SFDR Article 8 Website Disclosure

Product name: *Global Convertible Bond Fund (the “Fund”)*

A fund of Morgan Stanley Investment Funds

Legal entity identifier:

K3YUM7KVVWUDP746NXC39

Summary

No Sustainable investment objective

This financial product promotes environmental and social characteristics, but does not have as its objective sustainable investment.

The Fund will have a minimum proportion of 5% sustainable investments.

The “do no significant harm” methodology applied by the Investment Adviser seeks to ensure that the Fund’s sustainable investments do not cause significant harm to any of the mandatory principal adverse impact (“PAI”) indicators in the EU SFDR rules that are relevant to the investment and comply with certain minimum social safeguards.

Environmental or social characteristics of the financial product

The Fund promotes the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promotes the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

In addition, a minimum of 5% of the Fund’s investments will be sustainable investments in: (a) corporate issuers whose business practices, products or solutions make a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or (b) Green, Social or Sustainability Bonds (“Sustainable Bonds”) that make a positive environmental or social contribution through their use of proceeds.

Investment Strategy

The Fund’s objective is to provide an attractive rate of return through investment primarily in convertible bonds issued by companies organised or operating in either the developed or emerging markets which will be denominated in global currencies.

The Fund meets its environmental and social characteristics through exclusions of: (a) companies which generate any revenue from controversial weapons manufacturing or retail, civilian firearms manufacturing or retail or tobacco manufacturing; and (b) companies which derive 5% or more of their revenue from thermal coal mining and extraction.

In addition, the Fund aims to invest a proportion of its assets in sustainable investments (as described above).

As part of its bottom-up, fundamental research process, the Investment Adviser systematically incorporates the assessment of an issuer’s corporate governance and business practices.

Proportion of Investments

Aligned with E/S characteristics	90%
<i>Sustainable investments</i>	<i>5%</i>
<i>Taxonomy aligned</i>	<i>-</i>
<i>Other environmental</i>	<i>1%</i>
<i>Social</i>	<i>1%</i>
<i>Other E/S characteristics</i>	<i>85%</i>
Other investments	10%

The Fund expects to allocate a minimum of 5% of its assets to sustainable investments.

90% of investments are aligned with environmental or social characteristics.

This comprises entirely of investments which offer direct exposure to investee entities. These percentages are measured according to the value of the investments.

Monitoring of environmental or social characteristics

The environmental and social characteristics are monitored using a combination of tools / screens, portfolio surveillance tools and manual desk reviews and analyses.

The Investment Adviser’s Compliance, Risk and Portfolio Surveillance teams collaborate with the investment team to conduct regular portfolio/performance reviews and systemic checks to ensure compliance with portfolio investment objectives and environmental and social characteristics.

Methodologies

Compliance with the exclusionary screens is measured based on the percentage of the Fund’s investments which breach the exclusionary screens.

The sustainable investments made by the Fund are assessed as described above in relation to ‘environmental or social characteristics of the financial product’.

Data sources and processing

The Investment Adviser leverages ESG data from various external vendors. This data is collected and stored in Morgan Stanley’s centralized ESG data

repository, to allow any Morgan Stanley business unit, including MSIM investment teams, to access the information for research, portfolio analysis and construction, and client and regulatory reporting.

Due to gaps in data coverage, a small proportion of the data which is used to assess alignment with E/S characteristics is estimated data.

Limitations to methodologies and data

The Fund may use reasonable proxy data for PAI indicators where the Investment Adviser considers that the data is not widely or reliably available. For further details of data limitations, please see the full website disclosure.

The Investment Adviser takes reasonable steps to ensure that the Fund is able to meet its environmental and social characteristics despite these limitations, including reviewing and assessing proxies to ensure they are appropriate substitutes for the ESG themes promoted by the relevant PAI indicator.

In addition, where third-party screening data in relation to the Fund's exclusions is not available for an issuer, the Investment Adviser will apply its best efforts to verify, through in-house research, that the issuer does not violate the Fund's binding criteria.

Due diligence

The Investment Adviser relies on internal research to derive its own independent assessment of a company's value and credit worthiness, using third-party agency and sell side research as an input.

The Investment Adviser conducts in-depth bottom-up analysis to identify bond issuers that meet its investment criteria in terms of competitive position, franchise value and management quality. These factors all help the Investment Adviser understand the quality and stability of the company's cash flows.

As part of this process, the Investment Adviser also conducts bottom-up due diligence on the Fund's investments to identify any sustainability risks that could impact the value of the assets, which is considered by the Investment Adviser when making investment decisions on a non-binding basis.] The due diligence process is based on in-house research and third-party data.

In addition, the Investment Adviser's Risk team conducts top-down sustainability investment risk

analysis on the Fund. This information is monitored on an ongoing basis and monthly reports are provided to the Investment Adviser's senior management.

Engagement policies

The Investment Adviser may engage with selected bond issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities support, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Designated reference benchmark

The Fund has not designated a reference benchmark for the purpose of attaining its environmental or social characteristics.

SFDR Article 8 Website Disclosure

Product name: *Global Convertible Bond Fund (the “Fund”)*

A fund of Morgan Stanley Investment Funds

Legal entity identifier: 549300ZADDUDEM9Q8605

No Sustainable investment objective

This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.

The Fund aims to invest a minimum proportion of 5% of its assets in sustainable investments.

The Fund seeks to ensure that the sustainable investments of the Fund do not cause significant harm to relevant environmental or social sustainable investment objectives by:

- testing whether the investment meets the thresholds set by the Investment Adviser for each of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment; and
- ensuring that the sustainable investments of the Fund are aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights.

Environmental or social characteristics of the financial product

The Fund promotes the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promotes the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the section below titled, “*Investment Strategy*”).

The Fund also aims to make a minimum of 5% sustainable investments in:

- Corporate issuers whose business practices, products or solutions, make a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which make a positive environmental or social contribution through their use of proceeds as explained in response to the section below titled, “*Investment Strategy*”.

Investment Strategy

The Fund seeks to provide long-term capital appreciation, measured in US Dollars, through investment primarily in convertible bonds issued by companies organised or operating in either the developed or emerging markets which will be denominated in global currencies, while reducing exposure to sustainability risks through exclusionary screening of selected fossil fuels and of activities which can cause dangers to human health and wellbeing.

Investment strategy used to meet the environmental and social characteristics promoted by the Fund

The binding elements of the investment strategy are described in the table below.

The criteria are implemented and monitored by the Investment Adviser using a combination of third-party data and in-house research.

Binding criteria	
The Fund will not invest in corporate issuers which:	<p><u>Derive any revenue from any of the following activities:</u></p> <ul style="list-style-type: none"> • Controversial weapons manufacturing or retail (anti-personnel landmines, cluster munitions, biological or chemical weapons, and nuclear weapons); • Civilian firearms manufacturing or retail; • Tobacco manufacturing; or <p><u>Derive more than 5% revenue from any of the following activities:</u></p> <ul style="list-style-type: none"> • Thermal coal mining and extraction. The Fund may, as an exception, invest in labelled Sustainable Bonds issued by fossil fuel companies, which are intended to raise proceeds specifically for projects that promote positive environmental contributions mitigating the adverse sustainability impact of coal, such as renewable energy or energy efficiency, based on information available in the bond issuance documentation. This includes, but is not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles and Sustainability Bond Guidelines. The Investment Adviser uses a proprietary Sustainable Bond Evaluation framework to assess these investments. The methodology is available on msim.com.
Sustainable investments	The Fund will maintain a minimum of 5% of sustainable investments, which meet the criteria as set out in response to the section below titled, " <i>Methodologies</i> "

The Investment Adviser may apply additional ESG-related investment restrictions over time that it believes are consistent with the Fund's investment objectives and its environmental and social characteristics. Such additional investment restrictions will be disclosed as they are implemented on www.morganstanleyinvestmentfunds.com and on www.morganstanley.com/im.

In addition to the binding ESG considerations, the Fund integrates ESG considerations in the investment decision-making process to support its environmental and social characteristics on a non-binding basis, based on the Investment Adviser's in-house research and methodologies and on third-party data.

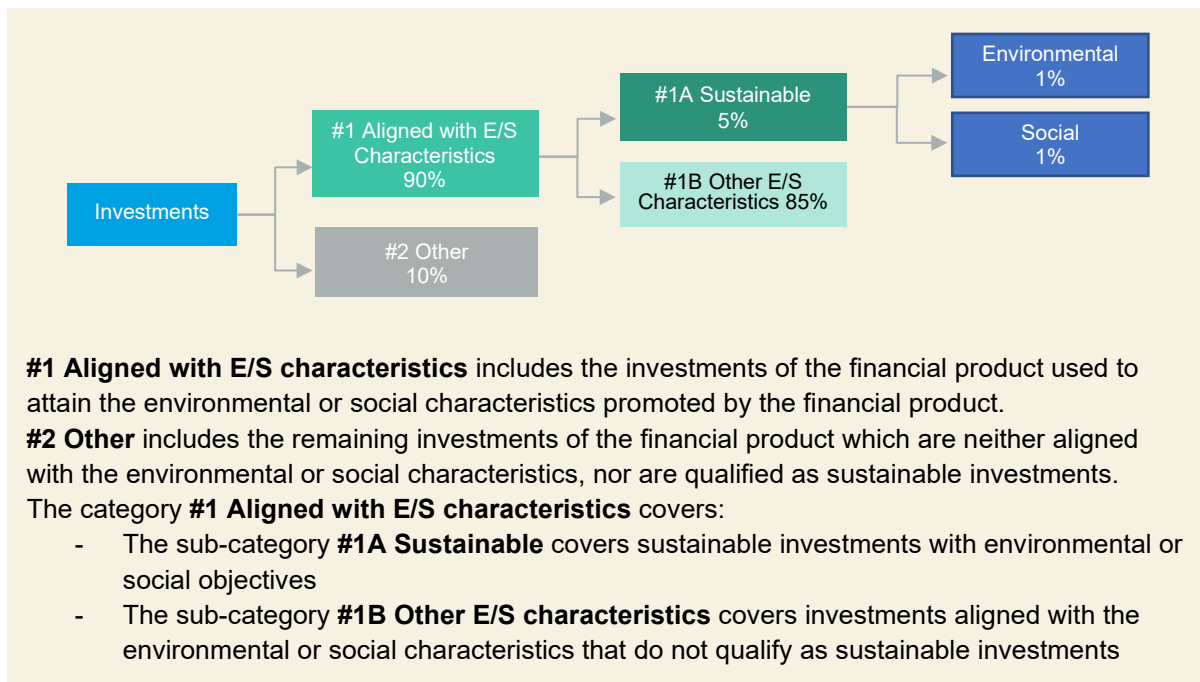

Governance practices of investee companies

As part of its bottom-up, fundamental research process, the Investment Adviser systematically incorporates the assessment of an issuer's corporate governance and business practices, including but not limited to evidence of sound management structures and employee relations, fair remuneration of staff, and tax compliance, in order to ensure that every investee company follows good governance practices.

This is done through the monitoring of data on governance-related, as well as on other environmental and/or social factors and controversies, sourced from third party providers, through in-house research, and through engagement with the management of selected issuers on corporate governance and disclosure issues.

In addition, the Fund's sustainable investments exclude any company that is involved in very severe governance-related controversies.

Proportion of investments

The exclusions (as described above) will be applied to at least 90% of the portfolio, however the Fund also expects to allocate a minimum of 5% of its assets to sustainable investments. Among these sustainable investments, the Fund commits to make a minimum of 1% of sustainable investments with an environmental objective and 1% of sustainable investments with a social objective which can both vary independently at any time.

90% of investments are aligned with environmental or social characteristics, which comprises entirely of investments which offer direct exposure to investee entities.

These percentages are measured according to the value of the investments.

“#2 Other” investments

It is anticipated that up to 10% of the Fund’s assets may be invested in hedging instruments for efficient portfolio management and in cash held as ancillary liquidity. These instruments are included in the “#2 Other” category and are not subject to any environmental or social screening or any minimum environmental or social safeguards.

Taxonomy disclosures

The Fund’s sustainable investments do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. Further information can be found in the environmental and social characteristics section.

Although some of these sustainable investments may be Taxonomy aligned, due to lack of available data regarding the Taxonomy alignment of the underlying securities, the Investment Adviser has not been able to confirm whether these investments are in fact Taxonomy aligned and accordingly will not consider them as such in calculations until this data is reported on or otherwise becomes more reliable. As such, the Investment Adviser uses its own methodology to determine whether certain investments are sustainable in accordance with the SFDR sustainable investment test, and then invests in such assets for the Fund.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Monitoring of environmental or social characteristics

The environmental and social characteristics are monitored on an ongoing basis using a combination of tools / screens, portfolio surveillance tools and manual desk reviews and analyses.

The investment process is subject to regular review, as part of a control and monitoring framework implemented by the Investment Adviser. The Investment Adviser's Compliance, Risk and Portfolio Surveillance teams collaborate with the investment team to conduct regular portfolio/performance reviews and systemic checks to ensure compliance with portfolio investment objectives and environmental and social characteristics, taking into account changing market conditions, information and strategy developments.

Investments that are held by the Fund but become restricted because they breach the exclusion criteria set out above after they are acquired for the Fund will be sold. Such sales will take place over a time period to be determined by the Investment Adviser, considering the best interests of the shareholders of the Fund.

If the Investment Adviser considers that the portfolio or an investment no longer meets the Fund's other binding environmental or social criteria, the Investment Adviser will take such remedial action as it determines to be appropriate. Any such remedial action will be taken over a time period to be determined by the Investment Adviser, considering the relevant circumstances and best interests of the shareholders of the Fund.

Methodologies

The sustainability indicator used to measure the attainment of the Fund's environmental and social characteristics is the Fund's exposure, in percentage market value, to issuers that violate any of the exclusion criteria, as described in the section above titled, "*Investment Strategy*".

Sustainable investments

The Fund's sustainable investments will fall within one of the following categories:

- Green, Social or Sustainability Bonds (“**Sustainable Bonds**”), as labelled in the securities’ documentation, where the issuer commits to allocate the proceeds to projects making a positive environmental or social contribution. This includes, but is not limited to, bonds that align with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines. Sustainable Bonds mobilise financing directly towards a multiplicity of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, make a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which have sufficient positive SDG alignment (in the Investment Adviser’s view) with at least one individual SDG, and which do not have any material mis-alignments (in the Investment Adviser’s view) on any of the SDGs.

PAI indicators

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments seeks to exclude investments that cause harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which are relevant to the investment.

The Investment Adviser has determined specific metrics and quantitative thresholds for what constitutes significant harm to screen PAI indicators that are relevant to the investment, using third-party data. The thresholds are set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. Different metrics or thresholds may apply to issuers located in developed markets and in emerging markets, respectively. This is intended to reflect the different extent to which the Investment Adviser deems that meeting minimum sustainability standards in these markets is currently achievable. In addition, different relative thresholds may apply to similar indicators: for example, the Investment Adviser currently applies a lower threshold to determine significant adverse impact with respect to scope 3 emissions intensity as compared to scope 1 and 2 emissions intensity. This is because: (i) companies have less control over their indirect emissions; and (ii) data estimates for scope 3 emissions, which currently prevail over reported data compared to scope 1 and 2 emissions, may result in a less accurate PAI assessment.

The Investment Adviser may use reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. The Investment Adviser’s use of proxy indicators will be kept under review, and will be replaced by PAI data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducts the PAI assessment at the issuer level. However, where appropriate the assessment may be done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that are directly related to the sustainability factors targeted by the bond’s use of proceeds will be assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, the Fund may invest in a Green Bond issued by a utility company that has a negative assessment under the PAI indicators related to GHG emissions and/or GHG intensity, as long as the Investment Adviser evaluates that the issuer has a credible strategy to reduce its GHG emissions and the Green Bond specifically contributes towards such goal.

Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are assessed at the issuer level.

The Fund's PAI assessment is supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Alignment with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

The Fund's sustainable investments exclude issuers which have experienced very severe controversies that are deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening is done using third-party data.

Data sources and processing

The Investment Adviser leverages ESG data from various external vendors. This data is collected and stored in Morgan Stanley's centralized ESG data repository, to allow any Morgan Stanley business unit, including MSIM investment teams, to access the information for research, portfolio analysis and construction, and client and regulatory reporting.

MSIM assesses data quality by liaising with the different data providers to obtain updates to the datasets as the regulation evolves. They also ensure that ESG data adheres to the Firm's data governance and quality standards through procedures to assess the appropriateness and delivery of data feeds. MSIM also conducts as appropriate, due diligence on the external data providers in order to assess whether their methodologies are appropriate for the intended use case.

Due to gaps in data coverage, a small proportion of the data which is used to assess alignment with E/S characteristics is estimated data. The Investment Adviser will keep data gaps under review and replace the estimated data with third-party data sources or data obtained by other means (e.g., directly from investee companies) when available.

Limitations to methodologies and data

The Investment Adviser uses data to assess the PAI indicators from third-party providers. The Fund may use reasonable proxy data for PAI indicators where the Investment Adviser considers that the data is not widely or reliably available. Any use of proxies will be kept under review and will be replaced by data from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available. This limitation does not affect how the environmental and social characteristics promoted by the Fund are met because any proxies used are reviewed and assessed by the Investment Adviser to ensure that they are appropriate substitutes for the relevant PAI indicator.

Additionally, the below outlines some of the key themes and commonalities which contribute to limitations in the methodologies and/or data and/or poor data quality of the Fund:

- methodology differences between data providers
- discrepancies in reported vs. estimated carbon emissions data such as Scope 3 emissions
- data lags i.e., reporting timelines for data may not align with SFDR reporting timelines
- coverage gaps across asset classes, geographies, and market capitalisations

Despite these limitations, which impact all consumers of ESG data and are not particular to MSIM, the Investment Adviser takes reasonable steps to mitigate the risk of these limitations hindering the Fund's ability to meet its environmental and social characteristics – these include (as appropriate), assessing vendor data quality and methodologies, comparing ESG data points between vendors or against its own internal analyses and using appropriate estimations to manage data gaps.

Due diligence

The Investment Adviser relies on internal research to derive its own independent assessment of a company's value and credit worthiness, using third-party agency and sell side research as an input.

The Investment Adviser conducts in-depth bottom-up analysis to identify bond issuers that meet its investment criteria in terms of competitive position, franchise value and management quality. These factors all help the Investment Adviser understand the quality and stability of the company's cash flows.

As part of this process, the Investment Adviser also conducts bottom-up due diligence on the Fund's investments to identify any sustainability risks that could impact the value of the assets, which is considered by the Investment Adviser when making investment decisions on a non-binding basis. The due diligence process is based on in-house research and third-party data.

In addition, the Investment Adviser's Risk team conducts top-down sustainability investment risk analysis on the Fund. This information is monitored on an ongoing basis and monthly reports are provided to the Investment Adviser's senior management.

Engagement policies

The Investment Adviser may engage with selected bond issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities support, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

A non-exhaustive list of examples of the Investment Adviser's engagement priorities are:

- Climate Change – promote policies to hasten energy transition to clean and renewable sources of energy and to address the physical risks of climate change;
- Diversity – advance women and minorities at board and management levels, and promote diversity and inclusion at all levels of the workforce;
- Labour and Human Rights – strengthen performance in company operations and supply chains; and
- Disclosure – improve disclosure of material ESG matters.

The Investment Adviser has developed a Fixed Income Engagement Strategy, available on www.morganstanley.com/im, to structure and conduct engagement meetings with bond issuers.

Designated reference benchmark

The Fund has not designated a reference benchmark for the purpose of attaining its environmental or social characteristics.

Global Convertible Bond Fund

Website Disclosure Summaries (Multiple Languages)

Offenlegung nach Artikel 8 SFDR auf der Website

Produktname: *Global Convertible Bond Fund (der „Fonds“)*

Ein Fonds von Morgan Stanley Investment Funds

LEI-Code: K3YUM7KVVWUDP746NXC39

Zusammenfassung

Kein nachhaltiges Investitionsziel

Dieses Finanzprodukt bewirbt ökologische und soziale Merkmale, hat jedoch keine nachhaltige Investition zum Ziel.

Der Fonds wird einen Anteil von mindestens 5 % in nachhaltigen Investitionen halten.

Die Methode des Anlageberaters, keine erhebliche Beeinträchtigung („do no significant harm“) zu verursachen, soll sicherstellen, dass die nachhaltigen Investitionen des Fonds keine der obligatorischen Indikatoren für die wichtigsten nachteiligen Auswirkungen („PAI“) in den SFDR-Regeln der EU, die für die Investition relevant sind und mit bestimmten sozialen Mindestschutzmaßnahmen konform sind, erheblich beeinträchtigen.

Ökologische oder soziale Merkmale des Finanzprodukts

Der Fonds bewirbt das ökologische Merkmal des Klimaschutzes, indem er Investitionen in bestimmte Arten von fossilen Brennstoffen ausschließt. Außerdem bewirbt der Fonds das soziale Merkmal des Ausschlusses von Investitionen in Aktivitäten, die schädlich für Gesundheit und Wohlergehen von Menschen sein können.

Darüber hinaus werden mindestens 5 % der Anlagen des Fonds in nachhaltigen Investitionen gehalten: (a) Unternehmensemittenten, deren Geschäftspraktiken, Produkte oder Lösungen einen positiven Nettobeitrag zu den Zielen für nachhaltige Entwicklung der Vereinten Nationen („SDGs“) leisten; oder (b) grüne, soziale oder Nachhaltigkeitsanleihen („nachhaltige Anleihen“), deren Erlöse für einen positiven ökologischen oder sozialen Beitrag verwendet werden.

Anlagestrategie

Ziel des Fonds ist eine attraktive Rendite, wozu er vorrangig in auf globale Währungen lautende Wandelanleihen von Unternehmen investiert, die ihren Sitz in Industrie- oder Schwellenländern haben oder dort ihre Geschäftstätigkeit ausüben.

Der Fonds erreicht seine ökologischen und sozialen Merkmale durch den Ausschluss von: (a) Unternehmen, die Umsätze aus der Herstellung oder dem Verkauf von umstrittenen Waffen, der Herstellung oder dem Verkauf von zivilen Schusswaffen oder der Herstellung von Tabakwaren erzielen; und (b) Unternehmen, die 5 % oder mehr ihres Umsatzes mit dem Abbau und der Förderung von Kraftwerkskohle erwirtschaften.

Darüber hinaus strebt der Fonds an, einen Teil seines Vermögens in nachhaltige Anlagen zu investieren (wie oben dargelegt).

Im Rahmen seines Verfahrens der Bottom-up-Fundamentalanalyse bezieht der Anlageberater systematisch die Bewertung der Unternehmensführung und der Geschäftspraktiken der Emittenten ein.

Aufteilung der Investitionen

Im Einklang mit ökologischen und sozialen Merkmalen	90%
<i>Nachhaltige Investitionen</i>	5%
<i>Taxonomie-konform</i>	-
<i>Sonstig ökologisch</i>	1%
<i>Sozial</i>	1%
<i>Sonstige ökologische und soziale Merkmale</i>	85%
Sonstige Investitionen	10%

Der Fonds erwartet, mindestens 5 % seines Vermögens in nachhaltigen Investitionen zu halten.

90 % der Investitionen sind auf ökologische oder soziale Merkmale ausgerichtet.

Diese bestehen ausschließlich aus Investitionen, die ein direktes Engagement in Portfoliounternehmen bieten. Diese Prozentanteile werden gemäß dem Wert der Investitionen gemessen.

Überwachung der ökologischen oder sozialen Merkmale

Die ökologischen und sozialen Merkmale werden durch Tools/Filter, Portfolioüberwachungs-Tools und manuelle Überprüfungen und Analysen des Teams überwacht.

Die Compliance-, Risiko- und Portfolioüberwachungsteams des Anlageberaters arbeiten mit dem Anlageteam zusammen, um regelmäßige Portfolio-/Performanceüberprüfungen und systemische Kontrollen durchzuführen, um die Compliance mit den Anlagezielen sowie den ökologischen und sozialen Merkmalen des Portfolios sicherzustellen.

Methoden

Die Compliance mit den Ausschlussfiltern wird anhand des Anteils der Investitionen des Fonds gemessen, die gegen die Ausschlussfilter verstoßen.

Die vom Fonds getätigten nachhaltigen Investitionen werden wie oben beschrieben in Bezug auf die „ökologischen oder sozialen Merkmale des Finanzprodukts“ bewertet.

Datenquellen und -verarbeitung

Der Anlageberater nutzt ESG-Daten verschiedener externer Anbieter. Diese Daten werden im zentralisierten ESG-Datenspeicher von Morgan Stanley gesammelt und gespeichert, sodass alle Geschäftseinheiten von Morgan Stanley, darunter auch die Anlageteams von MSIM, Zugang zu diesen Informationen für Research, Portfolioanalyse und -konstruktion sowie die Berichterstattung an Kunden und Aufsichtsbehörden haben.

Aufgrund von Lücken bei der Datenabdeckung handelt es sich bei einem kleinen Anteil der Daten, die zur Bewertung der Ausrichtung auf ökologische und soziale Merkmale eingesetzt werden, um Schätzungen.

Beschränkungen hinsichtlich der Methoden und Daten

Der Fonds kann angemessene Proxydaten für PAI-Indikatoren einsetzen, wenn der Anlageberater der Ansicht ist, dass die Daten nicht allgemein verfügbar oder leicht erhältlich sind. Weitere Informationen zur begrenzten Datenverfügbarkeit finden Sie in der vollständigen Offenlegung auf der Website.

Der Anlageberater ergreift angemessene Maßnahmen, um sicherzustellen, dass der Fonds seine ökologischen und sozialen Merkmale trotz dieser Einschränkungen erfüllen kann, beispielsweise die Prüfung und Bewertung von Proxydaten, um sicherzustellen, dass sie ein angemessener Ersatz für die vom jeweiligen PAI-Indikator beworbenen ESG-Themen sind.

Wenn für einen Emittenten keine Screening-Daten von Dritten bezüglich der Ausschlusskriterien des Fonds zur Verfügung stehen, wird sich der Anlageberater nach besten Kräften bemühen, mit eigenem Research zu überprüfen, dass der Emittent nicht gegen die verbindlichen Kriterien des Fonds verstößt.

Sorgfaltspflicht

Der Anlageberater betreibt sein eigenes internes Research, um den Unternehmenswert und die Kreditwürdigkeit eines Unternehmens unabhängig zu bewerten, wobei er sich auf das Research von Drittanbietern und der Sell Side stützt.

Der Anlageberater führt eine tiefgreifende Bottom-up-Analyse durch, um Anleiheemittenten zu identifizieren, die seine Anlagekriterien in Bezug auf Wettbewerbsposition, Unternehmenswert und Managementqualität erfüllen. Alle diese Faktoren helfen dem Anlageberater, die Qualität und Stabilität der Cashflows eines Unternehmens zu verstehen.

Im Rahmen dieses Prozesses führt der Anlageberater auch eine Bottom-up-Due-Diligence-Prüfung der Investitionen des Fonds durch, um etwaige Nachhaltigkeitsrisiken zu ermitteln, die sich auf den Wert der Vermögenswerte auswirken könnten, was der Anlageberater dann bei seinen Anlageentscheidungen auf unverbindlicher Basis berücksichtigt.] Die Due-Diligence-Prüfung stützt sich auf internes Research und Daten Dritter.

Darüber hinaus führt das Risikoteam des Anlageberaters für den Fonds eine Top-down-Risikoanalyse zu Nachhaltigkeitsaspekten durch. Diese Informationen werden laufend überwacht und dem Senior Management des Anlageberaters werden monatliche Berichte vorgelegt.

Mitwirkungspolitik

Der Anlageberater nimmt gegebenenfalls bei ausgewählten Anleiheemittenten Einfluss auf ihre Praktiken der Unternehmens- und Staatsführung sowie andere wesentliche Nachhaltigkeitsthemen im Zusammenhang mit den Zielen für nachhaltige Entwicklung (SDGs), einschließlich nachhaltigkeitsbezogener Kontroversen oder Verstößen gegen internationale Normen und Grundsätze. Solche Mitwirkungsaktivitäten unterstützen auf qualitativer und unverbindlicher Basis die Bewertung der wichtigsten nachteiligen Auswirkungen (Principal Adverse Impacts, PAI) und der Unternehmensführung.

Bestimmter Referenzwert

Der Fonds hat keinen Referenzwert für das Erreichen seiner ökologischen oder sozialen Merkmale bestimmt.

SFDR Άρθρο 8 Γνωστοποίηση ιστότοπου

Όνομα προϊόντος: *Global Convertible Bond Fund (to «Αμοιβαίο Κεφάλαιο»)*

Ένα αμοιβαίο κεφάλαιο της Morgan Stanley Investment Funds

Αναγνωριστικός κωδικός νομικής οντότητας:
K3YUM7KVVWUDP746NXC39

Περίληψη

Κανένας στόχος αιεφόρων επενδύσεων

Αυτό το χρηματοπιστωτικό προϊόν προωθεί περιβαλλοντικά και κοινωνικά χαρακτηριστικά, αλλά δεν έχει ως στόχο του αιεφόρες επενδύσεις.

Το Αμοιβαίο Κεφάλαιο θα έχει ελάχιστο ποσοστό 5% αιεφόρων επενδύσεων.

Η μεθοδολογία «μη πρόκλησης σημαντικής ζημίας» που εφαρμόζει ο Σύμβουλος Επενδύσεων επιδιώκει να διασφαλίσει ότι οι αιεφόρες επενδύσεις του Αμοιβαίου Κεφαλαίου δεν βλάπτουν σοβαρά κανέναν από τους υποχρεωτικούς δείκτες κύριων δυσμενών επιπτώσεων («**PAI**») των κανόνων SFDR της ΕΕ, οι οποίοι είναι σχετικοί με την επένδυση και συμμορφώνονται με ορισμένες ελάχιστες κοινωνικές εγγυήσεις.

Περιβαλλοντικά ή κοινωνικά χαρακτηριστικά του χρηματοπιστωτικού προϊόντος

Το Αμοιβαίο Κεφάλαιο προωθεί το περιβαλλοντικό χαρακτηριστικό του μετριασμού της κλιματικής αλλαγής με τον αποκλεισμό επενδύσεων σε ορισμένα είδη ορυκτών καυσίμων. Επιπλέον, το Αμοιβαίο Κεφάλαιο προωθεί το κοινωνικό χαρακτηριστικό της αποφυγής επενδύσεων σε ορισμένες δραστηριότητες που μπορούν να βλάψουν την ανθρώπινη υγεία και ευημερία.

Πέραν τούτου, τουλάχιστον το 5% των επενδύσεων του Αμοιβαίου Κεφαλαίου θα είναι αιεφόρες επενδύσεις σε: (α) εταιρικούς εκδότες των οποίων οι επιχειρηματικές πρακτικές, τα προϊόντα ή οι λύσεις έχουν καθαρή θετική συμβολή στους Στόχους Βιώσιμης Ανάπτυξης των Ηνωμένων Εθνών («**ΣΒΑ**»), ή (β) **Πράσινα, Κοινωνικά ή Βιώσιμα ομόλογα** («**Βιώσιμα ομόλογα**») που έχουν θετική περιβαλλοντική ή κοινωνική συμβολή μέσω της χρήσης των εσόδων τους.

Επενδυτική στρατηγική

Στόχος του Αμοιβαίου Κεφαλαίου είναι να παρέχει ποσοστό απόδοσης μέσω επενδύσεων κυρίως σε μετατρέψιμα ομόλογα που εκδίδονται από εταιρείες, οι οποίες είναι οργανωμένες ή λειτουργούν σε ανεπτυγμένες ή αναδυόμενες αγορές, τα οποία θα εκφράζονται σε παγκόσμια νομίσματα.

Το Αμοιβαίο Κεφάλαιο ανταποκρίνεται στα περιβαλλοντικά και κοινωνικά χαρακτηριστικά του μέσω αποκλεισμών: (α) εταιρειών που αποκτούν έσοδα από την κατασκευή ή τη λιανική πώληση αμφιλεγόμενων όπλων, την κατασκευή ή τη λιανική πώληση μη στρατιωτικών όπλων ή την κατασκευή καπνού και (β) εταιρειών που αντλούν το 5% ή περισσότερο των εσόδων τους από την εξόρυξη και εκμετάλλευση θερμικού άνθρακα.

Επιπλέον, το Αμοιβαίο Κεφάλαιο έχει σκοπό να επενδύει ένα ποσοστό του ενεργητικού του σε αιεφόρες επενδύσεις (όπως αναφέρονται παραπάνω).

Στο πλαίσιο της θεμελιώδους «bottom-up» (από τη βάση προς την κορυφή) ανάλυσης, ο Σύμβουλος Επενδύσεων ενσωματώνει συστηματικά την αξιολόγηση της εταιρικής διακυβέρνησης και των επιχειρηματικών πρακτικών ενός εκδότη.

Ποσοστό επενδύσεων

Ευθυγράμμιση με Π/Κ χαρακτηριστικά	90%
<i>Αιεφόρες επενδύσεις</i>	5%
<i>Ευθυγράμμιση με ταξινόμια</i>	-
<i>Άλλα περιβαλλοντικά</i>	1%
<i>Κοινωνικά</i>	1%
<i>Άλλα Π/Κ χαρακτηριστικά</i>	85%
Άλλες επενδύσεις	10%

Το Αμοιβαίο Κεφάλαιο αναμένει να διαθέσει τουλάχιστον το 5% του ενεργητικού του σε αιεφόρες επενδύσεις.

Το 90% των επενδύσεων είναι ευθυγραμμισμένες με περιβαλλοντικά ή κοινωνικά χαρακτηριστικά.

Αυτό αποτελείται εξ ολοκλήρου από επενδύσεις που προσφέρουν άμεση έκθεση σε οντότητες-αποδέκτες των επενδύσεων. Τα ποσοστά αυτά υπολογίζονται σύμφωνα με την αξία των επενδύσεων.

Παρακολούθηση περιβαλλοντικών ή κοινωνικών χαρακτηριστικών

Τα περιβαλλοντικά και κοινωνικά χαρακτηριστικά παρακολουθούνται χρησιμοποιώντας ένα συνδυασμό εργαλείων / ελέγχων, εργαλείων επιτήρησης χαρτοφυλακίου και χειροκίνητων επισκοπήσεων και αναλύσεων.

Οι ομάδες κανονιστικής συμμόρφωσης, κινδύνων και εποπτείας χαρτοφυλακίου του Συμβούλου Επενδύσεων συνεργάζονται με την επενδυτική ομάδα για τη διενέργεια τακτικών επισκοπήσεων χαρτοφυλακίου/απόδοσης και συστημικών ελέγχων προκειμένου να διασφαλίζεται η συμμόρφωση με τους επενδυτικούς στόχους του χαρτοφυλακίου και τα περιβαλλοντικά και κοινωνικά χαρακτηριστικά.

Μεθοδολογίες

Η συμμόρφωση με τους ελέγχους αποκλεισμού μετράται με βάση το ποσοστό των επενδύσεων του Αμοιβαίου Κεφαλαίου που παραβιάζουν τους ελέγχους αποκλεισμού.

Οι αιεφόρες επενδύσεις που πραγματοποιούνται από το Αμοιβαίο Κεφάλαιο αξιολογούνται όπως περιγράφεται ανωτέρω σε σχέση με τα «περιβαλλοντικά ή κοινωνικά χαρακτηριστικά του χρηματοπιστωτικού προϊόντος».

Πηγές και επεξεργασία δεδομένων

Ο Σύμβουλος Επενδύσεων αξιοποιεί δεδομένα ESG από διάφορους εξωτερικούς προμηθευτές. Τα δεδομένα αυτά συλλέγονται και αποθηκεύονται στο κεντρικό αποθετήριο δεδομένων ESG της Morgan Stanley, ώστε οποιαδήποτε επιχειρηματική μονάδα της Morgan Stanley,

συμπεριλαμβανομένων των επενδυτικών ομάδων MSIM, να έχει πρόσβαση στις πληροφορίες για σκοπούς έρευνας, ανάλυσης και δημιουργίας χαρτοφυλακίου, καθώς και υποβολής εκθέσεων σε πελάτες και κανονιστικές αρχές.

Λόγω κενών στην κάλυψη των δεδομένων, ένα μικρό ποσοστό των δεδομένων που χρησιμοποιούνται για την αξιολόγηση της ευθυγράμμισης με τα Π/Κ χαρακτηριστικά είναι κατ' εκτίμηση δεδομένα.

Περιορισμοί μεθοδολογιών και δεδομένων

Το Αμοιβαίο Κεφάλαιο μπορεί να χρησιμοποιεί εύλογα δεδομένα υποκατάστασης για τους δείκτες PAI όταν ο Σύμβουλος Επενδύσεων θεωρεί ότι τα δεδομένα δεν είναι ευρέως ή αξιόπιστα διαθέσιμα. Για περισσότερες λεπτομέρειες σχετικά με τους περιορισμούς των δεδομένων, ανατρέξτε στην πλήρη γνωστοποίηση του ιστότοπου.

Ο Σύμβουλος Επενδύσεων λαμβάνει εύλογα μέτρα για να διασφαλίσει ότι το Αμοιβαίο Κεφάλαιο είναι σε θέση να ανταποκριθεί στα περιβαλλοντικά και κοινωνικά χαρακτηριστικά του παρά τους περιορισμούς αυτούς, συμπεριλαμβανομένης της εξέτασης και αξιολόγησης των δεδομένων υποκατάστασης για να διασφαλίσει ότι αποτελούν κατάλληλα υποκατάστατα των ζητημάτων ESG που προωθεί ο σχετικός δείκτης PAI.

Επιπλέον, όταν για έναν εκδότη δεν υπάρχουν διαθέσιμα στοιχεία ελέγχου από τρίτους σε σχέση με τους αποκλεισμούς του Αμοιβαίου Κεφαλαίου, ο Σύμβουλος Επενδύσεων καταβάλλει κάθε δυνατή προσπάθεια για να επαληθεύσει, μέσω εσωτερικής έρευνας, ότι ο εκδότης δεν παραβιάζει τα δεσμευτικά κριτήρια του Αμοιβαίου Κεφαλαίου.

Δέουσα επιμέλεια

Ο Σύμβουλος Επενδύσεων βασίζεται σε εσωτερική έρευνα για να αντλήσει τη δική του ανεξάρτητη αξιολόγηση της αξίας και της πιστοληπτικής ικανότητας μιας εταιρείας, χρησιμοποιώντας ως εισρεόμενα στοιχεία την έρευνα τρίτων οργανισμών και την έρευνα από πλευράς πώλησης.

Ο Σύμβουλος Επενδύσεων διενεργεί εμπειριστατωμένη «bottom-up» (από τη βάση προς την κορυφή) ανάλυση για τον εντοπισμό εκδοτών ομολόγων που πληρούν τα επενδυτικά του κριτήρια όσον αφορά την ανταγωνιστική θέση, την αξία του franchise και την ποιότητα της διοίκησης. Όλοι αυτοί οι παράγοντες βοηθούν τον Σύμβουλο Επενδύσεων να κατανοήσει την ποιότητα και τη σταθερότητα των ταμειακών ροών της εταιρείας.

Στο πλαίσιο αυτής της διαδικασίας, ο Σύμβουλος Επενδύσεων εφαρμόζει επίσης μία «bottom-up» (από τη βάση προς την κορυφή) διαδικασία δέουσας επιμέλειας στις επενδύσεις του Αμοιβαίου Κεφαλαίου για τον εντοπισμό τυχόν κινδύνων βιωσιμότητας που θα

μπορούσαν να επηρεάσουν την αξία των περιουσιακών στοιχείων, οι οποίοι λαμβάνονται υπόψη από τον Σύμβουλο Επενδύσεων κατά τη λήψη επενδυτικών αποφάσεων σε μη δεσμευτική βάση.] Η διαδικασία δέουσας επιμέλειας βασίζεται σε εσωτερική έρευνα και σε δεδομένα τρίτων.

Επιπλέον, η ομάδα κινδύνου του Συμβούλου Επενδύσεων διεξάγει ανάλυση του επενδυτικού κινδύνου βιωσιμότητας από πάνω προς τα κάτω για το Αμοιβαίο Κεφάλαιο. Οι πληροφορίες αυτές παρακολουθούνται σε συνεχή βάση και οι μηνιαίες εκθέσεις παρέχονται στην ανώτερη διοίκηση του Συμβούλου Επενδύσεων.

Πολιτικές ενεργούς συμμετοχής

Ο Σύμβουλος Επενδύσεων μπορεί να συνεργαστεί με επιλεγμένους εκδότες ομολόγων σχετικά με τις εταιρικές πρακτικές διακυβέρνησής τους, καθώς και για άλλα ουσιώδη ζητήματα βιωσιμότητας που σχετίζονται με τους ΣΒΑ, συμπεριλαμβανομένων των αντισταθίσεων που σχετίζονται με τη βιωσιμότητα ή τις παραβιάσεις διεθνών κανόνων και αρχών. Αυτές οι δραστηριότητες ενεργούς συμμετοχής υποστηρίζουν, σε ποιοτική και μη δεσμευτική βάση, την αξιολόγηση των κύριων δυσμενών επιπτώσεων (PAI) και της χρηστής διακυβέρνησης του Αμοιβαίου Κεφαλαίου.

Καθορισμένος δείκτης αναφοράς

Το Αμοιβαίο Κεφάλαιο δεν έχει ορίσει δείκτη αναφοράς για την επίτευξη των περιβαλλοντικών ή κοινωνικών χαρακτηριστικών του.

Divulgación de información en el sitio web en virtud del Artículo 8 del SFDR

Nombre del producto: *Global Convertible Bond Fund (el "fondo")*

Fondo de Morgan Stanley Investment Funds

Identificador de personas jurídicas:

K3YUM7KVVWUDP746NXC39

Resumen

Sin objetivo de inversión sostenible

Este producto financiero promueve características medioambientales y sociales, si bien no tiene como objetivo una inversión sostenible.

El fondo tendrá una proporción mínima del 5% de inversiones sostenibles.

La metodología "no causar un perjuicio significativo" aplicada por el asesor de inversiones tiene como fin velar por que las inversiones sostenibles del fondo no ocasionen un perjuicio significativo a ninguno de los indicadores obligatorios de principales incidencias adversas ("PIA") de la normativa que establece el SFDR de la UE relevantes para la inversión y cumplan determinadas garantías sociales mínimas.

Características medioambientales o sociales del producto financiero

El fondo promueve la característica medioambiental de mitigación del cambio climático excluyendo inversiones en determinados tipos de combustibles fósiles. Además, el fondo promueve la característica social de evitar inversiones en determinadas actividades que pueden ser perjudiciales para la salud y el bienestar de los seres humanos.

Además, al menos el 5% de las inversiones del fondo serán inversiones sostenibles en: (a) emisores corporativos cuyos productos, soluciones o prácticas empresariales contribuyen de manera netamente positiva a los Objetivos de Desarrollo Sostenible ("ODS"); o bonos verdes, sociales o de sostenibilidad ("bonos sostenibles") que contribuyen de forma positiva desde el punto de vista medioambiental o social mediante el uso de su producto.

Estrategia de inversión

El objetivo del fondo es ofrecer una tasa de rentabilidad atractiva invirtiendo principalmente en bonos convertibles denominados en monedas globales emitidos por compañías constituidas o que lleven a cabo su actividad en mercados desarrollados o emergentes.

El fondo cumple sus características medioambientales y sociales excluyendo: (a) compañías que obtienen ingresos de la fabricación o la venta al por menor de armas controvertidas, la fabricación o la venta al por menor de armas de fuego de uso civil o la fabricación de tabaco; y (b) compañías que obtienen al menos el 5% de sus ingresos de la minería y la extracción de carbón térmico.

Además, el fondo procurará destinar una parte de sus activos a inversiones sostenibles (según se describe anteriormente).

En el marco de su proceso bottom-up de análisis fundamental, el asesor de inversiones lleva a cabo sistemáticamente una evaluación del gobierno corporativo y las prácticas empresariales del emisor.

Proporción de inversiones

Conformes con características medioambientales/sociales	90%
<i>Inversiones sostenibles</i>	5%
<i>Conformes con la Taxonomía</i>	-
<i>Otras medioambientales</i>	1%
<i>Sociales</i>	1%
<i>Otras características medioambientales/sociales</i>	85%
Otras inversiones	10%

El fondo prevé destinar un mínimo del 5% de sus activos a inversiones sostenibles.

El 90% de las inversiones son conformes con características medioambientales o sociales.

Se incluyen íntegramente las inversiones que ofrecen exposición directa a las compañías en las que se invierte. Estos porcentajes se cuantifican de acuerdo con el valor de las inversiones.

Seguimiento de las características medioambientales o sociales

Las características medioambientales o sociales se controlan utilizando una combinación de herramientas/controles, medios de supervisión de las carteras y revisiones y análisis manuales.

Los equipos de cumplimiento, riesgo y supervisión de carteras del asesor de inversiones colaboran con el equipo de inversión para llevar a cabo revisiones periódicas de la cartera / el rendimiento y comprobaciones sistémicas para asegurar el cumplimiento de los objetivos de inversión de la cartera y las características medioambientales y sociales.

Métodos

El cumplimiento con los controles de exclusión se cuantifica según el porcentaje de las inversiones del fondo que los incumplen.

Las inversiones sostenibles que realiza el fondo se evalúan como se describe con anterioridad en relación con las "características medioambientales o sociales del producto financiero".

Fuentes y tratamiento de datos

El asesor de inversiones recurre a datos ESG de varios proveedores externos. Estos datos se recogen y se almacenan en el depósito centralizado de datos ESG de Morgan Stanley para permitir a la unidad de negocio de Morgan Stanley, incluidos los equipos de inversión de MSIM, acceder a la información para realizar estudios, llevar a cabo análisis y elaboración de carteras, y facilitar información a clientes y reguladores.

Debido a las carencias en la cobertura de los datos, una pequeña proporción de los datos que se utilizan para evaluar el cumplimiento de las características medioambientales/sociales corresponde a datos estimados.

Limitaciones de los métodos y los datos

El fondo puede utilizar datos indirectos razonables relativos a los indicadores de PIA cuando el asesor de inversiones considere que no se dispone de datos de forma generalizada o que estos no resultan fiables. Para obtener más información sobre limitaciones de los datos, consulte la información íntegra en el sitio web.

El asesor de inversiones toma medidas razonables para velar por que el fondo pueda cumplir sus características medioambientales o sociales a pesar de estas limitaciones; esas medidas incluyen revisar y evaluar los datos indirectos para velar por que sean sustitutos adecuados para los temas ESG promovidos por el indicador de PIA correspondiente.

Además, en los casos en que no se dispone de datos de control de terceros en relación con las exclusiones del fondo correspondientes a un emisor, el asesor de inversiones desplegará todas las medidas que queden a su alcance para verificar, mediante un análisis interno, que el emisor no infringe los criterios vinculantes del fondo.

Diligencia debida

El asesor de inversiones se basa en análisis internos para llevar a cabo su propia evaluación independiente del valor y la solvencia de la compañía, recurriendo a análisis de agencias terceras y análisis de ventas.

El asesor de inversiones realiza análisis bottom-up exhaustivos para identificar emisores de bonos que cumplen sus criterios de inversión en cuanto a posición competitiva, valor de negocio y calidad de la gestión. Todos estos factores ayudan al asesor de inversiones a comprender la calidad y la estabilidad de los flujos de efectivo de la compañía.

En el marco de este proceso, el asesor de inversiones también aplica un proceso bottom-up de diligencia debida a las inversiones del fondo para identificar posibles riesgos de sostenibilidad que pudieran afectar al valor de los activos; el asesor de inversiones lo tiene en cuenta, de manera no vinculante, a la hora de tomar decisiones de inversión. El proceso de diligencia debida se basa en análisis internos y datos de terceros.

Además, el equipo de riesgo del asesor de inversiones lleva a cabo un análisis top-down del riesgo de inversión en clave de sostenibilidad del fondo. Esta información se controla de manera continua y se proporcionan informes mensuales a la alta dirección del asesor de inversión.

Políticas de implicación

El asesor de inversiones puede implicarse con emisores de bonos seleccionados acerca de sus prácticas de gobierno corporativo, así como sobre otros temas de sostenibilidad sustancial relativos a los ODS, como controversias relativas a sostenibilidad o incumplimientos de normas y principios internacionales. Estas actividades de implicación contribuyen, de manera cualitativa y no vinculante, a una evaluación adecuada de las PIA y el gobierno del fondo.

Índice de referencia designado

El fondo no ha designado un índice de referencia para cumplir sus características medioambientales o sociales.

SFDR-asetuksen 8 artiklan perusteella verkkosivustolla annettavat tuotetiedot

Tuotteen nimi: *Global Convertible Bond Fund* ("rahasto")

Morgan Stanley Investment Funds -rahasto

Oikeushenkilötunnus:

K3YUM7KVVWUDP746NXC39

Tiivistelmä

Ei kestäväää sijoitustavoitetta

Tämä rahoitustuote edistää ympäristöön tai yhteiskuntaan liittyviä ominaisuuksia, mutta sen tavoitteena ei ole kestävien sijoitusten tekeminen.

Rahasto sijoittaa vähintään viisi prosenttia varoistaan kestäviin sijoituksiin.

Rahastonhoitaja pyrkii "ei merkittävää haittaa" -periaatetta noudattamalla varmistamaan, etteivät rahaston kestävät sijoitukset aiheuta merkittävää haittaa millekään niiden kannalta relevantille EU:n SFDR-sääntöjen mukaiselle pakolliselle pääasiallisten haitallisten vaikutusten indikaattorille (PAI) ja että ne noudattavat määrättyjä sosiaalisia vähimmäissuojatoimia.

Ympäristöön tai yhteiskuntaan liittyvät rahoitustuotteen ominaisuudet

Rahasto edistää ilmastonmuutoksen hillitsemisen ympäristöominaisuutta sulkeamalla pois sijoitukset tietyntyyppisiin fossiilisiin polttoaineisiin. Lisäksi rahasto edistää yhteiskunnallisia ominaisuuksia välttämällä sijoituksia toimintoihin, jotka voivat aiheuttaa haittaa ihmisten terveydelle ja hyvinvoinnille.

Lisäksi rahasto sijoittaa vähintään viisi prosenttia varoistaan kestäviin sijoituksiin: a) yrityksiin, joiden liiketoimintakäytännöt, tuotteet tai ratkaisut edistävät positiivisesti Yhdistyneiden Kansakuntien kestävä kehityksen tavoitteiden (**Sustainable Development Goals, SDG**) saavuttamista, tai b) vihreisiin, sosiaaliin tai kestävä kehityksen joukkovelkakirjalainoihin ("kestävät joukkovelkakirjalainat"), joilla on positiivinen ympäristö- tai yhteiskuntavaikutus niiden tuottojen käytön kautta.

Sijoitusstrategia

Rahaston tavoitteena on tarjota houkutteleva tuottoaste sijoittamalla ensisijaisesti vaihtovelkakirjalainoihin, jotka on laskettu liikkeeseen joko kehittyneillä tai kehittyvillä markkinoilla järjestäytyneiden tai toimivien yritysten toimesta ja jotka ovat maailmanlaajuisten valuuttojen määräisiä.

Ympäristöön ja yhteiskuntaan liittyvien ominaisuuksien toteutumiseksi rahasto sulkee pois: a) yritykset, jotka saavat tuloja kiistanalaisten aseiden valmistuksesta tai vähittäismyynnistä, siviilituliaseiden valmistuksesta tai vähittäismyynnistä tai tupakan valmistuksesta, ja b) yritykset, jotka saavat vähintään viisi prosenttia tuloistaan kivihiilen louhinnasta ja talteenotosta.

Lisäksi rahasto aikoo sijoittaa osan varoistaan kestäviin sijoituksiin (edellä kuvatusti).

Osana bottom-up-perustutkimusprosessiaan rahastonhoitaja arvioi järjestelmällisesti liikkeeseenlaskijan hallinnointi- ja ohjausjärjestelmän sekä liiketoimintakäytännöt.

Sijoitusten osuus

Ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien mukainen	90%
<i>Kestävät sijoitukset</i>	5%
<i>Luokitusjärjestelmän mukainen</i>	-
<i>Muu ympäristöön liittyvä</i>	1%
<i>Yhteiskuntaan liittyvä</i>	1%
<i>Muu ympäristöön tai yhteiskuntaan liittyvä ominaisuus</i>	85%
Muut sijoitukset	10%

Rahasto sijoittaa vähintään viisi prosenttia varoistaan kestäviin sijoituksiin.

90 prosenttia sijoituksista on kohdennettu ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien mukaan.

Tämä koostuu täysin sijoituksista, jotka sisältävät sijoituskohteina oleviin yhteisöihin liittyvän suoran vastuun. Nämä prosenttiosuudet mitataan sijoitusten arvon mukaan.

Ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien seuranta

Ympäristöön ja yhteiskuntaan liittyviä ominaisuuksia seurataan yhdistelemällä työkaluja/seulontoja, salkun valvontatyökaluja ja käsin tehtävää asiakirjatarkastusta ja analyyseja.

Rahastonhoitajan compliance-, riski- ja salkkuasioiden valvontaryhmät toimivat yhteistyössä sijoitusryhmän kanssa säännöllisten salkun tai tulosten tarkastelujen ja järjestelmällisten tarkastusten suorittamiseksi sen varmistamiseksi, että salkun sijoitustavoitteita ja ympäristöön ja yhteiskuntaan liittyviä ominaisuuksia noudatetaan.

Menetelmät

Poissulkevien seulontojen noudattamista mitataan sen perusteella, mikä osuus rahaston sijoituksista rikkoo sen poissulkemisrajoja.

Rahaston kestävä sijoitus arvioidaan yllä kuvatun mukaisesti suhteessa "rahoitustuotteen ympäristöön tai yhteiskuntaan liittyviin ominaisuuksiin".

Tietolähteet ja tietojen käsittely

Rahastonhoitaja hyödyntää ulkopuolisilta toimittajilta saatuja ESG-tietoja. Nämä tiedot kerätään ja niitä säilytetään Morgan Stanley'n keskitetyssä ESG-tietovarastossa, jotta Morgan Stanley'n liiketoimintayksiköillä, mukaan lukien MSIM-sijoitusryhmät, on pääsy tietoihin tutkimusta, salkkuanalyseja ja salkun rakentamista sekä asiakasraportointia ja sääntelyn edellyttämää raportointia varten.

Tietojen kattavuudessa olevien puutteiden takia pieni osa tiedoista, joita käytetään ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien mukaisuuden arvioimiseen, on arvioita.

Menetelmiä ja tietoja koskevat rajoitukset

Rahasto voi PAI-indikaattorien osalta hyödyntää kohtuudella korvikedataa, jos rahastonhoitaja katsoo, ettei kattavia tai luotettavia tietoja ole saatavilla. Lisätietoja tietojen rajoituksista on verkkosivuilla annetuissa täydellisissä tuotetiedoissa.

Rahastonhoitaja ryhtyy kohtuullisiin toimiin sen varmistamiseksi, että rahasto pystyy toteuttamaan ympäristöön ja yhteiskuntaan liittyvät ominaisuudet näistä rajoituksista huolimatta, esimerkiksi tarkastelemalla ja arvioimalla korvikedataa sen varmistamiseksi, että se edustaa kunkin PAI-indikaattorin edistämää ESG-teemaa asianmukaisesti.

Jos rahaston poissulkemisiin liittyviä kolmannen osapuolen seulontatietoja ei ole saatavilla jonkin liikkeeseenlaskijan osalta, rahastonhoitaja pyrkii parhaansa mukaan hyödyntämään talon sisäistä tutkimusta tarkistaakseen, ettei liikkeeseenlaskija riko rahaston sitovia kriteerejä.

Asianmukainen huolellisuus

Rahastonhoitaja tukeutuu sisäiseen tutkimukseen muodostaakseen oman riippumattoman arvionsa liikkeeseenlaskijan arvosta ja luottokelpoisuudesta käyttäen apuna ulkopuolisen toimiston ja myyntipuolen tutkimuksia.

Rahastonhoitaja tekee perusteellisen bottom-up-analyysin yksilöidäkseen joukkovelkakirjojen liikkeeseenlaskijat, jotka täyttävät sen sijoituskriteerit kilpailuaseman, franchise-arvon ja johdon laadun osalta. Kaikki nämä tekijät auttavat rahastonhoitajaa ymmärtämään liikkeeseenlaskijan kassavirtojen laatua ja vakautta.

Osana tätä prosessia rahastonhoitaja tekee rahaston sijoituksille myös bottom-up due diligence -tarkastuksia yksilöidäkseen kaikki kestävyysriskit, jotka voivat vaikuttaa varojen arvoon. Rahastonhoitaja ottaa nämä riskit huomioon tehdessään sijoituspäätöksiä ei-sitovasti. Due diligence -prosessi perustuu sisäisiin tutkimuksiin ja kolmannen osapuolen tietoihin.

Lisäksi rahastonhoitajan riskitiimi suorittaa rahastolle top-down-lähestymistavan mukaisia sijoitusten kestävyysriskianalysejä. Näitä tietoja seurataan jatkuvasti, ja kuukausiraportit toimitetaan rahastonhoitajan ylimmälle johdolle.

Vaikuttamispolitiikat

Rahastonhoitaja voi keskustella valittujen joukkovelkakirjojen liikkeeseenlaskijoiden kanssa niiden hallintokäytännöistä sekä muista olennaisista kestävä kehityksen tavoitteisiin liittyvistä vastuullisuuskysymyksistä, mukaan lukien kestävyteen liittyvät kiistat tai kansainvälisten normien ja periaatteiden rikkomukset. Tällaiset vaikuttamistoimet tukevat laadulliselta ja ei-sitovalta pohjalta rahaston PAI:n ja hyvän hallintotavan arviointia.

Nimetty vertailuarvo

Rahastolla ei ole nimettyä vertailuarvoa sen ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien toteutumiseksi.

Divulgations sur le site Web en vertu de l'Article 8 du SFDR

Nom du produit : *Global Convertible Bond Fund (le « Fonds »)*

Un fonds de Morgan Stanley Investment Funds

Identifiant de l'entité juridique :

K3YUM7KVVWUDP746NXC39

Résumé

Sans objectif d'investissement durable

Ce produit financier promeut des caractéristiques environnementales et sociales, mais n'a pas pour objectif l'investissement durable.

Le Fonds comportera un minimum de 5 % d'investissements durables.

La méthodologie « ne pas nuire de manière significative » appliquée par le Conseiller en investissement vise à garantir que les investissements durables du Fonds ne nuisent pas de manière significative à l'un des principaux indicateurs d'incidence négative (« PAI ») des règles SFDR de l'UE qui sont pertinents pour l'investissement et respectent certaines garanties sociales minimales.

Caractéristiques environnementales ou sociales du produit financier

Le Fonds promeut la caractéristique environnementale d'atténuation du changement climatique en excluant les investissements dans certains types d'énergies fossiles. En outre, le Fonds promeut la caractéristique sociale consistant à éviter les investissements dans certaines activités qui peuvent nuire à la santé et au bien-être humains.

En outre, un minimum de 5 % des investissements du Fonds sera constitué d'investissements durables dans : (a) des entreprises dont les pratiques commerciales, les produits ou les solutions apportent une contribution positive nette aux Objectifs de développement durable des Nations unies (« SDG »); ou (b) des obligations vertes, sociales ou de développement durable (« Obligations durables ») apportant une contribution environnementale ou sociale positive à travers leur utilisation de produits.

Stratégie d'investissement

L'objectif du fonds est de générer un taux de rendement attractif en investissant principalement dans des obligations convertibles émises par des sociétés organisées ou opérant sur les marchés développés ou émergents et libellées dans des devises internationales.

Le Fonds respecte ses caractéristiques environnementales et sociales à travers l'exclusion des : (a) sociétés qui génèrent des revenus de la fabrication ou la vente d'armes controversées, la fabrication ou la vente d'armes à feu civiles ou la fabrication de tabac ; et (b) sociétés qui génèrent 5 % ou plus de leurs revenus grâce à l'extraction de charbon thermique.

En outre, le Fonds vise à investir une proportion de ses actifs en investissements durables (tel que décrit ci-dessus).

Dans le cadre de son processus de recherche fondamentale « bottom-up (ascendante) », le Conseiller en investissements incorpore systématiquement l'évaluation de la gouvernance d'entreprise et des pratiques commerciales d'un émetteur.

Proportion des investissements

Alignés sur les caractéristiques environnementales et sociales (E/S)	90%
<i>Investissements durables</i>	<i>5%</i>
<i>alignés sur la taxonomie</i>	<i>-</i>
<i>Autres caractéristiques environnementales</i>	<i>1%</i>
<i>Sociales</i>	<i>1%</i>
<i>Autres caractéristiques E/S</i>	<i>85%</i>
Autres investissements	10%

Le Fonds prévoit d'allouer un minimum de 5 % de ses actifs aux investissements durables.

90 % des investissements sont alignés sur des caractéristiques environnementales ou sociales.

Il s'agit entièrement d'investissements qui offrent une exposition directe aux entités bénéficiaires. Ces pourcentages sont mesurés en fonction de la valeur des investissements.

Contrôle des caractéristiques environnementales ou sociales

Les caractéristiques environnementales et sociales sont contrôlées à l'aide d'une combinaison d'outils et de filtres, d'outils de surveillance du portefeuille et d'examen et analyses documentaires manuels.

Les équipes de conformité, de risque et de surveillance du portefeuille du Conseiller en investissements collaborent avec l'équipe d'investissement pour effectuer des examens réguliers du portefeuille/de la performance et des contrôles systémiques afin de garantir le respect des objectifs d'investissement du portefeuille et des caractéristiques environnementales et sociales.

Méthodes

La conformité aux filtres exclusifs est mesurée en fonction du pourcentage des investissements du Fonds qui ne remplissent pas les conditions de filtrage exclusifs.

Les investissements durables effectués par le Fonds sont évalués tel que susmentionné en lien avec les caractéristiques environnementales ou sociales du produit financier.

Sources et traitement des données

Le Conseiller en investissements du Fonds utilise des données ESG provenant de divers fournisseurs externes. Ces données sont collectées et stockées dans le référentiel de données ESG centralisé de Morgan Stanley afin de permettre à toute division commerciale de Morgan Stanley, y compris les équipes d'investissement MSIM, d'accéder aux informations à des fins de recherche, d'analyse et de constitution de portefeuilles,

ainsi que pour les rapports destinés aux clients et aux autorités réglementaires.

En raison de lacunes dans la couverture des données, une faible proportion des données utilisées pour évaluer la conformité aux caractéristiques E/S sont des données estimées.

Limites aux méthodes et aux données

Le Fonds peut utiliser des données de substitution raisonnables pour les indicateurs PAI lorsque le Conseiller en investissements considère que les données ne sont pas disponibles de manière large ou fiable. Pour plus d'informations sur les limitations des données, veuillez consulter la déclaration complète du site Web.

Le Conseiller en investissements prend des mesures raisonnables pour s'assurer que le Fonds est en mesure de respecter ses caractéristiques environnementales et sociales malgré ces limites, notamment en examinant et en évaluant les mandataires pour s'assurer qu'ils sont des substituts appropriés aux thèmes ESG préconisés par l'indicateur PAI pertinent.

En outre, lorsque les données de filtrage tierces en lien avec les exclusions du Fonds ne sont pas disponibles pour un émetteur, le Conseiller en investissements utilisera tous les moyens pour vérifier, via une recherche interne, que l'émetteur ne viole pas les critères contraignants du Fonds.

Diligence raisonnable

Le Conseiller en investissements s'appuie sur la recherche interne pour évaluer de manière indépendante la valeur et la solvabilité d'une société, à l'aide d'une agence tierce et des analyses sell-side.

Le Conseiller en investissements mène une analyse « bottom up (ascendante) » approfondie pour sélectionner des émetteurs obligataires qui répondent aux critères d'investissement fixés en matière de positionnement concurrentiel, de valeur de l'entreprise et de qualité de l'équipe de direction. Ces facteurs aident tous le Conseiller en investissements à comprendre la qualité et la stabilité des flux de trésorerie de la société.

Dans le cadre de ce processus, le Conseiller en investissements mène également des vérifications « bottom up (ascendante) » sur les investissements du Fonds pour identifier tout risque de développement durable qui pourrait impacter la valeur des actifs, pris en compte par le Conseiller en investissements lors de la prise de décision d'investissement sur une base non contraignante.] Le processus de vérification se base sur la recherche interne et les données tierces.

En outre, l'équipe de risque du Conseiller en investissements mène une analyse des risques d'investissement de durabilité descendante sur le Fonds.

Ces informations sont constamment surveillées et des rapports mensuels sont fournis aux membres de la direction du Conseiller en investissements.

Politiques d'engagement

Le Conseiller en investissement peut nouer un dialogue avec des émetteurs d'obligations sélectionnées sur leur pratiques de gouvernance d'entreprise, ainsi que sur d'autres questions significatives de développement durable liées aux SDG, y compris les controverses liées au développement durable ou les violations des normes et principes internationaux. Lesdites activités de dialogue appuient, sur une base qualitative et non contraignante, les PAI et la bonne évaluation de la gouvernance du Fonds.

Indice de référence désigné

Le Fonds n'a pas désigné d'indice de référence aux fins de la réalisation de ses caractéristiques environnementales ou sociales.

Informativa del sito web per i prodotti ai sensi dell'Articolo 8 del Regolamento SFDR

Nome del prodotto: *Global Convertible Bond Fund* (il "**Comparto**")

Un comparto di Morgan Stanley Investment Funds

Identificativo della persona giuridica:
K3YUM7KVVWUDP746NXC39

Sintesi

Nessun obiettivo d'investimento sostenibile

Questo prodotto finanziario promuove caratteristiche ambientali e sociali, ma non persegue l'obiettivo di un investimento sostenibile.

Il Comparto avrà una quota minima del 5% di investimenti sostenibili.

La metodologia "non arrecare un danno significativo" (DNSH, Do No Significant Harm) applicata dal Consulente d'investimento del Comparto mira a garantire che gli investimenti sostenibili del Comparto non solo non causino danni significativi ad alcun indicatore obbligatorio dei principali effetti negativi ("**PAI**") ai sensi delle norme del Regolamento UE SFDR e applicabile all'investimento, bensì che rispettino anche alcune garanzie sociali minime.

Caratteristiche ambientali o sociali del prodotto finanziario

Il Comparto promuove la caratteristica ambientale della lotta ai cambiamenti climatici escludendo gli investimenti in determinati tipi di combustibili fossili. Inoltre, il Comparto promuove la caratteristica sociale rappresentata dalla scelta di evitare di investire in determinate attività suscettibili di arrecare danni alla salute e al benessere dell'uomo.

Inoltre, almeno il 5% degli investimenti del Comparto avrà una quota di investimenti sostenibili in: (a) emittenti societari con prassi aziendali, prodotti o soluzioni che apportano un contributo positivo netto agli Obiettivi di Sviluppo Sostenibile delle Nazioni Unite. ("**SDG**"); (b) investimenti obbligazionari classificati come verdi/sociali/sostenibili ("Obbligazioni sostenibili") che utilizzano i proventi per dare un contributo positivo all'ambiente o alla società.

Strategia d'investimento

L'obiettivo del Comparto è quello di offrire un tasso di rendimento interessante investendo principalmente in obbligazioni convertibili emesse da società organizzate od operanti nei mercati

sviluppati o emergenti e che saranno denominate in valute globali.

Il Comparto soddisfa le caratteristiche ambientali e sociali operando le seguenti esclusioni: (a) società che generano ricavi dalla produzione o dalla vendita di armi controverse, dalla produzione o dalla vendita di armi da fuoco per uso civile o dalla fabbricazione di prodotti a base di tabacco; (b) società che realizzano il 5% o più dei ricavi dall'estrazione e dallo sfruttamento del carbone termico.

Inoltre, il Comparto mira a investire una percentuale del proprio patrimonio in investimenti sostenibili (come descritto sopra).

Nell'ambito del proprio processo di ricerca fondamentale bottom-up, il Consulente d'investimento integra sistematicamente la valutazione della corporate governance e delle prassi aziendali di un emittente.

Quota degli investimenti

Allineati con caratteristiche A/S	90%
<i>Investimenti sostenibili</i>	5%
<i>Allineati alla tassonomia</i>	-
<i>Altri aspetti ambientali</i>	1%
<i>Sociali</i>	1%
<i>Altre caratteristiche A/S</i>	85%
Altri investimenti	10%

Il Comparto prevede di allocare almeno il 5% del proprio patrimonio negli investimenti sostenibili.

Il 90% degli investimenti è allineato a caratteristiche ambientali o sociali.

Si tratta esclusivamente di investimenti che offrono un'esposizione diretta alle entità partecipate. Queste percentuali sono misurate in base al valore degli investimenti.

Monitoraggio delle caratteristiche ambientali o sociali

Le caratteristiche ambientali e sociali vengono monitorate utilizzando una combinazione di screening/strumenti, strumenti di monitoraggio del portafoglio e analisi/revisioni della sala operativa.

I team responsabili della conformità, del rischio e del monitoraggio del portafoglio del Consulente d'investimento collaborano con il team d'investimento per condurre periodicamente esami del portafoglio/della performance e controlli sistemici per garantire l'aderenza agli obiettivi d'investimento del portafoglio e alle caratteristiche ambientali e sociali.

Metodologie

La conformità ai filtri di esclusione viene misurata in base alla percentuale di investimenti del Comparto che viola i filtri di esclusione.

Gli investimenti sostenibili effettuati dal Comparto vengono valutati secondo le modalità sopra descritte in relazione alle “caratteristiche ambientali o sociali del prodotto finanziario”.

Fonti e trattamento dei dati

Il Consulente d’investimento si avvale di dati ESG provenienti da diversi fornitori esterni. Questi dati vengono raccolti e conservati nell’archivio dei dati ESG centralizzato di Morgan Stanley per consentire a qualunque divisione di quest’ultima, ivi compresi i team d’investimento MSIM, di accedere alle informazioni per effettuare ricerche e analisi e occuparsi della costruzione del portafoglio, nonché per fornire a clienti e autorità di regolamentazione le informative richieste.

Per via di alcune lacune nella copertura dei dati, una piccola parte dei dati utilizzati per valutare l’allineamento a caratteristiche A/S è costituita da dati stimati.

Limiti delle metodologie e dei dati

Il Comparto può utilizzare dati surrogati ragionevoli per gli indicatori PAI laddove il Consulente d’investimento ritenga che i dati non siano generalmente disponibili o non siano attendibili. Per maggiori dettagli sui limiti dei dati, si rimanda all’informativa completa presente sul sito web.

Il Consulente d’investimento adotta misure ragionevoli per garantire che il Comparto risponda alle proprie caratteristiche ambientali e sociali nonostante tali limitazioni, conducendo, tra le altre cose, una revisione e una valutazione dei dati surrogati per assicurarsi che siano sostituiti adeguati per i temi ESG promossi dall’indicatore PAI applicabile.

Inoltre, ove per un emittente non fossero disponibili dati di screening forniti da terzi in relazione alle esclusioni del Comparto, il Consulente d’investimento farà del suo meglio per verificare, tramite ricerche interne, che l’emittente non violi i criteri vincolanti del Comparto.

Dovuta diligenza

Per derivare una valutazione indipendente del valore e del merito di credito di una società, il Consulente d’investimento si basa su un’attività di ricerca interna utilizzando i dati di ricerche sell-side e di agenzie terze.

Il Consulente d’investimento conduce un’analisi bottom-up approfondita al fine di individuare gli emittenti obbligazionari che soddisfano i suoi criteri d’investimento in termini di posizionamento competitivo, solidità del marchio e qualità del management. Tutti questi fattori aiutano il Consulente d’investimento a comprendere la qualità e la stabilità dei flussi di cassa della società.

Nell’ambito di questo processo, il Consulente d’investimento conduce anche una due diligence bottom-up sugli investimenti del Comparto per individuare eventuali rischi di sostenibilità suscettibili di incidere sul valore degli attivi, tenendone conto al momento di prendere decisioni d’investimento su base non vincolante. Il processo di due diligence si fonda su una ricerca interna e su dati di terzi.

Inoltre, il team di gestione del rischio del Consulente d’investimento esegue un’analisi top-down del rischio d’investimento sulla sostenibilità del Comparto. Queste informazioni vengono monitorate su base continuativa e le relazioni mensili vengono trasmesse al management senior del Consulente d’investimento.

Politiche di impegno

Il Consulente d’investimento può condurre attività di engagement con emittenti obbligazionari selezionati sia in merito alle prassi di governance societaria che in merito ad altri aspetti rilevanti sul piano della sostenibilità e relativi agli SDG, ad esempio controversie riguardanti la sostenibilità o violazioni di norme e principi internazionali. Tali attività di engagement contribuiscono, su base qualitativa e non vincolante, alla valutazione dei PAI e della buona governance del Comparto.

Indice di riferimento designato

Per realizzare le proprie caratteristiche ambientali o sociali, il Comparto non ha designato alcun indice di riferimento.

SFDR Artikel 8 Openbaarmaking van de website

Productnaam: *Global Convertible Bond Fund (het "Fonds")*

Een fonds van Morgan Stanley Investment Funds

Rechtspersoonlijkheid:

K3YUM7KVVWUDP746NXC39

Samenvatting

Geen duurzame beleggingsdoelstelling

Dit financiële product bevordert milieu- en sociale kenmerken, maar heeft niet tot doel duurzaam te beleggen.

Het fonds zal voor minimaal 5% duurzaam beleggen.

De door de beleggingsadviseur toegepaste "do no significant harm"-methodologie moet ervoor zorgen dat de duurzame beleggingen van het fonds geen significante schade veroorzaken aan een van de verplichte hoofd ("PAI") indicatoren voor negatieve effecten in de SFDR-regels van de EU die relevant zijn voor de belegging en voldoen aan bepaalde minimale sociale waarborgen.

Ecologische of sociale kenmerken van het financiële product

Het fonds bevordert het milieukenmerk van beperking van klimaatverandering door beleggingen in bepaalde soorten fossiele brandstoffen uit te sluiten. Daarnaast bevordert het fonds het sociale kenmerk van het vermijden van beleggingen in bepaalde activiteiten die de gezondheid en het welzijn van de mens kunnen schaden.

Daarnaast zal minimaal 5% van de beleggingen van het fonds bestaan uit duurzame beleggingen in: (a) bedrijfsemissanten wier bedrijfspraktijken, producten of oplossingen een netto positieve bijdrage leveren aan de Sustainable Development Goals ("SDGs"); **van de Verenigde Naties; of (b) groene, sociale of duurzaamheidsobligaties** ("Duurzame Obligaties") die een positieve ecologische of sociale bijdrage leveren door het gebruik van de opbrengsten.

Beleggingsstrategie

De doelstelling van het Fonds is een aantrekkelijk rendement te bieden door voornamelijk te beleggen in converteerbare obligaties die zijn uitgegeven door bedrijven die georganiseerd zijn in of actief zijn op ontwikkelde of opkomende markten en die luiden in wereldwijde valuta's.

Het fonds voldoet aan zijn milieu- en sociale kenmerken door uitsluiting van: (a) ondernemingen

die inkomsten genereren uit de productie van of detailhandel in controversiële wapens, de productie van of detailhandel in civiele vuurwapens of de productie van tabak; en (b) ondernemingen die 5% of meer van hun inkomsten halen uit de winning van thermische kolen.

Daarnaast streeft het fonds ernaar een deel van zijn vermogen te beleggen in duurzame beleggingen (zoals hierboven beschreven).

Als onderdeel van zijn bottom-up, fundamenteel onderzoeksproces neemt de beleggingsadviseur systematisch de beoordeling van het ondernemingsbestuur en de bedrijfspraktijken van een emittent op.

Aandeel beleggingen

Op één lijn met de E/S-eigenschappen	90%
<i>Duurzame beleggingen</i>	5%
<i>Taxonomie afgestemd</i>	-
<i>Overige milieu</i>	1%
<i>Sociale</i>	1%
<i>Overige E/S-eigenschappen</i>	85%
Overige beleggingen	10%

Het fonds verwacht minimaal 5% van zijn vermogen toe te wijzen aan duurzame beleggingen.

90% van de beleggingen liggen op één lijn met milieu- of sociale kenmerken.

Dit omvat alle beleggingen die een directe blootstelling bieden aan de entiteiten waarin men belegt. Deze percentages worden gemeten volgens de waarde van de beleggingen.

Monitoring ecologische of sociale kenmerken

De milieu- en sociale kenmerken worden gecontroleerd met een combinatie van instrumenten/screens, instrumenten voor portefeuillebewaking en handmatige documentaire beoordelingen en analyses.

De teams Compliance, Risk en Portfolio Surveillance van de beleggingsadviseur werken samen met het beleggingsteam om regelmatig portefeuille-/prestatiebeoordelingen en systemische controles uit te voeren om ervoor te zorgen dat de beleggingsdoelstellingen van de portefeuille en de milieu- en sociale kenmerken worden nageleefd.

Methodologieën

De naleving van de uitsluitingsschermen wordt gemeten op basis van het percentage van de beleggingen van het fonds dat de uitsluitingsschermen schendt.

De duurzame beleggingen van het fonds worden beoordeeld zoals hierboven beschreven met betrekking tot "milieu- of sociale kenmerken van het financiële product".

Databronnen en -verwerking

De beleggingsadviseur maakt gebruik van ESG-gegevens van diverse externe leveranciers. Deze gegevens worden verzameld en opgeslagen in de gecentraliseerde ESG-gegevensopslagplaats die elke afdeling van Morgan Stanley, inclusief de beleggingsteams van MSIM, toegang verstrekt tot de informatie voor onderzoek, portefeuilleanalyse en -opbouw, en rapportage aan cliënten en toezichthouders.

Als gevolg van lacunes in de gegevensdekking wordt een klein deel van de gegevens die worden gebruikt om de afstemming op de E/S-kenmerken te beoordelen, geschat.

Methodologische en databeperkingen

Het Fonds kan redelijke vervangende gegevens voor PAI-indicatoren gebruiken wanneer de beleggingsadviseur van mening is dat de gegevens niet algemeen beschikbaar of betrouwbaar zijn. Voor meer details over de gegevensbeperkingen wordt verwezen naar de volledige bekendmaking op de website.

De beleggingsadviseur neemt redelijke maatregelen om ervoor te zorgen dat het fonds ondanks deze beperkingen aan zijn milieu- en sociale kenmerken kan voldoen, met inbegrip van het herzien en beoordelen van volmachten om ervoor te zorgen dat zij geschikte substituten zijn voor de ESG-thema's die door de relevante PAI-indicator worden bevorderd.

Wanneer voor een emittent geen screeninggegevens van derden met betrekking tot de uitsluitingen van het fonds beschikbaar zijn, zal de beleggingsadviseur bovendien zijn uiterste best doen om via intern onderzoek na te gaan of de emittent de bindende criteria van het fonds niet schendt.

Due diligence

De beleggingsadviseur baseert zich op intern onderzoek om zijn eigen onafhankelijke beoordeling van de waarde en kredietwaardigheid van een onderneming af te leiden, waarbij hij gebruik maakt

van onderzoek van agentschappen en sell side van derden als input.

De beleggingsadviseur voert een diepgaande bottom-up analyse uit om obligatie-emittenten te identificeren die voldoen aan zijn beleggingscriteria in termen van concurrentiepositie, franchise-waarde en managementkwaliteit. Al deze factoren helpen de beleggingsadviseur inzicht te krijgen in de kwaliteit en stabiliteit van de kasstromen van de onderneming.

Als onderdeel van dit proces voert de beleggingsadviseur ook bottom-up due diligence uit op de beleggingen van het fonds om eventuele duurzaamheidsrisico's op te sporen die de waarde van de activa zouden kunnen beïnvloeden.] Het due diligence-proces is gebaseerd op intern onderzoek en gegevens van derden.

Daarnaast voert het risicoteam van de beleggingsadviseur een top-down analyse uit van de beleggingsrisico's op het gebied van duurzaamheid voor het fonds. Deze informatie wordt voortdurend gecontroleerd en er wordt maandelijks verslag uitgebracht aan het senior management van de beleggingsadviseur.

Engagementbeleid

De beleggingsadviseur kan met geselecteerde obligatie-emittenten in gesprek gaan over hun corporate governance-praktijken en over andere belangrijke duurzaamheidskwesties in verband met de SDG's, met inbegrip van duurzaamheidsgerelateerde controverses of schendingen van internationale normen en beginselen. Dergelijke engagementactiviteiten ondersteunen, op kwalitatieve en niet-bindende basis, de beoordeling van de PAI en goed bestuur van het fonds.

Aangewezen referentiebenchmark

Het fonds heeft geen referentiebenchmark aangewezen voor het bereiken van zijn milieu- of sociale kenmerken.

SFDR-artikkel 8 – kunngjøring på nettstedet

Produktnavn: *Global Convertible Bond Fund*
("fondet")

Et fond i Morgan Stanley Investment Funds

LEI-kode: K3YUM7KVVUDP746NXC39

Sammendrag

Ingen mål om bærekraftig investering

Dette finansproduktet fremmer miljømessige og sosiale egenskaper, men har ikke bærekraftig investering som mål.

Fondet vil ha en minimumsandel på 5 % bærekraftige investeringer.

Metoden for "ingen vesentlig skade" som anvendes av investeringsrådgiveren, søker å sikre at fondets bærekraftige investeringer ikke forårsaker betydelig skade på noen av de obligatoriske indikatorene for vesentlig negative konsekvenser på bærekraftsfaktorer ("PAI") i EUs SFDR-regler som er relevante for investeringen, samt at de overholder visse minste sosiale sikkerhetstiltak.

Miljømessige eller sosiale egenskaper ved det finansielle produktet

Fondet fremmer miljøegenskaper ved å redusere klimaendringer ved å utelukke investeringer i visse typer fossilt brensel. I tillegg fremmer fondet sosiale hensyn ved å unngå investeringer i visse aktiviteter som kan skade menneskers helse og velvære.

I tillegg vil minimum 5 % av fondets investeringer være bærekraftige investeringer i: (a) selskapsutstedere hvis forretningspraksis, produkter eller løsninger gir et netto positivt bidrag til FN's mål for bærekraftig utvikling ("SDG") eller (b) grønne, sosiale eller bærekraftige obligasjoner ("bærekraftige obligasjoner") som gir et positivt miljømessig eller sosialt bidrag gjennom bruken av inntektene.

Investeringsstrategi

Fondets mål er å gi en attraktiv avkastning gjennom investering primært i konvertible obligasjoner utstedt av selskaper organisert eller som opererer i enten utviklede eller fremvoksende markeder som vil være dominert i globale valutaer.

Fondet oppfyller sine miljømessige og sosiale egenskaper gjennom utelukkelse av: (a) selskaper som genererer inntekter fra kontroversiell våpenproduksjon eller detaljhandel, sivil våpenproduksjon eller detaljhandel eller tobakksproduksjon; og (b) selskaper som får 5 % eller mer av sine inntekter fra termisk kullgruvedrift og utvinning.

I tillegg har fondet som mål å investere en andel av sine aktiva i bærekraftige investeringer (som beskrevet ovenfor).

Som en del av sin prosess med nedenfra-og-opp-analyse av fundamentale forhold, innlemmer investeringsrådgiveren systematisk vurderingen av en utsteders selskapsstyring og forretningsskikk.

Andel av investeringer

Tilpasset miljømessige/sosiale egenskaper	90%
<i>Bærekraftige investeringer</i>	5%
<i>Tilpasset til taksonomi</i>	-
<i>Andre miljøforhold</i>	1%
<i>Sosiale forhold</i>	1%
<i>Andre miljømessige/sosiale egenskaper</i>	85%
Andre investeringer	10%

Fondet forventer å allokere minimum 5 % av sine aktiva til bærekraftige investeringer.

90 % av investeringene er tilpasset miljømessige eller sosiale egenskaper.

Dette består utelukkende av investeringer som gir direkte eksponering mot foretak som det investeres i. Disse prosentandelene måles i henhold til verdien av investeringene.

Overvåking av miljømessige eller sosiale egenskaper

De miljømessige og sosiale egenskapene overvåkes ved hjelp av en kombinasjon av verktøy/utslingsmekanismer, porteføljeovervåkingsverktøy og manuelle gjennomganger av dokumentasjon og analyser.

Investeringsrådgiverens etterlevelses-, risiko- og porteføljeovervåkingsteam samarbeider med investeringsteamet for å gjennomføre regelmessige portefølje-/verdiutviklingsgjennomganger og systemkontroller for å sikre etterlevelse mht. porteføljens investeringsmål og miljømessige og sosiale egenskaper.

Metoder

Etterlevelsen av utslingsmekanismene måles ut fra prosentandelen av fondets investeringer som ikke oppfyller utslingsmekanismene.

De bærekraftige investeringene som gjøres av fondet vurderes som beskrevet ovenfor i forhold til "miljømessige eller sosiale egenskaper ved det finansielle produktet".

Datakilder og -behandling

Investeringsrådgiveren utnytter ESG-data fra ulike eksterne leverandører. Disse dataene samles inn og lagres i Morgan Stanleys sentraliserte ESG-datalager, slik at enhver forretningsenhet hos Morgan Stanley, deriblant MSIM-investeringsteam, har tilgang til informasjonen for analyse, porteføljegjennomgang og -oppbygning samt klient- og regelverksrapportering.

På grunn av hull i datadekningen er en liten andel av dataene som brukes til å vurdere samsvar med miljømessige og sosiale egenskaper, estimerte data.

Begrensninger i metoder og data

Fondet kan bruke rimelige referansedata for PAI-indikatorer der investeringsrådgiveren anser at dataene ikke er allment tilgjengelig eller pålitelige. Ytterligere detaljer om databegrensninger er å finne i den fullstendige informasjonen på nettsiden.

Investeringsrådgiveren treffer rimelige tiltak for å sikre at fondet er i stand til å oppfylle sine miljømessige og sosiale egenskaper til tross for disse begrensningene, inkludert gjennomgang og vurdering av fullmakter for å sikre at de utgjør passende erstatninger for ESG-temaene som fremmes av den relevante PAI-indikatoren.

I tillegg, dersom tredjeparts utsilingsdata med hensyn til fondets ekskluderingsliste ikke er tilgjengelig for en utsteder, vil investeringsrådgiveren gjøre sitt beste for å bekrefte, gjennom interne undersøkelser, at utstederen ikke bryter fondets bindende kriterier.

Due diligence

Investeringsrådgiveren er avhengig av intern analyse for å utlede sin egen uavhengige vurdering av en et selskaps verdi og kredittverdighet, ved å bruke informasjon fra tredjepartsbyråer og salgssideanalyse.

Investeringsrådgiveren gjennomfører en dyptgående nedenfra-og-opp-analyse for å identifisere obligasjonsutstedere som oppfyller investeringskriteriene mht. konkurranseposisjon, franchiseverdi og ledelseskvalitet. Disse faktorene hjelper investeringsrådgiveren med å forstå kvaliteten og stabiliteten ved selskapets kontantstrømmer.

Som en del av denne prosessen gjennomfører investeringsrådgiveren også nedenfra -og-opp-basert due diligence av fondets investeringer for å identifisere eventuelle bærekraftsrisikoer som kan påvirke verdien av aktivaene, noe som vurderes av investeringsrådgiveren når investeringsbeslutninger tas på ikke-bindende grunnlag.] Due diligence-prosessen er basert på intern analyse og tredjepartsdata.

I tillegg utfører investeringsrådgiverens risikoteam ovenfra-og-ned-baserte risikoanalyser av bærekraftsinvestering for fondet. Denne informasjonen overvåkes fortløpende, og månedlige rapporter leveres til investeringsrådgiverens topledelse.

Retningslinjer for engasjement

Investeringsrådgiveren kan engasjere seg overfor utvalgte obligasjonsutstedere vedrørende deres selskapsstyringspraksis, så vel som i andre vesentlige bærekraftsspørsmål knyttet til bærekraftsmålene, inkludert bærekraftsrelaterte uoverensstemmelser eller brudd på internasjonale normer og prinsipper. Slike engasjementsaktiviteter understøtter, på et kvalitativt og ikke-bindende grunnlag, fondets vurdering av vesentlige negative konsekvenser (PAI) og god selskapsstyring.

Utpekt referanseindeks

Fondet har ikke utpekt en referanseindeks for å oppnå sine miljømessige eller sosiale egenskaper.

Divulgação do artigo 8.º do SFDR no site

Nome do produto: *Global Convertible Bond Fund*
(o “Fundo”)

Um fundo da Morgan Stanley Investment Funds

Identificador de entidade jurídica:

K3YUM7KVVWUDP746NXC39

Resumo

Produto sem objetivo de investimento sustentável

Este produto financeiro promove características ambientais e sociais, mas não tem por objetivo o investimento sustentável.

O Fundo terá uma proporção mínima de 5% em investimentos sustentáveis.

A metodologia de “não prejudicar significativamente” aplicada pelo Consultor de Investimentos procura assegurar que os investimentos sustentáveis do Fundo não prejudicam significativamente nenhum dos indicadores dos principais impactos negativos (“PAI”) obrigatórios que constam das regras do SFDR da UE, relevantes para o investimento e que cumprem determinadas salvaguardas sociais mínimas.

Características ambientais ou sociais do produto financeiro

O Fundo promove a característica ambiental de mitigação das alterações climáticas ao excluir investimentos em determinados tipos de combustíveis fósseis. Adicionalmente, o Fundo promove a característica social de evitar investimentos em determinadas atividades que podem causar danos à saúde e ao bem-estar do ser humano.

Além disso, um mínimo de 5% dos investimentos do Fundo serão investimentos sustentáveis em: (a) emissores empresariais cujas práticas empresariais, produtos ou soluções contribuem de forma positiva para os Objetivos de Desenvolvimento Sustentável (“ODS”) das Nações Unidas; ou (b) Obrigações Verdes, de Investimento Social ou Sustentáveis (“Obrigações Sustentáveis”) que contribuem de forma positiva para o ambiente ou para a sociedade através da afetação das receitas.

Estratégia de investimento

O objetivo do Fundo é proporcionar uma taxa de retorno atrativa primordialmente através de investimentos em obrigações convertíveis emitidas por empresas organizadas ou que operam em

mercados desenvolvidos ou emergentes que irão ser denominados em divisas internacionais.

O Fundo cumpre as suas características ambientais e sociais através da exclusão de: (a) empresas que geram receitas provenientes do fabrico ou da venda a retalho de armamento controverso, do fabrico ou da venda a retalho de armas de fogo civis ou do fabrico de tabaco; e (b) empresas que obtêm 5% ou mais das respetivas receitas a partir da extração e da mineração de carvão térmico.

Além disso, o Fundo visa investir uma proporção dos seus ativos em investimentos sustentáveis (conforme descrito anteriormente).

Como parte do respetivo processo ascendente de investigação fundamental, o Consultor de Investimentos incorpora sistematicamente a avaliação da governação empresarial e das práticas comerciais de um emissor.

Proporção dos investimentos

Alinhados com as características A/S	90%
<i>Investimentos sustentáveis</i>	5%
<i>Alinhados com a taxonomia</i>	-
<i>Outras características ambientais</i>	1%
<i>Características sociais</i>	1%
<i>Outras características A/S</i>	85%
Outros investimentos	10%

O Fundo prevê atribuir um mínimo de 5% dos seus ativos a investimentos sustentáveis.

90% dos investimentos estão alinhados com características ambientais ou sociais.

Tal abrange a totalidade dos investimentos que oferecem exposição direta às entidades onde se investe. Estas percentagens são calculadas de acordo com o valor dos investimentos.

Monitorização das características ambientais ou sociais

As características ambientais e sociais são monitorizadas mediante a utilização de uma combinação de ferramentas/análise, ferramentas de supervisão de carteiras, e análises e revisões documentais manuais.

As equipas de Conformidade, Risco e Supervisão de Carteiras do Consultor de Investimentos colaboram com a equipa de investimento na realização de revisões periódicas da carteira/do desempenho e de verificações sistémicas para garantir o cumprimento dos objetivos de investimento da carteira e das características ambientais e sociais.

Metodologias

A conformidade com as análises de exclusão é medida com base na percentagem dos investimentos do Fundo que violam as análises de exclusão.

Os investimentos sustentáveis realizados pelo Fundo são avaliados conforme descrito anteriormente em relação às “características ambientais ou sociais do produto financeiro”.

Fontes e tratamento dos dados

O Consultor de Investimentos tira partido de dados ASG de fornecedores terceiros. Estes dados são recolhidos e armazenados no repositório centralizado de dados ASG da Morgan Stanley para que todas as unidades de negócio da Morgan Stanley, incluindo as equipas de investimento da MSIM, tenham acesso às informações para efeitos de pesquisa, análise e constituição de carteiras, e para comunicação de informações a clientes e de natureza regulamentar.

Devido a lacunas na cobertura dos dados, uma pequena proporção dos dados utilizados para avaliar o alinhamento com as características A/S são dados estimados.

Limitações da metodologia e dos dados

O Fundo pode utilizar dados aproximativos razoáveis para os indicadores dos principais impactos negativos quando o Consultor de Investimentos considerar que os dados não estão disponíveis ou não são fiáveis de forma generalizada. Para obter mais informações sobre as limitações de dados, consulte a divulgação completa no website.

O Consultor de Investimentos toma medidas razoáveis para garantir que o Fundo é capaz de cumprir as suas características ambientais ou sociais apesar destas limitações, incluindo a análise e avaliação de indicadores alternativos de forma a garantir que são substitutos apropriados às temáticas ASG promovidas pelo indicador de principais impactos negativos relevante.

Além disso, quando os dados de análise de terceiros em relação às exclusões do Fundo não estiverem disponíveis para um emitente, o Consultor de Investimentos irá envidar todos os esforços para verificar, através de investigação interna, se o emitente não viola os critérios vinculativos do Fundo.

Diligência devida

O Consultor de Investimentos baseia-se em pesquisas internas para obter a sua própria avaliação independente do valor e da qualidade creditícia de uma empresa através da utilização de pesquisas do lado do vendedor e agências terceiras como um fator de produção.

O Consultor de Investimentos realiza uma análise ascendente aprofundada para identificar emittentes de obrigações que satisfazem os seus critérios de investimento em termos de posição competitiva, valor de franquia e qualidade de gestão. Estes fatores ajudam o Consultor de Investimentos a compreender a qualidade e a estabilidade dos fluxos de caixa da empresa.

Como parte deste processo, o Consultor de Investimentos também realiza uma diligência devida ascendente em relação aos investimentos do Fundo para identificar quaisquer riscos de sustentabilidade que possam afetar o valor dos ativos, o que é tido em conta pelo Consultor de Investimentos quando toma decisões de investimento numa base não vinculativa. O processo de diligência devida baseia-se em investigação interna e dados de terceiros.

Além disso, a equipa de risco do Consultor de Investimentos realiza uma análise de risco de investimento descendente em relação à sustentabilidade do Fundo. Estas informações são monitorizadas numa base contínua e são fornecidos relatórios mensais à direção de topo do Consultor de Investimentos.

Políticas de envolvimento

O Consultor de Investimentos pode envolver-se com emittentes de obrigações selecionados em relação às respetivas práticas de governação empresariais, bem a outras questões relevantes de sustentabilidade relacionadas com os ODS, incluindo controvérsias relacionadas com a sustentabilidade ou violações das normas e dos princípios internacionais. Tais atividades de envolvimento apoiam, numa base qualitativa e não vinculativa, os principais impactos negativos do Fundo e a avaliação da boa governação.

Índice de referência designado

O Fundo não designou um índice de referência com o objetivo de concretizar as respetivas características ambientais ou sociais.

SFDR Artikel 8 Webbplatsinformation

Produktnamn: *Global Convertible Bond Fund*
(*"Fonden"*)

En fond som tillhör Morgan Stanley Investment Funds

Identifieringskod för juridisk person:

K3YUM7KVVWUDP746NXC39

Sammanfattning

Inga mål för hållbar investering

Denna finansiella produkt främjar miljömässiga och sociala egenskaper, men har inte hållbar investering som mål.

Fonden kommer att ha minst en andel på 5 % i hållbara investeringar.

Metoden med "ingen betydande negativ inverkan" som tillämpas av investeringsrådgivaren syftar till att säkerställa att Fondens hållbara investeringar inte orsakar betydande negativ inverkan på någon av de obligatoriska PAI-indikatorerna (**negativ påverkan på hållbarhetsfaktorer**) i EU:s SFDR-regler som är relevanta för investeringar och följer vissa sociala minimigarantier.

Den finansiella produktens miljörelaterade eller sociala egenskaper

Fonden främjar de miljömässiga egenskaperna som bidrar till att mildra klimatförändringarna genom att utesluta investeringar i vissa typer av fossila bränslen. Dessutom främjar Fonden den sociala egenskapen att undvika investeringar i vissa verksamheter som kan skada människors hälsa och välbefinnande.

Dessutom kommer minst 5 % av Fondens investeringar att vara hållbara investeringar inom: (a) företagsemittenter vars företagspraxis, produkter eller lösningar skapar ett positivt bidrag till FN:s hållbarhetsmål ("**SDG**") eller (b) **gröna, sociala eller hållbarhetsrelaterade obligationer** ("hållbarhetsobligationer") som bidrar positivt till miljö eller samhälle genom det sätt som behållningen används.

Investeringsstrategi

Fondens mål är att ge en attraktiv avkastning genom investeringar främst i konvertibla obligationer utgivna av företag som är belägna eller verkar på utvecklings- eller tillväxtmarknader och som kommer att noteras i globala valutor.

Fonden uppfyller sina miljömässiga och sociala egenskaper genom att utesluta: (a) företag som genererar intäkter från tillverkning eller försäljning av kontroversiella vapen, tillverkning eller försäljning av

civila skjutvapen eller tobakstillverkning och (b) företag som får 5 % eller mer av sina intäkter från brytning och utvinning av termiskt kol.

Dessutom strävar Fonden efter att investera en del av tillgångarna i hållbara investeringar (enligt beskrivningen ovan).

Som en del av sin företagsanalysprocess tar investeringsrådgivaren systematiskt hänsyn till bedömningen av en emittents bolagsstyrning och affärsmetoder.

Andel av investeringar

I linje med miljömässiga och sociala egenskaper	90%
<i>Hållbara investeringar</i>	5%
<i>I linje med taxonomin</i>	-
<i>Övrigt miljömässigt</i>	1%
<i>Socialt</i>	1%
<i>Andra miljömässiga och sociala egenskaper</i>	85%
Övriga investeringar	10%

Fonden förväntas allokera minst 5 % av tillgångarna till hållbara investeringar.

90 % av investeringarna är i linje med miljömässiga och sociala egenskaper.

Detta består helt och hållet av investeringar som erbjuder direkt exponering mot investeringsobjekt. Dessa procentsatser mäts efter investeringarnas värde.

Övervakning av miljörelaterade eller sociala egenskaper

De miljömässiga och sociala egenskaperna övervakas med en kombination av verktyg/granskningar, verktyg för portföljövervakning och manuella skrivbordsgranskningar och analyser.

Investeringsrådgivarens efterlevnads-, risk- och portföljövervakningsteam samarbetar med investeringsteamet för att genomföra regelbundna portfölj-/resultatgranskningar och systemkontroller för att säkerställa efterlevnad av portföljens investeringsmål och miljömässiga och sociala egenskaper.

Metoder

Efterlevnad av uteslutningsgranskningarna mäts baserat på den procentsats av Fondens investeringar som överträder uteslutningsgranskningarna.

Fonden hållbara investeringar bedöms enligt vad som beskrivs ovan i förhållande till den finansiella produktens miljömässiga och sociala egenskaper.

Datakällor och databehandling

Investeringsrådgivaren utnyttjar ESG-data från olika externa leverantörer. Dessa data samlas in och lagras i Morgan Stanleys centraliserade ESG-dataarkiv för att göra det möjligt för alla Morgan Stanleys affärsenheter, inklusive MSIM-investeringssteamerna, att få tillgång till informationen för forskning, portföljanalys och portföljkonstruktion samt kundrelaterad och lagstadgad rapportering.

På grund av luckor i datatäckningen är en liten del av de data som används för att bedöma överensstämmelse med de miljömässiga och sociala egenskaperna uppskattade data.

Begränsningar för metoder och data

Fonden kan använda rimliga indirekta uppgifter för PAI-indikatorer där investeringsrådgivaren anser att data inte är allmänt eller tillförlitligt tillgängliga. För mer information om databegränsningar, se den fullständiga informationen på webbplatsen.

Investeringsrådgivaren vidtar rimliga åtgärder för att säkerställa att Fonden kan uppfylla sina miljömässiga och sociala egenskaper trots dessa begränsningar, inklusive granskning och bedömning av indirekta uppgifter för att säkerställa att de är lämpliga substitut för ESG-teman som främjas av den relevanta PAI-indikatorn.

Om det dessutom inte finns några uppgifter från tredje part om granskning av en emittent i förhållande till Fondens uteslutningar, kommer investeringsrådgivaren att göra sitt bästa för att genom intern forskning kontrollera att emittenten inte bryter mot Fondens bindande kriterier.

Due diligence

Investeringsrådgivaren förlitar sig på interna analyser för att få fram sin egen oberoende bedömning av ett företags värde och kreditvärdighet, med hjälp av analyser från tredjepartsbyråer och säljare som indata.

Investeringsrådgivaren genomför en djupgående företagsanalys för att identifiera obligationsemittenter som uppfyller investeringskriterierna när det gäller konkurrensläge, franchisevärde och ledningskvalitet. Alla dessa faktorer hjälper investeringsrådgivaren att förstå kvaliteten och stabiliteten i företagets kassaflöden.

Som en del av denna process utför investeringsrådgivaren också en due diligence-analys på företagsnivå på fondens investeringar för att identifiera eventuella hållbarhetsrisker som skulle kunna påverka värdet av tillgångarna, vilket beaktas av investeringsrådgivaren när denne fattar investeringsbeslut på icke-bindande basis.] Due diligence-processen baseras på intern forskning och uppgifter från tredje part.

Dessutom utför investeringsrådgivarens riskteam omvärldsanalyser av hållbarhetsinvesteringsrisker för Fonden. Denna information övervakas löpande och månadsrapporter lämnas till investeringsrådgivarens högsta ledning.

Strategier för engagemang

Investeringsrådgivaren kan komma att samarbeta med utvalda obligationsemittenter om deras bolagsstyrningspraxis samt om andra viktiga hållbarhetsfrågor med anknytning till hållbarhetsmålen, inklusive hållbarhetsrelaterade tvister eller brott mot internationella normer och principer. Sådan engagemangsverksamhet stöder, på en kvalitativ och icke-bindande grund, Fondens bedömning av negativ påverkan på hållbarhetsfaktorer (PAI) och god bolagsstyrning.

Valt referensvärde

Fonden har inte angivit något referensindex i syfte att uppnå sina miljömässiga eller sociala egenskaper.

Applications for shares in the Fund should not be made without first consulting the current Prospectus and the Key Investor Information Document (“KIID”), which are available in English and in the official language of your local jurisdiction at morganstanleyinvestmentfunds.com or free of charge from the Registered Office of Morgan Stanley Investment Funds, European Bank and Business Centre, 6B route de Trèves, L-2633 Senningerberg, R.C.S. Luxemburg B 29 192. A summary of investor rights is available in English at the same website.

Information in relation to sustainability aspects of the Fund and the summary of investor rights is available at the aforementioned website.

If the management company of the relevant Fund decides to terminate its arrangement for marketing that Fund in any EEA country where it is registered for sale, it will do so in accordance with the relevant UCITS rules.

DEFINITIONS

“ESG” investment: Environmental Social and Governance based investment is an investment approach which takes explicit account of the environmental, social and corporate governance aspects of all proposed investments.

ESG RISKS

ESG strategies that incorporate impact investing and/or environmental, social and governance (ESG) factors could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. As a result, there is no assurance ESG strategies could result in more favorable investment performance.

DISTRIBUTION

This communication is only intended for and will only be distributed to persons resident in jurisdictions where such distribution or availability would not be contrary to local laws or regulations. In particular, the Shares are not for distribution to US persons.
