advises certain CIFs that are intended to serve as investment options for defined contribution plans with participant-directed investments. Sage is not registered as a Commodities Trading Adviser, in reliance on an exemption from registration with the CFTC under the Commodity Exchange Act.

### ITEM 11 – CODE OF ETHICS

Sage has adopted a Code of Ethics and Personal Trading Policy (the "Code") in compliance with Rule 204A-1. The Code expresses the policy and procedures of Sage and is intended to ensure that no Associated Person is taking advantage of his or her position, or even giving the appearance of placing his or her own interests above those of Sage's clients. Sage's personnel must act as fiduciaries, and as such must place the interests of clients before their own.

Sage's Code includes:

- standards of business conduct, including limitations on giving and receiving gifts and business entertainment, making political contributions, serving as a director or trustee for an outside organization and engaging in outside business activities;
- compliance with federal securities laws;
- personal securities reporting;
- pre-clearance of certain transactions;
- prohibitions from using nonpublic information to trade in personal or client accounts;
- reporting of code violations; and
- review and enforcement.

All Associated Persons receive and acknowledge the Code and Sage's Compliance Policy Manual. In addition, all Associated Persons are required to certify compliance with the Compliance Policy Manual, including the Code, on an annual basis.

#### **PERSONAL TRADING POLICY**

Sage has adopted a personal trading policy outlined within its Code.

Sage's policy is based on the principle that it owes a fiduciary duty to clients to conduct personal securities transactions in a manner that does not interfere with client transactions or otherwise take unfair advantage of their relationship with clients.

Sage requires Associated Persons to pre-clear certain personal securities transactions. In addition, the Code requires Associated Persons to report certain security holdings initially upon being hired and annually thereafter. Finally, Associated Persons are required to report personal securities transactions to the Chief Compliance Officer on a quarterly basis.

Sage has certain proprietary accounts which fall under the definition of beneficial ownership due to certain Associated Persons' ownership stake in the firm. As provided for in Sage's portfolio management and trading policies, these accounts will participate in trade orders along with client accounts. This creates an incentive for Sage to put the interests of the firm ahead of clients; however, the Code requires Sage to put clients' interests first and to report personal transactions and holdings to the Chief Compliance Officer in accordance with the reporting requirements described above. These accounts are exempt from the pre-clearance requirements and personal trading restrictions described above provided the transactions are done in accordance with Sage's portfolio management and trading policies and procedures.

#### **COMPLIANCE WITH THE CODE OF ETHICS**

Sage's Chief Compliance Officer is primarily responsible for implementing and administering the Code. Associated Persons are required to report any violations of the Code or applicable laws. Failure to comply with the Code can result in disciplinary action, up to and including termination.

Upon request, Sage will provide a complete copy of our Code at no charge.

## **ITEM 12 – BROKERAGE PRACTICES**

### **OVERSIGHT**

Sage's Brokerage Oversight Committee provides oversight of trading and brokerage policies and practices. In addition, Sage maintains investment, trading and brokerage policies and procedures. The following is an overview of trading and brokerage practices, policies and procedures.

### **SOFT DOLLAR ARRANGEMENTS OR OTHER BENEFITS**

Sage does not have any formal or informal soft dollar arrangements with brokers. On occasion, Sage receives unsolicited research from outside sources. This information is not used in the investment decision-making process.

### **SELECTION OF BROKERS**

Sage utilizes traditional brokers, electronic communication networks and trading systems to execute trades on clients' behalf. Sage has established a Brokerage Oversight Committee to monitor and evaluate the quality of execution received from broker-dealers executing transactions on behalf of Sage's clients and to oversee trading practices and procedures. Sage's overriding objective in effecting portfolio transactions is to seek best execution. While the best price, giving effect to brokerage commission, if any, and other costs, is an important factor in this decision, a number of other factors will also enter into the decision. These include:

- Ability to locate liquidity;
- Inventory of fixed income securities;
- New issue supply or underwriting;
- Knowledge of and dominance in specific markets, securities and industries;
- Participation in bid/want lists;
- Quality of execution;
- Financial condition of the firm;
- Acceptable record keeping, administrative and settlement functions; and
- Reputation and integrity.

Recognizing the importance of these factors, Sage may pay commissions in excess of that which another broker or dealer might have charged for effecting the same transaction.

When managing assets for a wrap platform, Sage will trade away with brokers other than the wrap program sponsor. Trading with other brokers is known as trading away (or engaging in “step out” trades). These trades generally involve fixed income securities and do not include commissions.

Lastly, Sage traders occasionally receive entertainment, opportunities to participate in conferences or other organized events arranged by brokers. These events provide our traders with the opportunity to discuss a broad variety of educational topics specific to securities they trade. These activities pose a conflict where Sage’s traders could favor particular brokers that sponsor said activities. However, these activities are not included as criteria in Sage’s Broker Selection process.

#### **BROKERAGE FOR CLIENT REFERRALS**

Sage does not consider a broker-dealer’s promotion or sale of registered investment companies sub-advised by Sage when determining whether to select such broker-dealer to execute transactions for clients.

#### **CLIENT DIRECTED BROKERAGE**

In very limited circumstances, clients require Sage to direct transactions in their accounts to a particular broker-dealer (“directed brokers”). For clients utilizing a directed broker, the client may forgo any benefit from savings on execution costs that Sage may obtain for other clients, such as negotiating volume discounts on blocked orders. In addition, the client may not receive the same price or commission paid by other clients who utilize different brokers selected by Sage.

#### **TRADE AGGREGATION AND ALLOCATION**

##### **TAXABLE FIXED INCOME**

It is Sage’s policy to trade taxable fixed income securities for client accounts based on each client’s investment strategy. When practical, Sage separate client account trades will be bunched in a single order (a “block”) in an effort to obtain best execution. Sage seeks to block account trades and avoid partial fill situations. If a block

order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block trade will receive the average price. Only trades executed within the block on the single day are combined for purposes of calculating the average price. While generally infrequent, partial fills are allocated to give priority to those accounts that require alignment with its investment strategy. On occasion, in order to avoid odd lots Sage will identify a comparable bond that will be allocated to client accounts in which case the original allocation will be revised for the original bond.

##### **MUNICIPAL FIXED INCOME**

It is Sage’s policy to trade tax-exempt fixed income for client accounts based on each client’s investment strategy. When practical, Sage seeks to block account trades and avoid partial fill situations. If a block order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block trade will receive the average price. Only trades executed within the block on the single day are combined for purposes of calculating the average price. While generally infrequent, partial fills are allocated to give priority to those accounts that require alignment with its investment strategy. On occasion, in order to avoid odd lots Sage will identify a comparable bond that will be allocated to client accounts in which case the original allocation will be revised for the original bond.

##### **ACTIVELY MANAGED ETF**

It is Sage’s policy to make investment recommendations for actively managed ETF accounts, including Sage’s proprietary accounts, together. Once a decision has been made to update the ETF investment allocation model(s), Sage rotates the order in which clients are notified of changes to the model including Sage’s trading desk which then executes trades on behalf of clients. Sage does not exercise trading discretion over its model provision accounts. Sage utilizes a rotation process to place trades on behalf of client accounts and notify its model provision participating platforms of model changes so

that no group of clients is consistently favored or disfavored over any other clients.

Certain actively managed ETF clients direct Sage to use a specific broker-dealer to execute trades. Sage will generally place these trades simultaneously with other client trades. Please see the Client Directed Brokerage Section for additional information.

If a block order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block trade will receive the average price. Only trades executed within the block on the single day are combined for purposes of calculating the average price. While generally infrequent, partial fills are allocated to accounts within the strategy on a pro rata basis, subject to rounding and reasonable efforts to minimize trading costs.

#### **DEVIATIONS FROM POLICY**

Sage's policy allows for acceptable deviations from the practices described above.

#### **CROSS TRADES**

Cross transactions are generally infrequent, Sage will enter into cross transactions between client accounts when, in Sage's judgment, it is in the best interest of each client participating in the transaction. Sage uses Electronic Trading Networks (ECNs) to execute cross transactions on behalf of clients. Sage believes the ECNs solution helps ensure cross transactions are executed in a competitive environment without giving preferential treatment to either the buyer or the seller of the security. Sage will place the security on the trading network, with a bid price provided by Bloomberg Valuation Services ("BVAL") and adjusted as necessary to provide the most competitive price for the security in current market environment. If the price provided by Sage wins the bid, the cross transaction will be executed. If another broker-dealer wins the bid, the trade will be executed to the winning broker and no cross transaction will take place. Sage will not receive any fee or other compensation, other than their advisory fees, for effecting a cross transaction.

Sage will typically engage in cross transactions when one client needs to sell a bond as a result of an account liquidation, client instruction to raise cash, or portfolio rebalancing and another client is in need of a similar position. The accounts needing the bonds are typically new accounts that are not fully invested, accounts with high cash balances, and accounts that need to be brought in line with composite characteristics. When executing cross transactions, the firm strives to achieve best execution and considers the following factors when selecting a broker-dealer with which to cross trade:

- Ability to provide liquidity;
- Knowledge of and dominance in specific markets, securities and industries;
- Price;
- Quality of execution;
- Acceptable record keeping, administrative and settlement functions;
- Execution of cross trades; and
- Reputation and integrity; and
- Financial condition of the firm.

Sage will not engage in cross transactions with its ERISA accounts, IRAs, proprietary accounts or Funds sub-advised by the firm.

All cross transactions will be done in accordance with our Cross Transactions Policy. In addition, the Brokerage Oversight Committee is responsible for oversight of cross transactions.

#### **TRADE ERRORS**

It is Sage's policy for clients to be made whole following a trade error. When Sage causes a trade error to occur in a client account that results in a loss, Sage will reimburse the client. If the trade error results in a gain, the client will keep that gain. In situations where a trade error occurs due to a third party's error, Sage will work with the third party to reasonably ensure the client is not negatively impacted by the error.

### **ITEM 13 – REVIEW OF ACCOUNTS**

#### **ACCOUNT REVIEW**

Sage regularly monitors and reviews client accounts with the objective of ensuring Sage operates in accordance with: clients' investment policy statements, investment objectives and investment restrictions;

written disclosures; management objectives; and Sage’s fiduciary obligation to act in the best interests of its clients. Reviews are consistently performed by the investment personnel assigned to the account and all accounts are reviewed on a regular basis. Clients are generally provided with monthly reports, while certain clients receive additional reporting based on the nature of the services received.

## REPORTS

Our practice is to provide monthly portfolio evaluations, quarterly performance reviews and pertinent investment commentaries. Sage provides clients with convenient password protected access to their account information anytime, from anywhere via Sage’s website. Since Sage does not perform any custodial services, reports concerning such services will be forwarded directly to the client by the custodian.

## ITEM 14 – CLIENT REFERRALS AND OTHER COMPENSATION

### CLIENT REFERRALS

On occasion, Sage has entered into agreements with third parties who refer potential clients to Sage (“Promoters”). Sage will only compensate directly or indirectly, for client referrals in compliance with Rule 204(4)-1 of the Investment Advisers Act of 1940 (the “Advertising Rule”). The Advertising Rule requires, with some exceptions, client referral activities in exchange for direct or indirect compensation to be subject to a written agreement, disclosures to be provided to the prospective client that explains the compensation and related conflicts of interest and prohibits Promoters with certain disciplinary history from being compensated for referring clients to Sage.

In addition, Sage enters into marketing arrangements with other registered investment advisers and broker-dealers pursuant to which representatives of their firms, financial advisors, offer our services to the public. The Financial Advisor will consult with the client to assess their financial situation and identify their investment objectives and will make a determination that Sage’s services are suitable for the client before recommending Sage. The Financial Advisor will then contact the client at least annually regarding the suitability of Sage’s services for their account. Through

these arrangements, Sage pays a cash referral fee to the Financial Advisor’s firm based upon a percentage of Sage’s advisory fee pursuant to a written agreement. In connection with these arrangements, Sage will comply with the Advertising Rule requirements described above.

Promoters and Financial Advisors that refer potential clients to Sage have an incentive to make such referrals because of the compensation received for client referrals. Any material conflict between the Promoter or Financial Advisor and Sage will be disclosed to the potential client by either Sage or the Promoter or Financial Advisor. Additionally, Sage’s CCO oversees referral arrangements and Sage maintains policies and procedures, to reasonably ensure referrals in exchange for direct or indirect compensation are carried out in compliance with the Advertising Rule.

### OTHER THIRD PARTIES

#### OUTSIDE CONSULTANTS

Many of our clients and prospective clients retain investment consultants to advise them on the selection and review of investment managers. We provide information concerning our investment strategies to consultants who use that information in connection with the searches they conduct for their clients. On occasion we respond to a request for proposal in connection with those searches. In addition, consultants request information from us or provide direction to us concerning the accounts we manage for our mutual clients.

We do not compensate any consultant for making such introductions but in some cases, we do pay for the opportunity to participate, along with other investment managers, in conferences or other organized events arranged by consultants. These events provide us with the opportunity to discuss a broad variety of business topics with consultants, clients and prospective clients. In addition, we do invite consultants to events or other entertainment hosted by our firm.

#### REGISTERED INVESTMENT COMPANIES

Sage uses various registered investment companies to implement our actively managed exchange traded strategies. From time to time, Sage will receive compensation from some registered investment

companies to supplemental marketing efforts. This creates a conflict for Sage where we could use said registered investment companies' products within our strategies. Sage does not consider this practice when choosing investment options within our strategies.

#### ITEM 15 – CUSTODY

Sage has limited custody for the sole purpose of deducting advisory fees directly from some of our client accounts. Sage does not maintain custody of client assets. Sage's clients should receive quarterly statements from their broker dealer, bank or other qualified custodian that holds and maintains their investment assets.

Sage urges clients to carefully review their statements and compare the qualified custodian statement to the account statements that Sage provides.

Our statements can vary from custodial statements based on accounting procedures, trade reporting dates, or valuation methodologies of certain securities.

#### ITEM 16 – INVESTMENT DISCRETION

Sage generally provides portfolio management services on a discretionary basis; however, some accounts are managed on a non-discretionary basis. All accounts are subject to a written investment advisory agreement which describes discretionary authority, any investment limitations, investment objectives, fees and other matters.

#### ITEM 17 – VOTING CLIENT SECURITIES

A client's investment advisory agreement with Sage governs the responsibility for voting proxies within client accounts. As Sage is primarily a fixed income investment manager it is very rare for Sage to receive a proxy in which to vote. In limited situations, Sage will receive a proxy to vote as a result of a client holding fixed income corporate obligations and ETFs. When providing investment management services to employers sponsoring defined contribution plans with participant-directed investments,

Sage will be responsible for voting any proxies relating to the exchange traded funds that are offered as investment options to participants under the plan, unless the plan sponsor reserves such responsibility to

itself in accordance with ERISA and as provided under the investment management agreement.

When voting a particular proxy proposal, Sage takes into consideration, among other items:

- Management's assertions regarding the proxy proposal;
- Sage's determination of how the proxy proposal will impact its clients; and
- Sage's determination of whether the proxy proposal will create dilution for shareholders.

Sage will generally support management's recommendations on proxy issues related to business operations matters. Sage believes a company's management should generally have the latitude to make decisions related to the company's business operations. However, when Sage believes the company's management is acting in an inconsistent manner with its clients' best interests Sage will vote against management's recommendations. Sage will generally vote against non-salary compensation plans (such as stock compensation plans, employee stock purchase plans and long-term incentive plans) unless, in Sage's opinion, such plans are structured to not create serious dilution to shareholders and Sage will analyze all other compensation plans on a case-by-case basis. Sage will review proxy proposals regarding control matters (e.g., mergers and anti-takeover tactics) related to a company on a case-by-case basis. Sage generally opposes measures limiting the rights of shareholders. Sage generally opposes measures preventing shareholders from accepting an offer of a sale of a company.

In evaluating a proxy proposal, Sage could encounter a material conflict of interest. Sage has a duty to recognize and resolve a conflict before voting the proxy. Sage's proxy voting policies and procedures describe the actions taken when a conflict is identified.

A copy of Sage's proxy voting policies and procedures as well as a copy of our voting record is available upon request.

## ITEM 18 – FINANCIAL INFORMATION & REQUIRED DISCLOSURES

Registered investment advisers are required in this Item to provide certain financial information or disclosures about Sage’s financial condition.

Sage has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients and has not been the subject of a bankruptcy proceeding.

### OTHER INFORMATION

#### CLASS ACTIONS AND OTHER LEGAL PROCEEDINGS

Sage does not file legal proceedings, including class actions, on behalf of clients.

#### OPERATIONAL/CYBERSECURITY/INFORMATION SECURITY RISKS

Cybersecurity is a generic term used to describe the technology, processes, and practices designed to protect networks, systems, computers, programs, and data from “hacking” by other computer users, other unauthorized access, denial of service, or malicious acts targeting networks, systems, computers, programs, and data and the resulting damage and disruption of hardware and software systems, loss or corruption of data or business as well as misappropriation of confidential information. Information security risks are significant, in part, because of new technologies to conduct financial transactions and the increased sophistication and activities of organized crime, hackers, terrorists, and other external parties, including foreign state actors. A breach of security also can adversely affect the ability to effect transactions, service clients, and manage exposure to risk. Cyberattacks include, among other items, stealing or corrupting data maintained online or digitally, gaining unauthorized access to or releasing confidential information, shutting down systems through denial-of-service attacks, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorization, and causing operational disruption. Successful cyberattacks against Sage or third-party service providers could cause systems to fail, not operate properly or become disabled, overloaded or damaged as a result of a number of factors, including events that are wholly or partially

beyond our control, which could have a negative effect on our ability to conduct business activities. If Sage fails to continue to upgrade technology infrastructure to ensure effective cyber-security relative to the type, size and complexity of operations, the firm could become more vulnerable to cyber-attack(s).

While the firm employs resources to protect assets and personally identifiable information, the firm cannot guarantee the protection of all such information, nor assure against all related losses in consideration of the real and evolving cybersecurity risks. An event that results in the loss of information would require the firm to reconstruct lost data or reimburse clients for data and credit monitoring services, which could be costly and have a negative impact on our business and reputation. Further, even if not directed at the firm, attacks on financial or other institutions important to the overall functioning of the financial system or on counterparties could affect, directly or indirectly, aspects of Sage’s business. If a cybersecurity breach were to occur, Sage would incur substantial costs, including those associated with forensic analysis of the origin and scope of the breach, increased and upgraded cybersecurity, investment losses from sabotaged trading systems, identity theft, unauthorized use of proprietary information, litigation, adverse investor reaction, the dissemination of confidential and proprietary information, and reputational damage. The techniques to obtain unauthorized access to data, disable or degrade service, or sabotage systems change frequently and can be difficult to detect for long periods of time.

Sage maintains a disaster recovery and incident response plan designed to reasonably ensure the essential business functions of the firm are promptly restored in the event of a disaster event/incident. While the firm strives to establish and maintain comprehensive processes, the firm cannot ensure it will be able to continue business operations in the event of every disaster event, given the unknown nature and scope of future disaster events, which could include floods, fires, tornadoes, hurricanes, earthquakes, acts of war, terrorism, accidents, and sabotage.

Due to the firm’s interconnectivity with third-party vendors, advisers and financial institutions, the firm would be adversely affected if any of them are subject to a successful cyberattack or other information security

event, including those arising due to the use of mobile technology or a third-party cloud environment. The firm routinely transmits and receives personal, confidential or proprietary information by email and other electronic means. The firm collaborates with clients and third parties to develop effective transmission capabilities.

**Sage Advisory Services, Ltd. Co.**  
**Privacy Policy Notice**

***Our Promise to You***

As a client of Sage, you share both personal and financial information with us. Your privacy is important to us, and we are dedicated to safeguarding your personal and financial information. We value your trust and encourage you to take some time to read this Privacy Policy carefully. This Privacy Policy applies to all the products, services and websites offered by Sage. We refer to those products, services and websites collectively as the “Services” in this Privacy Policy. By accessing and using the Services, or any part thereof, you agree that you have read and understand this Privacy Policy, and that, in exchange for access to the Services, you accept and consent to the privacy practices (and any uses and disclosures of information about you) that are described in this Privacy Policy.

***Information Provided by Clients***

In the normal course of doing business, we typically obtain the following non-public personal information about our clients:

- Personal information of our clients’ identity such as name, address and Social Security number;
- Information about securities transactions effected by us; and
- Client financial information such as net-worth, assets, income, bank account information and account balances.

We rely on the following lawful grounds to process your personal data: (a) it is necessary for the performance of a contract with you; (b) our or a third party’s legitimate business interest; or (c) your consent. We retain personal information for as long as reasonably necessary for the purposes for which it was collected. In some circumstances, we may store personal information for longer periods of time as necessary to comply with legal, regulatory, tax, accounting or technical requirements. Our retention periods are based on the quantity, type, and sensitivity of the personal information, the potential risk of unauthorized use or disclosure, and applicable legal requirements.

***How We Manage and Protect Your Personal Information***

Sage does not sell information about current or former clients to third parties, nor is it our practice to disclose such information to third parties unless requested or permitted to do so by a client or client representative or, if necessary, to process a transaction, service an account or as permitted by law. We may, however, share information with outside companies that perform administrative services for us. However, our arrangements with these service providers require them to treat your information as confidential.

Sage safeguards customer information according to an established information security program which includes policies addressing the acceptable use and access to confidential business information and personal information which may be contained in Sage’s information systems. Sage maintains physical, electronic and procedural safeguards reasonably

designed to guard personal information provided to us from loss, misuse or unauthorized access, disclosure, alteration or destruction.

***Client Notifications & Modifications***

Sage may update, amend, revise or otherwise change this Privacy Policy from time to time. We will post any changes on our website and send notification to our clients. Each version of the Privacy Policy will be identified at the bottom of the page by its effective date. Continued use of our website or services constitutes your acceptance of our then-effective Privacy Policy. We are required by law to annually provide a notice describing our Privacy Policy. Please do not hesitate to contact us with questions about this notice.

**Sage Advisory Services, Ltd. Co. (“Sage”)  
Proxy Voting Policy**

**23.01 Overview**

This proxy voting policy is designed to provide reasonable assurance that proxies are voted in the clients’ best economic interest, when the responsibility for voting client proxies rests with Sage. Sage will vote proxies for clients pursuant to the authority granted in the investment management agreement between Sage and its client, or as granted by written direction from the client.

Mr. Wade Uloth, the Chief Compliance Officer (“CCO”), is responsible for oversight of this policy. Questions regarding this policy should be directed to the CCO.

**23.02 Conflicts of Interest**

**A. Overview**

Sage may encounter a material conflict in voting client proxies. Sage has a duty to recognize a material conflict and to resolve the conflict before voting the proxy. For purposes of this policy, material conflicts of interest are defined as those conflicts that a reasonable investor would view as important in making a decision regarding how to vote a proxy.

Examples of material conflicts include (but are not limited to):

1. Sage provides investment management services to a publicly traded company and also holds that same security within client portfolios which is subject to a proxy; and
2. A Sage employee has a business or personal relationship (such as a close friend or spouse) with a member of executive management, a participant in the proxy contest, or a corporate director of the company.

**B. Identifying Conflicts of Interest**

1. Sage shall maintain a listing of all material business conflicts of interests – those business relationships between the firm and other parties that are deemed to be material and may result in a conflict with respect to a future proxy contest.
2. All employees are required to disclose all personal and familial relationships that may present a material conflict of interest with respect to a future proxy contest. Employees who are unsure whether a relationship should be disclosed as a material conflict should consult the CCO for guidance.

C. Resolving Material Conflicts of Interest

Unless a client requests otherwise, Sage will take one of the following actions to ensure the proxy voting decision is based on the client's best interests and is not a result of the conflict.

1. Engage an independent party to determine how to vote the proxy;
2. Prepare a report that (i) describes the conflict of interest; (ii) discusses procedures used to address such conflict of interest; (iii) discloses any contacts from outside parties (other than routine communications from proxy solicitors) regarding the proposal; and (iv) confirms the recommendation was made solely on the investment merits and without regard to any other consideration;
3. Refer the proxy to a client or to a representative of the client for voting purposes;
4. Disclose the conflict to the affected clients and seek their consent to vote the proxy prior to casting the vote; or
5. Vote in accordance with a pre-determined voting policy, as disclosed to clients.

**23.03 Disclosures to Clients**

A client may request Sage to deliver this Proxy Voting Policy as well as a record of how Sage has voted that client's proxies. Sage will use the firm's Part 2A of Form ADV disclosure to:

- A. Notify clients of how they may obtain a copy of this policy;
- B. Notify clients of how they may obtain a record of how their securities were voted; and
- C. Summarize the firm's proxy voting policies.

**23.04 Voting Guidelines**

Sage strives to vote all proxies in the best economic interests of its clients. The decision of how to vote follows the same criteria Sage uses in managing client accounts – to vote for proposals in such a manner that, in Sage's opinion, will increase shareholder value.

A. General Overview

In evaluating a particular proxy proposal, Sage takes into consideration, among other items:

1. Management's assertions regarding the proxy proposal;
2. Sage's determination of how the proxy proposal will impact its clients; and
3. Sage's determination of whether the proxy proposal will create dilution for shareholders.

B. Proxy Proposals Regarding Business Operations Matters

Sage will generally support management's recommendations on proxy issues related to business operations matters. Sage believes a company's management should generally have the latitude to make decisions related to the company's business operations. However, when Sage believes the company's management is acting in an inconsistent manner with its clients' best interests Sage will vote against management's recommendations.

C. Proxy Proposals Regarding Compensations Matters

1. Sage will generally vote against non-salary compensation plans (such as stock compensation plans, employee stock purchase plans and long-term incentive plans) unless, in Sage's opinion, such plans are structured to not create serious dilution to shareholders; and
2. Sage will analyze all other compensation plans on a case-by-case basis.

D. Proxy Proposals Regarding Control Matters

1. Sage will review proxy proposals regarding control matters (e.g., mergers and anti-takeover tactics) related to a company on a case-by-case basis;
2. Sage generally opposes measures limiting the rights of shareholders; and
3. Sage generally opposes measures preventing shareholders from accepting an offer of a sale of a company.

**23.05 Record Retention Requirements**

Sage shall keep the following proxy voting records:

- A. These proxy voting policies and procedures;
- B. Proxy statements received regarding client securities. Electronic statements, such as those maintained on EDGAR or by a proxy voting service, are acceptable;
- C. Records of proxy votes cast on behalf of each client;
- D. Records of client requests for proxy voting information, including a record of the information provided by Sage; and
- E. Documents prepared by Sage that were material to making the decision of how to vote.

Sage will keep these records in accordance with its [Record Retention Policy](#).

Approved: January 14, 2014

Revised: August 1, 2020
