SFDR Article 8 Website Disclosure

Product name: *Tailwinds Fund (the “Fund”)*

A fund of Morgan Stanley Investment Funds

Legal entity identifier: *To be launched*

Summary

No Sustainable investment objective

This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.

Environmental or social characteristics of the financial product

The Fund promotes the following environmental and social characteristics:

- the Fund promotes the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promotes the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Investment Strategy

The Fund’s objective is to seek long term capital appreciation, measured in US Dollars.

The Fund invests in equity securities, including depositary receipts, of U.S. companies with capitalisations within the range of companies included in the Russell 1000 Index.

The investment process is bottom up. It seeks to identify companies that are aligned with and support environmental or social trends (tailwinds). These companies are expected to benefit from sustainability-related business activities in the form of enhanced growth rates, profitability, or competitive advantages.

The Fund meets its environmental and social characteristics through exclusions of corporate issuers whose industry classification or core business activity involves: tobacco; coal; or certain controversial weapons, comprising civilian firearms, cluster munitions and anti-personnel mines. See full website disclosure for details.

As part of the Fund's holistic approach to considering sustainability research and factors, the investment adviser of the Fund (the “**Investment**

Adviser”) assesses governance practices of investee companies, including but not limited to looking at the management structures, employee relations, remuneration of staff, and tax compliance of such companies.

Proportion of Investments

Aligned with E/S characteristics	90%
<i>Sustainable investments</i>	-
<i>Taxonomy aligned</i>	-
<i>Other environmental</i>	-
<i>Social</i>	-
<i>Other E/S characteristics</i>	90%
Other investments	10%

90% of investments are aligned with environmental or social characteristics. This comprises entirely of investments which offer direct exposure to investee entities.

These percentages are measured according to the value of the investments.

Monitoring of environmental or social characteristics

The environmental and social characteristics are monitored using a combination of tools / screens, portfolio surveillance tools and manual desk reviews and analyses.

The Investment Adviser’s Compliance, Risk and Portfolio Surveillance teams collaborate with the investment team to conduct regular portfolio/performance reviews and systemic checks to ensure compliance with portfolio investment objectives and environmental and social characteristics.

Methodologies

The sustainability indicator is the percentage of companies in the Fund which breach the exclusionary screens. The sustainability indicator will therefore be that 0% of the Fund’s investments are in violation of the Fund’s Restriction Screening Policy.

Data sources and processing

The Investment Adviser leverages ESG data from various external vendors. This data is collected and stored in Morgan Stanley’s centralized ESG data repository to allow any Morgan Stanley business unit, including MSIM investment teams, to access the information for research, portfolio

analysis and construction, and client and regulatory reporting.

None of the data which is used to assess alignment with the environmental / social characteristics is estimated by the Investment Adviser, because the Investment Adviser wholly relies on data from third-party data providers in order to attain the Fund's environmental and social characteristics.

Limitations to methodologies and data

The below outlines some of the key themes and commonalities which contribute to limitations in the methodologies and/or data and/or poor data quality of the Fund:

- methodology differences between data providers
- data lags i.e., reporting timelines for data may not align with SFDR reporting timelines
- data coverage gaps across asset classes, geographies, and market capitalisations

The Investment Adviser takes reasonable steps to ensure that the Fund is able to meet its environmental and social characteristics despite these limitations.

Due diligence

General investment due diligence

Under normal market conditions, the Fund's investment objective will be pursued by investing primarily in equity securities of established and emerging companies. The investment process will emphasize a bottom-up stock selection process, seeking attractive investments on an individual company basis. In selecting securities for investment, the Investment Adviser typically invests in companies it believes have competitive advantages with above-average business visibility, the ability to deploy capital at high rates of return, strong balance sheets and an attractive risk/reward profile.

Non-binding ESG due diligence

The investment team takes a long-term oriented approach to investing, which focuses on identifying

differentiated insights on multi-year opportunities. Investments are made in unique companies whose market value can increase significantly for underlying fundamental reasons. As a result, the team's portfolios are typically concentrated and differentiated from their benchmarks.

Environmental awareness and social responsibility underpin this investment philosophy, and the investment team believes that innovative companies can use sustainability initiatives and programmes to differentiate their franchises in the marketplace. The investment team's Sustainability Researchers, together with Disruptive Change Researchers, Consilient Researchers and investors within Counterpoint Global that cover different companies, are responsible for sustainability research for respective investments. In this way, the investment team is able to leverage each member's expertise to identify opportunities and risks presented by environmental and social trends. Investors should note, however, that in contrast to the environmental or social features described elsewhere in this disclosure, the Investment Adviser's consideration of these opportunities and risks is undertaken on a non-binding basis only.

Engagement policies

As long-term investors, and active owners, the Counterpoint Global team believe that they have a duty to be good stewards of the capital they manage. The investment team fulfils this duty by engaging with the companies in which they are invested and by exercising their proxy voting rights. These stewardship activities give the investment team the opportunity to guide companies in which they invest toward better governance practices, which the investment team believes will produce long-term, sustainable returns.

Designated reference benchmark

The Fund has not designated a reference benchmark for the purpose of attaining its environmental or social characteristics.

SFDR Article 8 Website Disclosure

Product name: *Tailwinds Fund (the "Fund")*

A fund of Morgan Stanley Investment Funds

Legal entity identifier: *To be launched*

No Sustainable investment objective

This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.

Environmental or social characteristics of the financial product

The Fund promotes the following environmental and social characteristics:

- the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

These exclusions are implemented in line with the Fund's Restriction Screening Policy, which can be found on www.morganstanley.com/im at

https://www.morganstanley.com/im/publication/msinvf/material/rsp_msinvf_counterpointglobal_en.pdf

Investment Strategy

The Portfolio invests primarily in securities of companies located in the United States and internationally that are benefitting from or driving Sustainability Research Tailwinds. These Tailwinds include Economic Empowerment, Health, Access Democratization, Inclusive Communities, Resource Efficiency, Downstream Efficiency, Data Security, Effective Institutions, Stakeholder Cultures, and Structural Longtermism. Further descriptions of these Tailwinds provided:

- **Economic Empowerment:** Platforms enabling socio-economic empowerment and entrepreneurialism that enable increased business formation, allowing more individuals access to economic independence.
- **Health:** Healthcare innovation driving wellness by improving patient outcomes by the discovery of new therapies, improving patient behavior, increasing efficiency in the healthcare system, or extending healthcare access across the globe
- **Access Democratization:** Consumer democratization of access supporting consumer empowerment. By broadening individual access to knowledge, opportunities, services, or capital, employees and consumers are empowered to make better decisions which may lead to improved societal outcomes.
- **Inclusive Communities:** Communities and tools enabling belonging and inclusion, including deeper human connection, communication, collaboration and understanding, which is not just societally altruistic but can also create a loyal community that can be the foundation for an enduring business.
- **Resource Efficiency:** Upstream opportunities enabling efficiencies and/or reduced waste in manufacturing and supply chains, transportation, energy production, or agriculture, resulting in improved environmental outcomes.

- **Downstream Efficiency:** Waste management and circularity minimizing environmental costs; Enabling improved building construction and energy consumption; and carbon sequestration, all resulting in improved environmental outcomes.
- **Data Security:** Cyber security protecting data and privacy allow for both individual and enterprise safety of digital assets from unauthorized exploitation of data, systems, networks and technologies.
- **Effective Institutions:** Public institution effectiveness and safety. Tools and platforms that increased societal security, transparency, and efficiency at all levels of government, law enforcement and global development organizations lead to more efficiency and safer communities.
- **Stakeholder Cultures:** Ecosystem focus strengthening uniqueness durability and stakeholder alignment. When corporates align incentives between different stakeholders including employees, shareholders and the broader society, everyone wins.
- **Structural Longtermism:** Structures supporting long-term value creation. Corporates with Boards of Directors, governance structures, and compensation schemes aligned for long-term value creation are more adaptable, positioning themselves to benefit from change rather than be disrupted by it, leading to better outcomes for their employees, their consumers, and broader society.

At least 50% of the Fund investments will have a material revenue or capital expenditure alignment (10% or greater) with at least one of the ten Tailwinds above.

Investment strategy used to meet the environmental and social characteristics of the Fund

Binding restriction screens are applied to the Fund to restrict investments in corporate issuers whose industry classification or core business activity, determined in accordance with the methodology set out below, involves:

- tobacco;
- coal; or
- certain controversial weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

The methodology used to determine industry classification or core business activity for the purpose of the above-described screening is as follows:

1. Global Industry Classification Standard (GICS) Sub-Industry is Tobacco or Coal & Consumable Fuels;
2. Revenue (as defined by external third-party data):
 - more than 5% of its recent-year revenue (or estimated revenue) from Tobacco;
 - more than 10% of its recent-year revenue (or estimated revenue) from Thermal Coal;
 - more than 10% of its recent-year revenue (or estimated revenue) from the Manufacture of Civilian Firearms and ammunition; or
3. Involvement as identified by an external third-party data provider through corporate ownership, in manufacturing the core weapon system, or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of the weapon, or cluster munitions and anti-personnel mines.

Good Governance

As part of the Fund's holistic approach to ESG, the Investment Adviser of the Fund assesses governance practices of investee companies, including but not limited to looking at the management structures, employee relations, remuneration of staff, and tax compliance of such companies. This is framed by a set of questions applied consistently across companies. Topics include, but are not limited to, management incentives aligned with the long-term interest of shareholders, capital allocation, independent and engaged boards, and transparency of accounting.

Proportion of investments

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Category #1 investments (i.e. those aligned with E/S characteristics) comprise all investments that are screened against the Fund's Restriction Screening Policy. Category #2 investments are those investments that are not screened against the Fund's Restriction Screening Policy.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, are screened against the Fund's Restriction Screening Policy. This comprises 90% of the Fund and comprises entirely of investments which offer direct exposure to investee entities. Accordingly, at least 90% of the Fund are Category #1 investments and the remaining 10% of the Fund (comprising cash and derivatives held for hedging purposes) are Category #2 investments.

These percentages are measured according to the value of the investments.

The Fund does not use any derivatives to attain its environmental or social characteristics.

Taxonomy disclosures

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Monitoring of environmental or social characteristics

The sustainability indicators of the Fund will be measured and evaluated on an ongoing basis, through an automated process, comprising pre- and post-trade guideline monitoring and exception-based screening.

Investments that are held by the Fund but become restricted because they breach the exclusion criteria set out above after they are acquired for the Fund will be sold. Such sales will take place over a time period to be determined by the Investment Adviser, considering the best interests of the shareholders of the Fund.

The investment process is subject to regular review, as part of a control and monitoring framework implemented by the Investment Adviser. The Investment Adviser's Compliance, Risk and Portfolio Surveillance teams collaborate with the investment team to conduct regular portfolio/performance reviews and systemic checks to ensure compliance with portfolio investment objectives and environmental and social characteristics, taking into account changing market conditions, information and strategy developments.

Methodologies

The sustainability indicator is the percentage of companies in the Fund which breach the exclusionary screens. The sustainability indicator will therefore be that 0% of the Fund's investments are in violation of the Fund's Restriction Screening Policy.

Data sources and processing

MSIM leverages ESG data from various external vendors, including but not limited to: MSCI, ISS ESG, S&P Global Trucost, in order to use as data sources to attain the environmental and social characteristics of the Fund. This data is collected and stored in Morgan Stanley's centralised ESG data repository, to allow any Morgan Stanley business unit, including MSIM investment teams to access the information for research,

portfolio analysis and construction, and client and regulatory reporting. A formal change management process is also in place to allow for enhancements as data quality/reporting improves.

Morgan Stanley also leverages third-party data in order to produce proprietary insights.

MSIM assesses data quality by liaising with the different data providers to obtain updates to the datasets as the regulation evolves. They also ensure that ESG data adheres to the Firm's data governance and quality standards through procedures to assess the appropriateness and delivery of data feeds. MSIM also conducts, as appropriate, due diligence on the external data providers in order to assess whether their methodologies are appropriate for the intended use case.

The SFDR dataset definitions which this Fund uses are listed below:

Data Set	Definition
Screening/Controversies	Business practices and products/services

None of the data which is used to assess alignment with the environmental / social characteristics is estimated by the Investment Adviser, because the Investment Adviser wholly relies on data from third-party data providers in order to attain the Fund's environmental and social characteristics.

Limitations to methodologies and data

The below outlines some of the key themes and commonalities which contribute to limitations in the methodologies and/or data and/or poor data quality of the Fund:

- methodology differences between data providers
- data lags i.e., reporting timelines for data may not align with SFDR reporting timelines
- data coverage gaps across asset classes, geographies, and market capitalisations

Despite these limitations, which impact all consumers of ESG data and are not particular to MSIM, the Investment Adviser takes reasonable steps to mitigate the risk of these limitations hindering the Fund's ability to meet its environmental and social characteristics – these include (as appropriate), assessing vendor data quality and methodologies and comparing ESG data points between vendors or against its own internal analyses.

Due diligence

General investment due diligence

Under normal market conditions, the Fund's investment objective will be pursued by investing primarily in equity securities of established and emerging companies. The investment process will emphasize a bottom-up stock selection process, seeking attractive investments on an individual company basis. In selecting securities for investment, the Investment Adviser typically invests in companies it believes have advantages with above-average business visibility, the ability to deploy capital at high rates of return, strong balance sheets and an attractive risk/reward profile.

Non-binding ESG due diligence

At Counterpoint Global, a key investment belief continues to be that investing for the long term aligns with interests of long-term shareholders, which often means focusing on disruption and sustainability themes. Accordingly, the investment team takes a long-term oriented approach to investing, which focuses on identifying differentiated insights on multi-year opportunities. Investments are made in unique companies

whose market value can increase significantly for underlying fundamental reasons. As a result, the investment team's portfolios are typically concentrated and differentiated from their benchmarks.

Environmental awareness and social responsibility underpin this investment philosophy, and the investment team believes that innovative companies can use sustainability initiatives and programmes to differentiate their franchises in the marketplace. The investment team's Sustainability Researchers, together with Disruptive Change Researchers, Consilient Researchers and Investment Advisers within Counterpoint Global that cover different companies, are responsible for sustainability research for respective investments. In this way, the investment team is able to leverage each member's expertise to identify opportunities and risks presented by environmental and social trends. Investors should note, however, that in contrast to the environmental or social features described elsewhere in this disclosure, the Investment Adviser's consideration of these opportunities and risks is undertaken on a non-binding basis only.

Engagement policies

The Investment Adviser takes a long-term oriented approach to investing, which focuses on identifying differentiated insights on multi-year opportunities. The Investment Adviser fulfils this duty by engaging with the companies in which they are invested and by exercising their proxy voting rights. These stewardship activities give the Investment Adviser the opportunity to guide companies in which they invest toward better governance practices, which the Investment Adviser believes will produce long-term, sustainable returns.

The Counterpoint Global engagement approach is viewed holistically with their investment activities and they consider their ability to deliver long-term value; hence they do not actively track their number of engagements, which is not a meaningful statistic that is value-additive to the investment process – each portfolio company is engaged with differently given respective areas of materiality.

Given the Investment Adviser's position as active, long-term owners, they have regular touchpoints with investee companies and have formed relationships with company management. This means that the Investment Adviser's engagement process is iterative with each engagement providing new information that enhances the Investment Adviser's view of the company and what they regard as its priorities, gaps and opportunities. When the Investment Adviser has provided suggestions or recommendations for companies on their business practices, the Investment Adviser monitors the company's alignment with these suggestions over a period of time. The Investment Adviser's engagement tracking notes allow them to flag issues for follow-up and for monitoring throughout the investment process. The Investment Adviser often goes into engagements with pre-defined topics to discuss with a company, but in some cases they will identify additional issues through an engagement, which then become new issues to monitor moving forward. For companies with significant, ongoing ESG challenges, the Investment Adviser may monitor a company's management of the same issue over an extended period of time and discuss that issue in every subsequent engagement call. For other companies, the topics of engagement may change frequently along with the KPIs and objectives used to monitor them.

Consistent with the approach to engagement across MSIM investment teams, the Counterpoint Global Investment Adviser looks to engage in constructive dialogue with the management teams of portfolio companies in all aspects of the business. The Investment Adviser is increasingly finding that its global, all-sector, all-capitalisation, integrated sustainability research approach is novel to companies and presents the opportunity for partnership, where the Investment Adviser shares strategies with companies to help them capitalise on the sustainability opportunities available to the company. The Investment Adviser selectively offers companies access to its network of other operators, or sustainability practitioners where they think doing so would create the opportunity for a mutually beneficial dialogue.

The Investment Adviser engages with company management when evaluating strategy and management quality. Where appropriate, the Investment Adviser's portfolio groups engage companies to discuss issues that may include environmental and social policies and practices. The Investment Adviser may also seek support from the MSIM Global Stewardship Team when, for example, their expertise on a particular issue is needed. The Investment Adviser generally does not seek out Board-level conversations without substantive concern, as they prefer that Boards remain focused on their core mandates of strategy, management and risk oversight.

The Investment Adviser pays close attention to proxy voting, using their votes and other shareholder rights to promote governance aligned with long-term shareholder interest. The Counterpoint Global Investment Adviser also engages some companies in discussion on various aspects of corporate governance, sometimes as an adjunct to proxy voting.

Designated reference benchmark

The Fund has not designated a reference benchmark for the purpose of attaining its environmental or social characteristics.

Tailwinds Fund

Website Disclosure Summaries (Multiple Languages)

Offenlegung nach Artikel 8 SFDR auf der Website

Produktname: Tailwinds Fund (der „Fonds“)

Ein Fonds von Morgan Stanley Investment Funds

LEI-Code: Noch nicht aufgelegt

Zusammenfassung

Kein nachhaltiges Investitionsziel

Dieses Finanzprodukt fördert ökologische oder soziale Merkmale, hat jedoch keine nachhaltige Anlage zum Ziel.

Ökologische oder soziale Merkmale des Finanzprodukts

Der Fonds fördert die folgenden ökologischen und sozialen Merkmale:

- der Fonds fördert das ökologische Merkmal, die externen Effekte auf die Umwelt zu begrenzen, indem er Investitionen in Kraftwerkskohle ausschließt; und
- der Fonds fördert das soziale Merkmal, Investitionen in bestimmte Aktivitäten zu vermeiden, die der menschlichen Gesundheit und dem Wohlbefinden schaden können, darunter Aktivitäten im Zusammenhang mit Tabak und bestimmten Waffen, einschließlich ziviler Schusswaffen, Streumunition und Antipersonenminen.

Anlagestrategie

Ziel des Fonds ist ein langfristiger Wertzuwachs in US-Dollar.

Der Fonds investiert in Aktien (einschließlich Depositary Receipts) von US-Unternehmen, deren Marktkapitalisierung innerhalb der Bandbreite der im Russell 1000 Index vertretenen Unternehmen liegt.

Der Fonds verfolgt einen Bottom-up-Ansatz. Er strebt danach, Unternehmen zu identifizieren, die auf ökologische oder soziale Trends ausgerichtet sind und diese unterstützen („Tailwinds“). Es wird erwartet, dass diese Unternehmen von nachhaltigkeitsbezogenen Geschäftsaktivitäten in der Form von besseren Wachstumsraten, Rentabilität oder Wettbewerbsvorteilen profitieren können.

Der Fonds erfüllt seine ökologischen und sozialen Merkmale, indem er Unternehmensemissionen ausschließt, die in folgende Branchen fallen oder deren Hauptgeschäftstätigkeit im Zusammenhang steht mit: Tabak, Kohle oder bestimmte umstrittene Waffen, darunter zivile Schusswaffen, Streumunition und Antipersonenminen. Weitere Informationen finden Sie in der vollständigen Offenlegung auf der Website.

Im Rahmen des ganzheitlichen Ansatzes des Fonds für die Berücksichtigung von Nachhaltigkeitsfaktoren und entsprechendem Research bewertet der Anlageberater des Fonds (der „Anlageberater“) die Governance-Praktiken der Unternehmen, in die investiert wird, einschließlich, aber nicht beschränkt auf die Prüfung der Managementstrukturen, der Beziehungen zu den Mitarbeitern, der Vergütung und der Einhaltung der Steuervorschriften.

Aufteilung der Investitionen

Ausgerichtet auf ökologische oder soziale Merkmale	90%
<i>Nachhaltige Investitionen</i>	-
<i>Taxonomiekonform</i>	-
<i>Sonstige Umweltziele</i>	-
<i>Soziale Ziele</i>	-
<i>Andere ökologische oder soziale Merkmale</i>	90%
Andere Investitionen	10%

90% der Anlagen weisen Umwelt- oder soziale Merkmale auf. Das bezieht sich ausschließlich auf Investitionen, die ein direktes Engagement in Portfoliounternehmen bieten.

Grundlage für die Prozentangaben sind der Wert der Anlagen.

Überwachung von ökologischen oder sozialen Merkmalen

Die ökologischen und sozialen Merkmale werden durch eine Kombination von Verfahren/Screens, Tools zur Portfolioüberwachung und manuellen Prüfungen und Analysen überwacht.

Die für Compliance, Risiko und Portfolioüberwachung zuständigen Teams des Anlageberaters arbeiten mit dem Anlageteam zusammen, um regelmäßige Portfolio-/Performanceüberprüfungen und systemische Checks durchzuführen und so sicherzustellen, dass die Anlageziele des Portfolios und die ökologischen und sozialen Merkmale eingehalten werden.

Methoden

Der Nachhaltigkeitsindikator zeigt den Prozentsatz der Unternehmen im Fonds an, die gegen die Ausschlusskriterien verstoßen. Der Nachhaltigkeitsindikator sollte demnach 0% anzeigen, das heißt, dass 0% der Anlagen des Fonds gegen die Restriction Screening Policy des Fonds verstoßen.

Datenquellen und -verarbeitung

Der Anlageberater nutzt ESG-Daten verschiedener externer Anbieter. Diese Daten werden im zentralisierten ESG-Datenspeicher von Morgan Stanley gesammelt und gespeichert, sodass alle Geschäftseinheiten von Morgan Stanley, darunter auch die Anlageteams von MSIM, Zugang zu diesen Informationen für Research, Portfolioanalysen und -zusammensetzung und die Berichterstattung an Kunden und Aufsichtsbehörden haben.

Zur Bewertung der Ausrichtung auf die ökologischen/sozialen Merkmale zieht der Anlageberater keine Schätzungen heran, vielmehr verlässt er sich vollständig auf Daten von Drittanbietern, um die ökologischen und sozialen Merkmale des Fonds zu ermitteln.

Beschränkungen hinsichtlich der Methoden und Daten

Im Folgenden werden einige der wichtigsten Themen und Gemeinsamkeiten aufgeführt, die zu Einschränkungen für Methodologien und/oder Daten und/oder mangelhafter Datenqualität des Fonds beitragen:

- unterschiedliche Methoden der einzelnen Datenanbieter
- zeitliche Verzögerungen, d.h. die Fristen für die Berichterstattung stimmen unter Umständen nicht mit denen der SFDR überein
- Lücken bei der Datenabdeckung über Anlageklassen, Regionen und Marktkapitalisierungen hinweg

Der Anlageberater ergreift angemessene Maßnahmen, um sicherzustellen, dass der Fonds seine ökologischen und sozialen Merkmale dennoch erfüllen kann.

Sorgfaltspflicht

Allgemeine Sorgfaltspflicht bei Investitionen

Unter normalen Marktbedingungen wird das Anlageziel verfolgt, indem der Fonds vornehmlich in Aktien von etablierten und aufstrebenden Unternehmen investiert. Der Schwerpunkt im Anlageprozess liegt auf einer Bottom-up-Titelauswahl, d. h. es werden attraktive Anlagen auf Ebene der Unternehmen gesucht. Der Anlageberater investiert in der Regel in Unternehmen, die seiner Meinung nach über Wettbewerbsvorteile verfügen, eine überdurchschnittliche Geschäftsentwicklung aufweisen, in der Lage sind, Kapital zu hohen Renditen einzusetzen, eine solide

Bilanz haben und über ein attraktives Risiko-Ertrags-Profil verfügen.

Unverbindliche ESG-Due-Diligence

Das Anlageteam verfolgt einen langfristig orientierten Ansatz, der sich darauf konzentriert, durch differenzierte Einblicke Chancen zu erkennen, die sich über mehrere Jahre entfalten dürften. Der Fonds investiert in einzigartige Unternehmen, deren Marktwert aufgrund fundamentaler Faktoren erheblich steigen dürfte. Daher weisen die Portfolios des Teams in der Regel eine hohe Konzentration auf und unterscheiden sich von ihren Benchmarks.

Umweltbewusstsein und soziale Verantwortung untermauern diese Anlagephilosophie, und das Anlageteam ist davon überzeugt, dass sich innovative Unternehmen durch Nachhaltigkeitsinitiativen und -programme von der Konkurrenz abheben können. Die im Anlageteam zuständigen Analysten für Nachhaltigkeit sind zusammen mit den Analysten für Disruptive Change, Consilient Research und den Investoren innerhalb von Counterpoint Global, die verschiedene Unternehmen abdecken, für das Nachhaltigkeitsresearch verantwortlich. Auf diese Weise kann das Anlageteam die Kompetenzen der einzelnen Mitglieder wirksam ausschöpfen, um Chancen und Risiken zu erkennen, die sich aus ökologischen und sozialen Trends ergeben. Anleger sollten jedoch beachten, dass der Anlageberater – im Gegensatz zu den in dieser Offenlegung an anderer Stelle beschriebenen ökologischen oder sozialen Merkmalen – diese Chancen und Risiken nur unverbindlich berücksichtigt.

Mitwirkungspolitik

Als langfristiger Investor und aktiver Eigentümer ist das Team von Counterpoint Global der Auffassung, dass es seine Pflicht ist, die ihm anvertrauten Mittel sorgfältig zu verwalten. Das Anlageteam erfüllt diese Pflicht, indem es sich mit den Unternehmen, in die es investiert, austauscht und seine Stimmrechte ausübt. Das Anlageteam versucht auf diese Weise, die Firmen zu einer besseren Unternehmensführung zu bewegen, was seiner Ansicht nach zu langfristigen, nachhaltigen Renditen führen wird.

Bestimmter Referenzwert

Der Fonds hat keinen Referenzwert für das Erreichen seiner ökologischen oder sozialen Merkmale bestimmt.

Divulgación de información en el sitio web en virtud del Artículo 8 del SFDR

Nombre del producto: *Tailwinds Fund (el “fondo”)*

Fondo de Morgan Stanley Investment Funds

Identificador de personas jurídicas: *Fondo pendiente de lanzamiento*

Resumen

Sin objetivo de inversión sostenible

Este producto financiero promueve características medioambientales o sociales, pero no tiene como objetivo una inversión sostenible.

Características medioambientales o sociales del producto financiero

El fondo promueve las siguientes características medioambientales y sociales:

- el fondo promueve la característica medioambiental de limitar las externalidades medioambientales excluyendo inversiones en carbón térmico; y
- el fondo promueve la característica social de evitar inversiones en determinadas actividades que pueden ser perjudiciales para la salud y el bienestar de los seres humanos, incluidos el tabaco y ciertas armas, donde se incluyen las armas de fuego de uso civil, las municiones en racimo y las minas antipersona.

Estrategia de inversión

El objetivo del fondo es procurar la revalorización del capital a largo plazo, en dólares estadounidenses.

El fondo invierte en valores de renta variable, incluidos recibos de depósito, de compañías estadounidenses con capitalizaciones que se encuentran en el rango de las incluidas en el índice Russell 1000.

El proceso de inversión es ascendente (bottom-up). El fondo procura identificar compañías que se ajustan a tendencias medioambientales o sociales (positivas) y que las respaldan. Se prevé que estas compañías salgan favorecidas de actividades económicas relacionadas con la sostenibilidad en forma de mejores tasas de crecimiento, rentabilidad o ventajas competitivas.

El fondo cumple sus características medioambientales y sociales excluyendo emisores corporativos cuya clasificación por sector o actividad económica principal guardan relación con: el tabaco, el carbón o ciertas armas controvertidas, incluidas las armas de fuego de uso civil, las municiones en racimo y las minas

antipersona. Consulte las divulgaciones íntegras que figuran en el sitio web para obtener información detallada.

En el marco del enfoque holístico del fondo hacia los análisis y los factores de sostenibilidad, el asesor de inversiones del fondo (el “asesor de inversiones”) evalúa las prácticas de gobierno de las compañías en que invierte, valorando, entre otros aspectos, las estructuras de gestión, las relaciones con los trabajadores, la remuneración del personal y el cumplimiento fiscal de tales compañías.

Proporción de inversiones

Conformes con características medioambientales/sociales	90%
<i>Inversiones sostenibles</i>	-
<i>Conformes con la Taxonomía</i>	-
<i>Otras medioambientales</i>	-
<i>Sociales</i>	-
<i>Otras características medioambientales/sociales</i>	90%
Otras inversiones	10%

El 90% de las inversiones son conformes con características medioambientales o sociales. Se incluyen íntegramente las inversiones que ofrecen exposición directa a las compañías en las que se invierte.

Estos porcentajes se cuantifican de acuerdo con el valor de las inversiones.

Seguimiento de las características medioambientales o sociales

Las características medioambientales o sociales se controlan utilizando una combinación de herramientas/controles, medios de supervisión de las carteras y revisiones y análisis manuales.

Los equipos de cumplimiento, riesgo y supervisión de carteras del asesor de inversiones colaboran con el equipo de inversión para llevar a cabo revisiones periódicas de la cartera / el rendimiento y comprobaciones sistémicas para asegurar el cumplimiento de los objetivos de inversión de la cartera y las características medioambientales y sociales.

Metodología

El indicador de sostenibilidad es el porcentaje de compañías del fondo que incumplen los controles de exclusión. El indicador de sostenibilidad será, por tanto, que el 0% de las inversiones del fondo contravengan su política de exclusiones de inversión.

Fuentes y tratamiento de datos

El asesor de inversiones recurre a datos ESG de varios proveedores externos. Estos datos se recogen y se almacenan en el depósito centralizado de datos ESG de Morgan Stanley para permitir a la unidad de negocio de Morgan Stanley, incluidos los equipos de inversión de MSIM, acceder a la información para realizar estudios, llevar a cabo análisis y elaboración de carteras, y facilitar información a clientes y reguladores.

Ninguno de los datos que se emplea para evaluar la conformidad con las características medioambientales/sociales es una estimación del asesor de inversiones porque el asesor de inversiones se basa íntegramente en datos de proveedores de datos terceros para cumplir las características medioambientales y sociales del fondo.

Limitaciones de los métodos y los datos

A continuación, se describen algunos de los temas y los aspectos comunes clave que contribuyen a las limitaciones en los métodos y/o los datos y/o la calidad deficiente de los datos del fondo:

- diferencias en los métodos entre proveedores de datos
- lapsos en los datos, es decir, los calendarios de provisión de datos podrían no ajustarse a los que establece el SFDR
- carencias en la cobertura de los datos entre clases de activos, regiones y capitalizaciones de mercado

El asesor de inversiones toma medidas razonables para velar por que el fondo pueda cumplir sus características medioambientales y sociales a pesar de estas limitaciones.

Diligencia debida

Diligencia debida de inversión general

En circunstancias normales de mercado, el fondo procurará lograr su objetivo de inversión invirtiendo principalmente en valores de renta variable de compañías consolidadas y emergentes. El proceso de inversión enfatizará la selección bottom-up de valores, buscando inversiones atractivas por compañías concretas. A la hora de elegir títulos para invertir, el asesor de inversiones invertirá habitualmente en compañías que considere que cuentan con ventajas competitivas, visibilidad de negocio superior a la media, capacidad de desplegar capital a tasas de rentabilidad altas, balances sólidos y una relación atractiva entre riesgo y rentabilidad.

Diligencia debida ESG no vinculante

El equipo de inversión adopta un enfoque a largo plazo hacia la inversión, centrado en identificar percepciones diferenciadas sobre oportunidades para varios años. Las inversiones se llevan a cabo en compañías únicas cuyo valor de mercado puede aumentar significativamente por razones fundamentales subyacentes. Como resultado, las carteras del equipo suelen estar concentradas y diferenciadas de sus índices de referencia.

La concienciación medioambiental y la responsabilidad social sustentan esta filosofía de inversión y el equipo de inversión considera que las compañías innovadoras pueden emplear iniciativas y programas de sostenibilidad para diferenciar sus productos en el mercado. Los analistas de sostenibilidad del equipo de inversión, junto con los investigadores de cambios disruptivos, los analistas consilientes y los inversores de Counterpoint Global que abarcan diferentes compañías, son los encargados de los análisis de sostenibilidad de las respectivas inversiones. De esta manera, el equipo de inversión puede aprovechar la especialización de cada uno de sus miembros para identificar las oportunidades y los riesgos que plantean las tendencias medioambientales y sociales. Sin embargo, los inversores deberían tener en cuenta que, a diferencia de las cuestiones medioambientales o sociales que se describen en otros puntos de la información que aquí se divulga, las reflexiones del asesor de inversiones acerca de estos riesgos y oportunidades no son vinculantes.

Políticas de implicación

Como inversores a largo plazo y propietarios activos, el equipo Counterpoint Global considera que tiene el deber de administrar de forma adecuada el capital que gestiona. El equipo de inversión cumple este deber implicándose con las compañías en las que invierte y ejerciendo sus derechos de voto delegado. Estas actividades de administración brindan al equipo de inversión la oportunidad de orientar a las compañías en las que invierte hacia prácticas de gobierno mejores que el equipo de inversión considera que se traducirán en rentabilidades sostenibles a largo plazo.

Índice de referencia designado

El fondo no ha designado un índice de referencia para cumplir sus características medioambientales o sociales.

SFDR 8 artiklan perusteella verkkosivustolla annettavat tuotetiedot

Tuotteen nimi: Tailwinds Fund ("rahasto")

Morgan Stanley Investment Funds -rahasto

Oikeushenkilötunnus: Liikkeeseen laskettava

Yhteenveto

Ei kestäväää sijoitustavoitetta

Tämä rahoitustuote edistää ympäristöön tai yhteiskuntaan liittyviä ominaisuuksia, mutta kestäväen kehityksen mukainen sijoittaminen ei ole sen tavoite.

Rahoitustuotteen ympäristöön tai yhteiskuntaan liittyvät ominaisuudet

Rahasto edistää seuraavia ympäristöön ja yhteiskuntaan liittyviä ominaisuuksia:

- Rahasto edistää ympäristöön liittyvää ominaisuutta, joka on ympäristön ulkoisvaikutusten rajoittaminen, sulkemalla pois investoinnit lämpöhiileen; ja
- lisäksi rahasto välttää sijoittamasta aktiviteetteihin, joista voi aiheutua haittaa ihmisten terveydelle ja hyvinvoinnille, joihin kuuluvat tupakka ja tietyt aseet, siviilituliaseet, ryppäleaseet ja henkilömiinat.

Sijoitusstrategia

Rahaston tavoitteena on tavoitella pitkäaikaista pääoman arvonnousua Yhdysvaltain dollareissa mitattuna.

Rahasto sijoittaa oman pääoman ehtoihin arvopapereihin, mukaan lukien osaketalletustodistuksiin, yhdysvaltalaisyrityksissä, joiden pörssi-arvo on Russell 1000 -indeksiin kuuluvien yritysten mukainen.

Investointiprosessi lähtee alatasolta. Siinä pyritään tunnistamaan yhtiöt, jotka noudattelevat ja tukevat ympäristöön tai yhteiskuntaan liittyviä trendejä. Näiden yhtiöiden odotetaan hyötyvän kestäväen kehitykseen liittyvästä liiketoiminnasta parantuvan kasvutahdin, kannattavuuden tai kilpailuedun muodossa.

Ympäristöön ja yhteiskuntaan liittyvien ominaisuuksien toteutumiseksi rahasto sulkee pois yrityssektorin liikkeeseenlaskijat, joiden toimialaluokituksen tai ydinliiketoimintaan kuuluu tupakka, hiili tai tietyt kiistanalaiset aseet, kuten siviilituliaseet, ryppäleaseet ja henkilömiinat.

Katso lisätiedot verkkosivuilla annetusta täydellisestä tuoteselosteesta.

Osana rahaston kokonaisvaltaista lähestymistapaa kestävyystutkimuksen ja -tekijöiden tarkasteluun, rahastonhoitaja ("rahastonhoitaja") arvioi sijoituskohteina olevien yhtiöiden hallinnointi- ja ohjauskäytänteitä ja tarkastelee muun muassa niiden hallintorakenteita, työntekijäsuhteita, henkilöstön palkitsemista ja verosäännösten noudattamista.

Sijoitusten osuus

Ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien mukainen 90%

Kestävät sijoitukset	-
Luokitusjärjestelmän mukaiset	-
Muut ympäristöön liittyvät	-
Yhteiskuntaan liittyvät	-
Muut ympäristöön tai yhteiskuntaan liittyvät ominaisuudet	90%
Muut sijoitukset	10%

90 prosenttia sijoituksista kohdennetaan ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien mukaan. Nämä kaikki ovat sijoituksia, jotka tarjoavat suoran position kohdeyhtiöihin.

Nämä prosenttiosuudet mitataan sijoitusten arvon mukaan.

Ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien seuraaminen

Ympäristöön tai yhteiskuntaan liittyviä ominaisuuksia seurataan yhdistelemällä työkaluja ja seuloja, salkunseurantatyökaluja sekä manuaalista tarkastusta ja analyysia.

Rahastonhoitajan compliance-, riski- ja salkunvalvontatiimit suorittavat sijoitustiimin kanssa säännöllisiä salkku- ja tulostarkastuksia sekä järjestelmäkontrolleja varmistukseksi, että salkun sijoitustavoitteita sekä ympäristöön ja yhteiskuntaan liittyviä ominaisuuksia noudatetaan.

Menetelmät

Kestävyysindikaattori on niiden rahastoon sisältyvien yritysten osuus, jotka ovat poissulkevien seulojen vastaisia. Kestävyysindikaattori on siten se, että nolla (0) prosenttia rahaston sijoituksista rikkoo rahaston poissulkemiskriteerejä.

Tietolähteet ja tietojen käsittely

Rahastonhoitaja hyödyntää ulkopuolisilta toimittajilta saatuja ESG-tietoja. Nämä tiedot kerätään ja niitä säilytetään Morgan Stanley'n keskitetyssä ESG-tietovarastossa, jotta Morgan Stanley'n liiketoimintayksiköillä ja MSIM-sijoitustiimeillä on pääsy tietoihin tutkimusta, salkkuanalyyseja ja salkun rakentamista sekä asiakasraportointia ja sääntelyn edellyttämää raportointia varten.

Rahastonhoitaja ei itse arvioi mitään niistä tiedoista, joita käytetään arvioitaessa vastaavuutta ympäristöön/yhteiskuntaan liittyvien ominaisuuksien kanssa, koska rahastonhoitaja luottaa rahaston ympäristöön ja yhteiskuntaan liittyvien ominaisuuksien saavuttamisessa täysin kolmansien osapuolten hankkimiin tietoihin.

Menetelmiä ja tietoja koskevat rajoitukset

Alla esitetään joitakin keskeisiä aiheita ja yhteneväisyyksiä, jotka aiheuttavat rahaston menetelmien ja/tai tietojen puutteellisuutta ja/tai tietojen heikkoa laatua:

- menetelmiin liittyvät erot toimittajien välillä
- tietojen laahaaminen jäljessä, eli tietojen raportointiaikataulut eivät ehkä ole yhdenmukaisia SFDR-raportointiaikataulujen kanssa
- tietojen kattavuudessa olevat puutteet, jotka liittyvät omaisuusluokkiin, maantieteellisiin alueisiin ja markkina-arvoihin

Rahastonhoitaja ryhtyy kohtuullisiin toimiin sen varmistamiseksi, että rahasto pystyy saavuttamaan ympäristöön ja yhteiskuntaan liittyvät ominaisuudet näistä rajoituksista huolimatta.

Asianmukainen huolellisuus

Yleinen sijoitukseen liittyvä due diligence

Tavanomaisissa markkinaolosuhteissa rahaston sijoitustavoitteeseen pyritään sijoittamalla ensisijaisesti vakiintuneiden ja aloittelevien yritysten osakkeisiin. Sijoitusprosessissa korostetaan bottom-up-osakevalintaa, jossa etsitään houkuttelevia sijoituskohteita yksittäisistä yhtiöistä. Sijoituskohteita valitessaan rahastonhoitaja sijoittaa tyypillisesti yrityksiin, joilla se uskoo olevan kilpailuetuja, keskimääräistä parempi liiketoiminnan näkyvyys, kyky käyttää pääomaa korkeilla tuottoasteilla, vahva tase ja houkutteleva riski-/tuottoprofiili.

Ei sitova ESG due diligence

Sijoitustiimi soveltaa sijoittamiseen pitkäjänteistä lähestymistapaa, jossa keskitytään tunnistamaan eriytettyjä näkemyksiä monivuotisista mahdollisuuksista. Sijoituksia tehdään ainutlaatuisiin yrityksiin, joiden markkina-arvo voi nousta merkittävästi fundamentaalisista syistä. Tämän seurauksena tiimin salkut ovat tyypillisesti keskittyneitä ja eroavat vertailuindekseistään.

Sijoitusfilosofia perustuu ympäristötietoisuuteen ja yhteiskuntavastuuseen, ja sijoitustiimi uskoo, että innovatiiviset yritykset voivat käyttää kestävyyttä koskevia aloitteita ja ohjelmia erottautuakseen markkinoilla. Sijoitustiimin vastuullisuustutkijat vastaavat yhdessä Disruptive Change -tutkijoiden, Consilient-tutkijoiden ja Counterpoint Globalin eri yhtiöitä seuraavien sijoittajien kanssa kunkin sijoituskohteen vastuullisuustutkimuksesta. Sijoitustiimi pystyy näin hyödyntämään kunkin jäsenen asiantuntemusta ympäristöön ja yhteiskuntaan liittyvien trendien tarjoamien mahdollisuuksien ja riskien tunnistamisessa. Sijoittajien on kuitenkin huomattava, että toisin kuin muualla tässä tuoteselosteessa kuvatut ympäristöön tai yhteiskuntaan liittyvät ominaisuudet, rahastonhoitaja huomioi nämä mahdollisuudet ja riskit ei-sitovalta pohjalta.

Vaikuttamispolitiikat

Pitkäaikaisina sijoittajina ja aktiivisina omistajina Counterpoint Globalin tiimi uskoo, että sen velvollisuutena on huolehtia hallinnoimansa pääoman hyvästä hoidosta. Sijoitustiimi täyttää tämän velvollisuuden olemalla yhteydessä sijoituskohteena oleviin yrityksiin ja käyttämällä osakkeenomistajien äänioikeutta ja muita oikeuksia. Sijoitustiimi voi näiden toimien avulla ohjata kohdeyrityksiä kohti parempia hallintokäytäntöjä, joiden sijoitustiimi uskoo tuottavan pitkän aikavälin kestävää tuottoa.

Nimetty vertailuarvo

Rahastolla ei ole nimettyä vertailuarvoa sen ympäristöön tai yhteiskuntaan liittyvien ominaisuuksien toteutumiselle.

SFDR Article 8 - Informations sur le site Web

Nom du produit : Tailwinds Fund (le « Fonds »)

Un fonds de Morgan Stanley Investment Funds

Identifiant de l'entité juridique : À lancer

Résumé

Absence d'objectif d'investissement durable

Ce produit financier promeut des caractéristiques environnementales ou sociales, mais n'a pas pour objectif l'investissement durable.

Caractéristiques environnementales ou sociales du produit financier

Le Fonds promeut les caractéristiques environnementales et sociales suivantes :

- le Fonds promeut la caractéristique environnementale consistant à limiter les effets externes sur l'environnement en excluant les investissements dans le charbon thermique ; et
- le Fonds promeut la caractéristique sociale consistant à éviter les investissements dans certaines activités susceptibles de nuire à la santé et au bien-être humains, notamment le tabac et certaines armes, dont les armes à feu civiles, les armes à sous-munitions et les mines antipersonnel.

Stratégie d'investissement

L'objectif du Fonds est de rechercher une appréciation du capital à long terme, mesurée en dollars américains.

Le fonds investit dans des titres de participation, incluant les certificats de dépôt, d'entreprises américaines dont la capitalisation se situe dans la fourchette des entreprises composant l'indice Russell 1000.

Le processus d'investissement est « bottom-up ». Il cherche à identifier les entreprises alignées et en soutien avec les tendances environnementales ou sociales (vents porteurs). Il est attendu de ces entreprises qu'elles tirent parti d'activités commerciales liées à la durabilité, sous la forme de taux de croissance, de rentabilité ou d'avantages concurrentiels améliorés.

Le Fonds répond à ses caractéristiques environnementales et sociales en excluant les sociétés émettrices dont la classification industrielle ou l'activité principale concerne : le tabac ; le charbon ; ou certaines armes controversées, notamment les armes à feu civiles, les armes à sous-munitions et les mines antipersonnel. Consultez le site web complet pour obtenir des informations à cet égard.

Dans le cadre de l'approche holistique du Fonds visant à prendre en compte la recherche et les facteurs liés au développement durable, le Conseiller en investissements du Fonds (« le Conseiller en investissements ») évalue les pratiques de gouvernance des entreprises

bénéficiaires d'investissements, y compris, mais pas uniquement, en examinant les structures de gestion, les relations avec les employés, la rémunération du personnel et la conformité fiscale de ces entreprises.

Proportion des investissements

Alignés sur les caractéristiques environnementales et sociales (E/S)	90%
<i>Investissements durables</i>	-
<i>Alignés sur la taxonomie</i>	-
<i>Autres caractéristiques environnementales</i>	-
<i>Sociaux</i>	-
<i>Autres caractéristiques E/S</i>	90%
Autres investissements	10%

90 % des investissements sont alignés sur des caractéristiques environnementales ou sociales. Il s'agit entièrement d'investissements qui offrent une exposition directe aux entités bénéficiaires.

Ces pourcentages sont mesurés en fonction de la valeur des investissements.

Surveillance des caractéristiques environnementales ou sociales

Les caractéristiques environnementales et sociales sont contrôlées à l'aide d'une combinaison d'outils et de filtres, d'outils de surveillance du portefeuille et d'examen et analyses documentaires manuels.

Les équipes de conformité, de risque et de surveillance du portefeuille du Conseiller en investissements collaborent avec l'équipe d'investissement pour effectuer des examens réguliers du portefeuille/de la performance et des contrôles systémiques afin de garantir le respect des objectifs d'investissement du portefeuille et des caractéristiques environnementales et sociales.

Méthodes

L'indicateur de développement durable est le pourcentage de sociétés du Fonds qui ne remplissent pas les conditions de filtres exclusifs. L'indicateur de développement durable sera donc que 0 % des investissements du Fonds ne respectent pas la politique de filtrage des restrictions du Fonds.

Sources et traitement des données

Le Conseiller en investissements du Fonds utilise des données ESG provenant de divers fournisseurs externes. Ces données sont collectées et stockées dans le référentiel de données ESG centralisé de Morgan Stanley afin de permettre à toute division commerciale de Morgan Stanley, y compris les équipes d'investissement MSIM, d'accéder aux informations à des fins de recherche, d'analyse et de constitution de portefeuilles, ainsi que

pour les rapports destinés aux clients et aux autorités réglementaires.

Aucune des données utilisées pour évaluer l'alignement sur les caractéristiques environnementales ou sociales n'est estimée par le Conseiller en investissements, car ce dernier s'appuie entièrement sur des données provenant de fournisseurs de données tiers afin d'atteindre les caractéristiques environnementales et sociales du Fonds.

Limites des méthodologies et des données

Le tableau ci-dessous présente certains des principaux thèmes et points communs qui contribuent aux limites des méthodologies et/ou des données et/ou à la mauvaise qualité des données du Fonds :

- Différences de méthodologie entre les fournisseurs de données.
- Décalage des données, c'est-à-dire que les délais de communication des données peuvent ne pas correspondre aux délais de communication du SFDR.
- Lacunes dans la couverture des données pour des classes d'actifs, des zones géographiques et des capitalisations boursières.

Le Conseiller en investissements du Fonds prend des mesures raisonnables pour s'assurer que le fonds est en mesure de respecter ses caractéristiques environnementales ou sociales malgré ces limitations.

Diligence raisonnable

Vérification préalable générale des investissements

Dans des conditions normales de marché, l'objectif d'investissement du Fonds sera poursuivi en investissant principalement dans des titres de participation de sociétés établies et émergentes. Le processus d'investissement mettra l'accent sur une sélection ascendante des actions, en recherchant des investissements intéressants sur la base de chaque société. En sélectionnant les titres à investir, le Conseiller en investissements investit généralement dans des sociétés qui, selon lui, présentent des avantages concurrentiels avec une visibilité commerciale supérieure à la moyenne, la capacité de déployer des capitaux à des taux de rendement élevés, des bilans solides et un profil risque/revenu attrayant.

Vérifications préalables ESG non contraignantes

L'équipe d'investissement adopte une approche d'investissement orientée vers le long terme, qui se concentre sur l'identification de perspectives différenciées sur des opportunités pluriannuelles. Les investissements sont réalisés dans des entreprises uniques dont la valeur de marché peut augmenter de manière significative pour des raisons fondamentales sous-jacentes. Par conséquent, les portefeuilles de l'équipe sont généralement concentrés et se distinguent de leurs indices de référence.

La sensibilisation à l'environnement et la responsabilité sociale sous-tendent cette philosophie d'investissement, et l'équipe d'investissement est convaincue que les entreprises innovantes peuvent utiliser des initiatives et des programmes de développement durable pour se différencier sur le marché. Les chercheurs en développement durable de l'équipe d'investissement, ainsi que ceux en changement disruptif, ceux en résilience et les investisseurs de Counterpoint Global qui couvrent différentes entreprises, sont responsables de la recherche en développement durable pour les investissements respectifs. De cette façon, l'équipe d'investissement est en mesure de tirer parti de l'expertise de chaque membre pour identifier les opportunités et les risques présentés par les tendances environnementales et sociales. Les investisseurs doivent toutefois noter que, contrairement aux caractéristiques environnementales ou sociales décrites ailleurs dans le présent document, l'examen de ces opportunités et de ces risques par le Conseiller en investissements est effectué sur une base non contraignante uniquement.

Politiques d'engagement

En tant qu'investisseurs à long terme et propriétaires actifs, l'équipe de Counterpoint Global estime qu'elle a le devoir d'être un bon gestionnaire du capital qu'elle gère. L'équipe d'investissement remplit ce devoir en s'engageant auprès des entreprises dans lesquelles elle est investie et en exerçant ses droits de vote par procuration. Ces activités de gérance donnent à l'équipe d'investissement la possibilité de guider les entreprises dans lesquelles elle investit vers de meilleures pratiques de gouvernance, ce qui, selon elle, produira des rendements durables à long terme.

Indice de référence désigné

Le Fonds n'a pas désigné d'indice de référence aux fins de la réalisation de ses caractéristiques environnementales ou sociales.

Informativa del sito web per i prodotti ai sensi dell'Articolo 8 del Regolamento SFDR

Nome del prodotto: Tailwinds Fund (il "Comparto")

Un comparto di Morgan Stanley Investment Funds

Identificativo della persona giuridica: Da lanciare

Sintesi

Nessun obiettivo di investimento sostenibile

Questo prodotto finanziario promuove caratteristiche ambientali o sociali, ma non persegue l'obiettivo di un investimento sostenibile.

Caratteristiche ambientali o sociali del prodotto finanziario

Il Comparto promuove le seguenti caratteristiche ambientali o sociali:

- il Comparto promuove la caratteristica ambientale finalizzata a limitare le esternalità negative, escludendo gli investimenti nel carbone termico; e
- Il Comparto promuove la caratteristica sociale rappresentata dalla scelta di evitare di investire in attività suscettibili di arrecare danni alla salute e al benessere dell'uomo, tra cui i prodotti a base di tabacco e alcune armi, tra cui le armi da fuoco ad uso civile, le munizioni a grappolo e le mine antiuomo.

Strategia d'investimento

L'obiettivo d'investimento del Comparto è l'apprezzamento del capitale a lungo termine misurato in dollari statunitensi.

Il Comparto investe in titoli azionario, tra cui certificati di deposito, di società statunitensi con una capitalizzazione simile a quelle delle società incluse nell'indice Russell 1000.

Il processo di investimento è di tipo bottom up. Il processo di investimento mira a individuare società le cui strategie aziendali sono allineate alle tendenze ambientali o sociali (fattori favorevoli) e le supportano. Ci si aspetta che tali società possano beneficiare delle attività commerciali legate alla sostenibilità sotto forma di un maggiore tasso di crescita, di una migliore redditività o di vantaggi competitivi più consistenti.

Il Comparto soddisfa le caratteristiche ambientali e sociali applicando l'esclusione di emittenti societari la cui classificazione di settore o attività core riguarda: prodotti a base di tabacco o armi controverse tra cui armi da fuoco ad uso civile, munizioni a grappolo e mine antiuomo. Per maggiori informazioni, si rimanda al sito web.

Nell'ambito dell'approccio olistico del Comparto che tiene conto della ricerca e dei fattori di sostenibilità, il consulente d'investimento del Comparto (il "Consulente d'investimento") valuta le prassi di governance delle società partecipate, esaminando, a titolo esemplificativo ma non esaustivo, le strutture gestionali, i rapporti con i dipendenti, la retribuzione del personale e gli adempimenti fiscali di tali società.

Percentuali degli investimenti

Allineati a caratteristiche E/S	90%
<i>Investimenti sostenibili</i>	-
<i>Allineati alla tassonomia</i>	-
<i>Altri aspetti ambientali</i>	-
<i>Sociali</i>	-
<i>Altre caratteristiche E/S</i>	90%
Altri investimenti	10%

Il 90% degli investimenti è allineato a caratteristiche ambientali o sociali. Si tratta esclusivamente di investimenti che offrono un'esposizione diretta alle entità partecipate.

Queste percentuali sono misurate in base al valore degli investimenti.

Monitoraggio delle caratteristiche ambientali o sociali

Le caratteristiche ambientali e sociali vengono monitorate utilizzando una combinazione di screening/strumenti, strumenti di monitoraggio del portafoglio e analisi/revisioni della sala operativa.

I team responsabili della conformità, del rischio e del monitoraggio del portafoglio del Consulente d'investimento collaborano con il team d'investimento per condurre periodicamente esami del portafoglio/della performance e controlli sistemici per garantire l'aderenza agli obiettivi d'investimento del portafoglio e alle caratteristiche ambientali e sociali.

Metodologie

L'indicatore di sostenibilità applicabile corrisponde alla percentuale di società partecipate dal Comparto che violano i filtri di esclusione. L'indicatore di sostenibilità è quindi che lo 0% degli investimenti del Comparto violi la relativa Politica dello screening di esclusione.

Fonti e trattamento dei dati

Il Consulente d'investimento si avvale di dati ESG provenienti da diversi fornitori esterni. Questi dati vengono raccolti e conservati nell'archivio dei dati ESG centralizzato di Morgan Stanley per consentire a qualunque divisione di quest'ultima, ivi compresi i team

d'investimento MSIM, di accedere alle informazioni per effettuare ricerche e analisi e occuparsi della costruzione del portafoglio, nonché per fornire a clienti e autorità di regolamentazione le informative richieste.

Nessun dato utilizzato per valutare l'allineamento alle caratteristiche ambientali e sociali viene stimato dal Consulente per gli Investimenti, il quale si affida interamente a dati forniti da terzi per conseguire le caratteristiche ambientali e sociali del Comparto.

Limiti delle metodologie e dei dati

Di seguito vengono illustrati alcuni temi chiave e aspetti condivisi che contribuiscono alla limitatezza delle metodologie e/o dei dati e/o alla scarsa qualità dei dati del Comparto:

- differenze metodologiche tra fornitori di dati;
- sfasamento dei dati, cioè il possibile disallineamento delle tempistiche delle informative riguardanti i dati rispetto alle tempistiche delle informative previste dal regolamento SFDR;
- lacune nella copertura dei dati per classe di attivo, regione geografica e capitalizzazione di mercato.

Il Consulente d'investimento adotta misure ragionevoli per garantire che il Comparto risponda alle proprie caratteristiche ambientali e sociali nonostante tali limitazioni.

Dovuta diligenza

Due diligence generale in relazione agli investimenti

In condizioni di mercato normali, l'obiettivo di investimento del Comparto verrà perseguito investendo principalmente in titoli azionari di società sia consolidate che emergenti. Il processo d'investimento privilegerà un processo di selezione dei titoli bottom-up, ricercando investimenti interessanti a livello di singola azienda. Nel selezionare i titoli in cui investire, il Consulente d'investimento investe generalmente in società dotate, a suo avviso, di vantaggi competitivi sostenibili, un business con visibilità sopra la media, capacità di impiegare capitale in modo molto redditizio, bilanci robusti e un ottimo profilo rischio/rendimento.

Due diligence ESG non vincolante

Il team d'investimento adotta un approccio agli investimenti orientato al lungo periodo, che si concentra sull'individuazione di visioni differenziate su opportunità pluriennali. Gli investimenti vengono effettuati in società uniche nel loro genere, il cui valore di mercato cresce in maniera significativa e per ragioni

fondamentali. Di conseguenza, i portafogli del team sono solitamente concentrati e si discostano dai rispettivi benchmark.

La sensibilità ambientale e la responsabilità sociale sono alla base di questa filosofia d'investimento e il team d'investimento ritiene che le aziende innovative possano sfruttare le iniziative e i programmi di sostenibilità per differenziarsi sul mercato. La ricerca riguardante la sostenibilità dei rispettivi investimenti è responsabilità dei ricercatori del team d'investimento specializzati in sostenibilità, insieme ai ricercatori specializzati in cambiamenti dirompenti e a quelli specializzati in consulenza, con il contributo degli investitori di Counterpoint Global che si occupano di diverse società. In questo modo, il team d'investimento è in grado di sfruttare le competenze di tutti i suoi membri per individuare le opportunità e i rischi derivanti dai trend ambientali e sociali. Si ricorda tuttavia agli investitori che, a differenza delle caratteristiche ambientali o sociali descritte in altre parti della presente informativa, il Consulente d'investimento prende in considerazione tali opportunità e rischi solo su base non vincolante.

Politiche di impegno

In quanto investitore a lungo termine e azionista attivo, il team Counterpoint Global ritiene di avere il dovere di tutelare il capitale sotto la propria gestione. Il team d'investimento adempie a questo dovere interagendo con le società partecipate ed esercitando il diritto di voto per delega. Queste attività di tutela danno al team d'investimento l'opportunità di indirizzare le società partecipate verso migliori prassi di governance che, a giudizio del team, genereranno rendimenti sostenibili nel lungo periodo.

Indice di riferimento designato

Per realizzare le proprie caratteristiche ambientali o sociali, il Comparto non ha designato alcun indice di riferimento.

SFDR-artikkel 8 – kunngjøring på nettstedet

Produktnavn: Tailwinds Fund (“fondet”)

Et fond i Morgan Stanley Investment Funds LEI-kode: Skal lanseres

Sammendrag

Ingen mål om bærekraftig investering

Dette finansproduktet fremmer miljømessige eller sosiale egenskaper, men har ikke bærekraftig investering som mål.

Miljømessige eller sosiale egenskaper ved det finansielle produktet

Fondet fremmer følgende miljømessige og sosiale egenskaper:

- Fondet fremmer miljøegenskapene ved å begrense ytre miljøpåvirkninger ved å utelukke investeringer i termisk kull; og
- Fondet fremmer de sosiale egenskapene ved å unngå investeringer i visse aktiviteter som kan skade menneskers helse og velvære, inkludert tobakk og visse våpen, deriblant sivile skytevåpen, klaseammunisjon og antipersonellminer.

Investeringsstrategi

Fondets mål er å søke langsiktig kapitalvekst, målt i USD.

Fondet investerer i egenkapitalinstrumenter, inkludert depotbevis, i amerikanske selskaper innenfor utvalget av selskaper som inngår i Russell 1000 Index.

Investeringsprosessen er nedenfra-og-opp. Den streber etter å identifisere selskaper som er i linje med og støtter miljømessige og sosiale trender (medvind). Disse selskapene forventes å dra fordel av bærekraftsrelaterte forretningsaktiviteter i form av forbedrede vekstrater, lønnsomhet eller konkurransedyktige fordeler.

Fondet oppfyller sine miljømessige og sosiale egenskaper gjennom å utelukke selskapsutstedere der bransjeklassifisering eller kjernevirksomhet omfatter: tobakk, kull eller visse kontroversielle våpen, deriblant sivile skytevåpen, klaseammunisjon og antipersonellminer. Se fullstendig beskrivelse på nettstedet.

Som en del av fondets helhetlige tilnærming til å vurdere bærekraftsanalyse og -faktorer, vurderer fondets investeringsrådgiver (“**investeringsrådgiveren**”) selskapsstyringspraksis for selskapene det investeres i, deriblant ved å se på

ledelsesstrukturer, ansattes forhold, godtgjørelse til ansatte og skatteetterlevelse hos selskapene.

Andel av investeringer

Tilpasset miljømessige/sosiale egenskaper	90%
Bærekraftige investeringer	-
Tilpasset til taksonomi	-
Andre miljøforhold	-
Sosiale forhold	-
Andre miljømessige/sosiale egenskaper	90%
Andre investeringer	10%

90 % av investeringene er tilpasset miljømessige eller sosiale egenskaper. Dette består utelukkende av investeringer som gir direkte eksponering mot foretak som det investeres i.

Disse prosentandelene måles i henhold til verdien av investeringene.

Overvåking av miljømessige eller sosiale egenskaper

De miljømessige og sosiale egenskapene overvåkes ved hjelp av en kombinasjon av verktøy/utslingsmekanismer, porteføljeovervåkingsverktøy og manuelle gjennomganger av dokumentasjon og analyser.

Investeringsrådgiverens etterlevelsens-, risiko- og porteføljeovervåkingsteam samarbeider med investeringsteamet for å gjennomføre regelmessige portefølje-/verdiutviklingsgjennomganger og systemkontroller for å sikre etterlevelse mht. porteføljens investeringsmål og miljømessige og sosiale egenskaper.

Metodikk

Bærekraftsindikatoren er prosentandelen av selskaper i fondet som bryter med utelukkelsesmekanismene. Bærekraftsindikatoren vil derfor være at 0 % av fondets investeringer er i strid med fondets retningslinjer for restriksjonsutsiling.

Datakilder og -behandling

Investeringsrådgiveren benytter ESG-data fra ulike eksterne leverandører. Disse dataene samles inn og lagres i Morgan Stanleys sentraliserte ESG-datalager, slik at relevant personell hos Morgan Stanley, deriblant MSIM-investeringssteamet, har tilgang til informasjonen for analyse, porteføljegjennomgang og -oppbygning samt klient- og regelverksrapportering.

Ingen av dataene som brukes til å vurdere samsvar med de miljømessige/sosiale egenskapene er estimert

av investeringsrådgiveren, fordi investeringsrådgiveren er helt avhengig av data fra tredjeparts dataleverandører for å oppnå fondets miljømessige og sosiale egenskaper.

Begrensninger i metoder og data

Nedenfor skisseres noen av hovedtemaene og fellestrekkene som bidrar til begrensninger i metoder og/eller data og/eller dårlig datakvalitet for fondet:

- metodikkforskjeller mellom dataleverandører
- dataforsinkelser, dvs. at rapporteringstidslinjer for data ikke stemmer overens med SFDR-rapporteringstidslinjer
- datadekningshull som omfatter flere aktivaklasser, geografier og markedsverdier

Investeringsrådgiveren treffer rimelige tiltak for å sikre at fondet er i stand til å oppfylle sine miljømessige og sosiale egenskaper til tross for disse begrensningene.

Due diligence

Generell due diligence ved investering

Under normale markedsforhold vil fondets investeringsmål bli etterlevd ved å investere primært i aksjer i etablerte og fremvoksende selskaper. Investeringsprosessen vil legge vekt på en aksjespesifikk aksjeutvelgelsesprosess, som søker attraktive investeringer i individuelle selskaper. Ved utvelgelse av verdipapirer til investering investerer investeringsrådgiveren gjerne i selskaper den anser har konkurransefortrinn med overgjennomsnittlig synlighet for virksomheten, evne til å bruke kapital til å oppnå høy avkastning, sterke balanseregnskap og en attraktiv risiko-/avkastningsprofil.

Ikke-bindende due diligence basert på ESG

Investeringsteamet har en langsiktig orientert tilnærming til investeringer, som fokuserer på å identifisere differensiert innsikt om flerårige muligheter. Investeringer gjøres i unike selskaper hvis markedsverdi kan øke betydelig av underliggende fundamentale årsaker. Som et resultat er lagets porteføljer typisk konsentrert og differensiert fra sine referanseindekser.

Miljøbevissthet og sosialt ansvar underbygger denne investeringsfilosofien, og investeringsteamet anser at innovative selskaper kan benytte bærekraftinitiativer og -programmer for å differensiere sine franchiser i markedet. Investeringsteamets bærekraftanalytikere, sammen med analytikere av disruptive endringer, kontinuitetsanalytikere og Globale Counterpoint-investorer som dekker ulike selskaper, er ansvarlige for

bærekraftsanalysen for de respektive investeringene. På denne måten er investeringsteamet i stand til å utnytte hvert medlems ekspertise for å identifisere muligheter og risikoer presentert av miljømessige og sosiale trender. Investorer bør imidlertid merke seg at i motsetning til de miljømessige eller sosiale egenskapene beskrevet andre steder i denne opplysningen, foretas investeringsrådgiverens vurdering av disse mulighetene og risikoene kun på et ikke-bindende grunnlag.

Retningslinjer for engasjement

Som langsiktige investorer, og aktive eiere, anser Counterpoint Global-teamet at de har en plikt til å være gode forvaltere av kapitalen de forvalter. Investeringsteamet oppfylder denne plikten ved å engasjere seg overfor selskapene de investerer i og ved å utøve sine stemmerett vai fullmektig. Disse forvaltningsaktivitetene gir investeringsteamet muligheten til å veilede selskaper de investerer i mot bedre selskapsstyringspraksis, som investeringsteamet mener vil gi langsiktig, bærekraftig avkastning.

Utpekt referanseindeks

Fondet har ikke utpekt en referanseindeks for å oppnå sine miljømessige eller sosiale egenskaper.

SFDR Artikel 8 Webbplatsupplysning

Produktnamn: Tailwinds Fund ("Fonden")

En fond som tillhör Morgan Stanley Investment Funds Identifieringskod för juridisk person: Ska lanseras

Sammanfattning

Inga mål för hållbar investering

Denna finansiella produkt främjar miljörelaterade eller sociala egenskaper, men har inte hållbar investering som mål.

Den finansiella produktens miljörelaterade eller sociala egenskaper

Fonden främjar följande miljörelaterade och sociala egenskaper:

- Fonden främjar den miljörelaterade egenskapen att begränsa externa miljöeffekter genom att utesluta investeringar i termiskt kol och
- Fonden främjar den sociala egenskapen att undvika investeringar i vissa verksamheter som kan skada människors hälsa och välbefinnande, inklusive tobak och vissa vapen, däribland civila skjutvapen, klustervapen och antipersonella minor.

Investeringsstrategi

Fondens mål är att söka långsiktig värdestegring, mätt i US-dollar.

Fonden investerar i aktierelaterade värdepapper, inklusive depåbevis, i amerikanska företag med börsvärden inom intervallet för de företag som ingår i Russell 1000 Index.

Investeringsprocessen är på företagsnivå. I processen strävar man efter att identifiera företag som är i linje med och stödjer miljörelaterade och sociala trender (tailwinds). Dessa företag förväntas dra nytta av hållbarhetsrelaterade affärsaktiviteter i form av ökad tillväxt, lönsamhet eller konkurrensfördelar.

Fonden uppfyller sina miljörelaterade och sociala egenskaper genom att utesluta emittenter vars branschklassificering eller huvudsakliga affärsverksamhet omfattar: tobak, kol eller vissa kontroversiella vapen, däribland civila skjutvapen, klustervapen och antipersonella minor. Mer information finns i den fullständiga webbplatsinformationen.

Som en del av Fondens holistiska tillvägagångssätt med att ta hänsyn till hållbarhetsforskning och hållbarhetsfaktorer bedömer Fondens investeringsrådgivare ("Investeringsrådgivaren")

styrningsmetoderna i investeringsbolagen, inklusive, men inte begränsat till, förvaltningsstrukturer, medarbetarrelationer, ersättningar till personalen och skatteafterlevnad i sådana bolag.

Investeringarnas proportioner

I linje med miljömässiga och sociala egenskaper	90%
Hållbara investeringar	-
I linje med taxonomin	-
Övrigt miljörelaterat	-
Sociala frågor	-
Andra miljörelaterade och sociala egenskaper	90%
Övriga investeringar	10%

90 % av investeringarna är i linje med miljömässiga och sociala egenskaper. Detta består helt och hållet av investeringar som erbjuder direkt exponering mot investeringsobjekt.

Dessa procentsatser mäts efter investeringarnas värde.

Övervakning av miljömässiga eller sociala egenskaper

De miljörelaterade och sociala egenskaperna övervakas med en kombination av verktyg/granskningar, verktyg för portföljövervakning och manuella skrivbordsgranskningar och analyser.

Investeringsrådgivarens efterlevnads-, risk- och portföljövervakningsteam samarbetar med investeringsteamet för att genomföra regelbundna portfölj-/resultatgranskningar och systemkontroller för att säkerställa efterlevnad av portföljens investeringsmål och miljömässiga och sociala egenskaper.

Metoder

Hållbarhetsindikatorn är den procentuella andelen företag i Fonden som överträder Fondens uteslutningsscreening. Hållbarhetsindikatorn är därför att 0 % av Fondens investeringar bryter mot Fondens granskningpolicy för begränsningar.

Datakällor och databehandling

Investeringsrådgivaren utnyttjar ESG-data från olika externa leverantörer. Dessa data samlas in och lagras i Morgan Stanleys centraliserade ESG-dataarkiv för att göra det möjligt för alla Morgan Stanleys affärsenheter, inklusive MSIM-investeringssteamet, att få tillgång till informationen för forskning, portföljanalys och

portföljkonstruktion samt kundrelaterad och lagstadgad rapportering.

Ingen av de data som används för att bedöma överensstämmelsen med de miljörelaterade/sociala egenskaperna uppskattas av investeringsrådgivaren, eftersom investeringsrådgivaren helt och hållet förlitar sig på data från tredjepartsleverantörer för att uppnå Fondens miljörelaterade och sociala egenskaper.

Begränsningar i metoder och data

Nedan beskrivs några av de viktigaste teman och gemensamma drag som bidrar till begränsningar i Fondens metoder och/eller data och/eller dåliga datakvalitet:

- metodskillnader mellan dataleverantörer
- data släpar efter, dvs. rapporteringstidsplanerna för data kanske inte överensstämmer med SFDR:s rapporteringstidsplaner
- luckor i datatäckningen mellan tillgångsklasser, geografiska områden och marknadsvärden

Investeringsrådgivaren vidtar rimliga åtgärder för att säkerställa att Fonden kan uppfylla sina miljörelaterade och sociala egenskaper trots dessa begränsningar.

Due diligence

Allmän due diligence inför investering

Under normala marknadsförhållanden kommer Fondens investeringsmål att eftersträvas genom att främst investera i aktier i etablerade företag och företag på tillväxtmarknader. Investeringsprocessen betonar en bottom-up-process för aktieurval och söker efter attraktiva investeringar på basis av enskilda företag. När investeringsrådgivaren väljer ut värdepapper för investeringar investerar hen vanligtvis i företag som hen anser har konkurrensfördelar med en synlighet som är större än genomsnittet, förmåga att använda kapital med hög avkastning, starka balansräkningar och en attraktiv risk/avkastningsprofil.

Icke-bindande ESG-due diligence

Investeringsteamet tillämpar en långsiktigt orienterad investeringsstrategi som fokuserar på att identifiera differentierade insikter om fleråriga möjligheter. Investeringar görs i unika företag vars marknadsvärde kan öka avsevärt av underliggande fundamentala skäl. Som ett resultat av detta är teamets portföljer vanligtvis koncentrerade och differentierade från sina referensvärden.

Miljömedvetenhet och socialt ansvarstagande ligger till grund för denna investeringsfilosofi, och investeringsteamet anser att innovativa företag kan

använda hållbarhetsinitiativ och -program för att särskilja sig på marknaden. Investeringsteamets hållbarhetsforskare, tillsammans med forskare som arbetar med störande förändringar, samarbetsvilliga forskare och investerare inom Counterpoint Global som täcker olika företag, ansvarar för hållbarhetsforskningen för respektive investeringar. På så sätt kan investeringsteamet utnyttja varje medlems expertis för att identifiera möjligheter och risker med miljörelaterade och sociala trender. Investerare bör dock notera att i motsats till de miljörelaterade och sociala egenskaper som beskrivs på annan plats i detta meddelande, är investeringsrådgivarens överväganden av dessa möjligheter och risker helt icke-bindande.

Strategier för engagemang

Som långsiktiga investerare och aktiva ägare anser Counterpoint Global-teamet att de har en skyldighet att vara goda administratörer av det kapital de förvaltar. Investeringsteamet fullgör denna skyldighet genom att samarbeta med de företag som de investerar i och genom att utöva fullmaktsröstning. Dessa aktiviteter ger investeringsteamet möjlighet att vägleda de företag som de investerar i till bättre bolagsstyrningspraxis, vilket investeringsteamet anser ger långsiktig och hållbar avkastning.

Valt jämförelseindex

Fonden har inte valt något referensvärde i syfte att uppnå sina miljörelaterade eller sociala egenskaper.

Applications for shares in the Fund should not be made without first consulting the current Prospectus and the Key Investor Information Document (“KIID”), which are available in English and in the official language of your local jurisdiction at morganstanleyinvestmentfunds.com or free of charge from the Registered Office of Morgan Stanley Investment Funds, European Bank and Business Centre, 6B route de Trèves, L-2633 Senningerberg, R.C.S. Luxemburg B 29 192. A summary of investor rights is available in English at the same website. Information in relation to sustainability aspects of the Fund and the summary of investor rights is available at the aforementioned website.

If the management company of the relevant Fund decides to terminate its arrangement for marketing that Fund in any EEA country where it is registered for sale, it will do so in accordance with the relevant UCITS rules.

DEFINITIONS

“ESG” investment: Environmental Social and Governance based investment is an investment approach which takes explicit account of the environmental, social and corporate governance aspects of all proposed investments.

ESG RISKS

ESG strategies that incorporate impact investing and/or environmental, social and governance (ESG) factors could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. As a result, there is no assurance ESG strategies could result in more favorable investment performance.
