TRANSITION 51

The BEAT provides connectivity between changing market events and implications for investor portfolios.

Spanning **Bonds, Equities, Alternatives and Transition***, this monthly review provides timely information across a broad array of markets and investment topics.

Each edition explores investment ideas, identifies areas of focus and provides a comprehensive outlook on asset allocation — all supported by a concise review of economic and asset class data through clear and impactful charts.

We believe **The BEAT** is a critical desk reference that enables more informed discussion and understanding of financial markets.

If you are viewing this book on your computer or tablet, **click or tap on the section box to jump to the beginning of each section.**

Data provided is for informational use only. See end of report for important additional information.

*Transition is an asset allocation view, which refers to cash, cash equivalents or liquid short-duration assets, such as short-dated Treasuries, that can be used to “transition” to other asset classes.

TOP IDEAS

Key Themes for March 2025

**Europe: The Underdog**

Tariffs, reconstruction and reindustrialization. Europe is the next regional target for tariffs, and although this is well-advertised, the announcement may still roil markets. We would view this as a buying opportunity. While European equities are the consensus underweight heading into 2025, they are the best performing DM year-to-date. As PMIs (an indication of the health of manufacturing) recover from a multi-year trough below 50, Europe is poised to recover. A ceasefire between Russia and Ukraine would provide further support. After all, doesn't everyone like the underdog!

**To Be or Not To Be Inflationary**

That is the question. Whether tariffs are inflationary or not is hotly debated. On the one hand, they may not be because without a monetary offset the impact is just a one-off rise in prices subject to substitution effects to lower priced goods. On the other, it may be because it disrupts supply chains and creates inefficiencies that put sustained upward pressure on prices. What does the market think? It seems to have sided with mildly-inflationary, as inflation breakevens have risen. This puts duration at risk.

**Let's Get Fiscal: Tariffs, Taxes, Budget**

It's part of the plan. One of President Trump's main goals this year is to pass a pro-growth budget plan, accomplished by creating easier fiscal policy spurred by tax relief, while simultaneously controlling the deficit. As we saw in February, tariffs were the first step to create the revenue needed to offset his plan to lower taxes. Starting in March, the linkage between the two will become part of the narrative, where we will be watchful of which sectors stand to benefit most.

**Growth: Taking the Easy Way Out**

Despite the noise, growth is still good. Global economic growth is still pointing toward expansion. Other than Japan, global central bank policies remain easy or at least are not tightening. This provides a tailwind to earnings and margins and is supportive of asset prices - let's not lose sight of this as it provides the signal through the noise. We think this supports a broadening of markets and our cyclical recovery theme.

TOP IDEAS

The Portfolio Solutions Group – Our Top 4 Ideas

Adding to Equities

Finding value and diversification in Europe. It is counter the consensus to add to European equity exposure, but this is what we are doing regardless. Why? A number of reasons: Recovering global PMIs, a low bar for earnings expected to surprise to the upside, German elections, pro-growth policies gaining favor and diversification all benefit European equities as an attractive large-cap value play. One of our themes calls for a broadening of the markets that favors cyclical and value, which we are adding exposure to in both the U.S. and Europe.

Add Exposure to European Construction

Improving fundamentals with positive optionality. After a challenging few years, the European Construction & Construction Materials sector looks poised for a rebound, as the tailwind from rate cuts works its way into construction activity. Additionally, news of a ceasefire in Ukraine and related reconstruction efforts could provide a further boost to EPS, providing positive optionality to the trade. With cheap valuation and relative insulation from tariff risks, we view this as an attractive opportunity.

Are Bonds Riskier than Stocks?

Duration. We have shifted portfolios to a modest underweight in duration, but we may continue to reduce. This is because 1) we hold a view that the yield curve may continue to steepen and 2) pro-growth fiscal policy is unfolding alongside tariffs, tilting the scales towards slightly higher inflation. As such, we prefer adding exposure to equities at the expense of duration-sensitive bonds. However, we remain overweight less duration-sensitive and higher-yielding credit.

A Turning Point for Real Estate

Pricing stabilizing amid improving fundamentals. Real estate has been experiencing a repricing over the last few years in response to higher interest rates, cyclical oversupply and, in certain sectors, secular demand destruction. However, the long-term operating outlook is markedly improving, with future supply materially decreasing and the demand destruction underway in certain sectors stabilizing. Entry pricing is meaningfully lower, providing a margin of safety and an interesting access point to these improving fundamentals.

The views and opinions expressed are those of the Portfolio Solutions Group at the time of writing of this presentation and are subject to change at any time due to market, economic, or other conditions, and may not necessarily come to pass. Not to be construed as an investment or research recommendation.

TOP THEMES

Market Measures of Inflation Have Been Trending Higher

Are tariffs inflationary? On the one hand, without a monetary offset the impact is just a one-off increase in prices which are then subject to substitution effects. On the other, tariffs disrupt supply chains and create inefficiencies that may lead to sustained inflationary impulses. Thus far, markets seem to have sided with the latter argument, with longer-term breakevens all moving above post-pandemic averages for the first time since late 2022.

Inflation Breakevens Recently Broke Above Post-Pandemic Averages

U.S. 5Y, 7Y, 10Y inflation breakevens (%) with post-pandemic averages

Source: Bloomberg, MSIM. As of February 11, 2025. "Inflation breakevens" are a market-based measure of inflation expectations. The views and opinions expressed are those of the Portfolio Solutions Group at the time of writing/of this presentation and are subject to change at any time due to market, economic, or other conditions, and may not necessarily come to pass. Forecasts/estimates are based on current market conditions, subject to change, and may not necessarily come to pass. **Past performance is no guarantee of future results.**

TOP THEMES

Regime Change: Excess Liquidity Shifting from Public to Private Sector

It's a zero-sum game. Larger public sector spending from the government crowds out the private sector. Many worry that Trump's plans to reduce government spending will hurt growth, but we do not believe this to be the case. The private sector can replace the public sector as a growth engine, which is beneficial as the private sector tends to have higher productive growth (i.e. higher growth with a lower inflation impulse).

As Money from Fiscal Largesse Wanes, the Private Sector Can Take Over as the Growth Driver

TOP THEMES

Tariffs Will Impact Global Trade, but Risks Are Skewed Towards ex-U.S.

We continue to view the core policy priorities of the Trump administration as net positive for the U.S. (deregulation, taxes) and negative for ex-U.S. (tariffs). Canada, Mexico and China represent ~40% of U.S. trade and have all been subjected to noise surrounding tariffs. While trade represents ~25% of U.S. GDP, it represents ~70% of GDP for Canada and Mexico.

TOP THEMES

Economic Policy Uncertainty Has Risen to Near All-Time Highs

Heightened uncertainty surrounding the path for tariffs, taxes and government spending have all driven gauges of general economic policy uncertainty to levels not witnessed since 2008 and 2020. Despite this, economic growth data remains solid and continues to point towards expansion. We remain focused on these signals amid the noise and uncertainty.

Economic Policy Uncertainty Has Spiked to Levels Consistent with Past Crises

TOP THEMES

4Q24 Earnings Scorecard: Materials Lead Improvement in Cyclical

With ~73% of market cap now having reported, earnings for cyclical sectors have improved noticeably since last quarter, with the average positive-negative surprise spread now at 62%, compared to 39% last quarter. Within cyclicals, the largest marginal improvement since last quarter was in materials, which displayed more positive surprises after a difficult Q3.

Earnings for Cyclical Sectors Have Shown More Positive Surprises thus far in Q4

TOP THEMES

A Continued Manufacturing Recovery Should Benefit SMID Segments

Manufacturing PMIs have historically displayed high correlations with earnings growth trends. Interestingly, large-cap earnings have decoupled from their historical relationship with PMIs, while small- and mid-caps (SMID) continue to move in line. A continued manufacturing recovery should benefit small- and mid-caps, and further fuel a broadening in U.S. equity markets.

Large-Cap EPS Has Defied the Trend in PMIs...

TOP THEMES

Equities Expected to Continue to Dominate Returns in a Balanced Strategy

We expect equities to continue to dominate returns in a balanced portfolio strategy. But the main difference going forward is that as the interest rate cycle moves sideways, passive bond strategies may not prove to be an effective hedge. One needs to actively manage duration risk within bond allocations moving ahead.

Equities Are Expected to Continue to Dominate Returns in a Balanced Strategy

Forecasts/estimates are based on current market conditions, subject to change, and may not necessarily come to pass. **Past performance is no guarantee of future results.**

TOP THEMES

Bank Loans Continue to Deliver Strong Performance

We continue to hold a favorable view on bank loans, which have outperformed other sectors of the credit markets since the onset of the Fed rate cutting cycle last September. Valuations remain attractive and the sector offers high carry relative to other areas of fixed income.

Capital Markets Investment Framework

Representative Allocations from the Portfolio Solutions Group

- Current allocation
- ◀ Change from previous
- High conviction underweight
- Underweight
- = Neutral
- + Overweight
- ++ High conviction overweight

Asset Allocation	Our View	Commentary
	-- - = + ++	
Bonds		
Duration	-	We remain underweight duration. While the UST 10Y yield at ~4.5% sits towards the middle of our view on a longer-term range, we see the near-term balance of risks skewing higher with recession risk low, but inflation risk a relevant focus.
Credit	+	
Equities		
Risk Level	++	We remain overweight equities, having added incrementally to our European equity exposure in February. Our core view in the U.S. remains soft landing, and we continue to assess U.S. political developments as net positive for 2025 equity returns. We remain vigilant to new policy developments.
Alternatives		
Private Markets	++	Private investment activity has been subdued year-to-date as investors cautiously interpreted announcements to changes in U.S. Fed policy, including its interaction with global geopolitics. However, we believe the directional clarity of the new administration and the continuing maturation of relatively low-cost financing are expected to expand deal-making activity in 2025. In addition, attractive entry prospects have emerged within sub-segments of real estate, private equity and private credit, but investor commitment levels have not yet responded to the heightened level of opportunity.
Hedge Funds	+	Hedge funds are benefiting from a constructive market environment for skill-based managers. We maintain conviction in equity long/short and fixed income relative value strategies as our expectations for market dispersion remain supportive while correlations have decreased at the micro level.
Commodities	=	We remain neutral on key commodity markets as geopolitical upside risks are balanced by high spare capacity in markets such as crude, which limit upside absent physical disruptions.
Transition		
Cash/Short Duration	-	We remain underweight cash and short duration instruments.

For informational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. The tactical views expressed above are a broad reflection of our team's views and implementations, expressed for client communication purposes. Individual team allocations may differ. Global Fixed Income

Representative Positioning from Portfolio Solutions Group

■ Current allocation
◀ Change from previous
 -- High conviction underweight
 - Underweight
 = Neutral
 + Overweight
 ++ High conviction overweight

Fixed Income	Our View	Commentary
	-- - = + ++	
Bonds		
U.S. Treasuries (USTs)	-	We remain underweight duration in the U.S. with 10Y yields at ~4.5%, given our view that the near-term balance of risks continues to skew higher with recession risk low, but inflation risk a relevant focus.
Inflation Linked Bonds	- ◀	We are reducing breakeven exposure as shorter term breakevens look particularly expensive relative to our view of future inflation. Longer term breakevens are closer to fair value.
Eurozone Govt. Bonds	+	We remain overweight duration in Europe, with scope for the ECB to continue cutting rates even if growth improves slightly. Core inflation and real GDP growth are likely to remain lower than in the U.S.
EM Hard Currency Govt. Bonds	+	EMD looks somewhat expensive on a standalone basis, yet remains more attractive relative to other segments of the market, such as corporate credit. We still think it's sensible to have an allocation to hard currency EMD.
EM Local Currency Govt. Bonds	+	The U.S. dollar (USD) appears very expensive from a Real Effective Exchange Rate perspective, which could manifest in attractive EM Local returns. However, this dynamic can take years to play out and policy uncertainty near term is too high for us to overweight EM Local given current real rate spreads vs USTs.
Public Credit		
Municipal Bonds	+	Muni ratios versus USTs currently look closer to "fair value" than cheap. We still like the asset class for taxable investors but are not forecasting large excess returns.
Investment Grade	-	Spreads are near all-time tights, excess return over USTs should be minimal and IG remains sensitive to left-tail outcomes. Our positive economic outlook keeps this from being a high-conviction underweight.
MBS/ABS	++	We continue to hold high conviction in ABS and yield per unit of credit quality remains attractive. U.S. 30Y fixed mortgage rates are higher than BB-rated corporate yields, a rare occurrence in the past 25 years.
High Yield	-	With spreads at historic lows across credit ratings, we see little upside left for high yield. We prefer to allocate to areas of fixed income with less stretched valuations.
Bank Loans	+	Loan spreads have continued to tighten and now look moderately expensive versus history. However, we still see a lot of relative value with the recent repricing of Fed expectations higher. Loans look poised to continue outperforming other fixed income asset classes due to their higher carry and low-duration sensitivity.

Global Equity

Representative Positioning from Portfolio Solutions Group

■ Current allocation
◀ Change from previous
 -- High conviction underweight
 - Underweight
 = Neutral
 + Overweight
 ++ High conviction overweight

Equity	Our View	Commentary
	-- - = + ++	
Regional		
<i>Developed Markets</i>	▶	We remain overweight the U.S. based on our view that the key policy priorities of the new administration will be beneficial for domestic growth (deregulation, fiscal), while posing challenges outside the U.S. (tariffs). We manage elevated U.S. valuations through mid-caps and selective cyclical exposure.
U.S.	■	We increased European equity exposure given our continued conviction in a manufacturing recovery, view that the worst-case tariff scenarios don't materialize and depressed sentiment/valuation. We view EU construction as a beneficiary of these tailwinds, and as having some positive optionality on a potential ceasefire in Ukraine.
Eurozone	▶	Japan's structural domestic improvements remain intact, while valuations remain undemanding. Near-term headwinds are U.S. trade policy uncertainty and renewed yen appreciation from rising inflationary pressure and continued BoJ rate hike prospects.
Japan	■	We continue to see regional dispersion in EM, with structural economic headwinds for China and tailwinds for India. Fortunes are reversing in the near-term with China's AI breakthrough and change in leadership attitude toward the private sector, while India's economy is undergoing a cyclical slowdown.
<i>Emerging Markets</i>	■	
Style		
Growth vs. Value	■	Growth style indexes remain disproportionately exposed to Big Tech, where we seek to keep our risk exposure close to neutral.
Quality	■	With little excess risk premium in equities and a limit to economic growth acceleration due to inflation risk, we continue to prefer a tilt toward quality. We balance this with selective cyclical exposure.
Large Cap vs. Small Cap	■	Mid-caps represent the sweet spot between elevated large-cap valuation and small-cap quality risk.
Cyclical vs. Defensive Sectors	■	We continue to favor selective cyclical exposure consistent with late cycle expansion.

For informational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. TOP IDEAS

Alternatives

Representative Positioning from Portfolio Solutions Group

Alternative Assets	Commentary
Private Markets	
Private Equity	We expect investor cash flows to recover due to increasing market activity, and asset pricing to offer an attractive entry point. While a key discipline in private equity investing is to limit exposure to exogenous risks, the directional clarity associated with the change of government in the U.S. is expected to expand deal-making activity, but likely to have an uneven impact on the growth opportunities and risks within each sector. The prospect of deregulation will potentially lead to increased opportunities in Financials and Healthcare and reduced anti-trust intervention could spark additional M&A more broadly. However, growth policies have the potential to add to inflation, so we continue to focus on middle-market strategies that rely less on leverage and are well-placed to deliver asset management initiatives to drive margin expansion and real earnings growth.
Private Real Assets	Commercial real estate is working through its debt maturity wall and pockets of elevated supply, leading to increased transaction volumes at more attractive entry valuations. These reset valuations and retreat of bank lending have created interesting opportunities for commercial real estate lenders. At the same time, fundamentals are constructive, as debt liquidity improves and the future supply in key sectors is materially lower, setting up an attractive opportunity for commercial real estate equity as well - particularly in secularly growing sectors including industrial, residential and net lease. Private infrastructure continues to participate in the investable opportunities relating to the mega trends of digitization and power generation. These themes converge where data services require power, and generative Artificial Intelligence (AI) is highlighting the fact that the current power mix is insufficient in terms of volume, density and reliability. Private investors are playing a key role in supplying this enabling infrastructure with attractive growth prospects. Recently observable policy changes in the U.S. and the Deepseek announcements could threaten performance in projects that are over-extended in their cash flow or valuations, but we believe investments in mature cost-competitive technologies that are under supplied versus demand tailwinds will continue to be positioned for strong returns.
Private Credit	Within corporate lending, covenant relief cases have increased as debt service has become more burdensome, but demand for products and services is generally healthy which is supporting profitability and debt coverage. Companies in unorthodox or transitional situations are accessing special situations capital that is improving alignment and offering attractive returns for investors.
Liquid Alternatives	
Hedge Funds	Given the current market drivers, we prefer hedge fund specialist portfolio managers who are best positioned to analyze policy impacts on security prices and capture the potential opportunity in increased capital markets activity. We stress the need to incorporate highly liquid, responsive, macro convexity strategies within portfolios to capitalize on price volatility should consensus views prove incorrect, stoking periods of broader market volatility. In addition, our highest conviction sub-strategies are fixed income relative value and quantitative long / short equity to take advantage of decreasing correlations at the micro level.
Commodities	We remain neutral on key commodity markets as geopolitical upside risks are balanced by high spare capacity in markets such as crude, limiting upside absent physical disruptions.

For informational purposes and does not constitute an offer or a recommendation to buy or sell any particular security or to adopt any specific investment strategy. Asset Allocation Committee

The Asset Allocation Committee is an independent group of senior investment professionals across various disciplines within MSIM and Eaton Vance. The Portfolio Solutions Group presents multi-sector research and investment ideas to the Committee, who is responsible for vetting and challenging these ideas to insure they meet their rigorous standards and can then be included in representative asset allocation recommendations.

Morgan Stanley Capital International All Country World (MSCI AC World) Index is an unmanaged free float-adjusted market-capitalization-weighted index designed to measure the equity market performance of developed and emerging markets.

Morgan Stanley Capital International Europe (MSCI Europe) Index is an unmanaged free float-adjusted market-capitalization-weighted index designed to measure the equity market performance of the developed markets in Europe.

Morgan Stanley Capital International Europe, Australasia, Far East (MSCI EAFE) Index is an unmanaged index of equities in the developed markets, excluding the U.S. and Canada.

MSCI USA Index is designed to measure the performance of the large and mid cap segments of the US market. With 625 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US.

MSCI China captures large and mid-cap representation across China A-shares, B-shares, H-shares, Red-chips and P-chips. It reflects the Mainland China and Hong Kong opportunity set from an international investor's perspective.

The **MSCI India Index** is designed to measure the performance of the large and mid cap segments of the Indian market.

The **MSCI World Index** is a free float adjusted market capitalization weighted index that is designed to measure the global equity market performance of developed markets. The term "free float" represents the portion of shares outstanding that are deemed to be available for purchase in the public equity markets by investors. The performance of the Index is listed in U.S. dollars and assumes reinvestment of net dividends.

ADDITIONAL INFORMATION

Index Definitions, Terms and About Risk

The MSCI USA Health Care Index is designed to capture the large and mid cap segments of the US equity universe. All securities in the index are classified in the Health Care sector as per the Global Industry Classification Standard.

Morningstar LSTA U.S. Leveraged Loan Index is an unmanaged index of the institutional leveraged loan market. Prior to August 29, 2022, the index name was S&P/LSTA Leveraged Loan Index.

Nikkei 225 Stock Average Index is unmanaged price-weighted index of 225 top-rated Japanese companies listed in the First Section of the Tokyo Stock Exchange.

Russell 1000 Index is an unmanaged index of 1,000 U.S. large-cap stocks.

Municipal-to-Treasury Yield Ratios are relative value indicators that measure the richness or cheapness of Municipal bond yields to comparable maturity Treasury bond yields.

Terms

Yield to Worst is a measure which reflects the lowest potential yield earned on a bond without the issuer defaulting. The yield to worst is calculated by making worst-case scenario assumptions by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer.

About Risk

Bank Loans – There can be no assurance that the liquidation of collateral securing an investment will satisfy the issuer's obligation in the event of non-payment or that collateral can be readily liquidated. The ability to realize the benefits of any collateral may be delayed or limited. **Commodities** – The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity including weather, embargoes, tariffs, or health, political, international and regulatory developments. **Credit** – Investments in income securities may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. **Duration** – Securities with longer durations tend to be more sensitive to interest rate changes than securities with shorter durations. **Equity** – Equity investment values are sensitive to stock market volatility. **Foreign** – Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, or other conditions. In emerging countries, these risks may be more significant. **Gov't Agency** – While certain U.S. Government-sponsored agencies may be chartered or sponsored by acts of Congress, their securities are neither issued nor guaranteed by the U.S. Treasury. **Income Market** – An imbalance in supply and demand in the income market may result in valuation uncertainties and greater volatility, less liquidity, widening credit spreads and a lack of price transparency in the market. There generally is limited public information about Municipal issuers. **Inflation-Linked** – Interest payments on inflation-linked securities may vary widely and will fluctuate as principal and interest are adjusted for inflation. Investments in inflation-linked securities may lose value in the event that the actual rate of inflation is different than the rate of the inflation index. **Interest Rate** – As interest rates rise, the value of certain income investments is likely to decline. **Lower-Rated** – Investments rated below Investment Grade (typically referred to as "junk") are generally subject to greater price volatility and illiquidity than higher rated investments. **Maturity** – Longer-term bonds typically are more sensitive to interest rate changes than shorter-term bonds. **Preferred Stocks** – When interest rates rise, the value of preferred stocks will generally decline. **Prepayment - MBS** – Mortgage-backed securities are subject to prepayment risk. **Prepayment - Bank Loan** – Bank Loans are subject to prepayment risk. **Real Estate** – Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry, including REITs.

ADDITIONAL INFORMATION

Risk Considerations

Diversification does not eliminate the risk of loss.

In general, equity securities' values also fluctuate in response to activities specific to a company. Investments in foreign markets entail special risks such as currency, political, economic, and market risks. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries. Fixed income securities are subject to the ability of an issuer to make timely principal and interest payments (credit risk), changes in interest rates (interest-rate risk), the creditworthiness of the issuer and general market liquidity (market risk). In a rising interest-rate environment, bond prices may fall and may result in periods of volatility and increased portfolio redemptions. In a declining interest-rate environment, the portfolio may generate less income. Longer-term securities may be more sensitive to interest rate changes. Alternative investments are speculative, involve a high degree of risk, are highly illiquid, typically have higher fees than other investments, and may engage in the use of leverage, short sales, and derivatives, which may increase the risk of investment loss. These investments are designed for investors who understand and are willing to accept these risks. Performance may be volatile, and an investor could lose all or a substantial portion of its investment.

There is no guarantee that any investment strategy will work under all market conditions, and each investor should evaluate their ability to invest for the long-term, especially during periods of downturn in the market.

A separately managed account may not be appropriate for all investors. Separate accounts managed according to the Strategy include a number of securities and will not necessarily track the performance of any index. Please consider the investment objectives, risks and fees of the Strategy carefully before investing. A minimum asset level is required.

For important information about the investment managers, please refer to Form ADV Part 2.

ADDITIONAL INFORMATION

ASIA PACIFIC

Hong Kong: This material is disseminated by Morgan Stanley Asia Limited for use in Hong Kong and shall only be made available to “professional investors” as defined under the Securities and Futures Ordinance of Hong Kong (Cap 571). The contents of this material have not been reviewed nor approved by any regulatory authority including the Securities and Futures Commission in Hong Kong. Accordingly, save where an exemption is available under the relevant law, this material shall not be issued, circulated, distributed, directed at, or made available to, the public in Hong Kong. **Singapore:** This material is disseminated by Morgan Stanley Investment Management Company and should not be considered to be the subject of an invitation for subscription or purchase, whether directly or indirectly, to the public or any member of the public in Singapore other than (i) to an institutional investor under section 304 of the Securities and Futures Act, Chapter 289 of Singapore (“SFA”); (ii) to a “relevant person” (which includes an accredited investor) pursuant to section 305 of the SFA, and such distribution is in accordance with the conditions specified in section 305 of the SFA; or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. This publication has not been reviewed by the Monetary Authority of Singapore. **Australia:** This material is provided by Morgan Stanley Investment Management (Australia) Pty Ltd ABN 22122040037, AFSL No. 314182 and its affiliates and does not constitute an offer of interests. Morgan Stanley Investment Management (Australia) Pty Limited arranges for MSIM affiliates to provide financial services to Australian wholesale clients. Interests will only be offered in circumstances under which no disclosure is required under the Corporations Act 2001 (Cth) (the “Corporations Act”). Any offer of interests will not purport to be an offer of interests in circumstances under which disclosure is required under the Corporations Act and will only be made to persons who qualify as a “wholesale client” (as defined in the Corporations Act). This material will not be lodged with the Australian Securities and Investments Commission.

Japan: For professional investors, this material is circulated or distributed for informational purposes only. For those who are not professional investors, this material is provided in relation to Morgan Stanley Investment Management (Japan) Co., Ltd. (“MSIMJ”)’s business with respect to discretionary investment management agreements (“IMA”) and investment advisory agreements (“IAA”). This is not for the purpose of a recommendation or solicitation of transactions or offers any particular financial instruments. Under an IMA, with respect to management of assets of a client, the client prescribes basic management policies in advance and commissions MSIMJ to make all investment decisions based on an analysis of the value, etc. of the securities, and MSIMJ accepts such commission. The client shall delegate to MSIMJ the authorities necessary for making investment. MSIMJ exercises the delegated authorities based on investment decisions of MSIMJ, and the client shall not make individual instructions. All investment profits and losses belong to the clients; principal is not guaranteed. Please consider the investment objectives and nature of risks before investing. As an investment advisory fee for an IAA or an IMA, the amount of assets subject to the contract multiplied by a certain rate (the upper limit is 2.20% per annum (including tax)) shall be incurred in proportion to the contract period. For some strategies, a contingency fee may be incurred in addition to the fee mentioned above. Indirect charges also may be incurred, such as brokerage commissions for incorporated securities. Since these charges and expenses are different depending on a contract and other factors, MSIMJ cannot present the rates, upper limits, etc. in advance. All clients should read the Documents Provided Prior to the Conclusion of a Contract carefully before executing an agreement. This material is disseminated in Japan by MSIMJ, Registered No. 410 (Director of Kanto Local Finance Bureau (Financial Instruments Firms)), Membership: the Japan Securities Dealers Association, The Investment Trusts Association, Japan, the Japan Investment Advisers Association and the Type II Financial Instruments Firms Association.
